# 2023 UNIVERSAL REGISTRATION DOCUMENT

including the Annual Financial Report

**This document is available free of charge at the ID Logistics Group head office at 55 Chemin des Engranauds, 13660 Orgon, France, and in electronic format on the AMF website ([www.amf-france.org](http://www.amf-france.org)) and on the Company website ([www.id-logistics.com](http://www.id-logistics.com)).**

The Universal Registration Document was filed on April 22, 2024 with the AMF, in its capacity as competent authority under Regulation (EU) 2017/1129, without prior approval in accordance with Article 9 of said Regulation.

The Universal Registration Document may be used for the purposes of an offer of financial securities to the public or the admission of financial securities to trading on a regulated market if it is supplemented by a securities note and, where applicable, a summary and any amendments made to the Universal Registration Document. The set of documents thus constituted is approved by the AMF in accordance with Regulation (EU) 2017/1129.

# GENERAL REMARKS

This Universal Registration Document including the Annual Financial Report is a reproduction in PDF format of the official version, which was prepared in ESEF format and can be accessed at <https://www.id-logistics.com>. This reproduction is available on the same website.

## Incorporation by reference

The Company's website is [www.id-logistics.com](http://www.id-logistics.com). The information on the website referred to by means of hyperlinks ([www.id-logistics.com](http://www.id-logistics.com)) in this Universal Registration Document does not form part of this Universal Registration Document, except for the information incorporated by reference as specified below. As such, this information has not been reviewed or approved by the AMF.

Pursuant to Article 19 of Regulation (EU) 2017/1129 of the European Parliament and of the Council of June 14, 2017, the following items are incorporated by reference in this Universal Registration Document:

- The consolidated financial statements for the year ended December 31, 2022 and the related statutory auditors' report, which may be found respectively on pages 133-176 and 179-189 of Universal Registration Document no. D23-0355 filed with the Autorité des Marchés Financiers on April 27, 2023. [https://www.id-logistics.com/fr/wp-content/uploads/sites/33/2023/04/ID\\_Logistics\\_DEU\\_2022\\_FR\\_202304271442-23-355-FR.pdf](https://www.id-logistics.com/fr/wp-content/uploads/sites/33/2023/04/ID_Logistics_DEU_2022_FR_202304271442-23-355-FR.pdf).
- The consolidated financial statements for the year ended December 31, 2021 and the related statutory auditors' report, which may be found respectively on pages 135-171 and 174-183 of Universal Registration Document no. D22-0336 filed with the Autorité des Marchés Financiers on April 22, 2022. [https://www.id-logistics.com/media/2022/04/ID\\_Logistics\\_DEU\\_2021\\_FR\\_202204212231-D22-0336-EN.pdf](https://www.id-logistics.com/media/2022/04/ID_Logistics_DEU_2021_FR_202204212231-D22-0336-EN.pdf)

## Contents of this document

- Universal Registration Document
- Annual Financial Report
- Management Report
- Board of Directors' corporate governance report
- Other AMF regulatory disclosures: description of the share buyback program

## Definitions

In this Universal Registration Document, except where indicated otherwise:

- "IDL Group" or "Company" means ID Logistics Group SA.
- "Group", "ID Logistics group" and "ID Logistics" mean the group of companies comprised by ID Logistics Group and its subsidiaries;

- "Universal Registration Document" means this Universal Registration Document filed with the French financial markets authority (AMF);
- "Universal Registration Document Date" means the date on which the Universal Registration Document was filed.

## Market information

The Universal Registration Document includes information about markets in which the Company and its competitors operate, their respective market shares and the Company's competitive position, in particular in section 1.4 "The contract logistics market" and section 1.5 "ID Logistics market positioning". This information is drawn primarily from external surveys. However, publicly available information deemed reliable by the Company has not been verified by an independent expert, and the Company cannot guarantee that a third party using different methods to gather, analyze or calculate market data would obtain the same results.

## Risk factors

Investors are invited to give careful consideration to the risk factors described in chapter 2 of the Universal Registration Document, "Risk factors", before making their decision to invest. The occurrence of all or part of these risks could have an adverse effect on the Company's business, position, financial results or objectives. In addition, other risks not yet identified or considered by the Company to be immaterial as of the Universal Registration Document Date could have the same adverse effect, as a result of which investors could lose all or part of their investment.

## Forward-looking information

The Universal Registration Document contains forward-looking statements and information on the Group's objectives, in particular in sections 1.5 "ID Logistics market positioning", 1.6 "ID Logistics growth strategy" and 4.14 "Business trends", which are sometimes characterized by the use of future and conditional verb forms and forward-looking expressions such as "estimate", "consider", "have as an objective", "expect to", "intend", "should", "wish" and "could", in their affirmative or negative forms, or other similar terms. Such information is based on data, assumptions and estimates deemed reasonable by the Company. The forward-looking statements and objectives referred to in the Universal Registration Document may be affected by known or unknown risks, by uncertainty relating in particular to the regulatory, economic, financial and competitive environments and by other factors that could lead to the Company's future results, performance and achievements being significantly different from the objectives expressed or implied. Such factors may in particular include the factors described in chapter 2 of the Universal Registration Document, "Risk factors".

## 1.1 ID LOGISTICS: A BOOMING CONTRACT LOGISTICS PURE PLAYER

ID Logistics is an international group operating in the contractual logistics industry. Since its creation in 2001, the Group has achieved sustained and uninterrupted growth, reaching revenues of €2.75 billion in 2023.

ID Logistics has developed an asset light model mainly focused on highly technical customer-specific warehouse

logistics. The Group currently operates almost 400 sites in 18 countries, representing 38,000 employees and over 8 million sqm in Europe, America, Asia and Africa.

ID Logistics serves a well-balanced portfolio of sectors including retail, e-commerce and consumer goods for leading international customers in their field.

## 1.2 MILESTONES IN THE COMPANY'S DEVELOPMENT

The key dates in the history of the Company are as follows:

<b>2001</b>	Incorporation of Vision Investissement, which was subsequently renamed ID Logistics Group Acquisition of the logistics business of La Flèche Cavaillonnaise First round of funding: Fonds Partenaire Gestion (Banque Lazard) 44%, La Flèche Cavaillonnaise 27%, founders 29% Launch of the subsidiary and commencement of operations in Taiwan By the end of the year the Group was already operating nearly 100,000 sqm of warehouse space
<b>2002</b>	Launch of the subsidiary and start of operations in Brazil
<b>2003</b>	Start of operations in China Development and deployment of zero paper order "voice-picking" technology in France
<b>2004</b>	Warehouse space operated by the Group passes the 500,000 sqm mark, with revenues of €100 million Launch of site equipped with high-frequency sorting at Évry, France Launch of two subsidiaries and start of operations on Réunion Island
<b>2005</b>	Shareholder restructuring after Banque Lazard's withdrawal: 50.5% of Group equity now held by the management
<b>2006</b>	Launch of the subsidiary and start of operations in Spain The Group operates 1 million sqm of warehouse space worldwide and becomes one of the top ten logistics operators in France in terms of revenue (source: Journal de la Logistique, September 2007)
<b>2007</b>	La Flèche Cavaillonnaise becomes a subsidiary of the ID Logistics group, now independent and wholly owned by its management Launch of the subsidiary and start of operations in Indonesia
<b>2008</b>	Launch of the subsidiary and start of operations in Poland
<b>2009</b>	Launch of the subsidiary and start of operations in Argentina Start of "Logistics on demand" operations in Morocco (providing "Software as a Service" solutions with leased warehouse management software)
<b>2010</b>	Launch of the subsidiary and start of operations in Russia Launch of the first ever Pick-n-Go smart fork-lift truck in France: a traditional order-picking truck connected to a radio frequency voice recognition system, a warehouse management system and a laser guiding system

<b>2011</b>	Warehouse space operated by the Group worldwide has doubled in 5 years and is now nearly 2 million sqm Acquisition of Mory group's logistics division
<b>2012</b>	Flotation of the Company's shares on the Euronext Paris Stock Exchange by a new stock issue representing a 25% float Launch of the subsidiary and start of operations in South Africa
<b>2013</b>	Acquisition of the entire capital of CEPL, leading French retail order-picking operator. This acquisition boosts the Group's market share in France and Spain and gives it a foothold in Germany and the Netherlands The surface area operated by the Group worldwide now exceeds 3 million sqm
<b>2014</b>	Customer partnerships strengthened via two new joint ventures with Danone (transport organization in Europe and fresh produce logistics in South Africa) Development of a dedicated offer and first commercial success in retail order picking and e-commerce
<b>2015</b>	E-commerce accounts for 11% of Group revenues
<b>2016</b>	Acquisition of Logiters group in Spain and Portugal: ID Logistics passed the symbolic billion euro revenue mark and France now accounts for less than 50% of Group business
<b>2017</b>	ID Logistics becomes the leading e-commerce contract logistics operator in France (source: E-commerce mag, Kantar, Company) Launch of operations in its 17 <sup>th</sup> country (Romania), strengthening ID Logistics' foothold in Eastern Europe
<b>2018</b>	Launch of operations in its 18 <sup>th</sup> country (Chile), strengthening ID Logistics' foothold in South America
<b>2019</b>	Closure of South Africa operations Acquisition of Jagged Peak giving ID Logistics a foothold in the US market
<b>2020</b>	Cessation of operations in China Resilience of the ID Logistics business model demonstrated throughout the COVID-19 health crisis with 5% organic revenue growth E-commerce accounts for 25% of Group revenues
<b>2021</b>	Acquisition of GVT (Benelux)
<b>2022</b>	Acquisition of Colisweb (France) and Kane Logistics (USA) Launch of operations in Italy, cessation of operations in Russia
<b>2023</b>	Acquisition of Spedimex (Poland) Launch of operations in the UK

## 1.3 SELECTED ANNUAL FINANCIAL INFORMATION

The financial information given below is based on the consolidated financial statements for the years ended December 31, 2023, 2022 and 2021, prepared pursuant to current IFRS. The 2023 financial statements are set out in section 4.8 of the Universal Registration Document, "Annual historic financial information".

These key accounting and operational results should be read in conjunction with the information contained in sections 4.2 "Comparison of years ended December 31, 2023 and December 31, 2022", 4.3 "Cash and capital" and 4.4 "Cash flow".

Figures stated in euro millions in the tables shown in this chapter have been rounded in line with those shown under chapter 4, "Financial statements".

The Group posted 2023 revenues of €2,747 million, underlying operating income (EBIT) before acquired customer relations amortization of €125.8 million and consolidated net income of €53.9 million.

Backed by some 38,000 employees, the Group had close to 400 sites comprising 8 million square meters of warehouses at December 31, 2023.

### Summary income statement for the year ended December 31

€m	2023	2022	2021
Revenues	2,747.4	2,481.3	1,910.9
Underlying EBITDA*	434.7	372.8	270.6
<i>Underlying EBITDA margin (% revenues)</i>	15.8%	15.0%	14.2%
EBIT**	125.8	108.2	75.6
<i>EBIT margin (% revenues)</i>	4.6%	4.4%	4.0%
Total consolidated net income	53.9	41.7	35.7
<i>Net margin (% revenues)</i>	2.0%	1.7%	1.9%

\* Underlying EBITDA corresponds to underlying operating income (EBIT) before net depreciation, amortization and impairment of PP&E and intangible assets.

\*\* Before amortization of acquired customer relations

### Summary statement of cash flows for the year ended December 31

€m	2023	2022	2021
Net change in cash and cash equivalents			
- from operating activities	429.8	343.3	271.3
- from investing activities	(99.3)	(309.8)	(150.1)
- from financing activities	(273.4)	(5.3)	(108.2)
Other changes	1.0	(1.4)	0.0
Change in net cash and cash equivalents	58.2	26.8	13.0

### Summary balance sheet as of December 31

€m	2023	2022**	2021
Non-current assets	1,676.0	1,481.4	1,057.4
Working capital	(124.7)	(114.3)	(79.8)
Net debt*	1,137.7	1,042.0	710.3
Total consolidated shareholders' equity	413.6	324.7	267.3

\* Net debt corresponds to net borrowings plus firm lease commitments. Net borrowings corresponds to gross borrowings plus bank overdrafts less cash and cash equivalents.

\*\* Excluding net liabilities totaling €0.4 million for discontinued operations in Russia.

## 1.4 THE CONTRACT LOGISTICS MARKET

### 1.4.1 Definition of contract logistics

Logistics comprises all operations that enable the right product to be delivered at the right time, in the right place and at the lowest cost. Specifically, logistics refers to the business of managing flows between an enterprise, its suppliers and its customers. It consists in optimizing the physical flow of goods as well as internal and external information and financial flows.”

Logistics operations are a central feature of the supply chain, involving upstream freight forwarding (sea or air) and inland transport (road or rail) activities and downstream delivery operations, including last-mile delivery.

Contract logistics covers the portion of logistics operations that is outsourced and formalized between the customer and its service provider in an agreement setting out the resources implemented and objectives to be achieved.

### 1.4.2 The contract logistics market

The contract logistics market encompasses a wide range of activities including warehouse inventory management, related services such as packaging and end-of-production operations and the management of all associated flows, in particular transportation. In view of the varying degree of integration between transportation activities and contract logistics activities in different countries and the limited number of specific world market contract logistics studies, it is difficult to estimate the size of the market.

The market share of the top 10 global players in 2022 was estimated as follows (source: Transport Intelligence, Company estimate):

Company or business unit	Market share
DHL (Supply Chain)	6.0%
GXO	3.1%
Ryder	2.1%
UPS	2.0%
Nippon Express	1.8%
Kuehne+Nagel	1.8%
Ceva	1.8%
Geodis	1.3%
Hitachi	1.3%
Rhenus	1.3%

#### The global contract logistics market

Given the Group’s international footprint and experience, and on the basis of its competitors’ publications, ID Logistics estimates that the global market was worth some €284 billion in 2023, up 3.3% over 2022 (sources: Transport Intelligence, Company estimate). Barring exceptional fluctuation due to the health crisis in 2020 and 2021, the global market is growing in line with inflation and GDP growth in the various local markets; growth is further boosted by a customer trend towards increased outsourcing.

The market is highly fragmented and the top five global players collectively account for just 15.0% of the total market share. DHL’s Supply Chain division has a global presence as the market leader in Europe and North America and a ranking of 4<sup>th</sup> in Asia-Pacific. GXO operates primarily in North America (3<sup>rd</sup>) and Europe (2<sup>nd</sup>). Ryder mainly operates in North America. Kuehne+Nagel and CEVA Logistics have increased their presence outside their home continent of Europe, whereas Nippon Express and Hitachi generate almost all of their revenues in Asia-Pacific, including 80% in Japan.

The world contract logistics market by region was estimated to break down as follows in 2022 (source: Transport Intelligence, Company estimate):

Region	Market share
Asia-Pacific	40%
Europe	30%
North America	24%
Other	6%

ID Logistics ranks 37<sup>th</sup> globally with an estimated market share of 1.1% in 2023.

### The European contract logistics market

The European market is the second largest contract logistics market in the world and the main market in which ID Logistics operates.

The European contract logistics market by region is estimated to break down as follows (source: Transport Intelligence, Company estimate):

Country	Market share
Germany	23.4%
United Kingdom	21.7%
France	12.6%
Netherlands	8.2%
Italy	6.7%

The market share of the top five European players (including the United Kingdom) in 2022 was estimated as follows (source: Transport Intelligence, Company estimate):

Company or business unit	Market share
DHL (Supply Chain)	8.4%
GXO	6.1%
Rhenus	3.4%
Kuehne+Nagel	2.8%
Geodis	2.8%

### The US contract logistics market

The US market is the third largest contract logistics market in the world, with ID Logistics entering this market at the end of 2019.

The market share of the top five US players in 2022 was estimated as follows (source: Transport Intelligence, Company estimate):

Company or business unit	Market share
DHL Supply Chain	8.7%
Ryder	8.0%
JB Hunt	4.5%
Penske	4.0%
UPS	3.9%

### Market development factors

#### ► Sensitivity to economic conditions and consumer trends

While sensitive to the economic situation, household consumption (particularly for consumer goods) is relatively stable in volume given constant demographic trends. Indeed, during an economic recession, consumers focus primarily on price, with the result that they may reduce their outgoings in value terms but not necessarily in volume. Therefore contract logistics companies, whose income depends mainly on volumes handled (pallets, order picking, etc.) are less affected by economic slowdowns. Nevertheless, the major difficulty for contract logistics players during an economic crisis lies in the erratic fluctuation in volumes handled and the uncertainty that surrounds them. Household consumption also depends on changes in purchasing power and on demographic trends.

Developments in consumer habits (in particular the rise of hard discount stores, specialized retailers, e-commerce, etc.) may result in the emergence of new market players and may lead major customers to modify their logistics arrangements. Adaptation to consumer behavior is a key factor for large retailers and consequently for their logistics operators as well.

#### ► Optimization of customers' supply chains is a key strategic factor

In order to respond to customers' new expectations, logistics groups are positioning themselves as global providers able to manage all types of goods flow over an ever expanding geographical area. Good supply chain management for consumer goods customers has become an important selling point and source of added value through product availability, limiting inventory shortages, minimizing inventories and costs, etc.

In addition, major customers tend to prefer a limited number of suppliers capable of sustaining structuring projects that require genuine expertise and a capacity for investment to implement and manage increasingly large-scale innovative and technological projects. This growing importance of leading players in the industry is counterbalanced by a decline in the policy of purchasing services from a wide range of transportation and warehousing suppliers.

► **A strategy of increased outsourcing**

Besides economic factors, the environment in which logistics providers operate is characterized by a structural upward trend in the outsourcing of logistics functions by shippers. The use of subcontractors in this way is justified by the following needs:

- Need for cost savings: in-house logistics departments are frequently a source of high costs for companies.
- Need for flexibility: in order to focus on their core business without having to concern themselves with logistics issues, customers expect their logistics operators to demonstrate a real ability to share costs while also being flexible.
- Need for expertise: the high-level technical know-how required to manage flows of increasing complexity is guaranteed by the logistics operator's experience and capacity for innovation.
- Need to support growth abroad: outsourcing makes it much easier to set up foreign operations, especially when growth is booming.

Outsourcing is estimated to account for 32-38% of logistics activities depending on the source. It varies widely by geographic area from around 20% in the United States to almost 60% in the United Kingdom, for example. There is still considerable scope for progress, especially during the current period; the uncertainty and lack of confidence that plague the global economy confirm the choices made by economic players that have decided to focus on their core business and outsource their ancillary functions in order to gain flexibility and reduce costs.

► **E-commerce development**

Over the last five years, the e-commerce share of the global market has increased from 10% to 20%. The pandemic was certainly a driving force, but it also established e-commerce as a consumer trend in its own right whose share in the global market is expected to continue to grow.

Since it serves the end customer directly, e-commerce is more demanding in terms of reliability and order picking timeframes than conventional bricks-and-mortar retail. Order picking is also more intricate, as it only concerns a few units of a few items per parcel. The solutions to be implemented and managed are therefore much more complex and sophisticated, with greater reliance on automation and robotics. Finally, e-commerce is characterized by high return rates (around 30% of goods shipped) which generate additional logistics operations.

For these reasons, e-commerce has driven and will continue to drive growth in the contract logistics market, while ramping up revenues for well-positioned, recognized logistics companies in this segment, including ID Logistics.

► **Major shippers' sustainable development strategies bolster this trend**

The emergence of sustainable development issues has only accelerated this trend. Indeed, companies' efforts to reduce their carbon footprint compel them to look for ways to step up transport consolidation.

These factors also reinforce the need to have global providers capable of measuring CO<sub>2</sub> emissions throughout the supply chain, proposing sufficiently comprehensive action plans in order to reduce their impact and proposing global supply chain optimization solutions (see section 1.10 of the Universal Registration Document, "Consolidated statement of non-financial performance").

► **Reorganization of supply chains**

Recent crises related to the COVID-19 pandemic, energy costs and supply disruptions have highlighted the need to make supply chains more resilient. In this context, customers are required to rethink their logistics organization and consider creating back-up inventories or relocating part of their inventory close to consumption areas such as Europe or North America. Such steps would provide new growth opportunities in the contract logistics market.

## A strong consolidation trend over the past 10 years

For 10 years, the logistics market has undergone considerable consolidation, as market players have sought to expand their competencies and reach the critical mass

required to offer a wide range of services and support their customers' international growth.

The table below summarizes the principal acquisitions carried out over the last 10 years:

Target	Buyer	Year
Fiege (Spain/Italy)	Norbert Dentressangle (France)	2013
CEPL (France)	ID Logistics (France)	2013
MGF (France)	Norbert Dentressangle (France)	2014
Jacobsen (USA)	Norbert Dentressangle (France)	2014
Norbert Dentressangle (France)	XPO (USA)	2015
OHL (USA)	Geodis (France)	2015
Uti (USA)	DSV (Denmark)	2015
LGI (Germany)	Elanders (Sweden)	2016
Logiters (Spain)	ID Logistics (France)	2016
CEVA Logistics (Switzerland)	CMA CGM (France)	2019
Panalpina (Switzerland)	DSV (Denmark)	2019
Kuehne+Nagel UK (UK)	GXO (USA)	2020

PFS (USA)	GXO (USA)	2023
Spedimex (Poland)	ID Logistics (France)	2023
Bolloré Logistics	Ceva Logistics (France)	2023

## 1.5 MARKET POSITIONING OF ID LOGISTICS

### 1.5.1 Market positioning of ID Logistics

► **A fundamental approach as a logistics pure player and integrator of technical solutions**

The Group has made the strategic decision to pursue growth based on its expertise in developing technical solutions specific to individual customers. As such the Group does not aim to develop business lines where growth is driven by control of networks (i.e. inland transportation, air and sea freight forwarding, etc.).

As a pure player since incorporation backed by nearly 20 years of experience, ID Logistics can offer not only individual logistics services but also logistics solutions ranging from traditional logistics operations to developing solutions as part of the customer's strategy.

This approach is particularly evident in the Group's ongoing commitment to innovation, constant search for financial and environmental optimization solutions, constant endeavor to improve its customers' flows, etc.

► **A totally customer-focused organizational system**

ID Logistics places itself at the core of its customers' logistics strategy. The Group has implemented a specific organizational system focusing on customer relations in order to meet customer expectations as closely as possible while offering proposals that anticipate their future development.

Specializing in key accounts and high-volume requirements, ID Logistics primarily operates warehouses dedicated to a single customer. Each warehouse is thus organized and managed specifically for the customer using directly dedicated resources.

► **Consistent first-grade operational quality worldwide**

In order to provide optimum and consistent service throughout its subsidiaries in France and abroad, the Group has established a set of “best practices”. These are intended to ensure world-class quality of service when setting up new operational facilities in France and abroad, while ensuring that know-how and values are shared within the Group.

In addition to these best practices, ID Logistics also implements “core models” that can be copied by customers developing several logistics operations in one or more countries. Based on perfect knowledge of customer needs and standardized organization and responses, this approach makes it possible to ramp up the implementation of start-ups and the monitoring of activities.

► **Continuing focus on the mass market (production and distribution)**

The Group’s expertise is based on the logistical management of high-volume contracts and the search for optimizing solutions along the entire supply chain from manufacturer through to end customer. The Group aims to continue to serve new types of customer within this sector.

► **International positioning focused on mass consumption markets**

Thanks to this approach, the Group has established long-term relationships of trust with its customers, as borne out by the support that the Group has provided for those customers’ international development (operating bases in 16 new countries since 2001).

The Group is present in most of the major consumption countries where its large retail and mass consumption customers operate. The main objective is to increase market share in these countries, in particular through support offered to domestic customers. In the coming years, the activity of supporting existing customers could lead to openings in new countries. The first step would be to continue to offer support to existing customers for their growth in these countries.

► **Support for major customers in their new business lines and particularly in cross-channel selling**

One avenue of potential growth lies in expanding the Group’s offer to existing customers. In fact, increasingly decisive logistics support is required in order to keep pace with changing modes of distribution.

The growth of online selling, the opening of “Click & Collect”-type models, home delivery and other factors entail changes to distributors’ logistics organization and thus provide the Group with new opportunities.

In a broader context, changes in consumer habits lead to growing complexity of logistical arrangements, due to:

- an increase in the number of products offered for sale and the need for those products to be available;
- complexity of sales and distribution channels;
- a requirement for greater flexibility in the management of volumes.

Expansion of the logistics offering is a suitable response to these requirements.

► **A culture geared towards innovation and automation**

Since inception, the Group has made innovation one of its top priorities, notably by setting up an R&D department in order to offer customers cutting-edge technological solutions. This policy allows the Group to develop so as to improve the operational and financial performance of its operating sites and to offer better working conditions for its employees (e.g. via a reduction in accident rates, increased productivity, etc.).

ID Logistics also offers solutions and innovations in the areas of mechanization, automation and robotics, including high-speed automated sorting systems, load transfer, gripping and packing robots to optimize workstation ergonomics and operator working conditions, automated goods-to-person solutions (shuttles, mini-loads) to improve order-picking ergonomics, increase storage and production capacity, and high-rise stacker cranes for storing pallets. Drawing on its expertise and experience, ID Logistics has the ability to connect, interface and manage systems via fully digitized processes and interfaces and to offer scalable solutions as its customers mature.

► **Control of information systems**

The Group has acquired significant expertise in the management and implementation of information systems, allowing it to install customized solutions according to the site typology and to benefit from real-time access to structured information. The fluidity and reliability of this information allows the Group in particular to analyze and thus continuously improve site performance.

► **Highly experienced employees who share Group values**

The Group attaches particular importance to imparting the following values among employees: enterprise, operational excellence, rigor and solidarity. Moreover, ID Logistics has been able to attract and retain talented people, resulting in a stable management team.

Finally, in addition to its competitive advantages, ID Logistics has adopted a customer-focused strategy of sustainable development and growth. To this end, the Group has set up a number of projects aimed at reducing the Group’s carbon footprint and has developed specific environmental and financial analysis and improvement expertise on behalf of its customers.

► **Measure to promote sustainable development**

ID Logistics' service offerings take into account the sustainable development challenges of its customers. These services focus heavily on occupational health and safety,

based on training, innovation and empowerment of all people at the Company. They are also intended to support customer strategies for reducing their environmental footprint.

## 1.5.2 Types of service offered by ID Logistics

ID Logistics provides a broad range of logistical services to its customers:

### Warehousing and value-added services

The ID Logistics offer meets the specific requirements of ambient and fresh produce logistics and e-commerce.

- Warehousing: use of a warehouse to store goods.
- Inventory management: real-time monitoring of inventory levels, turnover, sell-by dates, etc.
- Order picking: collection of products, packages or pallets in a warehouse for the preparation of an order to be delivered to a distribution center or point of sale.
- Kitting: putting several items together to form a kit or pack.
- Co-packing: packaging operation involving the grouping of parts into a batch (e.g. for special offers) or for shop displays.
- Packaging (shrink-wrapping or repackaging): preparation of a package in the desired packaging and containers.
- Just-in-time assembly line supply and Kanban: supply of a minimum inventory of parts or work-in-progress alongside the assembly line, to be used and replenished based on production requirements. Kanban is one of the techniques of just-in-time procurement.
- Consolidation: flow management designed to optimize the loading ratio of the transport vehicle (truck, wagon, barge, etc.).
- Cross-docking: organizing transport such that the goods are received from suppliers, and customer orders prepared and shipped, on the same day with zero time in inventory.
- Multi-supplier consolidation: sharing of a warehouse by several suppliers of the same customer. The goods remain the property of the suppliers, which are often too small to be able to deliver regularly to retailers at a competitive price. This type of storage guarantees the availability of products to the customer.
- Quality control: an operation designed to control the compliance of goods received and shipments.

### Transportation and flow organization

- Transport organization: on behalf of the customer, ID Logistics organizes and optimizes transport schedules and routes over a given geographical area; the customer maintains a direct contractual relationship with its carriers.
- Administration of transport orders: administration of delivery notes, scheduling, arranging meetings, monitoring disputes, etc.
- Routing plan optimization: regular proposals to reengineer routing plans in order to cut costs.
- Dedicated vehicle fleet: use of vehicles specifically allocated to the customer.

- Combined transport: use of combined rail and road solutions.
- Container tracking: real-time tracking of containers with a view to optimizing the customer's supply chain.
- Dedicated monitoring team: transport organization on behalf of the customer, including forwarding and contractual relations with the carriers designated by ID Logistics.

### Supply chain optimization

- Customer-side installation of WMS – Warehouse Management System - or ERP software interposed between commercial purchasing management and warehouse inventory management.
- Proposed implementation of systems to enable real-time monitoring of supply chain flows.
- Management of in/outbound warehouse flows: ID Logistics manages and optimizes inbound and outbound flows at the customer's warehouses, irrespective of whether the warehouse is managed by ID Logistics.
- Organization of meetings: ID Logistics manages and optimizes its customer's meetings with carriers concerning deliveries and dispatches to and from the warehouse.
- Back-up plan: ID Logistics designs and manages back-up plans for its customers in order to ensure ongoing delivery to their points of sale even if one or more of their sites are not in operation due to fire, adverse weather conditions, strikes, etc.
- Project management: ID Logistics participates in the design and implementation of all types of projects related to its customers' supply chains in France and abroad (e.g. prospecting, impact studies, solution consulting, etc.).

### E-commerce

The Group has implemented special tools designed to deal with specific issues related to e-commerce:

- Choice of a specific information system: the Group has decided not to resort to the usual systems but to acquire a customized information system suitable for this type of process.
- Appropriate real estate solutions allowing a large degree of flexibility and sharing of e-commerce operations.
- Partnerships with express and pallet distribution networks in order to provide a global offer to the customer.

The Group has acquired particular expertise in this business and applies it in all countries where it operates.

E-commerce requires logistics providers to manage more complex flows. Indeed, a logistics provider must have the requisite systems allowing it to receive a purchase order for a product stored in one of its warehouses and viewed and purchased online by the customer, and to send the product directly to the customer from the warehouse or make it rapidly available at a retail outlet for collection by the customer.

### 1.5.3 Market typology

ID Logistics operates across a wide range of market types:

Sector	% 2023 revenues	Customer typology	Customer requirements
Retail	36%	General or specialized retail, food and non-food	<p>In view of the surge in the number of food product references, major retailers have adopted the policy of drastically reducing their inventory levels to achieve an average close to 10 days per warehouse. This new logistics system has become a key competitive factor for retail chains that need to ensure constant availability of products at minimum cost. In cold logistics, an additional challenge includes the complete mastery of the cold chain.</p> <p>Non-food or general goods are imported in mass quantities and require special inventory logistics designed to cope with a wide variety of product types. The updating of product ranges resulting in frequent promotional campaigns as well as significant product seasonality makes flexibility of service particularly important.</p> <p>Several years ago the sector entered a new phase, consisting of further acceleration of flows due to the transformation of warehouses into cross-docking platforms. This new strategy has forced industrial suppliers to adapt their mode of delivery to the new system. This new logistics system has become a key competitive factor for retail chains that need to ensure constant availability of products at minimum cost.</p>
E-commerce	25%	Cross-channel retail developed by retail customers in addition to their bricks-and-mortar sales outlets, plus pure player websites	<p>E-commerce has become a major issue for all retail customers. It is a high-growth market that is complementary to retailers' traditional sales outlets. Major customers seek both specific e-commerce logistics and synergies with their traditional logistics arrangements while demanding 100% quality rates.</p>
Fast-moving consumer goods	19%	Manufacturers and suppliers for general or specialized large retailers	<p>Manufacturers are looking for a logistics service that can support them through the organizational changes required by large retailers. Inventory reduction increases the frequency of deliveries. Customer expectations relate to the picking process and to the associated organization of transport.</p>
Technology	7%	Hi-fi products and technology.	<p>High-value products, diverse range of product sizes (ranging from cameras to refrigerators), large seasonal differences, mostly imported en masse and requiring high-precision logistics due to the nature of the product. Inventory management is the key component of the logistics service.</p>

Sector	% 2023 revenues	Customer typology	Customer requirements
Fashion	6%	Manufacturers and general or specialized retailers of clothing, leather goods and fashion accessories	Textile logistics is a particularly demanding field, involving major seasonal differences, the success or failure of collections, issues related to the transportation of clothing flat or on hangers and mass importation.
Cosmetics	3%	Manufacturers and general or specialized retailers of cosmetics and fragrances	Luxury products and cosmetics logistics requires high-precision management of a wide variety of consumer products and sales promotion accessories, given the fragility and high unit value of the products. This applies in particular to the order-picking process, in which the rate of error must be kept as low as possible. It must also cope with a concentration of sales around public holidays, sales campaigns and launches of products with relatively short life cycles.
Industry	2%	Manufacturers and subcontractors	Parts inventory management and line-side logistics, including kitting of components for just-in-time delivery synchronized with production rate. The use of subcontractors for such operations allows manufacturers to cope with fluctuations in production rates. Need for end-to-end traceability for avionics components. Need for authorization for defense-related operations.
Healthcare	2%	Pharmaceuticals manufacturers	Need for end-to-end traceability, management by batch number and storage requirements for specific products (temperature, safety measures, etc.), requiring special authorization. Customer pooling requirements, particularly prior to transportation.

## 1.5.4 Global monitoring of key accounts

### Top-ranking customers consisting of leading French companies and major multinational groups

Historically, the Group has built its development around major French-based multinationals and has proved its ability to support them in the long term and in their advanced foreign markets in South America and Asia. ID Logistics has been able to reinforce its long-standing relationships with its principal customers and to adapt to their changing needs, in particular by offering plans for continuous improvement and developing innovative solutions.

On the back of its operational successes with its long-term customers, the Group has expanded and diversified its

customer portfolio by supporting the major French retail groups and large manufacturing groups in their foreign operations in regions with high growth potential (i.e. emerging countries).

With very few exceptions, all Group customers are leading players in their respective industries and operate in Europe and abroad.

The Group's goal is to support these customers' growth in France and worldwide while adapting to their changing strategies.

Principal Group customers<sup>(1)</sup>

► Retail and e-commerce

► Fast-moving consumer goods

► Other

(1) The above presentation includes a selection of customers which generated revenues for the years presented in this Universal Registration Document.

### Support for customers worldwide

Since its inception, the Group has chosen to support its customers in their foreign operations. Today, the Group serves over half its customers in at least two countries.

The process of supporting customers in their foreign operations generally starts with an upgrade of operational

processes prior to the installation of the technology currently used on customers' sites in France. During this upgrading process, revenue per employee (permanent and temporary), converted into euros, is generally lower than the equivalent figure at French-based sites.

## 1.5.5 Relationships established with customers on a contractual, transparent and long-term basis

Contract logistics is based on systematic contractual formalization and the allocation of appropriate resources.

Contracts are formalized following a call for tenders procedure during which the service providers invited to bid propose the best logistics solution in a transparent manner and in collaboration with the customer on the basis of information provided by the latter (inbound sourcing zone, outbound distribution zone, volume, product mix, seasonality, etc.). This information is used to determine the best location for the warehouse (barycentric), its operational characteristics, associated IT processes, permanent and temporary staffing, etc.

### Systematic contractual formalization

After the tender procedure that is carried out almost systematically by shippers, ID Logistics signs a formal contract with the customer for each new project. This includes:

- operating specifications, which describe the entire service and assets to be provided by the Group;
- quality specifications, which describe the quality commitments undertaken and how they are measured (e.g. KPI);
- the contract, which specifies payment arrangements, liability, the duration of the contract, renewal clauses, etc.

ID Logistics applies a rule whereby it does not enter into a new contract without prior clarification of all the aforementioned items with the customer.

### Invoicing system determined when contract is signed

All contracts are subject to different pricing terms and conditions (e.g. indexation or volumes) stemming from commercial negotiations based on customer assumptions regarding operating conditions (volume, seasonality, order mix, etc.). Revenue is generally recognized as follows: the customer is invoiced based on specifications (e.g. full pallet, preparation of special packages, etc.) and quantity of packages prepared.

Group revenues are mainly based on volumes handled, which are contractually defined on the basis of the information provided by the customer during the call for tenders. In the event of a significant change in volumes, prices are renegotiated accordingly.

Most agreements include annual price indexation clauses applicable on the anniversary date of the contract on the basis of official local inflation indices.

While the Group's revenues are not subject to major seasonal fluctuations, second-half revenues tend to be slightly higher than first-half revenues, in view of the breakdown of customers and their growth profile.

However, first half revenues tend to be more volatile in terms of volumes with larger swings between business peaks and lows than in the second half. Excluding the impact of any new facility start-up costs, this volatility is reflected in lower operational productivity, and first-half operating income is generally lower than in the second half.

This feature of ID Logistics' business, which is also experienced by some competitors, is entirely factored into its operating procedures and financial management and does not constitute a risk as such.

### Assets assigned to each contract

For each contract, ID Logistics provides a tailored solution designed to meet the specific requirements of each customer, including the following services:

- Almost entirely single-customer solutions (one customer per warehouse).
- Dedicated resources for each customer: warehouses, equipment, vehicles, etc.
- An "asset light" policy which allows the Group to minimize the risk of unoccupied surfaces whilst offering significant flexibility to customers.
- Market information systems tailored to customer needs.
- A system for measuring performance and action plans.
- Specifically trained teams assigned to the operation.

### An ultra-flexible business model

ID Logistics has traditionally pursued its development according to a model based on flexibility and adaptability. This approach has enabled the Group to offer its customers bespoke solutions, without having to rely solely on its own assets and avoiding the risks associated with the acquisition of a large amount of property, plant and equipment. It is particularly suited to the present economic climate, as it allows the Group to adapt to consumer trends and the global economic situation in the medium to long-term.

The Group has therefore decided to focus on leasing its warehouses (all warehouse surface area in operation as of December 31, 2023). With each new contract, the Group can offer bespoke real estate solutions tailored to each customer's requirements: leasing (takeover of the existing warehouse or search for a new location), use of the customer warehouse, construction, etc. In the case of leasing, the term of the lease corresponds to that of the customer's contractual obligation.

In terms of human resources, the Group assigns a training and management team to each contract and determines the staffing requirements in accordance with the specific features of each site. Seasonal effects and activity peaks are absorbed by the use of temporary workers without impacting the ongoing cost structure. The Group works together with the main temporary employment agencies.

In addition, the equipment required for operating the warehouses (trolleys, forklifts, etc.) is generally leased for the duration of the contract.

### Genuine transparency with each customer

The customer partnership approach developed by ID Logistics is based on transparency.

This transparency is reflected in the practice of notifying the customer of all assets deployed and costs incurred in order to guarantee the proper performance of the contract. ID Logistics' operating margin is thus calculated on a clear and shared basis.

However, this transparent approach does not necessarily involve invoicing based on "cost + margin", a practice which, although common in English-speaking countries, is relatively rare in the countries in which ID Logistics operates.

Every year, ID Logistics reviews price developments and the improvement procedures it undertakes with its customers. ID Logistics' philosophy of long-term customer support is embodied in the form of improvement plans designed to ensure the continuous improvement of logistics operation performance (reducing the overall cost for the customer while optimizing the level of service). The benefits of these improvement plans are shared in a transparent manner between ID Logistics and its customers.

### Long-term support

The legal term of a contract depends mainly on the value of the investments required or on other more specific elements, such as the takeover of staff in the context of outsourcing. The term varies between 3 and 10 years. Once the initial contractual term is completed, contracts are renewed on a regular basis.

If the logistics provider is able to establish a strong relationship with its customer based on transparency and solid communication, contracts are frequently renewed as changing providers involves major costs and risks.

## 1.6 ID LOGISTICS GROWTH STRATEGY

### The Group's main strategic principles

In view of these different sources of growth, ID Logistics follows a strategy based on four major principles:

► **A fundamental approach as a logistics pure player and integrator of technical solutions**

The Group has made the strategic decision to pursue growth based on its expertise in developing technical solutions specific to individual customers. As such the Group does not aim to develop business lines where growth is driven by control of networks (i.e. inland transportation, air and sea freight forwarding, etc.).

► **International positioning focused on mass consumption markets**

The Group is present in most mass consumption countries where its large retail and FMCG manufacturing customers operate. The main objective is to increase market share in these countries, in particular through support offered to domestic customers. In the coming years, the activity of supporting existing customers could lead to openings in new countries. The first step would be to continue to offer support to existing customers for their growth in these countries.

► **Continuing focus on the mass market**

The Group's expertise is based on the logistical management of high-volume contracts and the search for optimizing solutions along the entire supply chain from manufacturer through to end customer. The Group aims to continue to serve new types of customer within this sector.

► **Support for major customers in their new business lines and particularly in cross-channel selling**

One avenue of potential growth lies in expanding the Group's offer to existing customers. In fact, increasingly decisive logistics support is required in order to keep pace with changing modes of distribution.

The growth of online selling, the opening of "Click & Collect"-type models, home delivery and other factors entail changes to distributors' logistics organization and thus provide the Group with new opportunities.

In a broader context, changes in consumer habits lead to growing complexity of logistical arrangements, due to:

- an increase in the number of products offered for sale and the need for those products to be available;
- complexity of sales and distribution channels;
- a requirement for greater flexibility in the management of volumes.

Expansion of the logistics offering is a suitable response to these requirements.

### Major untapped potential for organic growth

ID Logistics currently operates in most countries where the mass market is a major target for large manufacturers and retailers. The Group intends to focus on sectors where it is already present, in France and abroad.

In France, the Group has many sources of growth through the acquisition of new contracts (either due to a change in logistics supplier or by manufacturers or retailers outsourcing logistics) or development of multi-channel logistics solutions ("traditional" versus "e-commerce" logistics) in conjunction with the support offered to existing customers. The Group also made significant inroads into this new business line, which has grown over 10 years and now accounts for 25% of its revenues.

The Group still has major growth potential abroad. In the first stage, ID Logistics pursued a strategy of supporting its customers based in France and abroad. In the second stage, the Group aims to boost its competitive position by supporting local customers, either in their country of origin or via the Group's sites in other countries. In this respect, ID Logistics intends to focus on certain major growth sectors such as textiles, fresh produce, healthcare and fragrances.

Geographically speaking, the Group does not rule out the possibility of moving into new countries with high growth potential, while maintaining its usual approach of supporting its existing customers then consolidating its local market position.

### Stepping up growth through acquisitions

The Group is also stepping up growth via acquisitions in order to:

- strengthen competitive positions in countries where it is already present in order to consolidate the sector in France and abroad;
- develop additional logistics expertise in a new business;
- reinforce the services related to contract logistics operations.

It was precisely this strategy which led to the July 2013 acquisition of CEPL that confirmed the strategic advantage of stepping up external growth and the Group's ability to carry out and integrate value-adding acquisitions.

Thanks to this acquisition, the ID Logistics Group has boosted its service offering in the single order picking market segment and has become the No. 1 French operator in automated order picking. The Group has expanded its customer base to take on new market segments such as electronic and cultural goods, perfumes and clothing and now serves well-known high-potential customers such as Sony, Bouygues Telecom, Givenchy, Guerlain, Yves Rocher, Elizabeth Arden, Le Coq Sportif and André. This operation also allowed ID Logistics to bolster its e-commerce services with customers such as *vente-privee.com*.

Furthermore, CEPL's in-depth expertise in automation and order picking has allowed the ID Logistics Group to offer innovative solutions to all customers while providing flexible, bespoke logistics services to e-commerce customers. As a result of this transaction, ID Logistics has boosted its European network by expanding into Germany and the Netherlands while consolidating its traditional operations in Spain. Lastly, CEPL's existing customers provided potential for commercial growth abroad.

Likewise, in 2016 ID Logistics continued to roll out its international growth strategy, strengthen its leadership in Europe and shore up its logistics pure player model via the acquisition of Logiters. In 2015, Logiters managed more than 50 warehouses equivalent to around 750,000 sqm, employed 3,300 people and posted revenues of €250 million. This important acquisition has allowed ID Logistics to develop its business in high-potential sectors such as healthcare/pharmaceuticals and the automotive industry, to strengthen its positioning in its historical sectors of FMCG and retail, and to enhance its portfolio with new, high-profile customers. Logiters also provided ID Logistics with new expertise and know-how, particularly in IT systems, engineering and transport organization, and new value-added solutions such as industrial pooling.

In late 2019 ID Logistics purchased a number of business operations from Jagged Peak, a US-based e-commerce logistics specialist which posted 2018 revenues of \$80 million and employs around 200 people. Jagged Peak stands out by its ability to provide order picking and distribution solutions over the whole of North America, using its own resources backed by an extensive partner network, streamlined organization and an unrivaled IT system. This management system, which includes OMS (order management system), WMS (warehouse management system) and TMS (transport management system) modules, ensures record-time distribution of products for e-commerce key accounts throughout North America. Acquiring Jagged Peak has given ID Logistics a foothold in the USA, a new source of growth through acquisitions and organic growth.

In line with this strategy of targeted development through acquisitions, ID Logistics carried out the following operations in late 2021 and early 2022:

- Acquisition of GVT, Benelux (December 2021). GVT manages 12 sites, employs over 750 people, leases 200,000 sqm of warehouse space and has a fleet of 285

trucks in the Netherlands and Belgium. The company generates annual revenues of around €100 million. It has strategic locations close to major ports and airports and benefits from easy access by water, rail and road in order to serve mainly international blue-chip electronics and non-food distribution companies. This acquisition allows ID Logistics to consolidate its presence in Northern Europe and broaden its customer portfolio.

- Acquisition of Colisweb, France (January 2022). Founded in 2013, Colisweb offers a unique multi-channel software solution to organize last-mile delivery by appointment on D or D+1, in 2-hour time slots, for shipments of up to 1,800 kg with the possibility of assembly, commissioning or collection of packaging and used equipment. Through its network of 1,500 delivery partners, Colisweb serves all French regions and has attracted a varied portfolio of customers, particularly in the DIY, furniture and decoration sectors. Colisweb posted revenues of around €30 million in 2021 for nearly 750,000 packages delivered. This acquisition allows ID Logistics to offer its many customers in the French DIY and home furnishing sectors an integrated response to the last mile problem.
- Acquisition of 100% of US-based Kane Logistics group (March 2022). Kane Logistics is a leading US contract logistics provider working mainly with reputed manufacturers in the consumer goods, food, beverage and specialist retail sectors. Kane Logistics has posted 20% annual revenue growth since 2019 to reach \$235 million in 2021 and operates 20 hubs nationwide (including Pennsylvania, Georgia, Ohio, Illinois and California) representing 725,000 sqm. Two years after its first steps in the United States with the takeover of Nespresso's logistics operations, this acquisition has enabled ID Logistics to develop commercial synergies and pursue strong growth in a region with high potential for the Group's activities.

In 2023, ID Logistics continued this strategy with the acquisition of Spedimex (Poland), a company boasting extensive expertise and a strong reputation in the fashion sector. Spedimex has developed an asset-light model and operates 15 sites across the country spanning a total area of 230,000 sqm. The company has implemented sophisticated automation and technology solutions capable of managing large complex flows, such as e-commerce and store returns covering over 15 European countries for a single customer. The complementary nature of Spedimex and ID Logistics' customer portfolios and technical expertise should also enable them to develop commercial synergies, particularly for international market-leading customers. Lastly, in line with the post-COVID industrial relocation trend, ID Logistics has strengthened its position in a booming market that is already playing a central role in the current reorganization of supply chains in Europe. The Spedimex acquisition has put ID Logistics in a leading position in the Polish market, backed by 35 sites, 7,000 employees and a prestigious customer portfolio of manufacturers, distributors and e-commerce companies.

## 1.7 ENVIRONMENTAL ISSUES

The Group’s operations do not represent any material risk for the environment: as of the Universal Registration Document date, the Group stores and handles a certain amount of materials regarded as toxic under Seveso or equivalent regulations (aerosols, car batteries, paint, etc.) and provides the corresponding road transport services. These activities and services are of limited scope compared to the rest of the Group’s activities and the Group considers that it is not significantly exposed to environmental risks. The Group also maintains an active policy of sustainable development, as described in section 1.11 of the Universal Registration Document, “Consolidated statement of non-financial performance”.

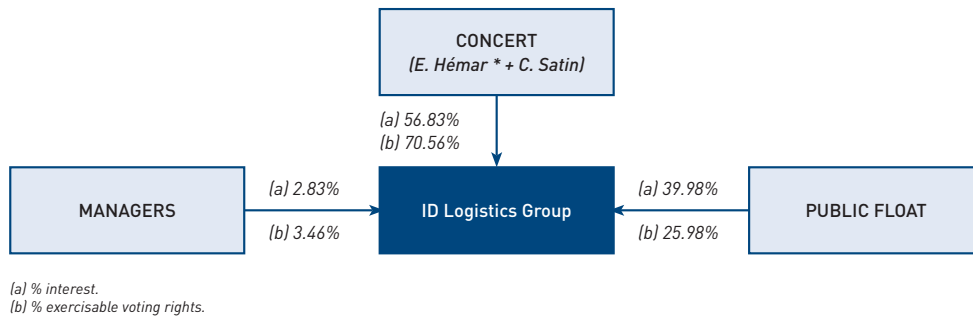

Fewer than 10% of the facilities operated by the Group worldwide are located in areas exposed to natural risks such as earthquakes (e.g. Taiwan or USA West Coast) or cyclones (e.g. Réunion Island or South-East USA). These facilities comply with standards and regulations aimed at limiting the potential impact of these phenomena on their activity. In the regions concerned, the Group has organized its operations in such a way that movements can be reallocated between the various warehouses managed. Lastly, the Group pursues an asset-light approach and does not own the real estate assets it operates.

In this respect, outside the scope of the usual regulations relating to environmental and safety standards, there is no environmental issue that could significantly influence the use of the Group’s property, plant and equipment.

## 1.8 ORGANIZATION CHARTS

### 1.8.1 Legal organization chart

As stated in section 3.1.1 “Capital stock”, ownership of the Company breaks down as follows as of December 31, 2023:

Treasury stock held by the Company under the liquidity contract is included under “Public”. As of December 31, 2023 treasury shares represented 0.36% of the capital stock.

The diagram below shows the simplified organization chart with the main Group companies as of December 31, 2023:

The Company is a holding company which has no business operations. It centralizes some of the Group’s central services. The business operations are carried out by the subsidiaries (see section 1.9.2 “Presentation of the Group’s main companies”).

As of December 31, 2023, the Company held direct and indirect equity investments in 125 companies, 57 of which are located within mainland France. This chapter only covers the Group’s main subsidiaries.

The Group companies’ business is described in chapter 1, “Business Overview”.

The duties carried out in the subsidiaries by the Company’s officers and directors are described in section 3.1, “Board of Directors’ corporate governance report”.

The Group’s operational structure and the main centralized services are described in section 1.9.4, “Operational organization chart”.

Section 1.11.3, “Consolidated non-financial performance indicators”, shows a breakdown of Group employees.

The companies included in the Group’s 2023 consolidated financial statements are listed in Note 30 to the Company’s consolidated financial statements appearing in section 4.8 “Annual historic financial information”.

As of December 31, 2023, the relative weighting of subsidiaries grouped by operating segment is as follows:

<i>(€m except for headcount)</i>	<b>France</b>	<b>International</b>	<b>Total</b>
Revenues	826.5	1,920.9	<b>2,747.4</b>
Underlying EBITDA	126.2	308.5	<b>434.7</b>
EBIT before amortization of acquired customer relations	34.6	91.2	<b>125.8</b>
Net cash flow from operating activities	123.0	306.8	<b>429.8</b>
Operating investments	13.8	61.1	<b>74.9</b>
Fixed assets	324.8	1,316.7	<b>1,641.5</b>
Headcount	7,182	20,863	<b>28,045</b>

## 1.8.2 Presentation of the main Group companies

As of December 31, 2023, the main Group companies are:

### ► **CEPL Barcelona (Spain)**

CEPL Barcelona is a Spanish company that operates a site for a cosmetics customer. The company had 153 employees as of December 31, 2023.

### ► **Colisweb (France)**

Colisweb is a company incorporated under French law created in 2013 and acquired by the Group in January 2022. Colisweb offers software solutions for organizing and optimizing last mile delivery. It does not operate any facilities as such and employed 65 people as of December 31, 2023.

### ► **Logistics IDL España Group (Spain)**

Logistics IDL España Group is a company incorporated under Spanish law whose head office is in Madrid. Created in 2006, it operates eight sites for major retailers and the textile industry. Most of its sites are managed with the help of mechanical systems. As of December 31, 2023, Logistics IDL España Group had 947 direct employees.

### ► **GVT Transport & Logistics (Netherlands)**

GVT Transport & Logistics is a company incorporated under Dutch law whose head office is in Tilburg. Acquired by the ID Logistics Group in December 2021, GVT manages 13 sites and had 138 employees as of December 31, 2023.

### ► **ID Freight Management (Netherlands)**

ID Freight Management is a Dutch company that manages three transport sites in the Netherlands and Belgium, and does not directly employ any staff.

### ► **ID Logistics Belgium (Belgium)**

ID Logistics Belgium is a company incorporated under Belgian law whose head office is in Brussels. ID Logistics Belgium operates one site and had 349 direct employees as of December 31, 2023.

### ► **ID Logistics Benelux (Netherlands)**

ID Logistics Benelux (formerly CEPL Tilburg) is a company incorporated under Dutch law whose head office is in Tilburg. It is an indirect subsidiary of CFL, acquired in 2013. ID Logistics Benelux operates eight sites and had 272 direct employees as of December 31, 2023.

### ► **ID Logistics Bucharest (Romania)**

ID Logistics Bucharest is a company incorporated under Romanian law and created in 2018. It operates six sites and had 662 employees as of December 31, 2023.

### ► **ID Logistics do Brasil (Brazil)**

ID Logistics do Brasil is a company incorporated under Brazilian law whose head office is in São Paulo. Created in 2002, it manages approximately 44 sites for a varied portfolio of customers and provides a diversified range of services for major retailers, e-commerce, consumer goods and manufacturers. As of December 31, 2023, ID Logistics do Brasil had 4,734 direct employees.

### ► **ID Logistics France (France)**

ID Logistics France is a French simplified joint stock company (société par actions simplifiée) registered on December 1, 2000 with the Avignon Trade and Companies Registry under the name "La Flèche Logistique". It was given its current name on February 11, 2002 within the framework of the spin-off of the logistics business of ID Projets (formerly La Flèche Cavaillonnaise) into a new company whose shares were transferred to ID Logistics in December 2001. Today, it is the Group's main operating subsidiary and had 4,331 direct employees as of December 31, 2023.

### ► **ID Logistics GmbH (Germany)**

ID Logistics GmbH is a company incorporated under German law whose head office is in Weilbach. It operates one site and had 335 direct employees as of December 31, 2023.

### ► **ID Logistics Italy (Italy)**

ID Logistics Italy is a company incorporated under Italian law whose head office is in Milan. Founded in 2022, it operates two sites and had 28 direct employees as of December 31, 2023.

### ► **ID Logistics Kaiserslautern (Germany)**

ID Logistics Kaiserslautern is a company incorporated under German law and created in 2020. It operates one e-commerce site and had 193 direct employees as of December 31, 2023.

**► ID Logistics Polska (Poland)**

ID Logistics Polska is a company incorporated under Polish law whose head office is in Katowice. Created in 2008, it manages food and non-food warehouses for major retailers and their suppliers. It has also developed a transportation organization and management package and holds an international transportation license. As of December 31, 2023, ID Logistics Polska had 1,975 direct employees.

**► ID Logistics Kleinostheim (Germany)**

ID Logistics Kleinostheim is a company incorporated under German law and created in 2020. It operates one e-commerce site and had 117 direct employees as of December 31, 2023.

**► ID Logistics Polska (Poland)**

ID Logistics Polska is a company incorporated under Polish law whose head office is in Katowice. Created in 2008, it manages food and non-food warehouses for major retailers and their suppliers. It has also developed a transportation organization and management package and holds an international transportation license. As of December 31, 2022, ID Logistics Polska had 1,621 direct employees.

**► ID Logistics Taiwan (Taiwan)**

ID Logistics Taiwan is a company incorporated under Taiwanese law whose head office is in Lujhu. It was created in 2001, and was the Group's first foreign subsidiary. It is jointly owned by its co-founder and current General Manager (who has a 40% shareholding). ID Logistics Taiwan manages food and non-food warehouses for major retailers, mainly in the form of cross-docking. It had 298 direct employees as of December 31, 2023.

**► ID Logistics Selective (France)**

ID Logistics Selective is a company incorporated under French law and created in 2012. It operates one e-commerce site and had 233 direct employees as of December 31, 2023.

**► ID Logistics Selective 3 (France)**

ID Logistics Selective 3 is a French company specializing in last-mile delivery services, particularly for e-commerce customers. The company had 458 employees as of December 31, 2023.

**► ID Logistics Tilburg (Netherlands)**

ID Logistics Tilburg is a company incorporated under Dutch law and created in 2015 in order to operate a site for a pan-European industrial customer. ID Logistics Tilburg operates one site and had 60 direct employees as of December 31, 2023.

**► ID Logistics US, Inc. (USA)**

ID Logistics US, Inc. is a company incorporated under US law based in Tampa. It operates six sites throughout the USA serving e-commerce customers. The company had 422 employees as of December 31, 2023.

**► ID Supply Chain (Argentina)**

ID Supply Chain is a company incorporated under Argentinian law whose head office is in Buenos Aires. Created in 2008, it is held jointly by its co-founder and current General Manager, who holds a 40% equity stake. It manages food and non-food warehouses for major retailers. As of December 31, 2023, ID Supply Chain had 667 direct employees.

**► ID Logistics Iberia (Spain)**

ID Logistics Iberia (formerly Logiters Logística) is a company incorporated under Spanish law and based in Madrid. Purchased by the Group in 2016, it operates around 50 sites throughout the region for retail, consumer goods, healthcare and automotive customers. As of December 31, 2023, ID Logistics Iberia had 2,351 employees. Following this acquisition, it acts as the head office housing all administrative operations for Spain.

**► Kane Logistics (USA)**

Kane Logistics is a company incorporated under US law that was part of the Kane Logistics group acquired by the Group in March 2022. It operates three logistics sites for a specific customer and had 248 employees as of December 31, 2023.

**► Kane Warehousing (USA)**

Kane Warehousing is a company incorporated under US law that was part of the Kane Logistics group acquired by the Group in March 2022. It operates 20 logistics sites for a variety of customers in the consumer goods and distribution sectors. The company had 2,050 employees as of December 31, 2023.

**► La Flèche (France)**

La Flèche is a French simplified joint stock company (société par actions simplifiée) registered on December 5, 2007 with the Avignon Trade and Companies Registry. It was created at the time of the Group's acquisition of ID Projets (formerly La Flèche Cavallonnaise), whose business it operates pursuant to a lease management agreement. It operates three sites in France and had 185 direct employees as of December 31, 2023.

**► Logiters Logística Portugal (Portugal)**

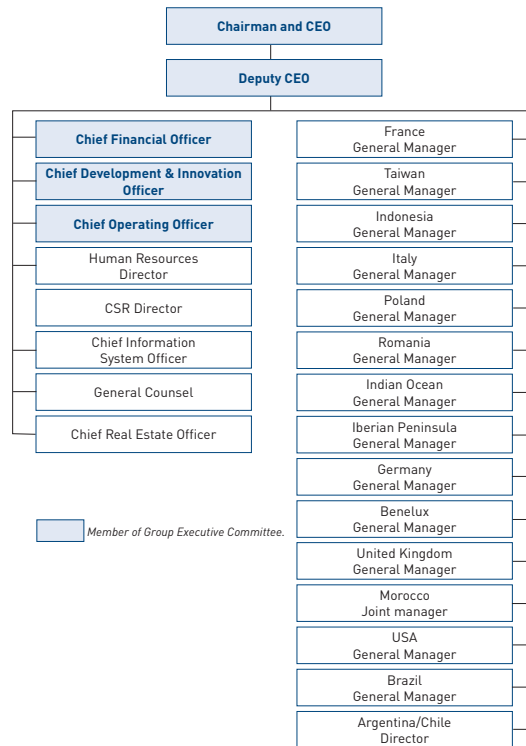

Logiters Logística Portugal is a company incorporated under Portuguese law, based in Azambuja. It is wholly-owned by ID Logistics Iberia. It operates 5 sites for consumer goods and healthcare customers. As of December 31, 2023, Logiters Logística Portugal had 305 employees.

**► Spedimex (Poland)**

Spedimex is a company incorporated under Polish law whose head office is in Strykow, Poland. Acquired by the ID Logistics group in May 2023, Spedimex manages 15 sites and had 752 employees as of December 31, 2023.

### 1.8.3 Operational organization chart

As of the Universal Registration Document date, the Group operational organization chart was as follows:

All Group senior managers have extensive experience in their respective fields.

## 1.9 RESEARCH AND DEVELOPMENT

As stated in section 1.6, “ID Logistics market positioning”, since its inception the Group has placed a strong emphasis on technological innovation, enabling it to offer its customers solutions that combine quality of service with productivity, while ensuring more ergonomic working conditions for its staff.

This innovation culture is supported by the Group’s R&D department, staffed by forty technicians around the world,

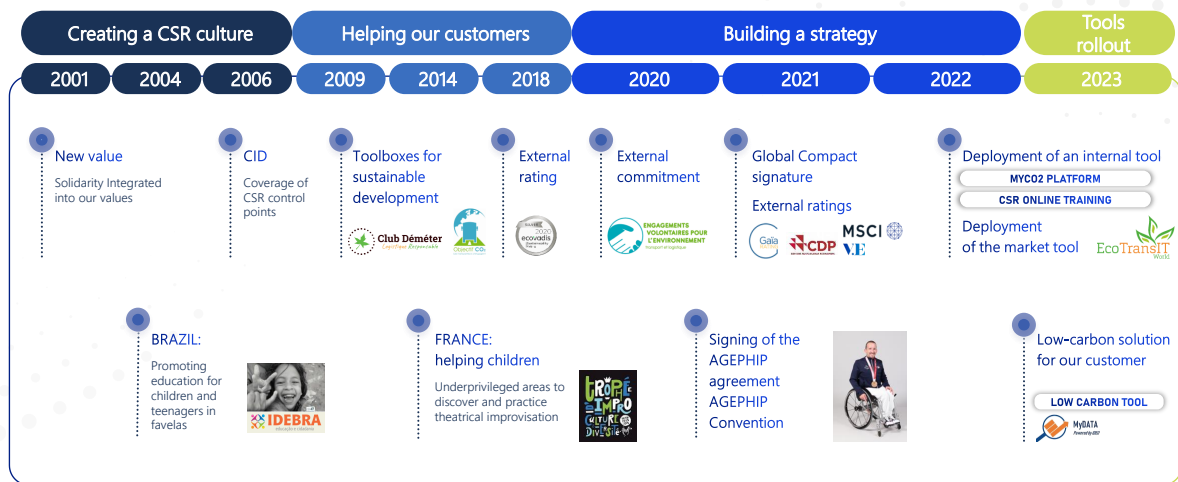

who add a new technological perspective to each commercial offer or reengineering request.

Nevertheless, the Group’s R&D expenditure does not entitle it to a material tax credit. The Group cannot capitalize its R&D expenses; they are posted to expenses as and when incurred. The annual amount of R&D costs recorded as expenses by the Company is not material.

# 1.10 CONSOLIDATED STATEMENT OF NON-FINANCIAL PERFORMANCE

## 1.10.1 Sustainable development and growth: history of our CSR strategy

Although not initially established as a formal policy, CSR has been central to ID Logistics since its creation with consideration given to the impact of its activities on the environment and its stakeholders.

### 1.10.1.1 A strategy rooted in ID Logistics' values

The four core ID Logistics values as espoused by all Group business lines and regions form the foundation upon which the CSR strategy is built:

► **Entrepreneurship**

This watchword can be broken down into three simple concepts: daring, imagination, growth – with all due care and attention required when implementing and assessing risks.

► **Operational excellence**

Strict compliance with specifications, quality of service, new technologies, sustainable solutions, etc., in order to guarantee the customer optimal performance.

► **Rigor**

Rigor, discipline and professionalism in human relationships both within the Company and with customers and partners.

► **Solidarity**

Between employees, between business units, with customers, with partners, taking the form of supportive actions during challenging situations or promoting sustainable development.

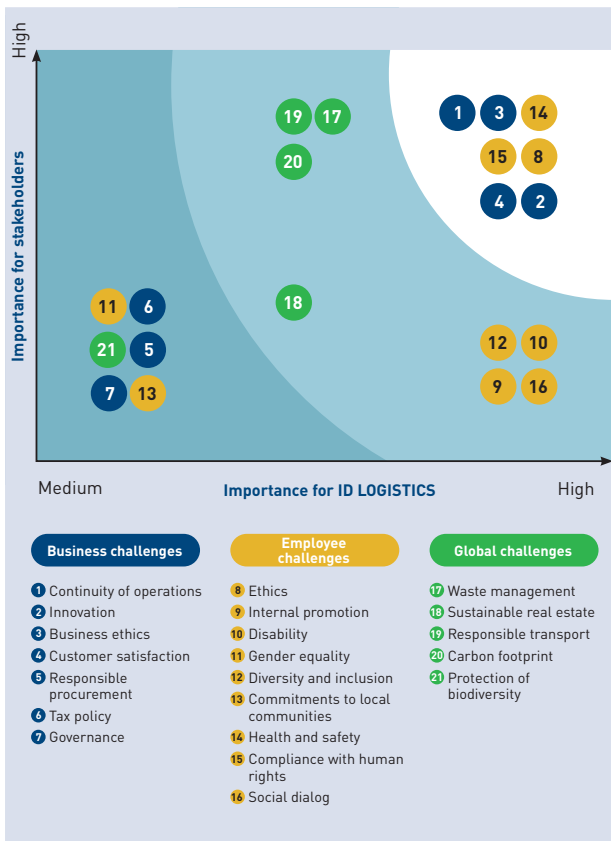

When applied to training and the identification and promotion of talent, these values help define the Group's strong team spirit. This environment is strengthened by the internal ID Certification (CID), which promotes the sharing of best practices, in favor of the end customer.

**1.10.1.2 A strategy founded on 3 pillars**

Since 2011, in line with its values, ID Logistics has been committed to a Sustainable Development approach.

► **Materiality survey (GRI 101.1/GRI 101.3)**

The ID Logistics materiality survey was carried out in February 2021 (next revision in 2024 including the creation of a double materiality matrix in accordance with CSRD requirements). ID Logistics teams presented 21 previously identified corporate social responsibility challenges to their priority contacts (defined using the stakeholder mapping – primarily customers, but also suppliers and employees, in all countries where the Group operates), based notably on the CSR framework for Logistics and ISO 26000. 266 respondents expressed the importance they attached to each of these challenges and their perception of ID Logistics’ maturity in addressing them. The findings of this consultation will be fed into the CSR roadmap to help set the 2030 objectives.

► **CSR strategy**

Based on this survey, the Group has defined three main pillars, broken down into 10 working priorities.

- “What we are”, covering social issues: Our capital is human above all. With the goal of:
  - being the benchmark logistics provider in terms of workplace health and safety,
  - being a driving force of inclusion by promoting the integration of the most vulnerable people and encouraging diversity within teams,
  - supporting employees in their professional development.
- SDGs 3, 8 and 10 are covered in this section.

- “What we do”, covering environmental issues: Act within the Group’s businesses above all with a view to safeguarding the environment and controlling risks while making business assets such as vehicles and sites more environmentally friendly. The issues covered by this strategy include:

- waste management,
- pollutant and greenhouse gas emissions,
- water and energy management.

With the goal of:

- reducing the environmental footprint (with GHG emissions, energy intensity and waste management as the most material challenges),
- aligning our commitments with those of our customers by implementing optimized and innovative solutions that meet both economic and environmental criteria,
- giving consideration to sustainable development issues at the project planning stage in order to factor such considerations into the solutions proposed to customers,
- proposing solutions to the customers’ CSR challenges, in particular the reduction of their carbon footprint, during the term of the contract.
- SDGs 7, 12 and 13 are covered in this section.

• “Where we contribute”, covering societal issues: Act as a responsible corporate citizen throughout our value chain by encouraging local initiatives in keeping with the Group’s values, ensuring that our suppliers comply with our CSR charter and making ethics a prerequisite for any operation.

With the goal of:

- encouraging local initiatives in keeping with the Group’s values,
  - having our suppliers sign our Responsible Purchasing and CSR Charter,
  - training all national executive committees and managers in ethics.
- The SDGs covered in this section may include SDGs 1, 2, 4, 5, 11, 15, 16 and 17.

**1.10.1.3 A tools-based strategy**

Our CSR strategy is based on four tools.

- **CID:** ID Logistics Certification This procedure, which has been at the heart of our culture and practices since 2007, enables ID Logistics to ensure the implementation of all its operational policies, in particular its CSR strategy, whether through the regulations (covering all the standards and legal or regulatory requirements that must be followed in all our operations) or the promotion of best practices. The CID is the Group’s operations bible.
  - Constantly updated to account for new requirements, this certification must be achieved by all ID Logistics sites operating for over a year irrespective of geographical location or service type.
  - Certified sites are audited twice a year: once by ID Logistics auditors (persons not attached to the site audited) and once by independent external auditors (EURACRP). It is after this external audit that certification is awarded, thereby guaranteeing an

independent assessment. More than 30% of external audits are spot audits (unannounced).

- In the event of non-compliance, the site is given a period of one month to implement corrections, failing which certification is suspended.
- A site performance report, with a corresponding rating, enables long-term monitoring of the changes from one year to the next and facilitates the management and comparison of the sites.
- CID incorporates CSR issues, such as respect for employee rights, training, health and safety at work, environmental risks, waste management, sanitary control and responsible procurement. It covers 80% of ISO 14001 requirements.

- **The Together + Responsible** program: CSR principles are widely disseminated via this intranet platform.

Launched in 2022, the platform is an extension of the “Sustainable Development Toolbox” program, which enabled the completion of over 3,150 projects following its launch in 2009. Each site must commit to a long-term goal by selecting one of 14 themes (zero carbon warehouse, zero waste warehouse, certified company, etc.). ID Logistics’ CSR principles are widely disseminated via this intranet platform,

which fosters significant commitment among all Group employees. The system also allows activities to be organized at Group level so as to make them:

- more effective (by providing detailed information on the execution of projects);
- repeatable, on the basis of internal sharing of best practices.

Each manager is responsible for promoting this sustainable development approach within their sphere of influence by carrying out a certain number of projects per year, as verified during CID audits.

Around 300 initiatives are listed Group-wide, covering five themes: waste management, water and energy management, greenhouse gas and pollutants management, staff welfare schemes (including health and safety) and social schemes.

► **The vigilance plan (covered in section 3.3 of the URD)**

A vigilance plan was established in 2017 to identify risks and prevent serious breaches of human rights and fundamental liberties as well as serious damage to personal health and safety and the environment.

To prepare the plan, which applies to all ID Logistics Group companies, a working group comprising the following department representatives was formed: purchasing, human resources, risk management, legal, operations.

In 2023, the plan was fully rolled out across all overseas Group subsidiaries and the system will be bolstered by a continuous improvement and audit procedure.

This plan was established on the basis of the following elements:

1. Risk mapping: 23 specific risks were identified and categorized into four groups: corruption & integrity, human rights and fundamental freedoms, health and safety of individuals and the environment.
2. Risk assessment and prevention: implementation of measures including: code of ethics, ethics training, development of the CID benchmark (see previous paragraph), supplier code of conduct (Purchasing and CSR Charter), procurement procedure, supplier risk mapping and survey.
3. Whistleblowing system: implementation of a standard Group-wide whistleblowing system designed to satisfy all regulatory requirements (whistleblowing channel security; management of alert confidentiality, the whistleblower's identity, the identity of the third parties mentioned in the alert and all information collected while the alert is being processed), processing and protection of personal data, protection of whistleblowers and alert facilitators. The system is available both internally and externally.
4. Measuring effectiveness: by monitoring changes in CID certification scores, whistleblowing reporting and internal audits.

► **Customer satisfaction survey**

Carried out each year, the survey enables the Group to measure its response to the challenges faced by customers.

- 15% of the survey relates to CSR criteria: of the 25 questions asked, 4 are used to assess the relevance of the ID Logistics CSR strategy and its consistency with customers' strategies.
- Through a detailed analysis of customer responses, the Group is able to adjust its policy and update the CID or toolbox where necessary. In 2023, our CSR rating increased to 3.74, up 14.7% from 3.26 in 2020, illustrating the improvement in customers' perception of our CSR initiatives.

### 1.10.1.4 A new ambition

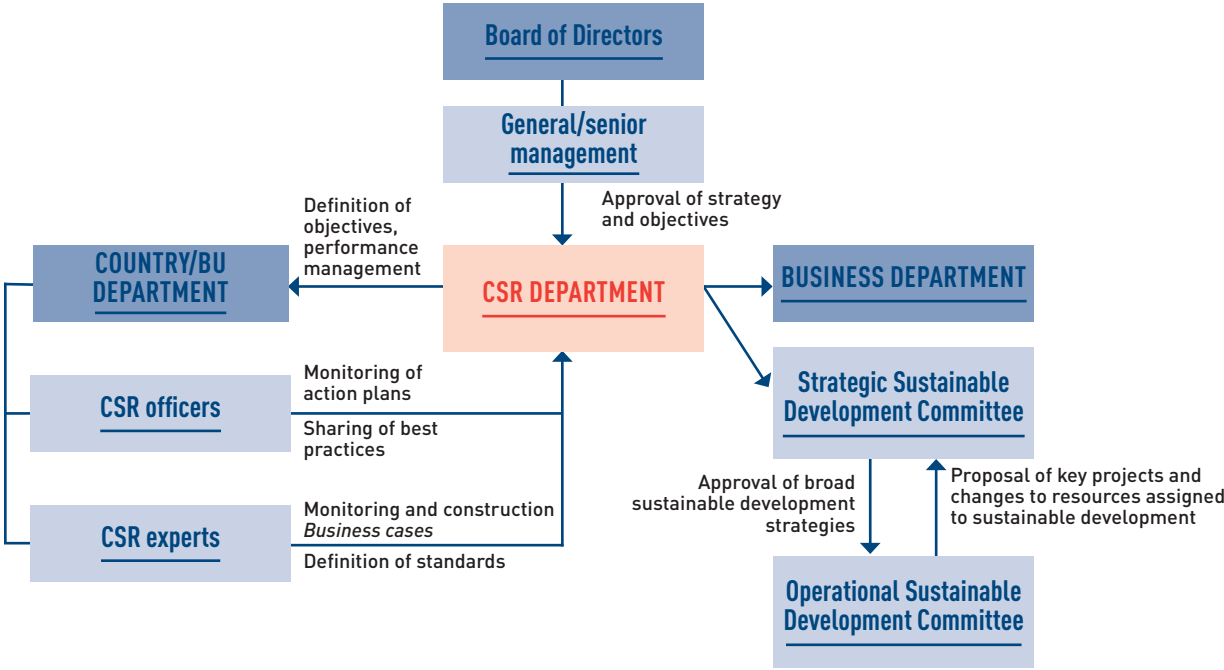

In view of current developments (strengthening of customer CSR commitments, stricter legislation, greater awareness of CSR issues within society), ID Logistics is stepping up its CSR strategy.

► **Structure and governance**

- Appointment of a new CSR Director in August 2023 reporting directly to the ID Logistics group Chief Operating Officer. The role of the CSR director is to:
  - establish Group CSR strategy and ensure its consistency with the other Group policies;
  - establish projects, procedures and structures to implement Group strategy;
  - represent the Group in CSR matters, both internally and externally.

The CSR Director is a member of the Executive Committee, where he can act as a mouthpiece for CSR issues during discussions on related matters that have a direct or indirect impact on corporate social responsibility. The Executive Committee approves the broad sustainable development strategies, oversees progress in relation to established plans, approves key projects and resources allocated to sustainable development and establishes programs to reward staff so as to encourage and promote the best initiatives.

- The Operational CSR Committee comprising the CSR officers from each country. The CSR officers report to the CSR Director. This committee transforms the strategies established by the Strategic Sustainable Development Committee into action plans, monitors trends in indicators in relation to the defined action plans and reviews progress made by Group sites. It submits proposals for key projects and changes to dedicated resources to the Strategic Sustainable Development Committee. It is also responsible for feeding back local information and ensuring the implementation of CSR projects and policy at local level.
- The expert network: certain subjects may require expert knowledge to address matters thoroughly. In such cases, experts are identified in various countries in order to establish the recommendations and procedures resulting from the CSR policy.
- Integration into the Country budget: all of the Group's CSR objectives have been broken down by country and integrated into the budget process.

► **Ambition 2030**

The Group has announced CSR objectives for 2030, which are subsequently included in each section.

**10 CSR TARGETS**

**SOCIAL Pillar**

**#1 Workplace health and safety**

40% decrease in industrial accident frequency and severity rates (ID + temps) by 2027 (vs. 2018)

**#2 Disability**

20% increase in proportion of employees with disabilities by 2025 (vs. 2018)

**#3 Internal promotion**

Reach 70% internal promotion for site managers by 2030

**ENVIRONMENTAL Pillar**

**#4 Carbon footprint**

40% reduction in Scope 1 & 2 emissions from logistics activities (CO<sub>2</sub>/pallet) by 2030 (vs. 2018)

**#5 Energy intensity**

20% reduction in energy intensity in logistics activities (kWh/sqm) by 2030 (vs. 2018)

**#6 Waste**

Reach 85% of waste recycled by 2025

**#7 Customer commitments**

75% of sites having undertaken a CSR initiative in collaboration with their customer by 2025

**SOCIETAL Pillar**

**#8 Involvement in local communities**

100% of countries involved in an initiative with local communities by 2025

**#9 Responsible procurement**

Purchasing and CSR Charter signed with 80% of suppliers representing 95% of purchases by 2024

**#10 Ethics**

100% of country Management Committee members and 80% of managers trained in ethics by 2024

The Group also became a signatory to the UN Global Compact in April 2020, thereby publicly and unreservedly demonstrating its full support for the 10 principles and its commitment to integrating them into its corporate policy.

- Principle 1: Businesses should support and respect the protection of internationally proclaimed human rights; and
- Principle 2: Make sure that they are not complicit in human rights abuses.
- Principle 3: Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;
- Principle 4: The elimination of all forms of forced and compulsory labor;
- Principle 5: The effective abolition of child labor; and
- Principle 6: The elimination of discrimination in respect of employment and occupation.
- Principle 7: Businesses should support a precautionary approach to environmental challenges;

- Principle 8: Undertake initiatives to promote greater environmental responsibility; and
- Principle 9: Encourage the development and diffusion of environmentally friendly technologies.
- Principle 10: Businesses should work against corruption in all its forms, including extortion and bribery.

**NOUS SOUTENONS  
LE PACTE MONDIAL**

1.10.1.5 The value-added model

Create sustainable logistics solutions

RESOURCES

Human capital

- 26,569 employees worldwide
- Average age: 39 years
- Strict health & safety policy
- Strong employer brand

Innovation capital

- 65 commercial engineers worldwide
- 3 innovation campuses
- 40% international warehouses automated

Financial capital

- Shareholders' equity of €417m
- Debt ratio limited to 1.6x EBITDA
- Group listed on Euronext Paris

VALUE CREATED

Customer

- Organic growth of 9.7% per year in the last five years
- 20 new contracts per year in the last five years
- Over 90% of contracts are renewed

Human

- Top 10 – "Happy at Work" survey
- 7,500 new recruits per year on average in the last five years
- 235,300 hours of training per year in the last five years
- Industrial accident frequency rate down to 14.8 in 2023

Financial

- €695m invested in five years
- Market capitalization up 2.1x in five years
- Revenues up 1.9x in five years

1.10.2 CSR risks

Group senior management has identified the non-financial risks likely to jeopardize the Group's value-added model. The identification of these risks, which mainly concern staff and the environment, is combined with the tracking of performance indicators, which are reviewed on a monthly basis by the departments concerned in each country and at least once a year with the Group Executive Committee (GRI 101.4 / 101.6 / 101.7 / 101.8).

When the decree implementing the order transposing the European Directive was published, senior management reviewed the 41 themes listed in order to ensure that risks previously identified and already monitored by the Group were included and to see whether new risks needed to be added.

This dual approach has resulted in the identification of the following main non-financial risks:

Area	Challenge	Paragraph
Employment	Guarantee the health and physical integrity of employees by reducing industrial accidents	1.10.2.1 A
Employment	Enhance the Company's ability to attract new talent	1.10.2.1 B
Employment	Retain talent through appropriate career development and remuneration policies	1.10.2.1 C
Employment	See that employee skills match job requirements	1.10.2.1 D
Employment	Maintain effective labor relations	1.10.2.1 E
Environmental	Ensure responsible waste management	1.10.2.2 A
Environmental	Reduce carbon footprint	1.10.2.2 B
Social	Equal treatment	1.10.2.3 A
Social	Regional, economic and social impact and relations with stakeholders	1.10.2.3 B
Social	Tax policy	1.10.2.3 C
Social	Initiatives in defense of human rights	1.10.2.3 D
Ethics and corruption	Uphold procurement best practices	1.10.2.4 A
Ethics and corruption	Fair competition	1.10.2.4 B
Ethics and corruption	Prevent and combat corruption	1.10.2.4 C

This strategy was renewed in 2021 with a materiality assessment following a discussion with key stakeholders.

### 1.10.2.1 Employment

#### A. Guarantee the health and physical integrity of employees by reducing industrial accidents

##### a) Challenges

Ensuring the health and safety of employees and service providers is a key factor in ensuring ID Logistics' development. This approach is set out in the Group's health and safety policy published in December 2021.

##### b) Initiatives

###### ► Corporate culture

For ID Logistics, safety comes first and is everyone's responsibility. It is for this reason that the managers take initial responsibility and are tasked with ensuring that this strategy is applied and implemented. The entire management team, from country manager to site manager, is set results-based health and safety targets. Safety indicators are included in the SIM (Short Interval Management) briefs designed to raise employees' awareness and keep them regularly informed. Indicators are displayed at all ID Logistics sites and compiled monthly at country and Group level. Safety rules are displayed at all ID Logistics sites, both inside warehouses and in outside work areas.

Days dedicated to workplace health and safety were organized (Safety Week in November in the Benelux countries, Green April and Yellow May in Brazil, Safety Month in France, Spain and Poland).

###### ► Procedures

In order to provide managers with a concrete and coherent plan, all items related to health and safety, whether regulatory requirements or best practices, are set out in the various documents and procedures. Several elements of the CID cover workplace health and safety requirements. Additionally, the IDeliver best practice guide places a particular focus on the 5S approach, the first step towards a secure working environment.

###### ► Training

ID Logistics is committed to improving the safety culture amongst all Group employees, by organizing specific training sessions for both permanent and temporary staff. The two annual CID audits verify the proper supervision of the safety training plan.

The training primarily focuses on behavior and movements inside the company. This includes (but is not limited to) training on movements and posture, electrical authorization, fire safety officers, occupational first aid, and analysis of industrial accidents.

The Group has incorporated health and safety management as an essential skills base into its drive to create essential training courses for all types of functions and positions within the Company, with a view to setting up an "ID Academy".

More generally, this training aims to provide employees with the keys to a healthier lifestyle. For example, ID Logistics has implemented the #Salud360 program in Spain, which covers health, eating habits and stress management at work, while addiction awareness campaigns have been conducted in France.

► **Innovation**

ID Logistics provides its employees with a secure working environment that focuses on reducing arduous work via ergonomic equipment, innovations and enhancements. For example:

- Since 2022, the Securitab mobile app has continued to spearhead safety initiatives at our sites in France, enabling:
  - management of safety alerts delivered to site managers for the implementation of suitable corrective action and monitoring through to completion;
  - tracking of site safety audits with results compilation, in order to identify areas for improvement and ensure their resolution;
  - digital centralized management of the single assessment document;
  - coordination of all safety measures (OSMID, TMS inspection, etc.).

The Group has decided on a phased deployment of this application (or any similar application offering the same features) across all sites.

- In 2023, the Group launched a program to test the performance of Exoskeletons in real-life conditions with EMG sensors, motion capture and heart rate measurement. This program has enabled us to test a broad range of equipment and identify which scenarios were most favorable, generating real gains for the operator.
- In Poland, a new gamification application available on PC, smartphone and scanner was rolled out in 2023. Connected to the WMS, it distributes virtual experience points to employees depending on the quantity and type of their preparation tasks. Points can then be exchanged for tangible rewards.
- In 2020, ID Logistics Benelux rolled out its Gamification technical training program initiated in 2020. Virtual reality training has been created for handling equipment operators. 80 people have been trained using this technique since December 2021.
- In 2020, Spain launched a robot enabling operators to handle heavy loads (car batteries) with the assistance of a mechanical arm and suction gripper. A similar system was introduced in 2022 to handle beer barrels for a Spanish customer and paint pots for a French customer.
- Since the launch of the TMS-MAP project in France in 2020, 90% of sites have conducted an ergonomic study on five workstations. The procedure, which combines on-site visits, strain measurement via sensors and the use of avatars, enables categorization of the workstations that cause the greatest strains as well as the development of corrective measures. and is contributing to the development of best practices and the CID benchmark at Group level.
- In 2023, a virtual reality safety training course for new arrivals was introduced at 40 French sites, including risk

hunting and simulations (fire accident) designed to raise employee awareness. The international roll-out of virtual reality continues, particularly in Chile, where our forklift operators are trained using 360° immersive videos.

- Similarly, safety visuals have been improved by laser projections of illuminated signs and pedestrian walkways on the ground.
- Speed control functions that automatically slow down forklifts during loading are gradually being introduced at warehouses as the fleet is replaced.

► **Employee welfare**

A specific ID Logistics insurance policy, in addition to social security cover and the general industry policy, covers all or part of the remaining charge for employees.

The scheme is free for ID Logistics employees and all premiums are paid by the Company.

Focus
<p style="text-align: center;"><b>Monitoring our temporary workforce</b></p> <p>In addition to the focus placed on permanent employees, ID Logistics implements a structured approach regarding temporary staff, monitoring accident rates (frequency and severity rates) for permanent employees and temporary workers alike. In France, this approach follows a five-point process:</p> <ul style="list-style-type: none"> <li>• An induction kit including a test is issued to every temporary worker in order to measure their level of awareness of safety-related information (in the event of a score below 80%, the worker is not kept on).</li> <li>• In collaboration with the purchasing department, the health &amp; safety department conducts a meeting with each temporary employment agency for the purposes of reporting and establishing targets and action plans.</li> <li>• Every month, each temporary employment agency reports on industrial accidents (monthly and cumulatively). After verification, the data is collated with data collected for permanent employees on a summary table sent to all levels of company management.</li> <li>• Specific day-long events are organized with temporary employment agencies to raise awareness among our temporary staff about the risks involved in their work. For sensitive matters, the temporary employment agencies are directly involved in the action plans implemented.</li> <li>• For sensitive matters, the temporary employment agencies are directly involved in the action plans implemented.</li> </ul>

**c) Results**

The frequency rate (i.e. number of lost time industrial accidents (excluding travel accidents) during the year over actual payroll hours times 1,000,000) was as follows for ID Logistics employees:

	2023	2022
France	30.1	31.4
International	10.2	11.2
<b>Total</b>	<b>14.8</b>	<b>16.2</b>

The frequency rate (i.e. number of lost time industrial accidents (excluding travel accidents) during the year over actual payroll hours times 1,000,000) was as follows for temporary workers:

	2023	2022
France	42.4	43.6
International	12.1	13.4
<b>Total</b>	<b>17.8</b>	<b>20.4</b>

*NB: All countries except Morocco reported this indicator for the full year in 2022.*

The severity rate (i.e. number of days lost due to industrial accidents (excluding travel accidents and extended absences or relapses arising from industrial accidents in prior years) over actual payroll hours times 1,000) was as follows for ID Logistics employees:

	2023	2022
France	1.3	1.4
International	0.3	0.3
<b>Total</b>	<b>0.5</b>	<b>0.5</b>

*NB: In the various countries where ID Logistics operates, there are significant differences between the definition of industrial accidents, the conditions regarding medical leave and the requirement to report them to the relevant bodies. These differences are particularly marked between European and non-European countries, and explain the discrepancy between the frequency and severity rates recorded between France and abroad.*

In 2023, 37 people declared occupational sickness in France with the CPAM (French employee welfare organization) and to date have not been rejected, compared to 47 people in 2022. Given that the occupational sickness definition varies

too widely between the Group’s countries of operation, only the indicator for France, which is the most significant, is disclosed. **GRI 403-10**

**B. Enhance the Company’s ability to attract new talent**

**a) Challenges**

Hiring people capable of strengthening ID Logistics’ expertise is a key challenge in maintaining the Group’s rapid development. Faced with the increasing demands of our business lines, particularly in terms of innovation, supporting the acquisition of new talent is a key factor for success of the ID Logistics strategy.

**b) Initiatives**

Our hiring capacity involves strengthening our relationship and partnerships with targeted universities.

► **The recruitment team**

ID Logistics’ recruitment teams perform an essential task by handling requests and running a career page on which all job offers are posted.

► **Employer brand**

We also need to show our customers that we are able to anticipate and meet their needs, whether in terms of innovative and sustainable solutions or, naturally, human resources. It was therefore essential to highlight the features that set ID Logistics apart from other companies and that rally our employees together. We therefore had to define our employer brand in order to meet the major challenges posed by recruitment and foster commitment and pride of belonging among our employees.

For this purpose, in 2023 ID Logistics conducted a major drive focusing on its employer identity and the pillars that sustain it, in order to highlight our logistics sector, our corporate culture and our propensity to develop and encourage innovation at all levels of the organization.

An internal communication campaign was launched in 2023, followed by an external campaign focusing on these pillars, while managers and recruiters were provided with appropriate tools.

► **Relationship with universities**

ID Logistics currently partners with a number of schools:

- France: KEDGE BS, IUT Aix-Marseille (logistics management training), AFTRAL.
- Spain: Polit cnica de Madrid, Polit cnica de Catalu na, Complutense de Madrid, Alcal  de Henares, ESADE, IE, EAE.
- Netherlands: ROC (Tilburg).
- Romania: Polytechnic University Bucharest – Transport Faculty & Academy of Economic Studies – Logistics Master.
- Taiwan: Vanung University, Chung Yuan Christian University, Shu-Te University, National Kaohsiung University of Science and Technology.
- Brazil: S o Paulo State, UNIP - Paulista University, Est cio University, Nove de Julho University, S o Judas Tadeu University, Minas Gerais State, FAEX - Extrema College, Educational Anhanguera (University).

► **Work-study & international work experience volunteer (VIE) program**

- Work-study contracts: the Group’s proactive policy to hire work-study students led to over 118 new hires in 2023.

The retention rate has been steadily increasing over the last five years (44% in 2023). Students are hired in either operational or cross-functional positions or pursue their work-study programs at ID. A support program was set up alongside KEDGE Business School in late 2023 to help tutors perform their duties.

- VIE: in view of its rapid international expansion and the addition of new countries, ID Logistics has been prioritizing this scheme for several years. In 2023, seven VIE students carried out assignments in South America (Argentina) and Europe (Spain, Romania, Italy).

Management aims to encourage each country even more strongly to welcome young graduates in order to let them enjoy a great international experience and share their knowledge and skills on assignments in various fields, such as operations, continuous improvement and finance.

► **Partnerships**

In 2023, ID Logistics continued to work alongside organizations promoting the professional integration of young people, including Ecole de la 2<sup>e</sup> Chance and 100 Chances 100 Emplois.

**c) Results**

The number of permanent new hires during the period was as follows:

	2023	2022
France	1,013	1,288
International	7,803	8,290
<b>Total</b>	<b>8,816</b>	<b>9,578</b>

**C. Retain talent through appropriate career development and remuneration policies**

**a) Challenges**

Aware of the vital importance of a proactive talent acquisition and retention policy, ID Logistics has made firm commitments over a number of years to ensure that all its employees are offered professional development opportunities in line with the Company’s growth.

**b) Initiatives**

► **Salaries and pay rises**

In order to attract and motivate its employees in the long term, the ID Logistics remuneration policy is based on several levers:

- Recognition of responsibility and skills development by setting and ensuring dynamic development of the base salary in line with market practices so as to maintain external competitiveness.
- High valuation of individual performance through a proactive special bonus and incentive scheme. Performance based on the attainment of individual targets aligned with the challenges of ID Logistics at Group level.
- The retention of key individuals and talent within the Company through the discretionary allocation of bonus shares, thereby strengthening the personal commitment of these key individuals in all countries regarding the future of the Company.

► **Incentive and profit-sharing agreements**

There is no Group employee incentive agreement. However, various incentive agreements are in place at all of the French legal entities. Similarly, while there is no Group employee profit-sharing agreement, profit-sharing agreements have been concluded at the French subsidiaries where legal conditions are met.

The main objective is to align the specific economic and operational requirements of each profit center with the terms of value-sharing schemes.

► **Employee shareholding**

As of December 31, 2023 and as specified under section 3.1.1 of the Universal Registration Document, “Breakdown of capital stock and voting rights”, Group management holds a total of 3.1% of the Company’s capital (3.1% at December 31, 2022). Each manager is responsible for his or her own holdings and there is no collective scheme for equity holdings.

The Company has also established a collective Company share acquisition scheme for employees, the terms of which are as follows:

- The FCPE (corporate mutual fund) “Actions ID Logistics” was approved by the AMF on February 26, 2013 under authorization number FCE20130024.
- At all times, between one third and 100% of the FCPE’s assets are invested in ID Logistics Group shares, the

# 1 BUSINESS OVERVIEW

## CONSOLIDATED STATEMENT OF NON-FINANCIAL PERFORMANCE

management objective being to invest between 95% and 100% in Group shares so that the FCPE's value closely tracks the share's market price.

This scheme was introduced during first half 2013 when the 2012 employee profit share was paid out. Since then, a new scheme has been launched every spring when the employee profit share is paid out.

### c) Results

Voluntary departure rates are as follows:

	2023	2022
France	6.6%	6.3%
International	14.5%	15.9%
<b>Total</b>	<b>12.3%</b>	<b>13.0%</b>

NB: The different regulations between countries where ID Logistics operates, and specifically between European and non-European countries, makes it difficult to compare turnover rates between France and other countries.

ID Logistics made the following internal promotions across the reporting scope:

	2023	2022
France	469	912
International	2,332	1,899
<b>Total</b>	<b>2,801</b>	<b>2,811</b>

The amounts recorded in France in respect of these incentive and profit-sharing agreements were as follows:

€000	2023	2022
Incentives	7,386	8,406
Profit share	4,896	5,086

Absenteeism (i.e. the total number of days absent due to accidents, illness and other unauthorized absences over total payroll days per calendar year) was as follows:

	2023	2022
France	6.9%	7.8%
International	5.4%	6.3%
<b>Total</b>	<b>5.8%</b>	<b>6.7%</b>

As of December 31, 2023, 944 employees, i.e. just over 13% of the French workforce, held shares via the FCPE amounting to some 0.2% of capital stock.

#### ► Happy at Work

In 2023 for the first time, the survey was conducted in all 16 countries where the Group operated and covered all employees.

For this first global survey, the Group posted a recommendation rate of 60.1%, an overall score of 3.9/5 and a participation rate of over 60% of employees Group-wide (14,200 respondents out of 23,300 employees questioned).

#### ► Internal job transfers

ID Logistics is conducting ambitious strategic workforce planning in order to anticipate the Company's future staffing requirements. By identifying potential movements and preparing for them in advance, the Group aims to perform the requisite internal staff changes with greater speed and efficiency as opportunities arise.

Each of the countries concerned is committed to an action plan aimed at keeping the Group in the list of top performers.

At the end of the survey, ID Logistics ranked 10<sup>th</sup> in the 500+ employees category of this ranking based on the opinions of employees questioned during the HappyIndex®AtWork 2022 survey.

A similar survey will be launched in 2024 covering 18 countries.

## D. See that employee skills match job requirements

### a) Challenges

Aware of the vital importance of a proactive talent acquisition and retention policy, ID Logistics has made firm commitments over a number of years to ensure that all its employees are offered professional development opportunities in line with the Company's growth.

### b) Initiatives

Launched by ID Logistics in 2019 for all employees, the IDev program is a growth and development tool designed to provide individuals with the means to flourish within the Group.

It comprises four components:

- **IDev Function** with business line mapping and job knowledge,
- **IDev Career** to promote career development and mobility, with standardized processes across countries: an induction program for new hires and a performance review coupled with career development plans to promote employees' development within ID Logistics business lines,
- **IDev Potential**, a standardized Group-wide system for identifying, monitoring and developing potential,
- **IDev Leader** to support employees in their role as the Company's "engine room", coupled with the implementation of the ID managerial model.

This development program will continue over the coming years with a view to gradual roll-out across the whole Group in terms of processes and shared assessment standards.

#### ► Exploiting potential and promoting organization sustainability

ID Logistics pays particular attention to its HR risks and issues related to the sustainability of its organizational systems.

This program is also designed to develop succession planning for key jobs, thereby ensuring continuity of the service delivered to customers.

ID Logistics has also launched IDev Talent, a program for identifying potential based on an assessment of performance and potential. France was the first country to set up a career committee and introduce a shared matrix and criteria.

#### ► Internal mobility, job mapping and classification

The global job mapping initiative launched in 2019 led to the completion of new mapping and descriptions for all jobs in terms of tasks and skills in France in 2020. Argentina and Brazil also completed this exercise in 2020.

The IDev Function program continued in 2022 with all positions within the Group being categorized under a single job classification system. The main objective was to provide a clear overview of the various jobs and functions present in all countries, to be able to "weigh" positions and thereby facilitate

transfers between countries by more easily measuring skills gaps between different organizations, while defining the packages associated with those positions.

#### ► Skills development (GRI 404)

Training represents a considerable challenge at ID Logistics for all Group employees.

In 2021, ID Logistics launched an initiative aimed at:

- strengthening and structuring training programs for production personnel, particularly in the area of workplace health and safety.
- committing to a comprehensive equal opportunities and internal promotion policy: the ID Logistics group decided to launch a training course devoted to "Fundamental Skills" for employees needing to improve their mastery of basic skills, including literacy and numeracy.

On a voluntary basis, this training course, which can be adapted to individual participants' needs, aims to develop basic skills, including:

- Oral and written communication
- Familiarization with the basic rules of calculation
- Understanding of displays and instructions
- Administrative formalities and procedures
- Preparation for the theoretical CACES test
- Computer skills

In 2023, 14 employees took part in this training course.

- Create career paths to help employees plan their professional development within the organization and, above all, identify the skill sets required for each of the jobs concerned and train accordingly. These courses follow on from the initiatives launched in 2020 and finalized in 2021 under the aegis of the ID operations department, which resulted in the creation of the Stock Academy aimed at establishing a shared reference framework and allowing our stock managers to acquire the skills sets needed to perform their duties effectively. Rolled out in France, this type of course has now been extended to six other jobs.
- Generalize the VAE (validation of acquired experience) process.
- Extend executive training, mainly for senior executives, by creating partnerships with Aix-Marseille University and AFTRAL.

In Brazil, ID Logistics launched its Leadership Academy in 2020, an ambitious development program covering all three levels of management.

These initiatives are destined to be rolled out across all countries, as part of the drive to identify common standards, leading to:

- the identification of key skills blocks per population;
- the general roll-out of managerial training, depending on the level of responsibility.

### c) Results

ID Logistics has delivered almost 306,000 hours of training.

	2023	2022
France <sup>(1)</sup>	58,910	54,637
International	247,385	162,453
<b>Total</b>	<b>306,295</b>	<b>217,090</b>

(1) Training hours include employees' statutory training entitlement (DIF) but exclude vocational qualification periods.

**E. Maintain effective labor relations****a) Challenges**

In order to ensure balance between its employees' expectations and business constraints, ID Logistics seeks to maintain effective dialog with staff. Social harmony is an important factor in the Group's success.

**b) Initiatives****► Arrangements for labor dialog**

Meetings and discussion should serve as a basis for resolving any difficulties. It is up to Group management and staff representatives to provide early warnings of difficulties encountered or breaches of the principles specified in the Code of Ethics. To comply with this early warning principle, local company management and staff representatives show willingness to communicate in order to prevent any difficulties arising from degenerating into labor conflicts.

**c) Results**

Overall, nearly 90% of Group employees are covered by collective labor agreements covering, in particular, work

The objective is to promote understanding between all levels of the company and to place labor relations at a global level, so as to improve them in all respects, including discussions between unions and management and between managers and their staff.

Employees themselves are the main focus of labor dialog and discussions are expanded to let them collectively or individually voice their opinions. By speaking and listening, the objective is to identify warning signs in advance and thereby avoid conflicts, while taking note of current working conditions and suggested improvements.

**► List of collective employee agreements**

ID Logistics continuously strives to strike a fair balance between business needs and the collective interests of the staff.

Accordingly, in 2023 ID Logistics France signed a new agreement on professional equality with the trade unions.

arrangements and working hours, pay rates and fringe benefits.

<b>Number of strike days</b>	<b>2023</b>	<b>2022</b>
France	2,515	1,292
International	1,508	208
<b>Total</b>	<b>4,023</b>	<b>1,500</b>
<b>% of days lost due to strikes</b>	<b>2023</b>	<b>2022</b>
France	0.0%	0.0%
International	0.0%	0.0%
<b>Total</b>	<b>0.0%</b>	<b>0.0%</b>

### 1.10.2.2 Environment

#### A. Ensure responsible waste management

##### a) Challenges

In a continuous effort to reduce its environmental impact, managing its own waste is one of ID Logistics' most direct tools.

Waste generated by ID Logistics at its sites is mainly derived from four sources:

- Packaging of products handled on site: this mainly includes primary packaging of products sent by customers, which ID prepares and ships in smaller units than those received (e.g. shrink-wrap on inbound pallets when products are prepared for packing, primary cardboard packaging when the product is prepared for unit shipment, strapping, etc.).
- Products damaged on site or during transport, returns and obsolete products.
- Consumables used by ID during order-picking and shipment processes (e.g. directional label holder).
- On-site staff activities (paper, household waste, etc.).

The first category represents the vast majority of waste treated on site. In this case, ID Logistics is highly dependent on its customer (in terms of packaging and order structure). The main challenge for ID Logistics is therefore:

- first, to implement waste sorting solutions;
- second, to ensure that waste recycling or recovery channels are identified and used;
- third, to work with customers to reduce waste at the source.

##### c) Results

Waste tonnage generated broke down as follows:

Type	2023		2022	
	Tonnage <sup>(1)</sup>	%	Tonnage <sup>(1)</sup>	%
Cardboard	39,927	46%	33,463	44%
Wood	9,552	11%	11,426	15%
Plastic	4,783	6%	3,889	5%
Ordinary industrial waste and other <sup>(2)</sup>	30,099	34%	23,382	31%
WEEE	157	0%	16	0%
Other	2,956	3%	3,646	5%
	87,474	100%	75,823	100%

(1) The coverage (based on the number of sites for which data is available over the number of sites included in the reporting procedure, as per the procedural memo - "Reported information") amounted to 94% in 2023 and 82% in 2022.

(2) For some sites (mainly one site in Germany), the tonnage of ordinary industrial waste is estimated, as it is not weighed when collected from the site.

The increase in waste tonnage is mainly due to changes in consolidation scope (consolidation of Kane, USA).

Logistics waste recovery rates (mainly by recycling) are as follows:

	2023	2022
France	78%	75%
International	60%	65%
<b>Total</b>	<b>66%</b>	<b>69%</b>

**B. Reduce carbon footprint**

**a) Challenges**

Logistics activities impact the carbon footprint due to warehouse activities and, most of all, due to the logistics supplier’s positioning in its customer supply chains.

Introducing a scheme for measuring and reducing the overall carbon footprint enables operating expenses to be stabilized.

**b) Initiatives**

**For warehousing and order picking, which represent the vast majority of our operations**

**Group carbon footprint 2023**

Logistics activities

The carbon footprint is primarily comprised of five elements. The Group works to reduce the carbon footprint in each of these areas, either by reducing volumes consumed or via less carbon-intensive consumption methods.

► **Electricity**

Representing 27% of the warehouse carbon footprint, used for lighting, charging handling equipment, the operation of mechanized equipment and computer system power supply.

- Change: the electricity carbon footprint decreased in 2023 under the combined impact of efforts to reduce consumption (7% reduction in kWh consumed) and the use of low-carbon electricity (18% of kWh consumed).
- Measures implemented to reduce the electricity portion of the footprint:
  - Reduce consumption. For several years now, the Group has been working to reduce its electricity consumption. Given market tension and in line with its environmental commitments, the Group moved up a gear in 2023 by launching the Watt’sDown program, which enables

sites to assess their position and earmark projects for implementation.

- Installation of software to manage hourly energy consumption at the sites where ID Logistics is responsible for this item. Launched in France in 2021, the scheme has been rolled out at 23 sites since then. In Germany, one site introduced a similar system and recorded a 40% saving in energy (gas and electricity) in 2023 compared to the previous year.
- A lighting upgrade program (low-energy fittings followed by installation of LED lighting) combined with the installation of motion and brightness sensors is yielding positive results (over 90% of surfaces in Poland, 79% in Spain and 60% in France are now fitted with LED lighting).
- Lithium-ion batteries have been installed across all or part of the forklift fleet (Spain, Poland, Germany, United States and Brazil), enabling a 30% reduction in electricity consumption while improving operator safety.
- Decarbonization of Group electricity mix
  - Over and above regulatory requirements, where contract duration allows or during building construction for which it acts as project manager, the Group installs renewable energy production equipment: in 2023, 1,772 MWh of electricity was produced and self-consumed at our logistics sites.
  - The Group has also signed contracts for the supply of renewable electricity, with guarantee of origin certificates, for 41,264 MWh (17% of Group consumption) in Argentina, the Netherlands, Spain, Germany and Brazil. The Group will continue to extend such contracts to other countries in the coming years.

► **Buildings**

15% of warehouse carbon footprint, covering depreciation of the impact of construction over 20 years.

- Stable proportion of Group carbon footprint.
- ID Logistics is currently drawing up a roadmap for reducing emissions from buildings. However, when ID Logistics carries out construction on behalf of its customers, BREEAM Very Good certification is systematically sought. This is the case for 15 sites in France and all sites launched in Poland over the past three years.

► **Waste**

17% of warehouse carbon footprint. Consideration of the end of waste generated by ID Logistics' activity or waste treatment.

- Stable proportion of Group carbon footprint.
- To reduce waste-related emissions, ID Logistics is working on improving its sorting and recovery processes (see section 1.10.2.2-b).

► **Raw materials and consumables**

9% of warehouse carbon footprint. Used for handling and packing products, either inside the warehouse or at time of shipment.

- The Group's activities consume few raw materials in the strict sense. Consumables mainly consist of cardboard packaging and shrink-wrapping.
- Stable proportion of Group carbon footprint.
- The Group seeks to reduce consumption, of shrink-wrapping in particular, by introducing automatic stretch wrap machines at most sites (leading to lower shrink-wrapping consumption compared to manual shrink-wrapping processes) and reducing shrink-wrap thickness.
- The introduction of reusable packaging is also an important area of work with our customers. In 2023, a system was introduced for local deliveries at two new sites in France and one in Poland. Likewise, one site in Germany reduced its shrink-wrap consumption by introducing reusable straps to hold parcels in place on pallets in stock.

► **Natural gas**

6% of warehouse carbon footprint: used for heating premises.

- Reduced proportion compared to other emissions.
- As in the case of electricity, the Group has installed software to manage hourly gas consumption at the sites where ID Logistics is responsible for this item. Launched in France in 2021 and rolled out at 23 sites since then, the scheme led to a 30% reduction in consumption in 2023.

► **Commuting**

- This new category was added to the Scope 3 calculation in 2023.
- It represents 19% of the carbon footprint.
- This is a macro estimate: it was calculated on the basis of estimates of commuting distances per country for an average FTE workforce spread over the year and an estimate of the means of transport.
- The estimate will be fine-tuned over the coming years.
- The Group is committed to limiting the commuter footprint and has launched projects to this end:
  - Implementation of car-sharing application in France
  - Offering jobs near the home if possible
  - Assistance with moving house
  - Daily bus service introduced in Poland

► **Other elements (fuel oil, refrigerant, travel, forklifts, etc.) are non-material (< 5% of emissions).**

- IT: use of servers running on renewable energy, selection of reduced-consumption computer equipment
- Business travel: preference for rail
- Company vehicles: transition of vehicle fleet towards more fuel-efficient engines

- Forklifts (new category for 2023): switch to Li-ion batteries allowing a 20% reduction in electricity consumption.
- Lastly, an indirect consequence of the work carried out at the warehouses to optimize truck loading is that it allows our customers to reduce their carbon footprint (outside the ID Logistics scope).

**As part of our logistics business we offer transportation services that also have a carbon footprint.**

► **Related to our rail-road activity**

- Combined cold chain logistics: Through its subsidiary Froid Combi, ID Logistics has introduced an integrated rail-road solution using mobile containers, and has thus developed its expertise in rail-road logistics over the last 10 years, with three North-South domestic routes. Several thousand transport containers are shipped every year via combined rail-road carriage on the Avignon-Valenton and Avignon-Dourges routes.
- ID Logistics operates 58 mobile containers daily for these flows.

► **Related to our transport activity**

- For its own fleet, ID Logistics invests in alternative drive trucks. In 2023, the fleet comprised the following vehicles:
  - France: 46% of HGVs are fitted with an alternative engine (VNG or electric), as are 11% of LVs (electric) including 1% HGV tractors (electric).
  - Spain: 9 mega-trucks (capable of transporting 1.5 times the load of a standard vehicle).
  - Argentina: 10 trucks fitted with alternative drive power (VNG).

To produce a uniform measurement of its subcontracted transport footprint included in Scope 3 since 2022, the Group has partnered with EcoTransIT, which draws on the latest greenhouse gas reporting standards. The footprint of all subcontracted transport flows is included (see "Reported information").

- The French freight division has regularly renewed its commitment to the "Objectif CO<sub>2</sub>" charter since 2009. This charter formalizes the voluntary commitment made by road freight operators to reducing their carbon emissions. It was drawn up by the French Ministry of Ecology, Energy, Sustainable Development and Marine Affairs, and various professional organizations in collaboration with ADEME. By signing the charter, the Group has undertaken to meet certain CO<sub>2</sub> emission reduction targets. The Group aims to meet these targets by modernizing its vehicle fleet, monitoring its fuel consumption, training its drivers, improving load ratios and minimizing empty-load mileage. The most recent renewal of the charter in 2022 for the 2022-2024 period targets a 10% reduction in GHG emissions within three years.

► **For transport monitoring activities**

- The aim of the Group's transportation monitoring system is to reduce the carbon footprint of the customers concerned. Indeed, optimizing routing plans reduces empty-load mileage and vehicle operating time. ID Logistics monitored over 2 million transport orders in 2023.
- It has also developed rail organization expertise, contributing to the modal shift (organization of 1,700 trains per year, the equivalent of 68,000 trucks, over an average distance of 750km).

- Between 2020 and 2021, all of the French transport management businesses signed the EVCOM commitment. This charter formalizes a voluntary commitment to reducing carbon emissions on the part of flow managers and freight forwarders. It was drawn up by the French Ministry of Ecology, Energy, Sustainable Development and Marine Affairs, and various professional organizations in collaboration with ADEME. By signing the charter, the Group has undertaken to meet certain CO<sub>2</sub> emission reduction targets. Its first commitment under the charter, signed in 2020 for the 2020-2022 period, is to target a 5% reduction in its own GHG emissions and those of its customers within 3 years.
- Within this framework, IDEO, a subsidiary of ID Logistics, won a trophy at the 2022 transport and logistics meetings organized by ADEME in the category of the most innovative action thanks to a CO<sub>2</sub> emissions data visualization tool. Developed internally, the application is used by operational staff to monitor and manage the reduction of the carbon footprint of customer transport

flows. It also enables IDEO to identify new opportunities for decarbonization in connection with the assistance it provides to a number of customers with the Fret 21 scheme, the shipper equivalent of EVCOM.

After the success of its 2020-2022 commitment and a total reduction of 8% in its transport GHGs, IDEO renewed its EVCOM commitment in 2023 with the aim of reducing emissions by a further 5% by 2025. Since the beginning of its commitment, IDEO has contributed to reducing its transport-related emissions by over 11,600 tCO<sub>2</sub>eq., the equivalent of over 15,000 full-load truck journeys between Paris and Lyon.

Note that managed transport operations are not included in the carbon footprint scope. Managed transport emissions are estimated at around 268,125 tCO<sub>2</sub>eq. for 2023.

► **Reduce employee carbon footprint**

- The *Together + Responsible* program offers a number of initiatives for reducing GHG emissions related to employee travel. Over 40 projects targeting carbon footprint reduction were carried out in 2023 (e.g. prioritizing car-sharing in parking space allocation, establishing public transport links to our sites with the corresponding local authorities, building bicycle sheds, etc.).
- Moreover, the travel policy favors travel by rail rather than air whenever possible.
- Lastly, some time ago the Group introduced a virtual meeting system for employees. This working method became commonplace during the COVID-19 crisis and is here to stay.

► **Carbon offsetting**

The Group has entered into a carbon offsetting partnership with EcoAct. The partnership involves carrying out voluntary carbon offsets based on the most widely recognized certificates. No offsets were carried out in 2023.

### c) Results

Change in greenhouse gas emissions is as follows:

Tons of CO <sub>2</sub> emitted, Scope 1, 2 and 3 <sup>(9)</sup>	2023	2022
Scope 1 France	14,161	18,833
Scope 1 International	43,877	41,584
<b>Scope 1 total GRI 305-1</b>	<b>58,038</b>	60,417

Scope 1, 2 & 3 France – new methodology (GRI 305-2)	102,911	97,595
Scope 1, 2 & 3 International – new methodology (GRI 305-2)	356,605	295,736
<b>Scope 1, 2 &amp; 3 – new methodology</b>	<b>459,516</b>	393,332

The “comparable methodology” carbon assessment covers the same consumption scope as in 2022, including subcontracted transport. The new methodology includes the additions made to the scope in 2023, namely the commuting estimate and handling equipment carbon footprint.

### C. Other initiatives to protect the environment

#### ► Accidental air and soil pollution

The Group’s main activity of warehouse management generates minimal discharges into the air, water and soil that could seriously impact the environment. Nevertheless, through the CID, each site vigilantly monitors the potential for accidental pollution by:

- keeping up-to-date records of products stored;
- applying local regulations;
- following the inspection routines and procedures set out in the CID.

In 2023, as in previous years, there was no accidental air or soil pollution. The CID audits have not highlighted any non-compliance in this regard.

The Group encourages local initiatives to reduce pollution. In France, for example, 24 employees at IDEO, the ID Logistics transport subsidiary, took part in World Cleanup Day on September 16 by collecting litter around their office in Saint-Priest. They collected 48kg of waste, part of which was sent for recycling. In Poland, ID Logistics Poland employees, supported by employees of ID Logistics customers, were involved in initiatives to clean up forests and rivers. Our employees also took part in a tree planting campaign in the Osobowice forest in Wrocław.

#### ► Management of hazardous products

- The Group stores and handles a certain amount of materials regarded as toxic under Seveso or equivalent regulations (e.g. aerosols, car batteries and paint) and provides the corresponding road transport services. These activities and services are of limited scope compared to the rest of the Group’s activities and the Group considers that it is not significantly exposed to serious accidental pollution risks.
- Nevertheless, in view of its role as a service provider, ID Logistics must contribute fully to the management of hazardous products in terms of compliance with procedures and legislation and alerting and advising customers.
- All procedures relating to hazardous products are covered by the CID, the safety policy and the following individuals:
  - for the warehouses: hazardous products manager, responsible for various aspects of hazardous product management (alerts, compliance with thresholds, storage conditions, etc.),
  - for transport: the Technical Director.
- No incident has been reported to date.
- No non-compliance was reported during the 2023 CID campaign in relation to hazardous products.

### ► Water management (GRI 303-1)

In 2022, the Group carried out a water criticality study using the WWF Water Analysis.

Operational water consumption mainly concerns warehouse cleaning and staff consumption. Water is not used in the production process. All ID Logistics sites are classified as OOR Low Risk or Very Low Risk.

7% of water consumption is located in basins where water supply is limited (QBR index, WWF Water Analysis).

This analysis will be repeated in 2024.

In addition, one site in France and one in Brazil recycle rainwater for internal use at the warehouse or for cleaning solar panels, while two sites in Brazil have introduced a solution to improve management of water consumption.

### ► Noise pollution

- The Group has obtained Piek noise reduction certification for some of its transportation equipment. Currently, 14 trucks have the Piek label.
- The increased use of gas-powered engines also contributes to this improvement (30% noise reduction).

### ► Sustainable building

ID Logistics operates as a matter of priority in modern buildings in order to provide proper working conditions for employees and service providers and enable the Group to achieve or surpass its environmental objectives.

When ID Logistics is hired for the construction of a logistics building, and when the customer accepts, ID Logistics builds warehouses to high environmental standards. Seven new buildings of high environmental quality are currently under construction in France to house operations due to begin in 2024.

### ► Biodiversity

Due to the nature of its business activity, ID Logistics does not have a significant impact on biodiversity. However, the toolbox contains a number of biodiversity initiatives. Nine projects aimed at reducing our impact on biodiversity or promoting its development are currently underway. For example, employees at the Mszczonów warehouse in Poland have planted trees around the buildings and installed an insect hotel, bee hives and a birdhouse. In Germany, all sites host bee colonies in order to promote the local ecosystem.

### ► Sensitive natural resources

- The Group does not use sensitive natural resources in its operations.

## 1.10.2.3 Society

### A. Equal treatment (GRI 405)

One of ID Logistics' strengths is the diversity of its workforce, consisting of men and women of many different nationalities and backgrounds working together and sharing common goals. Encouraging staff diversity is one of the Group's key commitments toward its employees.

In this respect, ID Logistics strives to build an inclusive culture where all employees are valued for their different knowledge, skills, experience, culture and background.

ID Logistics also strives to develop programs promoting the employment of disabled people. As an employer, ID Logistics encourages fair employment practices worldwide while respecting equal opportunity for all employees in terms of both hiring and career development.

### ► Measures adopted to promote equal opportunities for men and women

In 2023, the Group focused on conducting a survey across France. This review, which was shared and discussed with staff representatives, revealed that:

- there is no difference in salary levels between men and women for comparable jobs;
- the Group's workforce is largely male.

In order to promote a long-term shared commitment, the Group signed an agreement with staff representatives towards the end of 2023.

The agreement mainly concerns hiring more women through a bold action plan covering:

- hiring and access to employment;
- professional training;
- promotion;
- work-life balance;
- working conditions and occupational health & safety.

Other countries have adopted the same approach: for example, since 2021 Spain and Portugal have conducted a campaign called "Corresponsabilidad" (joint responsibility) to promote gender equality.

The proportion of women among new hires has progressed as follows:

Proportion of women among new hires	2023	2022
France	31.0%	27.4%
International	39.2%	36.8%
<b>Total</b>	<b>38.2%</b>	<b>35.6%</b>

Moreover, in France the 2023 Gender Equality Index was 84/100.

► **Measures adopted to promote employment and integration of persons with disabilities**

The Group has decided to structure its policy for promoting the employment and retention of persons with disabilities: the Group held discussions with AGEFIPH leading to the conclusion of a partnership agreement in January 2020 to promote the employment of persons with disabilities. The three-year agreement, which covers all French establishments included in the ID Logistics France socio-economic unit, is designed to go beyond statutory requirements and make disabled inclusion an opportunity for broader consideration regarding the company, its values and its organization. This initiative forms part of the global policy in favor of equal opportunities, promoting diversity and eliminating discrimination espoused by the ID Logistics Group.

The Company has drawn on the support of AGEFIPH to structure its disability policy and make contractual commitments in the following six areas:

- Awareness and training
- Information and communications
- Hiring and inclusion
- Career guidance for disabled employees
- Job retention
- Working with the sheltered sector and disability-friendly companies

Since 2020, awareness-raising campaigns and training for employees and managers on the concept of disability have enabled us to increase the proportion of employees with disabilities in our workforce by 2% to more than 6% in France. This rate has been calculated in accordance with the methodology prescribed by French regulations.

As the AGEFIPH convention has ended and cannot be renewed, France has decided to extend the process by creating a specific disability project and a multidisciplinary, multi-purpose working group tasked with identifying and leveraging best practices in terms of access to employment, communication, training and retention of persons with disabilities.

The best practices identified in this way will be disseminated across the other Group countries.

Meanwhile:

- The Group organized a week of internal communication to coincide with European Disability Employment Week. Employee testimonies, practical information and an interactive quiz designed to inform employees and challenge misconceptions were shared throughout the week.
- The Group organized a DUO Day in November 2023, creating over 40 "ID DUOs" bringing together people with disabilities and volunteers from among the ID Logistics workforce, in all roles and throughout France. The aim was to increase knowledge of the business and to promote coexistence, overcome prejudice and accept diversity and disability.

Moreover, last year we began working with the SIFU Foundation, which promotes the social and professional integration of persons with disabilities. The Foundation runs an inclusive artistic project known as "BecasSuperArte", which aims to promote the artistic development of persons with disabilities. In May 2023, we signed a collaboration agreement with the Foundation to sponsor a disabled artist and grant him a scholarship to pursue his artistic studies during the 2023-2024 academic year. The aim is to promote the employability of persons with disabilities by encouraging their personal and artistic development through culture.

The proportion of Group employees with disabilities has progressed as follows:

	2023	2022
France	4.7%	4.8%
International	0.9%	0.8%
<b>Total</b>	<b>2.1%</b>	<b>2.1%</b>

► **Anti-discrimination policy**

The location of our platforms allows us to offer jobs to people experiencing difficulty in the job market, with priority given to young people aged under 26.

In 2023, over 70 young people from disadvantaged neighborhoods were hired in our warehouses under fixed-

term contracts of more than six months or permanent contracts.

► **Promoting jobs for young people (under 26)**

ID Logistics has stepped up its commitment to work-study contracts and apprenticeships by adopting a structured, proactive policy of helping young people aged under 26

obtain qualifications ranging from the CAP certificate of professional competence to a Master’s degree.

In addition to the section entitled “Enhance the Company’s ability to attract potential”, this structured policy involves:

- identifying and training around 30 mentors to guide future young graduates;
- continued organization of an inclusion day for young people;
- a new housing assistance scheme with no length of service requirement for young people.

Lastly, in line with the initiatives organized over the previous years, all under-26 new hires are assigned a mentor for their first three months of employment.

► **Commitments towards hiring and retaining senior staff (at least 57 years old, and at least 55 for disabled employees), and passing on knowledge and skills to young people:**

- The Company has committed to maintaining the proportion of senior employees among the total workforce over the next three years.
- The retention of senior employees goes hand in hand with measures to promote proper working conditions, a safe working environment and the absence of arduous work. ID Logistics’ endeavors to promote job retention among senior employees are focused on improving working conditions and identifying and preventing arduous work situations: adaptation of work equipment and methods to the needs of senior employees, annual medical check-ups, partnerships with occupational physicians to identify potential incapacity in advance and facilitate return to work after medical leave exceeding 90 days.

- Development of skills and qualifications and provision of training (CPF personal training scheme, redeployment scheme, in-company training plan, VAE recognition of experience, etc.)
- Easing the transition between working life and retirement: assistance by the HR department in preparing the employee’s pension application, organization of training schemes under the DIF system to prepare for retirement
- Organization of tutoring work for employees aged 57 or over who volunteer to pass on knowledge and skills
- ID Logistics won the Grand Prix Humpact 2022 award in the senior employment category for the second consecutive year.
- In 2022, MyChooseCompany ranked the Group in the top 25 in terms of senior happiness and commitment among companies with over 500 employees.

**GRAND PRIX HUMPACT 2022**  
**Gagnant**  
**Emploi des seniors**

The proportion of Group employees over 55 years has progressed as follows:

	2023	2022
France	14.6%	13.1%
International	10.6%	9.9%
<b>Total</b>	<b>11.7%</b>	<b>10.8%</b>

**B. Regional, economic and social impact and relations with stakeholders**

The Group demonstrates its commitment to solidarity, one of its core values, by fostering new initiatives aimed at providing support to employees, customers and suppliers in difficulty and by driving or taking part in initiatives geared towards responsible and sustainable development.

► **Idebra**

In Brazil, so as to improve its local community relations, in 2002 ID Logistics founded a non-profit called “ID Esperanza” (renamed Idebra in 2011), which promotes education for young children and teenagers from the Favela Beira Mar, a slum situated right next to one of the Group’s Rio de Janeiro sites.

This project was managed directly by the Group to ensure that funds were used properly and to control the results. The aim of the project is to bring children back into education by means of a series of educational (tutoring), sporting

(volleyball) and play-oriented (dance, reading, singing and audiovisual media workshops) projects.

The annual cost amounted to 1,200,000 reais, paid in full by ID Logistics.

Since the start of the program more than 3,884 children have benefited from this year-long program, while individual events (sport, dance classes) have brought together almost 24,000 people.

In 2023, a new branch of the charity was set up in Serra following the opening of branches in Extrema (2020), São Paulo (2021) and Sete Lagoas (2022).

In 2023 the program welcomed 369 students, 85% of whom have attended classes until the end of the cycle, double the average for a standard school curriculum in Brazil. 51% of students completed the Logistics Assistant training program

launched in 2014 (39% in 2022). Seven of them were hired by ID Logistics in 2023.

► **Culture and diversity**

In September 2014, ID Logistics France signed a partnership with the Trophée d'Improvisation Culture & Diversité (Improvisation, Culture & Diversity award). This association organizes a nationwide theatrical improvisation competition for college students. Under the program, created in 2010 by Jamel Debbouze and Marc Ladreit de Lacharrière, pupils enrolled in the schools (largely in disadvantaged neighborhoods and rural areas) can learn about and practice theatrical improvisation, a key factor for personal development and social inclusion.

For the 2022/23 season, 122 schools spanning 20 regional education authorities and represented by 2,000 budding young improvisers took part in the Impro Culture & Diversity Trophy thanks to the support of 29 companies and cultural organizations.

► **Career opportunities in logistics**

In the Netherlands, among other things ID Logistics offered opportunities to learn more about the jobs available in logistics, especially forklift handling, for people on social welfare or job seekers with disabilities. The aim was to give them an introduction to our profession and to allow them to consider looking for a job in logistics.

► **Working with children**

In Poland, ID Logistics organizes initiatives to help children: ID Logistics Poland supports two orphanages in Katowice, the Group's historical base in the country, helping them to organize school trips for the children. ID Logistics helped fund a toy collection for children in hospital. Furthermore, ID Logistics took part in a nationwide initiative organized for Christmas by the Noble Gift (Szlachetna Paczka) association and for the Mère Solitaire home for single mothers. Lastly, ID Logistics helped finance a summer trip for children from an orphanage in Katowice.

► **Inclusion of disadvantaged communities**

In Spain, ID Logistics continued to work with the "Cruz Roja" (Red Cross) to support the inclusion of people facing barriers to the employment market.

In Poland, employees helped renovate rooms in an orphanage in Wólka Grodziska.

In Spain, Poland and France, used clothing collection containers have been installed at the warehouses.

In France, ID Logistics works alongside Télémaque, a pioneering charity in the field of equal opportunities and mentoring that helps motivated schoolchildren and apprentices from disadvantaged regions to succeed through a twofold school/company mentoring system. Five ID Logistics employees expressed an interest in becoming mentors and three were ultimately taken on under this partnership. The scheme will be developed further for the next school year.

**C. Tax policy**

In line with its policy of integration into its regional, economic and social environment, ID Logistics has a

transparent and responsible tax policy. Accordingly, ID Logistics has no profit transfer mechanism (via transfer pricing re-invoicing, management fees, Group fees, etc.) and pays its taxes and social security contributions in the countries where it operates.

**D. Other initiatives in defense of human rights**

In addition to the items already mentioned (workplace health and safety, combating discrimination, employee training, etc.) and through the application of the vigilance plan guidelines, as specified in its Code of Ethics, ID Logistics is committed to defending and promoting human rights across the entire scope of its operation. In particular:

- Respect for freedom of political opinion and the right to join trade unions and other associations.
- Respect for diversity.
- Fight against all forms of harassment and discrimination whether sexual or on the basis of race, color, gender, nationality, age, sexual orientation, disability, family situation, religion, political opinion, professional background, level of studies or the specific health condition of each person.
- Promotion of healthy relationships and rejection of civil conflicts.
- Promotion of education.

When these rights are threatened, the Group seeks to enforce international standards and to avoid situations that could be interpreted as tolerating human rights violations. In all cases, the Group seeks to ensure that its equipment and facilities are used in accordance with these rights.

The Group believes that all of the activities mentioned in this report help to safeguard the dignity, well-being and rights of Group employees, their families and the communities in which they live, as well as other persons affected by its operations.

**1.10.2.4 Ethics and corruption**

**A. Uphold procurement best practices**

ID Logistics acknowledges its responsibility in requesting that its suppliers apply the rules imposed by its Code of Ethics, covering the following areas in particular:

- Promotion of and adherence to the ILO fundamental conventions (the Group Code of Ethics recognizes employees' right to form or join a trade union and to negotiate and sign collective agreements, with specific reference to ILO conventions 87 and 98).
- Subcontracting, suppliers and fair commercial practices

The Group has formalized its responsible procurement policy in a "Purchasing and CSR" charter. By recalling the major principles to which ID Logistics is committed and which are included in our code of conduct, ID Logistics formalizes its intention to share its CSR strategy with its suppliers. The code of conduct is based on the following texts: the Universal Declaration of Human Rights (UDHR), the Tripartite Declaration of Principles concerning Multinational Enterprises published by the International Labour Organization (ILO), the ILO Declaration on Fundamental Principles and Rights at Work, the ILO Eight Fundamental Conventions and the OECD Guidelines for Multinational Enterprises. Designed to be signed by all

suppliers working with ID Logistics, this charter covers the following commitments:

- Economic commitments
  - Apply fair, transparent business practices.
  - Ensure confidentiality.
  - Fight corruption.
- Environmental commitments
  - Controlled consumption of energy and natural resources.
  - Management of hazardous products.
  - Waste recycling.
- Staff and social commitments
  - Safeguard the mental and physical health of employees.
  - Child labor.
  - Ensuring legal protection of employees.
  - Fighting discrimination at work.
  - Freedom of association and the right to collective bargaining.

The proportion of suppliers having signed the Purchasing and CSR Charter is 75% in number (% of suppliers having signed the charter) and 74% in value (% of total procurement carried out by suppliers having signed the charter). Chile, Morocco, Indonesia, Réunion Island and Italy are excluded from this calculation.

As a concrete expression of this commitment, the Group renewed its signature of the responsible procurement-supplier relations charter in September 2021.

## Charte

### RELATIONS FOURNISSEURS RESPONSABLES

In Brazil, in October 2023, the first Responsible Procurement Conference was held in order to raise awareness among all the main local suppliers of our CSR policy on procurement and their role in our procurement process.

In France, the implementation of centralized procedures for supplier approval and management guarantees the application of these provisions:

- Purchasing families are managed directly by the Group purchasing department or the purchasing departments at the subsidiaries.
- Supplier approval follows tender procedures, including a checklist for identifying potential CSR risks.
- Regular awareness-raising and training initiatives regarding responsible procurement are organized.
- More specifically, for the provision of temporary staff, which accounts for one third of all purchases and external charges, temping agencies provide their services subject to master agreements that specify their commitments with regard to:
  - ways to improve qualifications of temporary staff allocated, in particular in relation to prevention and safety;
  - general health and safety rules by appropriate information communicated via instructional material

that highlights the importance of equipment (safety shoes, etc.);

- instructing staff assigned about the Group waste treatment policy and procedures implemented at all locations;
- helping the Group to fulfill its obligation to employ disabled people by proposing the résumés and skills of disabled workers registered with the agency.
- The most important suppliers in terms of purchasing volumes undergo an assessment/survey conducted by the purchasing department. These surveys help to ascertain internal stakeholders' (our logistics sites) perception of suppliers. This assessment covers a number of qualitative criteria, including compliance with commitments imposed by the Group. A section on ethics and corruption has been added to this survey.
- Supplier risk mapping: a specific methodology has been set up to assess Group suppliers and implement the necessary actions for high-risk suppliers.

ID Logistics has opted to use a trusted third party to monitor suppliers regarding compliance with mandatory regulations (duty of vigilance, regulatory compliance of suppliers and CSR charter).

The Actradis platform verifies and authenticates documents and guarantees suppliers' legal compliance.

Suppliers are logged in Actradis in accordance with two criteria:

- Amount of annual expenditure in euros excluding tax. The top 100 suppliers in terms of expenditure are logged. In order to categorize suppliers, the purchasing department extracts and processes the SAP data each year.
- Supplier purchasing family. All suppliers whose purchasing family is managed by the purchasing department are logged in Actradis.

The list of suppliers logged in Actradis is reviewed on a regular basis and at least annually depending on the aforementioned criteria.

#### B. Fair competition

The Group's policies establish particular ethical rules for relations with the ID Logistics group's competitors.

Specifically, the Code of Ethics specifies in Article 1.1.2 that "ID Logistics competes aggressively but fairly in the marketplace". We do not engage in illegal acts and unfair competition to win a contract or retain a customer. This requires our employees to behave in a fair and honest manner towards customers, suppliers, competitors and their colleagues. They must respect the rights of all parties."

No non-compliance was flagged in this regard in 2023, nor in the various audits or via the whistleblowing mechanism during previous years.

#### C. Prevent and combat corruption

The Group's policies set out the ethical rules of the ID Logistics group.

Accordingly, Article 2.3.1 of the Code of Ethics provides as follows: "We are committed to the practice of fair competition based solely on the quality of our services and solutions. As such, in view of our commitment to comply

with current anti-corruption legislation, Group directors, senior executives and employees should not offer, promise or give anything to an individual from the public or private sector that could inappropriately influence the judgment of a third party on the services or solutions provided by ID Logistics or by another company, gain illegitimate advantage from a commercial transaction, influence the timing of business transactions or harm the reputation of ID Logistics if the offer, the promise or the payment were publicly disclosed.”

In light of Article 17 of the French Sapin 2 Act, the Group has implemented an anti-corruption protocol based on:

- Corruption risk mapping to identify major risks of corruption and influence-peddling depending on country risk (based on Transparency International’s Corruption Perception Index), the history and maturity of the subsidiary, and any risk factors (the subsidiary’s organization, separation of tasks, type of services offered, type of products managed, local organization and revenues). Following this risk assessment, specific action was taken, including formalizing procedures and stepping up certain controls.
- The Group’s Code of Ethics, updated to include the prevention of corruption, available on the Group website and circulated to employees.
- The implementation of dedicated ethics training, accounting for requirements relating to laws on the duty of vigilance and the Sapin 2 Act. It enables employees to identify risks in their daily work related to human rights, corruption and influence-peddling, as well as the areas

and activities most at risk, and to acquire the right reflexes. This module is disseminated via e-learning.

Delivery began in 2020 with the following results:

- 100% of Group and country Management Committee members received training in 2021.
- On average, around 90% of persons exposed to these risks received training in 2022 and 2023.
- The implementation of centralized procedures for supplier approval and management (see section on responsible procurement). Major purchasing categories (handling equipment, temporary staff, uniforms, IT equipment, etc.) are managed directly by the Group or individual subsidiary’s purchasing department. Suppliers are approved through tenders coordinated at Group or national level, approved by Group senior management or by the country management team. Regular awareness-raising and training initiatives regarding responsible procurement are also organized.
- The most important suppliers in terms of purchasing volumes undergo an assessment/survey conducted by the purchasing department. These surveys help to ascertain internal stakeholders’ (our logistics sites) perception of suppliers. This assessment covers a number of qualitative criteria, including compliance with commitments imposed by the Group. A section on ethics and corruption has been added to this survey and suppliers deemed to be at risk are audited.
- Lastly, the Group has set up a Group-wide whistleblowing system via SIGNALEMENT.NET, which meets the requirements of the French Sapin 2 Act.

## 1.10.3 Taxonomy

In accordance with the European Green Taxonomy Regulation, ID Logistics has listed its activities considered as contributing substantially to climate change mitigation.

### ► Eligible activities

An economic activity is considered eligible if it is included in the list of activities identified as likely to make a substantial contribution to the first two of the six environmental objectives listed below:

- Climate change mitigation;
- Climate change adaptation;
- Sustainable use and protection of water and marine resources;
- Transition to a circular economy, waste prevention and recycling;
- Pollution prevention and control;
- Protection and restoration of biodiversity and ecosystem.

Eligible activities are restricted to purchasing, financing, credit and operations

- Rail freight transport (activity 6.2).
- Transport by motorbikes, passenger cars and light commercial vehicles (activity 6.5): vehicles designated as belonging to the categories and for commercial vehicles.
- Road freight transport (activity 6.6).
- Building acquisition and property (activity 7.7).

### ► Aligned activities

A business activity is considered to be aligned if it (i) makes a substantial contribution and (ii) complies with the Do No Significant Harm (DNSH) principle.

- Freight rail transport (activity 6.2): all activities are aligned with the substantial contribution criteria and comply with the DNSH principle.

- Transport by motorbikes, passenger cars and light commercial vehicles (activity 6.5).
- Freight transport services by road (activity 6.6): excluding subcontracted transport operations where the Group has no means of verifying the alignment criteria, as well as transport operations carried out with vehicles not covered by stage E of the Euro VI standard.
- Acquisition and ownership of buildings (activity 7.7):
  - The following were discounted:
    - buildings outside Europe for which the Group has no means of verifying the alignment criteria;
    - buildings exposed to climate risks (DNSH criterion). This verification was carried out by cross-checking the information from the WWF Water Risk Filter and the R4RE (resilience for real estate) tools on a sample representing over 70% of CAPEX and revenues;
    - buildings built before 2020 that do fall under Class A.
  - The included buildings all benefit from an energy performance management system.

### ► Scope

- The revenue, capital expenditure and operating expenses in question cover all the Group's activities corresponding to the scope of the companies under its control.
- The financial data is taken from the financial statements for the year ended December 31, 2023. Revenue and capital expenditure can therefore be reconciled with the financial statements.
- Operating expenses were negligible (€141 million vs. €2,313 million) and therefore not included.

	Revenues		Capital expenditure	
	Amount (€000)	%	Amount (€000)	%
<b>Activities eligible for the taxonomy</b>	<b>927,320</b>	<b>34%</b>	<b>278,030</b>	<b>65%</b>
Aligned activity	362,359	13%	163,767	38%
Non-aligned activity	564,961	21%	115,063	27%
<b>Activities not eligible for the taxonomy</b>	<b>1,820,105</b>	<b>66%</b>	<b>147,788</b>	<b>35%</b>
<b>Total</b>	<b>2,747,425</b>	<b>100%</b>	<b>425,818</b>	<b>100%</b>

Financial data is taken from the 2023 financial statements.

Since the regulations are changing, the Group's analysis will be adapted in line with future changes.

Accounting Year N	Year		Substantial contribution criteria							Do No Significant Harm (DNSH) criteria (h)							Business category

## 1.10.4 Progress report on Ambition 2030

Objective	2023 progress report
• 100% of country Management Committee members and 80% of managers trained in ethics	Achieved
• 80% of suppliers representing 95% of purchases are signatories to the Purchasing and CSR Charter	75% of suppliers accounting for 74% of revenues
• 20% increase in employment rate of people with disabilities vs. 2020	+2%
• 40% reduction in frequency rates vs. 2018 (ID Logistics and temporary staff)	-37%
• 40% reduction in severity rates vs. 2018 (ID Logistics) /15% reduction vs. 2021	-47%
• 70% of site managers appointed by internal promotion	63%
• 85% of waste recycled	66%
• 40% reduction in Scope 1&2 emissions from logistics activities vs. 2018 (CO <sub>2</sub> /pallet)	-18%
• 20% reduction in energy intensity in logistics activities (kWh/sqm)	-15%
• 75% of sites having undertaken a CSR initiative in collaboration with their customer	69%
• 100% of countries having undertaken an initiative with local communities	70%

(1) including maternity leave, temporary fixed-term contracts or equivalent

(3) Excluding redundancies.

(4) Number of lost time industrial accidents (excluding travel accidents) during the year over actual payroll hours times 1,000,000.

(5) Number of days lost due to industrial accidents (excluding travel accidents and extended absences or relapses arising from industrial accidents in prior years) over actual payroll hours times 1,000.

(6) Training hours include employees' statutory training entitlement (DIF) but exclude vocational qualification periods.

(8) Shipped pallets are pallets shipped from our warehouses.

(9) The emission factors applied are based on the ADEME "Bilan Carbone" method (combustion for Scope 1, production for Scope 2).

(10) Scope 3 International – new categories added (GRI 305-2) corresponds to commuter journeys and forklifts

## 1.10.6 Reported information

### GRI 101.9

In 2023, within the historical reporting scope:

- The entire scope of consolidation is covered apart from Morocco and the UK, the latter representing a non-material portion of the reporting scope. Likewise, Spedimex, consolidated in June 2023, is excluded from the scope for 2023.
- As in previous years, sites included for environmental reporting must have operated for at least six months of the year and have six months of data. Sites that have operated for at least 6 months but have less than 6 months of data impact the indicator's coverage (which is calculated on the number of sites). Unless otherwise indicated in the report, the indicators have 100% coverage.

Consolidation methods applied to calculate the reported indicators are the same as the accounting principles described under Note 4 to the consolidated financial statements.

- Industrial accident indicators reported under 1.c) are calculated based on the following data:
  - Actual hours worked as recorded for the pay period of the year in question for all ID Logistics employees, determined on the basis of the contractual hours of each employee plus overtime, minus all absences.
  - The number of days lost due to industrial accidents (excluding travel accidents), based on a "prevention" approach, i.e. excluding extended absences or relapse related to industrial accidents in prior years.
  - The number of lost time industrial accidents (excluding travel accidents) during the year.
- Absenteeism is calculated by dividing the total number of calendar days off due to accidents, sickness and other unauthorized absences by total payroll calendar days.
- The dismissal rate excludes redundancies.
- The voluntary departure rate is calculated by dividing the number of voluntary leavers in the year by the number of permanent employees at December 31, 2022.

- The waste recycling rate concerned mainly cardboard, packaging, film and paper waste at operating sites (excluding head office and other administrative offices).
- For the calculation of CO<sub>2</sub> emissions
  - Scope 1 emissions are direct combustion emissions from warehouse fixed installations and cooling systems and vehicles managed directly by ID Logistics.
  - Scope 2 emissions are indirect emissions related to electricity consumption by warehouses and vehicles managed directly by ID Logistics.
  - Scope 3 emissions comprise other indirect emissions:
    - Emissions linked to purchases of cardboard and plastic film consumables.
    - Emissions related to building construction (added to the standard in 2021).
    - End-of-waste emissions (added in the standard in 2021).
    - IT-related emissions (added to the standard in 2021).
    - Emissions related to water consumption (added to the standard in 2021).
    - Upstream and downstream emissions from energy consumption (added to the standard in 2021).
    - Subcontracted transport emissions (added to the standard in 2022).
    - Emissions related to the forklift life cycle.
    - Employee commuting emissions (added to the standard in 2023).
- The conversion factors applied (from kWh, kg or liters to kg CO<sub>2</sub> equivalent) have been updated with the latest ADEME "Base Carbone" figures issued in March 2023.

Issues such as food waste, the elimination of food insecurity, respect for animal welfare, measures to encourage physical exercise and sport and the promotion of responsible, fair and sustainable food have little bearing on the Group's business activities. They are not included in the non-financial performance indicators.

## 1.10.7 Report issued by one of the statutory auditors, appointed as independent third-party agency, on the verification of the consolidated statement of non-financial performance presented in the Group management report

To the General Meeting of Shareholders,

In our capacity as Statutory Auditor of ID Logistics (hereinafter, the "Entity") appointed as independent third-party agency ("Third Party"), accredited by Cofrac Inspection Accreditation 3-1080, the scope of which may be consulted at [www.cofrac.fr](http://www.cofrac.fr), we have carried out work with the aim of formulating a reasoned opinion expressing a conclusion of moderate assurance on the historical information (observed or extrapolated) in the statement of non-financial performance prepared in accordance with the entity's procedures (hereinafter the "Guidelines") for the fiscal year ended December 31, 2023 (hereinafter the "Information" and the "Statement" respectively), as presented in the Group's management report in accordance with the provisions of Articles L. 225-102-1, R. 225-105 and R. 225-105-1 of the French Commercial Code.

### Conclusion

Based on the procedures we performed, as described in the section entitled "Nature and scope of our review procedures", and the information we obtained, we have identified no material misstatements that cause us to believe that the consolidated statement of non-financial performance does not comply with the applicable regulatory requirements and that the Information, taken as a whole, is presented fairly in accordance with the Guidelines.

### Comment

Without prejudice to the foregoing conclusion and in accordance with the provisions of Article A. 225-3 of the French Commercial Code, we hereby submit the following comment: the indicator related to scope 3 GHG emissions presents a high degree of uncertainty inherent to the nature of emissions, which the chosen method (EcoTransIT, which makes source assumptions and uses general emission factors) does not completely resolve.

### Preparation of the Statement

The lack of a generally accepted and commonly used framework or established practices on which the Information can be evaluated and measured allows for the use of different, but acceptable, measurement techniques that may affect comparability across entities and over time.

Therefore, the Information should be read and understood with reference to the Guidelines, the material provisions of which are presented in the Statement (available on the website or upon request from the entity's registered office).

### Limitations inherent in the preparation of information related to the Statement

As mentioned in the Statement, the Information may be subject to the uncertainty inherent to the current status of scientific or economic knowledge and the quality of the external data used. Certain information is affected by the methodological choices, assumptions and/or estimates made in preparing it and presented in the Statement.

### Company's responsibility

The Group's management is responsible for:

- selecting or establishing appropriate criteria for the preparation of the Information;
- preparing a Statement pursuant to statutory and regulatory provisions, including a presentation of the business model, a description of the main non-financial risks, a presentation of the policies implemented with respect to these risks as well as the results of these policies, including key performance indicators and, additionally, the information provided for in Article 8 of Regulation (EU) 2020/852 (green taxonomy);
- preparing the Statement using the entity's Guidelines as set out above; and
- implementing the internal control procedures it deems necessary to ensure that the Information is free from material misstatement, whether due to fraud or error.

The Statement was prepared by the Board of Directors.

## Responsibility of the Statutory Auditor appointed as independent third party

Based on our work, our responsibility is to formulate a reasoned opinion expressing a limited assurance conclusion on:

- the compliance of the Statement with the provisions of Article R. 225-105 of the French Commercial Code;
- the fair presentation of the historical information (observed or extrapolated) provided pursuant to Article R. 225-105 I(3) and II of the French Commercial Code, i.e. the results of policies, including key performance indicators, and measures relating to the main risks.

As it is our responsibility to form an independent conclusion on the Information as prepared by Management, we are not permitted to be involved in the preparation of this Information, as this could compromise our independence.

It is not our responsibility to express an opinion on:

- the entity's compliance with other applicable statutory and regulatory provisions, in particular with regard to the information required by Article 8 of Regulation (EU) 2020/852 (green taxonomy), the vigilance plan and the prevention of corruption and tax evasion;
- the fair presentation of the information provided under Article 8 of Regulation (EU) 2020/852 (green taxonomy);
- the compliance of products and services with applicable regulations.

## Regulatory provisions and applicable professional standards

We conducted the work described below in accordance with the provisions of Articles A. 225-1 et seq. of the French Commercial Code, the professional guidance issued by the French Institute of Statutory Auditors (Compagnie Nationale des Commissaires aux Comptes, CNCC) relating to this work, particularly the CNCC's technical opinion (work of the statutory auditors - work of the independent third-party agency (OTI) - statement of non-financial performance), our audit program provided at the start of the assignment, and international standard ISAE 3000 (revised)[1].

[1] ISAE 3000 (revised) - *Assurance engagements other than audits or reviews of historical information*

## Independence and quality control

Our independence is defined by Article L. 822-11 of the French Commercial Code and the French Code of Ethics for Statutory Auditors. In addition, we have introduced a quality control system including documented policies and procedures designed to ensure compliance with applicable laws and regulations, ethical rules and the professional guidance issued by the French Institute of Statutory Auditors relating to this activity.

## Means and resources

Our review was conducted by four people over a period of around four weeks between December 2023 and March 2024.

In conducting our work, we called on assistance from our corporate social responsibility and sustainable development experts. We conducted around ten interviews with the people responsible for preparing the Statement, representing in particular the following departments: human resources, health and safety, environment and logistics.

## Nature and scope of review procedures

We planned and carried out our work taking into account the risks of material misstatement of the Information.

We believe that the procedures applied based on our professional judgment allow us to issue a moderate level of assurance:

- We familiarized ourselves with the business activity of all the entities included in the consolidation scope and with the main risks presented.
- We assessed the appropriateness of the Reference Data in terms of its relevance, completeness, accuracy, objectivity and clarity, taking industry best practices into consideration where appropriate.
- We verified that the Statement covers each category of information required under Article L. 225-102-1 III of the French Commercial Code relating to social and environmental issues, respect for human rights and the fight against corruption and tax evasion, and includes, where applicable, an explanation of the reasons for the absence of information required under paragraph 2 of Article L. 225-102-1 III of the French Commercial Code.
- We verified that the Statement includes the information required by Article R. 225-105 II of the French Commercial Code, where such information is relevant to the main risks.
- We verified that the Statement presents the business model and a description of the main risks relating to the business activity of all the companies included in the consolidation scope, including, where relevant and proportionate, the risks generated by its business relations, products or services as well as policies, measures and outcomes, including key performance indicators relating to the principal risks.
- We verified that the Statement includes a clear and reasoned explanation of the reasons for the absence of a policy covering one or more of these risks, in accordance with Article R. 225-105 I of the French Commercial Code.
- We consulted documentary sources and conducted interviews in order to:
  - assess the process of selecting and validating the main risks and the consistency of the results and key performance indicators used with regard to the main risks and policies presented, and
  - corroborate the qualitative information (actions and outcomes) that we considered most important [1]. Our work was carried out at the level of the consolidating entity.
- We verified that the Statement covers the consolidated scope, i.e. all entities within the scope of consolidation in

- accordance with Article L. 233-16 of the French Commercial Code.
- We obtained an understanding of internal control and risk management procedures the entity has put in place and we assessed the data collection process aimed at ensuring the completeness and fair presentation of the Information;
  - For the key performance indicators and other quantitative results that we considered most important<sup>[2]</sup>, we implemented:
    - analytical procedures that consisted in verifying the correct consolidation of collected data as well as the consistency of changes thereto;

- substantive tests, on the basis of surveys or other selection methods, that consisted in verifying the proper application of definitions and procedures and reconciling data with supporting documentation. These procedures were conducted on a selection of contributing entities [3] and covered between 16% and 76% of the consolidated data for these tests;
- We assessed the overall consistency of the Statement in light of our knowledge of all the entities included in the scope of consolidation.

The procedures performed in the context of a moderate level of assurance assignment are less extensive than those required for a reasonable level of assurance carried out in accordance with the professional guidance issued by the French Institute of Statutory Auditors; a higher level of assurance would have required more extensive audit work.

Investors are invited to take into consideration all the information contained in the Universal Registration Document, including the risk factors described in this chapter, before deciding to subscribe for or purchase shares in the Company. The Company has reviewed the risks that could have a material adverse impact on the Group, its business activity, financial position, earnings, outlook, image or ability to meet its objectives. The risks deemed material and specific to the Company as of the Universal Registration Document date are presented below.

However, investors' attention is drawn to the fact that the list of risks and contingencies described below is not exhaustive. Other known or unknown risks which, as of the Universal Registration Document date, are not considered likely to have a material adverse effect on the Group, its business activity, financial position, earnings, image or outlook may exist or become major factors that could have a material adverse effect on the Group, its business activity, financial position, earnings, growth, image or outlook.

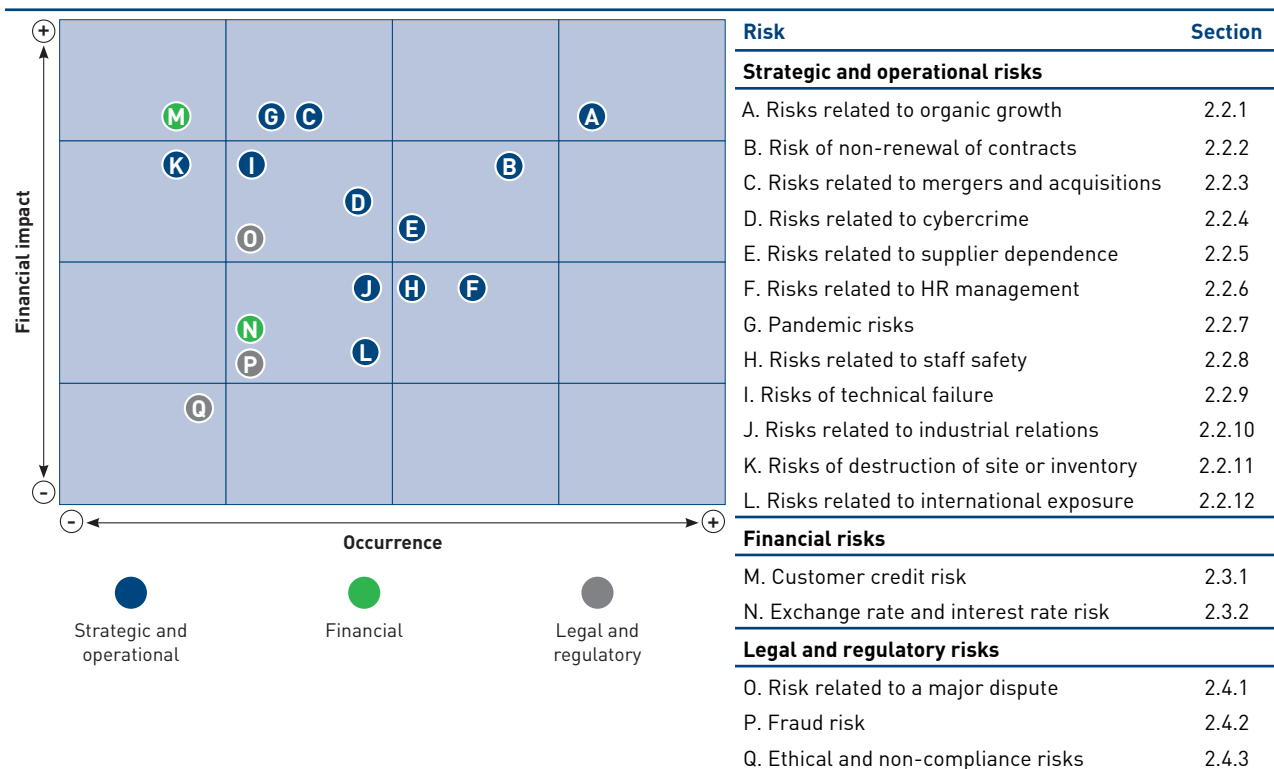

## 2.1 RISK MAPPING AND ASSESSMENT

Risks impacting the ID Logistics Group are assessed on a "net risk" basis, i.e. including the impact of risk management measures, depending on probability of occurrence and their impact in terms of finance, image, etc.

They are classified on four levels:

- Occurrence scale: low, medium, high, significant.
- Impact scale: low, medium, high, significant.

The risks assessed according to these levels are classified by category and are presented in each category in no particular order of priority. Within each risk category, the risk factors that the Company considers most significant at the Universal Registration Document date are listed first. Any new circumstances within or outside the Group could therefore alter this order of importance in the future.

## 2.2 STRATEGIC AND OPERATIONAL RISKS

### 2.2.1 Risks related to organic growth

The Group's business has grown rapidly since its foundation, mainly through organic growth driven by:

- a price effect related to the contractual indexation of prices under existing contracts, generally based on the inflation rate;
- a volume effect related to optimizing the volume of goods handled by existing warehouses, although the Group's dedicated customer-specific logistics policy means that maximum site capacity is quickly reached by the customer and the volume effect is therefore limited;
- the launch of new sites after winning calls for tender initiated by customers;
- increased market share across new segments and services;
- the establishment of operations in new regions.

While the Group has acquired considerable experience in starting up new contracts, this type of growth may involve major costs during the launch phase, related to the start of operations on a new site or the takeover of staff, equipment and information systems on existing sites. This is generally the case during the first 24 months of operation, this being

the length of time required to reach maturity in terms of productivity. The first 12-18 months of this period are generally loss-making.

The Group is also growing internationally, mainly by supporting its existing customers as part of their own international growth. Besides the costs of launching the first site in a new country (see above), establishing operations in a new country requires setting up a local administrative structure and management team to manage operations in the country. Under these conditions, establishment in a new country involves overheads that cannot be covered by operations. In addition, subsequent contracts with new customers can entail costs that weigh heavily on the subsidiary's financial results until critical mass is achieved. Finally, throughout this growth period the Group remains locally dependent on a limited number of contracts. The loss of a major contract in a given country could pose a threat to the Group's operations in that country.

New site launches over the past five years:

	2019	2020	2021	2022	2023
Number of new sites	21	18	22	16	22

An acceleration in organic growth or new site launches, or the Group's inability to manage its organic growth, or unexpected difficulties encountered during its expansion

could have an adverse impact on its business activity, earnings, financial position, growth, image and outlook.

### 2.2.2 Risk of non-renewal or early termination of customer contracts

Logistics service contracts are entered into with customers for a fixed term at the end of which they are submitted for renewal via a call for tenders procedure. Generally speaking, the first contract is entered into for a term of 5-6 years, then renewed for subsequent 3-year terms. Over 90% of contracts are renewed. Given these various cycles, the average residual term of customer contracts outstanding is currently around 4 years, while 20-25% of revenues are renewed every year.

Furthermore, customers have the right to terminate contracts early in the event of repeated and serious non-compliance with contractual quality indicators.

To limit the risks, the Group prioritizes the leasing of warehouses and handling and computer equipment for its logistics contracts, subject to lease terms and termination

conditions identical to those of the customer contract. If it is not possible to lease specific equipment and the Group incurs capital expenditure costs, these costs are included in the price of services invoiced to the relevant customer during the contract term.

When the contract ends, particularly in the event of early termination by the customer, the Group may incur rental and maintenance costs for space that is no longer used, along with costs for operating staff dismissals if they are not taken on by the new operator or the Group cannot reassign them to other operations.

The occurrence of these risks would have an adverse impact on the Group's financial position, earnings, growth, image and outlook.

### 2.2.3 Risks related to mergers and acquisitions

Knowledge of the customer's business sector and products plays a key role in winning calls for tenders for logistics services. Visits to sites operated by ID Logistics in a prospective customer's business sector may help convince

the prospect of the Group's ability to manage its logistics operations. Without such knowledge and a specific customer portfolio, the chances of winning a call for tenders would be more limited.

## 2

### RISK FACTORS STRATEGIC AND OPERATIONAL RISKS

Acquisitions aimed at acquiring important sector customers are therefore essential in order to support organic growth and expansion into new sectors. Accordingly, around 39% of Group revenues in 2023 came from acquisitions completed over the last ten years (CEPL, Logiters, Jagged Peak, GVT, Colisweb, Kane Logistics, Spedimex).

However, the Group cannot guarantee its ability to identify, value, acquire and integrate the best acquisition targets. By their very nature, such operations also involve risks related in

particular to the valuation of the assets and liabilities acquired, the integration of staff, business activities and technologies (including information systems) and the development of relations with the relevant customers and partners.

The Group's inability to manage its acquisitions or unexpected difficulties encountered during its expansion could have an adverse impact on its business activity, earnings, financial position, growth and outlook.

#### 2.2.4 Risks related to cybercrime

Besides the risk of internal information system failure, the Group is exposed to the growing risk of cybercrime. The potential impacts of cyberattack include theft, loss or leakage of personal, confidential or strategic operating data or partial or total system crashes caused by ransomware.

The Group has engaged a cybersecurity partner to monitor cyberthreats and has carried out penetration tests and audits. It uses automated vulnerability analysis tools.

It has also raised awareness among all Group employees through an IT Charter for users and administrators, awareness-raising campaigns, phishing tests and the definition and roll-out of an information system security policy (ISSP).

Furthermore, the Group has taken out cyber insurance to cover the costs it may incur and/or be ordered to pay in the event of a breach of personal data in its possession, policyholder information systems/data or third-party data.

The Group has implemented a number of measures to comply with data privacy legislation (GDPR), including the formal establishment of a processing register and data privacy policy, along with impact analyses of sensitive areas.

Despite the considerable amounts invested in protecting information systems, the inability to conduct daily operations or the loss or disclosure of sensitive data could disrupt Group operations and have an adverse impact on its financial position, earnings, outlook, image and reputation.

#### 2.2.5 Risks related to supplier dependence

The Group may employ external service providers (temporary employment agencies, equipment rental firms, IT subcontractors, automated equipment manufacturers, etc.) in conjunction with its contract logistics and ancillary service activities.

In order to meet its needs, the Group regularly controls the quality of its subcontractors and maintains a large and diversified subcontractor database. As of the Universal Registration Document date, the Group is not dependent on any given external supplier in such a way that this might represent a risk to the smooth functioning of the Group's operations.

However, specific technical solutions (e.g. automation or warehouse management software) may be offered by a limited number of specialist suppliers. If such suppliers are unable to deliver all or part of their solutions on time, this could lead to project delays or cancellation, which could have an adverse impact on the Group's financial position, earnings, growth, image and outlook.

Furthermore, the Group's operations require a considerable number of temporary employees (34% of the headcount in

2023). These employees are hired through a number of specialized leading employment agencies with which the Group has master agreements, enabling it to procure additional personnel at any given moment in accordance with activity peaks.

The temporary employment agencies are regularly controlled or invited to bid in tender offers organized by the Group. During these controls and tender offers, the Group pays particular attention to the training, safety and security procedures followed by these agencies and to procedures relating to compliance with legislation (Labor Code, immigration law, operating authorizations, approvals, etc.). Temporary staff receive the same training and are subject to the same safety and security rules as permanent ID Logistics staff.

However, the Group cannot rule out the possibility of incorrect application of procedures by the temporary employment agencies it uses, and cannot guarantee that temporary employees will carry out their assignments in a satisfactory manner. The materialization of such risks could have an adverse impact on the Group's financial position, earnings, growth and outlook.

## 2.2.6 Risks related to HR management

In order to manage and grow the Group's business activities, qualified technicians and managers must be recruited and retained. The success of the Group's operations depends in particular on the experience and commitment of the management team and the employees. The Group's ability to retain its employees, to attract, integrate and retain new high-quality staff and to train and promote promising employees is an important factor.

The Group has implemented an active human resources strategy in France and abroad aimed at identifying, attracting, retaining and updating the skills and competencies required for its operations and growth in a highly competitive environment. The Group has therefore formed partnerships

with various schools. It has also adopted succession plans for key employees, annual appraisal schemes, people reviews for a number of executives and employee appraisals for all on-site staff, along with training courses. If the Group lost the services of one or more of its managers or key personnel, the Group considers that most responsibilities held by such individuals could be assumed by other persons, if necessary after a period of adaptation and/or training for the vacant jobs. However, the departure or long-term absence of one or more such persons could have an adverse impact on the Group's strategy or business activity, on the implementation of new projects required for its growth and, consequently, on the Group's business activity, financial position, earnings, growth, image and outlook.

## 2.2.7 Pandemic risks

The outbreak of a contagious disease affecting multiple countries worldwide, such as COVID-19 or SARS, could seriously disrupt the Group, its customers and some of its suppliers' business.

- Certain customers' business could increase sharply in the event of panic buying (food, hygiene, health, e-commerce for example). In this case, the Group may find itself understaffed and unable to increase its workforce, particularly in the event of illness or travel restrictions. Productivity may also decline due to the added complexities of certain processes (disinfection, taking temperatures, social distance, etc.).
- Meanwhile, other customers could see a sharp decline in business (e.g. furniture, textiles, automotive), in which case the Group may find itself overstaffed.
- The Group may be dependent on specific technology suppliers. Operational difficulties experienced by such suppliers due to a pandemic would increase this risk of dependency.

Nearly 70% of the Group's business is generated by consumer goods, food retail, hygiene, healthcare and e-commerce,

which recorded a significant increase in activity during the COVID-19 crisis and helped offset the slowdown or shutdown of other activities. Temporary staff also account for an average of 34% of its workforce, and the Group is able to transfer staff from one site to another and limit the impacts of major variations in customer volumes. Finally, the Group has a diverse global foothold between France (30% of revenues in 2023), Europe (47%), North America (14%) and the Rest of the World (9%), mainly in South America, which has also helped offset the differing situations in these regions (intensity, time, individual government responses).

However, the outbreak of a pandemic could adversely impact the Group's business activity, earnings, financial position, growth, image and outlook. The extent of these impacts would depend on the scale and duration of the pandemic, the Group's ability to share the burden of these impacts with its customers, as well as governmental measures taken in response to such a situation (travel restrictions, overstaffing, regulatory relaxations in case of understaffing, access to liquidity, etc.).

### 2.2.8 Risks related to staff safety

Logistics operations are handling operations which, even if they are considerably supported by mechanical and technological resources, nevertheless remain highly manual. Therefore, there is a risk of physical injury to employees. The Group implements preventive measures and monitors the occurrence of industrial accidents with a view to reducing their frequency and severity. It regularly raises awareness among staff and organizes training on safety, handling and posture.

Despite the measures implemented, a deterioration in Group staff safety conditions could result in higher insurance premiums or social security charges and limit the Group's attractiveness as an employer. Such a situation would have an adverse impact on the Group's financial position, earnings, growth, image and outlook.

### 2.2.9 Risks of technical failure

In conjunction with its operations, the Group uses information systems and a certain amount of automated equipment, in particular to manage and safeguard its daily information flows. Such equipment and systems are used for the organization of logistics operations, customer billing, management of operating staff, financial control of operations and communication to customers of the information required for their inventory management.

The Group pays particular attention to the preventive maintenance of automated equipment and the storage of replacement parts and has implemented call-out and repair agreements with third parties. Furthermore, the Group ensures data back-up and rapid data restoration in case of an incident. All emergency and back-up networks are duplicated and managed from two separate cleanrooms outsourced to a

leading service provider. Furthermore, the Group has defined continuity and recovery plans.

In order to optimize assets and minimize risks, the management of information systems for most of the overseas subsidiaries is centralized and carried out directly via staff and assets based in France.

Lastly, disaster recovery testing is regularly conducted in order to check that the procedures in place are effective.

Nevertheless, in view of the flow of information managed by the Group, if the equipment and information systems failed or if certain databases were destroyed or damaged for any reason whatsoever, the Group's operations could be disrupted. As a result, the Group's financial position, earnings and image could be adversely impacted.

### 2.2.10 Risks related to industrial relations

Despite the care applied by the Group with regard to its industrial relations management, it cannot rule out the possibility of deterioration in industrial relations or disruption in labor. The Group's business activities could be disrupted by strikes, employee claims and other labor actions.

Business interruptions due to industrial action could impact the Group's business activity, financial position, operating earnings and image.

### 2.2.11 Risks of destruction of site or inventory

The Group is exposed to the risk of destruction or loss of goods or equipment, particularly due to fire, extreme weather conditions (flood, wind) or natural disaster (earthquake).

The Group installs appropriate fire safety and prevention equipment on its sites, which at a minimum complies with applicable regulations. Group sites are also protected by security personnel and access control systems. In addition, the Group's organizational structure is sufficiently responsive to enable it to transfer the operations of a

disabled site to a new site within a few days. Buildings and equipment leased by ID Logistics, along with goods, are covered by specific insurance policies for damage, third-party liability, etc.

Despite the measures taken, the occurrence of these risks intrinsic to the Group's logistics business could delay or halt the performance of certain contracts and result in higher insurance premiums or social security charges, which would have an adverse impact on the Group's financial position, earnings, growth, image and outlook.

## 2.2.12 Risks related to international exposure

Part of the Group's international operations are carried out in fast-growing countries, where the Group is primarily exposed to the following risks: GDP volatility, relative economic instability (leading to major fluctuation in inflation, interest rates or exchange rates, for example) and rapid or major changes in local regulations (taxation, exchange controls, foreign investors, etc.). More specifically, regarding risks of

exposure to areas of conflict or under embargo, ID Logistics has no operations in Ukraine and the Russian business discontinued in Q4 2022 accounted for only 1% of Group revenues.

All of these factors could impact the Group's financial position, earnings, growth, image and outlook.

## 2.3 FINANCIAL RISKS

### 2.3.1 Credit risk related to customer default

ID Logistics specializes in *dedicated* as opposed to *multi-customer* contract logistics: each warehouse is dedicated to a single customer, meaning that the costs of organization, processes, equipment and the entire real estate surface area used are passed on to the customer under a specific logistics service contract per customer and per site.

The Group prioritizes the leasing of warehouses and handling and computer equipment for its logistics contracts, subject to lease terms and termination conditions identical to those of the customer contract. If it is not possible to lease specific equipment and the Group incurs capital

expenditure costs, the cost is included in the price of services invoiced to the relevant customer.

In the event of bankruptcy or insolvency of a customer for which the Group has outstanding commitments, the Group may incur rental and maintenance costs for space that is no longer used, exceptional impairment charges on equipment and facilities installed for the customer and the costs of dismissing operating staff.

The occurrence of such risk would have an adverse impact on the Group's financial position, earnings, growth, image and outlook.

### 2.3.2 Exchange rate and interest rate risk

#### ► Exchange rate risk

The Group publishes its consolidated financial statements and carries out most of its operations in euros. The Group's subsidiaries situated outside the eurozone trade largely in local currency, which limits the Group's exposure to exchange rate fluctuations.

Assets excluding goodwill net of liabilities excluding shareholders' equity denominated in non-euro currencies amounted to net assets of €168.7 million as of December 31, 2023 and mainly consisted of net assets of €69.2 million denominated in US dollars, €57.1 million in Polish zloty and €17.5 million in Brazilian reals (see Note 15 to the consolidated financial statements in section 4.8 of the Universal Registration Document).

The Group periodically reappraises its exposure to exchange risk and, as of December 31, 2023, these amounts were not subject to any specific hedging.

As of the Universal Registration Document date, the Group considers that its exposure to exchange rate risk is limited, however cannot rule out the possibility of a major increase in international business or major fluctuations among some currencies heightening its exposure to this risk.

#### ► Interest rate risk

As of December 31, 2023, gross borrowings (in the form of bank loans or factoring) stood at €523.8 million and were mainly contracted by French legal entities.

At this date, 92% of the Group's borrowings before interest rate hedges are subject to floating interest rates. To provide against an adverse movement in interest rates, the Group has adopted a hedging strategy in the form of swaps (between floating and fixed rates) or caps (floating rate caps). After hedges, 75% of the Group's borrowings as of December 31, 2023 were at floating rates.

As stated under Note 15 to the 2023 Group consolidated financial statements in section 4.8.1 "2023 Group consolidated financial statements", a 1% average increase in interest rates would result in a €3.9 million increase in interest expense under net financial items. As of the Universal Registration Document date, the Group considers that its exposure to interest rate risk is limited, however cannot rule out the possibility of a major fluctuation in interest rates heightening its exposure to this risk.

## 2.4 REGULATORY AND LEGAL RISKS

### 2.4.1 Risk related to a major dispute

During the normal course of its business, the Group is exposed to legal risks in view of its status as an employer, taxpayer, service provider and purchaser of goods and services.

Accordingly, the Group may be involved in administrative, judicial or arbitration proceedings involving material claims or potential penalties imposed on the Group.

Furthermore, provisions recognized in the accounts based on Group estimates of the risk arising from administrative, judicial or arbitration proceedings could insufficiently cover actual expenses following the issue of the final ruling. Irrespective of the merits of such rulings, this situation could have a material impact on the Group's business activity, financial position, earnings, image or outlook.

### 2.4.2 Fraud risk

ID Logistics is exposed to the risk of fraud of internal (e.g. collusion between employees, theft or misappropriation of goods, false statements, circumvention of limits) or external origin (e.g. usurpation of identity, forgery, misappropriation of bank account details).

To limit the risks of fraud, the Group implements internal control procedures such as setting limits on powers, rules

for segregating tasks, counter-appeal procedures, a supplier approval procedure, inventory monitoring and security audits, etc. It regularly raises awareness among staff through email campaigns and training. However, the Group cannot rule out the possibility that an act of fraud could have a material impact on the Group's business activity, earnings or outlook.

### 2.4.3 Ethical and non-compliance risks

Unethical conduct by Group employees (particularly with regard to human rights violations, health and safety) or a breach of applicable laws and regulations (in terms of corruption or fraud) could expose ID Logistics to criminal and civil sanctions and damage its reputation and share value.

The Group's Code of Ethics, which applies to all of its employees, enshrines ID Logistics' commitment to integrity and compliance with applicable legal requirements, and is founded on a "zero tolerance" approach in the matter. In order to fulfill the regulatory requirements and, in particular, the requirements of the French Sapin 2 Act, the Group has implemented an ethics and anti-corruption protocol comprising a number of measures:

- risk mapping regarding corruption and influence peddling;
- a set of disciplinary sanctions;
- a whistleblowing system made available to all employees and third parties to report unethical behavior;

- ethics awareness-raising initiatives: target communications, training, e-learning, Purchasing and CSR Charter;
- controls, audits and procedures (policy on gifts, donations and sponsorship, supplier approval procedure, etc), supplier assessment including specific measures applicable to sensitive suppliers (ethics clause, audit clause, etc).

Despite this program, the Group cannot guarantee that its employees, suppliers, subcontractors or other business partners will comply with the Group's code of conduct and ethical standards or with applicable statutory regulations.

## 3.1 BOARD OF DIRECTORS' CORPORATE GOVERNANCE REPORT

Pursuant to Articles L. 225-37 and L. 22-10-10 of the French Commercial Code, your Board of Directors prepared this report on the corporate governance of your Company.

This report was prepared based on information provided by several departments, notably the Group legal affairs and

finance departments, and then passed to the Audit Committee for discussion and review before being approved by the Board of Directors on March 13, 2024 and subsequently submitted to the statutory auditors.

### 3.1.1 Capital stock

#### a) Amount of capital stock

At December 31, 2023, the Company's capital stock amounted to €3,086,664.00 divided into 6,173,328 fully paid-up shares with a par value of €0.50 each. As of the Universal

Registration Document Date, the Company's capital stock amounted to €3,086,664.00 divided into 6,173,328 fully paid-up shares with a par value of €0.50 each.

#### b) Change in capital over the last 5 years

Date	Nature of transactions	Capital stock (€)	Issue premium (€)*	Number of shares created	Par value (€)	Company's capital stock (€)
2019	Capital increase by bonus share allotment	1,413.00	-	2,826	0.50	2,822,650.50
2020	Capital increase by bonus share allotment	2,063.00	-	4,126	0.50	2,824,713.50
2021	Capital increase by bonus share allotment	12,180.50	-	24,361	0.50	2,836,894.00
2022	Capital increase by bonus share allotment	6,185.50	-	12,371	0.50	2,843,079.50
2023	Reserved capital increase as consideration for the contribution of 5.0% of Ficopar by Immod to the Company	147,710.00	83,284,806.40	295,420	0.50	2,990,789.50
2023	Reserved capital increase as consideration for the contribution of 70% of Spedimex by the Company (the balance being paid in cash)	95,874.50	53,833,531.75	191,749	0.50	3,086,664.00

\* The issue premiums above are stated at gross value, whereas their values net of capital increase costs are recognized in the financial statements.

### c) Securities not giving entitlement to equity

None.

### d) Changes in shareholders

The breakdown of the Company's capital and theoretical and exercisable voting rights over the last three fiscal years has been as follows:

	12/31/2021		12/31/2022		12/31/2023	
	Number of shares	Number of voting rights	Number of shares	Number of voting rights	Number of shares	Number of voting rights

(1) As of December 31, 2023, 100% of Immod's capital stock was indirectly held by Mr. Eric Hémar, via Comète SARL (the latter acting as lead holding company). Libertad SARL is owned 90% by Mr. Christophe Satin and 10% by his spouse.

(2) The "Other" shareholders are registered shareholders and are primarily current or former Group employees, none of whom individually hold more than 2% of the capital stock or voting rights.

In view of the relations between Messrs Hémar and Satin since the Company's inception, their respective offices and their common status as shareholders of Immod SAS, itself a shareholder in the Company, Messrs Hémar and Satin and Immod SAS have formalized their relationship by signing a shareholder agreement to act in concert (AMF decision no. 212C053). An initial supplemental agreement was

executed on January 19, 2016 whereby Libertad SARL joined the aforementioned shareholder agreement (AMF decision 216C0276) and a second supplemental amendment was executed on March 4, 2022 whereby the term of the agreement was extended to March 7, 2032 (AMF decision 222C0618) (see paragraph h) below for further detail on this agreement).

## e) Authorized capital

Current delegations and authorizations granted to the Company with regard to capital increases include:

	General meeting date	Delegation expiry date	Cap (nominal value)	Use between date of 2023 AGM and December 31, 2023	Balance at December 31, 2023
Issue of shares and/or securities providing immediate and/or future access to the Company's capital stock, with continued effectiveness of preferential subscription rights	5/31/2023	7/30/2025	Shares: €1,400,000 Debt securities: €250,000,000 **	None	Shares: €1,400,000 Debt securities: €250,000,000
Issue without preferential subscription rights, by a public offering, excluding the offers referred to in Article L. 411-2 (1) of the French Monetary and Financial Code, of shares and/or securities providing immediate and/or future access to the Company's capital stock and option to confer a priority right	5/31/2023	7/30/2025	Shares: €1,400,000 Debt securities: €250,000,000 **	None	Shares: €1,400,000 Debt securities: €250,000,000
Issue without preferential subscription rights, by an offering referred to in Article L. 411-2 (1) of the French Monetary and Financial Code, of shares and/or securities providing immediate and/or future access to the Company's capital stock, capped at 20% of capital stock per year	5/31/2023	7/30/2025	Shares: €1,400,000 and capped at 20% of capital stock per annum Debt securities: €250,000,000 **	None	Shares: €1,400,000 and capped at 20% of capital stock per annum Debt securities: €250,000,000
Issue of shares and/or securities providing immediate and/or future access to the Company's capital stock, with cancellation of preferential subscription rights, to a specific category of beneficiaries	5/31/2023	11/30/2024*	Shares: €1,400,000 Debt securities: €250,000,000 **	None	Shares: €1,400,000 Debt securities: €250,000,000
Authorization to increase the total value of issues in the event of surplus demand	5/31/2023	7/30/2025*	Capped at 15% of the initial issue amount	None	Capped at 15% of the initial issue amount
Authorization to set the issue price within the limit of 10% of the capital per annum	5/31/2023	7/30/2025	Capped at 10% of capital stock per annum	None	Capped at 10% of capital stock per annum

	General meeting date	Delegation expiry date	Cap (nominal value)	Use between date of 2023 AGM and December 31, 2023	Balance at December 31, 2023
Capital increase by way of issue of shares and/or securities providing immediate and/or future access to the Company's capital stock without preferential subscription rights, as consideration for contributions in kind of capital securities or securities providing access to the capital stock	5/31/2023	7/30/2025	- Shares: Capped at 10% of capital stock per annum - Securities representing debt or equivalent securities: €283,052 **	None	Capped at 10% of capital stock per annum
Capital increase by capitalization of reserves, profits or additional paid-in capital	5/31/2023	7/30/2025	€1,400,000 **	None	€1,400,000
Capital increase by way of issue of shares for subscribers to a corporate savings plan implemented pursuant to Articles L. 3332-18 to L. 3332-24 et seq. of the French Labor Code, without preferential subscription rights, in favor of such subscribers	5/31/2023	7/30/2025*	Capped at 3% of post-issue capital stock as of the Board of Directors' decision to perform this increase **	None	Capped at 3% of post-issue capital stock as of the Board of Directors' decision to perform this increase
Power to issue equity warrants	5/31/2023	11/30/2024*	€290,000 nominal value **	None	€290,000 nominal value
Authorization to be given to the Board of Directors to grant Company stock options in favor of Group employees and corporate officers	5/31/2023	7/30/2026	10% of capital stock as of their allotment by the general meeting	None	617,363 shares
Authorization to be given to the Board of Directors to grant new or existing bonus shares to Group employees and corporate officers	5/31/2023	7/30/2026	10% of the capital stock existing on the date such grant is decided by the Board of Directors	92,163 shares granted	525,200 shares

\* It will be recommended to the May 30, 2024 annual general meeting that these authorizations be renewed (see chapter 6 of the Universal Registration Document).

\*\* Independent caps

**f) Potential capital****► Shares resulting from exercise of equity warrants**

Immod, which held 32.05% of the Company's capital at December 31, 2023, holds 155,520 shares with equity warrants representing at that date a 5.04% maximum potential dilution of post-dilution capital (a shareholder holding 1.00% of the capital stock before exercise of the equity warrants would hold 0.95% thereafter), the main terms of which are:

General meeting date	10/13/2008
Board of Directors meeting date	October 13, 2008, modified on June 21, 2010
Total number of warrants issued	155,520
Maximum number of shares that may be subscribed by Immod	311,040
Earliest exercise date	10/13/2008
Expiry date	Not set
Exercise price	€4.50
Terms of exercise	1 equity warrant = 2 shares
Number of shares subscribed as of the Universal Registration Document Date	None
Number of canceled or lapsed warrants to date	None
Number of shares potentially subscribed as of the Universal Registration Document Date	311,040
Warrants outstanding as of the Universal Registration Document Date	155,520

► **Bonus shares**

The May 31, 2023 combined general meeting renewed the Board of Directors' authority to grant bonus shares. In accordance with the authorizations successively granted to it by the general meeting, the Company's Board of Directors decided on the following allotments:

	Plan 5-3	Plan 4-5	Plan 5-4	Plan 4-6	Plan 4-6 e	Plan 5-5	Plan 5-5 b	Plans 5-5 c to e	Plan 2023-G	Plan 2023-S	Plans 2023 P and T
General meeting date	5/23/2019	5/23/2019	5/23/2019	5/23/2019	5/31/2022	5/31/2022	5/31/2022	5/31/2022	5/31/2022	5/31/2023	5/31/2023
Board of Directors meeting date	5/26/2020	1/16/2021	5/31/2021	1/12/2022	5/31/2022	5/31/2022	8/30/2022	8/30/2022	3/15/2023	8/30/2023	8/30/2023
Total number of bonus shares granted	12,177	2,619	18,199	2,466	405	16,600	266	682	3,135	20,128	68,900
Total number of shares that may be subscribed by corporate officers	-	-	-	-	-	-	-	-	-	-	13,000
Vesting date	5/26/2023 <sup>(4)</sup>	(1) (2)	5/31/2024 <sup>(5)</sup>	(1) (3)	5/31/2024 <sup>(4)</sup>	5/31/2025 <sup>(4)</sup>	5/31/2025 <sup>(4)</sup>	8/31/2024 <sup>(4)</sup>	(1) (5)	8/30/2026 <sup>(4)</sup>	8/30/2028 <sup>(6)</sup>
End of lock-in period	n/a	(2)	n/a	(3)	n/a	n/a	n/a	n/a	(5)	n/a	n/a
Number of shares fully vested as of the Universal Registration Document Date	12,177	2,604	-	1,580	-	-	-	-	-	-	-
Total number of lapsed or canceled shares as of the Universal Registration Document Date	-	15	-	102	-	308	-	-	-	133	-
Bonus shares granted and outstanding as of the Universal Registration Document Date	-	-	18,199	784	405	16,292	266	682	3,135	19,995	68,900

(1) Bonus shares granted under plans 4-5, 4-6 and 2023-G shall vest subject to the continued employment of the beneficiaries.

(2) The shares granted break down into two tranches, Tranche A and Tranche B, where the number of shares granted under Tranche B is equal to 50% of the number of shares granted under Tranche A. The vesting periods are one year for Tranche A, i.e. until January 16, 2022, and two years for Tranche B, i.e. until January 16, 2023. The lock-in period for Tranche A is one year, i.e. until January 16, 2023. There is no lock-in period for Tranche B.

(3) The shares granted break down into two tranches, Tranche A and Tranche B, where the number of shares granted under Tranche B is equal to 50% of the number of shares granted under Tranche A. The vesting periods are one year for Tranche A, i.e. until January 12, 2023, and two years for Tranche B, i.e. until January 12, 2024. The lock-in period for Tranche A is one year, i.e. until January 12, 2024. There is no lock-in period for Tranche B.

(4) Bonus shares vest subject to the continued employment of the beneficiaries and the fulfillment of performance criteria related to EBIT, consolidated net income and share price.

(5) The shares granted break down into two tranches, Tranche A and Tranche B, where the number of shares granted under Tranche B is equal to 50% of the number of shares granted under Tranche A. The vesting periods are one year for Tranche A, i.e. until March 15, 2024, and two years for Tranche B, i.e. until March 15, 2025. The lock-in period for Tranche A is one year, i.e. until March 15, 2025. There is no lock-in period for Tranche B.

(6) Bonus shares vest subject to the continued employment of the beneficiaries and the fulfillment of performance criteria related to revenues and EBIT. The shares granted break down into four tranches according to the performance years and criteria, all with the same vesting date on August 31, 2028.

Accordingly, the maximum potential dilution is as follows:

Board meeting date	Type of instrument	Total initial number	Total outstanding at 3/31/2024	Potential dilution <sup>(1)</sup>
10/13/2008	Equity warrants (BSA) <sup>(2)</sup>	155,520	155,520	5.04%
5/31/2021	Bonus shares	18,199	18,199	0.29%
5/31/2022	Bonus shares	405	405	0.01%
5/31/2022	Bonus shares	16,600	16,292	0.26%
8/30/2022	Bonus shares	948	682	0.01%
3/15/2023	Bonus shares	3,135	1,507	0.02%
8/30/2023	Bonus shares	20,128	19,995	0.32%
8/30/2023	Bonus shares	68,900	68,900	1.12%

(1) Maximum potential equity dilution of post-dilution capital

(2) Note that exercise of the equity warrants ("BSA") may result in the creation of a maximum of 311,040 shares.

### g) Breakdown of voting rights

The Company's capital stock and voting rights as of March 31, 2024 are detailed in the following table:

Shareholders	Number of shares	Number of voting rights	% capital stock	% theoretical voting rights	% exercisable voting rights
Immod <sup>(1)</sup>	1,978,289	3,643,735	32.05%	38.35%	38.37%
Eric Hémar <sup>(1)</sup>	1,296,460	2,592,920	21.00%	27.29%	27.30%
Libertad <sup>(1)</sup>	137,133	274,266	2.22%	2.89%	2.89%
Christophe Satin <sup>(1)</sup>	81,029	159,948	1.31%	1.68%	1.68%
<b>Subtotal held in concert</b>	<b>3,492,911</b>	<b>6,670,869</b>	<b>56.58%</b>	<b>70.21%</b>	<b>70.24%</b>
Others <sup>(2)</sup>	168,598	318,272	2.73%	3.35%	3.35%
Public float	2,507,382	2,507,921	40.62%	26.40%	26.41%
Treasury shares	4,437	4,437	0.07%	0.05%	0%
<b>Total</b>	<b>6,173,328</b>	<b>9,501,499</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

(1) As of March 31, 2024, 100% of Immod SAS's capital stock was indirectly held by Mr. Eric Hémar and his wife and children, via the company Comète (the latter acting as lead holding company). Libertad SARL is owned 90% by Christophe Satin and 10% by his wife.

(2) The "Other" shareholders are registered shareholders and are primarily current or former Group employees, none of whom individually hold more than 2% of the capital stock or voting rights.

The Company is not aware of any other shareholder who, directly or indirectly, acting alone or in concert, holds over 5% of the capital or voting rights.

TO the Company's knowledge, as of the Universal Registration Document Date there has been no significant change in the breakdown of the Company's capital since March 31, 2024.

Following the decision of the June 21, 2010 general meeting, a double voting right is conferred upon shares which have been registered in the name of the same shareholder for at least four years (Article 25 of the Company bylaws). This principle explains any differences between the equity interest percentage and the voting rights percentage in the above table. The difference between the theoretical and actual voting rights percentages arises from treasury shares.

## h) Control of the Company

As of December 31, 2023, Eric Hémar held:

- 21.00% of the Company's capital stock and 27.29% of the exercisable voting rights directly,
- 32.05% of the Company's capital stock and 38.35% of the exercisable voting rights indirectly via Immod, in which he holds 100% of the capital via Comète (the latter acting as lead holding company).

Eric Hémar therefore directly and indirectly holds 53.05% of the capital and 65.65% of the exercisable voting rights (excluding treasury stock) and, acting in concert with Christophe Satin and Libertad, 56.87% of the capital and 70.59% of the exercisable voting rights.

The Company is controlled as stated above. Steps taken to ensure that control is not abused include the presence of four independent directors and one independent advisor on the Board of Directors.

Moreover, in view of the relations existing between Messrs Hémar and Satin since the Company's incorporation and their respective offices, Messrs Hémar and Satin and Immod have formalized their relationship by signing a shareholder agreement that represents an action in concert.

The main provisions of this agreement stipulate that the parties undertake to cooperate prior to any decision justifying a common position or materially impacting the number or percentage of voting rights they hold in the Company.

The parties meet: (i) prior to all Company ordinary and extraordinary shareholders' meetings, (ii) in the event of a declaration from a third party acting alone or in concert that such third party has crossed the 2% threshold of the Company's capital and voting rights, (iii) in the event of a public tender offer from a third party for the capital stock of ID Logistics Group SA, and (iv) in the event of an issue of stock or any other securities enabling holders immediately or in the future to acquire an equity interest in ID Logistics Group SA.

This shareholder agreement was signed for an initial 10-year term with effect from March 7, 2012 and will terminate early vis-à-vis: (i) any party who ceases to carry out his duties in the Company or in a company controlled by the Company, (ii) any party who no longer holds ID Logistics Group stock, (iii) all parties as of the date when the parties, separately or together, no longer hold at least 30% of the Company's capital or voting rights and (iv) all parties, should all parties mutually agree to terminate the shareholder agreement early [AMF decision 212C0523].

A supplemental agreement was executed on January 19, 2016 whereby Libertad SARL adhered to the aforementioned shareholder agreement [AMF decision 216C0276].

A second supplemental agreement was executed between the parties whereby the term of the shareholder agreement was extended by ten years in relation to the initial term, i.e.

until March 7, 2032. This supplemental agreement entails no novation or modification of the agreement other than with regard to its term [AMF decision 222C0618].

## i) Crossing of statutory thresholds

In the last three fiscal years, the following statutory threshold crossings have been declared:

- In letters received January 5, 2021 and January 8, 2021, Christophe Satin declared, by way of rectification, that on December 18, 2020, following the sale of ID Logistics Group shares on the market, directly and indirectly, via Libertad, which he controls, he had fallen below the threshold of 5% of the capital of ID Logistics Group and that he held, at that date, 281,052 ID Logistics shares representing 562,104 voting rights, i.e. 4.97% of the Company's capital and 6.22% of the voting rights [AMF decision 221C0065].
- In a letter received January 8, 2021, Christophe Satin declared, by way of rectification, that on January 19, 2020, directly and indirectly, via Libertad, which he controls, he had exceeded the threshold of 5% of the voting rights of ID Logistics Group following a grant of double voting rights and that he held, at that date, 285,220 ID Logistics Group shares representing 570,440 voting rights (including 206,301 shares representing 412,602 voting rights held by Libertad), i.e. 5.05% of the capital and 6.30% of the voting rights of said company (on the basis of capital comprising, at that date, 5,645,301 shares representing 8,849,420 voting rights), pursuant to paragraph two of Article 223-11 of the AMF General Regulation [AMF decision 221C0065].
- In a letter received March 19, 2021, Christophe Satin declared that on March 17, 2021, directly and indirectly, via Libertad, which he controls, he had exceeded the threshold of 5% of the capital of ID Logistics Group and that he held, directly and indirectly, 283,162 ID Logistics Group shares representing 564,214 voting rights, i.e. 5.01% of the Company's capital and 6.24% of the voting rights [AMF decision 221C0613].
- In a letter received May 14, 2021, Christophe Satin declared that on May 12, 2021, directly and indirectly, via Libertad, which he controls, he had fallen below the threshold of 5% of the capital of ID Logistics Group and that he held, directly and indirectly, 278,530 ID Logistics Group shares representing 554,950 voting rights, i.e. 4.92% of the Company's capital and 6.13% of the voting rights. This threshold crossing resulted from the sale of ID Logistics Group shares on the market by Libertad. At this date, the concert comprising Eric Hémar and Christophe Satin, as well as the companies that they control, did not cross any thresholds and stated that it held 3,245,860 ID Logistics Group shares representing 6,484,186 voting rights, i.e. 57.34% of the Company's capital and 71.63% of the voting rights [AMF decision 221C1060].

- In a letter received May 12, 2023, Immod declared its intention to individually cross the threshold of 30% of the capital of ID Logistics Group via two simultaneous transactions to be carried out on May 31, 2023: (a) the contribution to ID Logistics Group of the 5.0% stake held by Immod in the intermediate sub-holding company Ficopar, which holds all of the Group's operating activities, in consideration for shares received by Immod; (b) the acquisition by ID Logistics Group of Spedimex in Poland, for which 70% of the consideration was paid in ID Logistics Group shares. Following these two simultaneous transactions, Immod holds 32.01% of the capital of ID Logistics Group and 38.22% of the exercisable voting rights (AMF decision dated May 30, 2023 no. 223C0795).
- Furthermore, considering that ID Logistics Group is already majority-controlled by Mr. Eric Hémar (directly and indirectly through Immod), and by the concert formed with Christophe Satin, and noting that the balance of the majority concert will not be changed, the AMF granted Immod an exemption from the obligation to file a public tender offer for the ID Logistics Group shares on the regulatory basis invoked by Immod, namely Article 234-9(6) of the General Regulations ("*holding of a majority of the company's voting rights by the applicant or by a third party, acting alone or in concert*"). (AMF decision dated May 30, 2023 no. 223C0795)

#### j) Agreements or mechanisms that could delay, defer or prevent a change of control

There is no particular clause in the Company's deed of incorporation, bylaws, any charter or regulations that could

result in delaying, deferring or preventing a change in control of the Company.

To the Company's knowledge, with the exception of the shareholder agreement between Messrs Hémar and Satin, Libertad and Immod, as of the Universal Registration Document Date there are no other agreements or actions in concert between the Company's shareholders that could result in a change of control over the Company.

#### k) Statement of pledges

To the Company's knowledge, as of the Universal Registration Document Date there are no material pledges over the Company's shares.

#### l) Dutreil pact

To the Company's knowledge, there is no Dutreil pact in force at Company level. For information purposes, there is a Dutreil pact in force between Mr. Eric Hémar and his children, covering 97.54% of the capital stock of Comète, which controls 100% of Immod, which holds a 32.05% equity stake in ID Logistics Group.

#### m) Information on capital stock of any Group member subject to an option or conditional or unconditional agreement providing for an option in respect thereof

As far as the Company is aware, there is no call or put option or undertaking in favor of the Company's shareholders or granted by them in respect of the Company's shares.

#### n) Summary statement of share transactions carried out by Company directors or officers as defined under Article L. 621-18-2 of the French Monetary and Financial Code

In respect of 2023, the following transactions on Company shares were reported by directors or officers:

Director or officer	Immod <sup>(1)</sup>	Libertad <sup>(3)</sup>	Jesus Hernandez
Position in the Company	Director and Deputy CEO	Director and Deputy CEO	Advisor
<b>Disposals</b>			
• Total number of shares sold	-	22,439	609
• Total disposal value (€000)	-	6,493,588	177
<b>Acquisitions</b>			
• Total number of shares purchased	297,578 <sup>(2)</sup>	-	
• Total purchase value (€000)	83,971 <sup>(2)</sup>	-	

(1) As of March 31, 2024, 100% of Immod SAS's capital stock was indirectly held by Mr. Eric Hémar and his wife and children, via the company Comète (the latter acting as lead holding company).

(2) Including 295,420 shares acquired as consideration for Immod's contribution of its 5.0% stake in the intermediate holding company Ficopar to ID Logistics Group on May 31, 2023.

(3) Libertad is controlled by Mr. Christophe Satin.

### 3.1.2 Corporate governance code

The Company applies the Middelnext corporate governance code. This code can be viewed at: [www.middelnext.com](http://www.middelnext.com).

As it does every year, ID Logistics has reviewed the 22 Middelnext code recommendations and in particular the revisions made in September 2021. This review was commented on during the March 13, 2024 Board of Directors meeting, specifically:

#	Recommendation	Applied
1	Ethics for Board members	yes <sup>(1)</sup>
2	Conflicts of interest	yes <sup>(1)</sup>
3	Board members: presence of independent directors	Yes
4	Information for Board members	Yes
5	Training of Board members	yes <sup>(2)</sup>
6	Organization of Board meetings and committees	Yes
7	Introduction of committees	Yes
8	Establishment of a special CSR Committee	yes <sup>(3)</sup>
9	Introduction of the Board Rules of Procedure	yes <sup>(1)</sup>
10	Choice of each director	Yes
11	Term of office for Board members	
	- terms of office adapted to the Company	Yes
	- staggered terms of office	no <sup>(4)</sup>
12	Directors' remuneration	Yes
13	Introduction of evaluations of the Board's work	Yes
14	Relationships with "shareholders"	Yes
15	Diversity and equity policy within the Company	Yes
16	Definition and transparency of directors' remuneration	Yes
17	Preparation of executive officers' succession	no <sup>(5)</sup>
18	Combining employment contract and directorship	Yes
19	Severance pay	Yes
20	Supplementary pension scheme	Yes
21	Stock options and bonus shares	Yes
22	Review of points requiring special attention	Yes

(1) The Board of Directors considers that these recommendations are effectively implemented but that they will be reviewed in depth for inclusion in the updated Board of Directors Rules of Procedure, which are currently being prepared. More specifically, with regard to Recommendation R2 on conflicts of interest, the members of the Board of Directors each confirmed at the March 13, 2024 meeting that there were no conflicts of interest concerning them. It was also recalled that the statutory auditors review the statement of non-financial performance and consider that this assignment does not constitute a conflict of interest or a loss of independence.

(2) With regard to Recommendation R5 on the training of the members of the Board of Directors, ID Logistics recalls that the members are chosen on the basis of their training and high level of experience as recalled in section 3.1.3(c) "Director information". ID Logistics also recalls that at least once a year, a meeting of the Board of Directors is held at one of the operational sites over a full day, with an organized visit, and addresses in concrete terms the contract logistics business, changes in its market and competitive environment, and at least one strategic theme specific to said business. The topics already discussed during these meetings include the impact of new consumption patterns, automation, innovation, new sustainable development issues, development of an employer brand, etc. The members of the Board of Directors therefore considered that it was not necessary at this stage to organize a three-year training program as proposed by Recommendation R5, but did not exclude the possibility of individual requests from its members.

(3) With regard to Recommendation R8 on the establishment of a Social and Environmental Responsibility Committee, ID Logistics considers that, at this stage, the discussions that have been initiated with the Board of Directors on the basis of the statements of non-financial performance and the follow-up of the 10 CSR objectives established in 2021 are currently sufficient and do not require the creation of a specific Committee. Furthermore, since 2024 a specific CSR item is added to the agenda of the Board of Directors' annual meeting on changes and challenges in the contract logistics business.

(4) At the General Meeting held on May 30, 2024, shareholders will be asked to amend the Company's bylaws to provide for staggered terms of office for Board members.

(5) The topic is regularly discussed by the Board of Directors but has never been formally set down as such. On March 13, 2024, the Board set itself the goal of formally drafting a succession plan before the next meeting called to approve the 2024 financial statements.

The Board of Directors has also reviewed the Middelnext Code points requiring special attention as revised in September 2021. Specifically:

- points concerning the Board's supervisory powers were discussed in conjunction with assessing the work of the Board of Directors in March 2024;
- points concerning executive and sovereign powers were reviewed at the March 13, 2024 Board of Directors meeting during its discussions on the operations of the Board of Directors and the merits of establishing an Appointments and Remuneration Committee.

## 3.1.3 The Board of Directors and Committees

### a) Members of the Board of Directors

The Board of Directors comprises nine directors (including the employee representative director) and one independent advisor. Their term of office runs for three years.

In fiscal year 2023, the following were reappointed as directors:

- Mr Michel Clair, who was reappointed as a Board member for a three-year term at the General Meeting of May 31, 2023;
- Ms. Carine Mosnier, Board member representing the employees, who was reappointed for a further three years at the Board of Directors' meeting on March 15, 2023;
- Ms. Malgorzata Hornig, appointed on March 15, 2023 by the Board to replace Vera Gorbacheva, who resigned from her duties as director. The appointment of Malgorzata Hornig was approved at the General Meeting of May 31, 2023.

Membership of the Board of Directors has been arranged so as to involve the Group's controlling shareholder representatives in the definition, implementation and monitoring of the Group's growth strategy, while ensuring that the Group benefits from the diverse international professional experience of its Board members.

As of the Universal Registration Document Date, the Company's Board of Directors consists of the following members:

Full name	Title	Independent director	Year first appointed	Expiry of term of office	Member of the Audit Committee
<b>Eric Hémar</b>	Chairman and CEO	No	2010	2025	No
<b>Comète, represented by Marie-Aude Hémar</b>	Director	No	2019	2025	No
<b>Christophe Satin</b>	Director and Deputy CEO	No	2013	2025	No
<b>Michel Clair</b>	Director	Yes	2011	2026	Yes (Chairman)
<b>Hervé Montjotin</b>	Director	Yes	2021	2024	Yes
<b>Éléonore Ladreit de Lacharrière</b>	Director	Yes	2021	2024	No
<b>Gérard Lavinay</b>	Director	Yes	2021	2024	No
<b>Malgorzata Hornig</b>	Director	No	2023	2024	No
<b>Carine Mosnier</b>	Employee representative director	No	2022	2026	No

The Board of Directors also comprises one independent advisor: Mr. Jesus Hernandez, a Spanish national, was appointed as independent advisor by the Board of Directors on May 31, 2021, with effect from the same day, for a three-year term expiring at the close of the general meeting held in 2024 to approve the financial statements for the year ended December 31, 2024.

It will be recommended to the May 30, 2024 combined general meeting that Eléonore de la Charrière, Malgorzata Hornig, Hervé Montjotin and Gérard Lavinay be reappointed as directors.

Subject to the above renewal and ratification, the Company is compliant with the legal requirement of balanced representation of women and men on boards of directors which, for boards comprising a maximum of eight members,

provides that the difference between the number of directors of each gender must not be more than two, while the employee representative director is not included in this calculation.

Under Recommendation R3 of the Middledex corporate governance code for small and mid caps, the criteria for classifying a Board member as independent are as follows:

Criteria	Michel Clair	Hervé Montjotin	Éléonore Ladreit de Lacharrière	Gérard Lavinay
• has not been, over the last five years, and is not currently an employee or executive corporate officer of the company or a group company;	Yes	Yes	Yes	Yes
• has not been, over the last two years, and is not currently in a material business relationship with the company or its group (customer, supplier, competitor, service provider, creditor, banker, etc.);	Yes	Yes	Yes	Yes
• is not a major shareholder in the company, and does not hold a significant percentage of the voting rights;	Yes	Yes	Yes	Yes
• has no close relationship or family ties with a corporate officer or major shareholder;	Yes	Yes	Yes	Yes
• has not been, over the last six years, a statutory auditor of the company.	Yes	Yes	Yes	Yes

Among the members of the Board, Michel Clair, Hervé Montjotin, Gérard Lavinay and Eléonore Ladreit de Lacharrière meet all of these criteria and are considered independent. The Board of Directors is therefore composed of eight members excluding the employee representative director, four of whom are independent (50%). Accordingly, the Company complies with Recommendation R3 of the Middledex Code.

Ms. Marie-Aude Hémar, permanent representative of Comète, is Mr. Eric Hémar's wife. There are no other family links between the other members listed above.

To the Company's knowledge, as of the date this Universal Registration Document was prepared, no Board of Directors

or senior management members have, within the last five years:

- been sentenced for fraud;
- been involved in bankruptcy, receivership, liquidation or court-ordered administration proceedings;
- been indicted or incurred official public sanctions imposed by statutory or regulatory authorities (including designated professional bodies);
- been deprived by a court of the right to perform the duties of a member of an administrative, management or supervisory body of an issuer or from being involved in the management or conduct of the business of an issuer.

### b) Conflicts of interest among members of the administrative and management bodies and senior management

To the Company's knowledge, and as of the date this Universal Registration Document was prepared, there is:

- no conflict of interest between the duties of each member of the senior management team and Board of Directors towards the Company as corporate officers and their private or other interests;
- no arrangement or agreement with the principal shareholders or with any customers, suppliers or other persons pursuant to which any members of the senior management team or Board of Directors were appointed;

- no restriction accepted by the members of the senior management team or Board of Directors members in relation to the sale of the Company securities that they hold, with the exception of the aforementioned shareholder agreement (see section 3.1.1, h) "Control of the Company").

There are related party agreements which are described under sections 3.1.6 "Contracts with corporate officers or a shareholder holding more than 10% of the voting rights in the Company" and 4.10 "Transactions with related parties".

## c) Director information

<p>• <b>Eric Hémar</b></p> <p><b>Chairman and CEO</b></p> <p><b>Business address:</b> ID Logistics, 55 chemin des Engranauds, 13660 Orgon, France</p>	<p>Eric Hémar, a former student of ENA, began his career at the Cour des Comptes (French government Court of Audit) before joining the French Ministry of Equipment, Transport and Tourism in 1993, where he was technical advisor to minister Bernard Bosson. In 1995, he began working for the Sceta group, followed by Geodis as Corporate Secretary. He left Geodis Logistics in March 2001 to found the ID Logistics group. Eric Hémar has been Chairman and Chief Executive Officer of the Company since the June 21, 2010 shareholders' general meeting, prior to which he was Chairman of the Company.</p>

--	---

• **Michel Clair**

**Independent director and Chairman of the Audit Committee**

**Business address:**

SIPAC, 2 place de la Porte Maillot, 75017  
Paris, France

A former student of ENA, Michel Clair was auditor, then senior advisor for the Cour des Comptes (1975-91) before taking up various positions within government agencies and several ministries. This included chief of staff for the Ministry of Trade, Crafts and Services from 1986 to 1988. In 1991, he joined Compagnie Bancaire, for which he was Corporate Secretary and member of the Management Board. Following the Paribas - Compagnie Bancaire merger, he became a member of the Executive Committee of Paribas, in charge of real estate and shared services. In 1996 he joined the Klépierre group as member of the Board of Directors and was appointed Chairman the following year. From 1998 to 2012, he was chairman of the Klépierre Management Board followed by the Supervisory Board. He is currently Chairman of Société Immobilière du Palais des Congrès (SIPAC). He is Vice President of the Paris Ile-de-France Chamber of Commerce and Industry (CCI) in charge of conferences and trade shows.

**List of functions and offices exercised as of the Universal Registration Document Date**

**Principal function**

- Chairman of Société Immobilière du Palais des Congrès (SIPAC)
- Chairman of Propexpo

**Other offices within the Group:** None

**Other offices outside the Group**

- Chairman: Promosalons, SAS RHVS (Action Logement Group)
- Deputy Chairman: Klesia Retraites AGIRC
- Director: Klesia Prévoyance, Arpavie, Ecole des Gobelins

**List of functions and offices having expired during the last five years**

- Chairman: Comexposium, France Habitation, Omnium de Gestion Immobilière de France (OGIF)

• **Hervé Montjotin**

**Independent director and member of the Audit Committee**

**Business address:**

Socotec, Bâtiment Mirabeau – 5 place des Frères Montgolfier – Guyancourt – CS 20732 – 78182 St-Quentin-en-Yvelines Cedex – France

Hervé Montjotin studied at the Ecole Normale Supérieure (schools of education, social sciences) and the ESCP, before launching his career in Organizational Advisory at Bossard Consultants in 1989. In 1995, he joined Norbert Dentressangle transport and logistics group, where he worked successively as Head of HR, Managing Director Organization and Member of the Management Board (2001), Managing Director Division Transport (2005) and Chairman of the Management Board from 2012 to 2015, when the company was sold to US company XPO. Over these 20 years, the Norbert Dentressangle Group grew revenues from €300 million to €5 billion and became a European benchmark in the supply chain industry. In 2016, Hervé Montjotin took over as CEO of Socotec Group with a mission to make it global leader in the construction and infrastructure testing, inspection and certification (TIC) sector.

#### d) Director shareholdings - Securities giving access to the capital granted to the directors

As of March 31, 2024, members of the Board of Directors held the following direct equity investments and securities giving access to the Company's capital stock:

Directors	Shares and voting rights		
	Number	% equity	% exercisable voting rights
<b>Eric Hémar</b>	1,296,460	21.00%	27.36%
<b>Comète<sup>[1]</sup>, represented by Marie-Aude Hémar</b>	-	-	-
<b>Christophe Satin</b>	81,029	1.31%	1.69%
<b>Michel Clair<sup>[2]</sup></b>	6,300	0.01%	0.01%
<b>Hervé Montjotin</b>	380	0.01%	0.01%
<b>Éléonore Ladreit de Lacharrière</b>	50	0.00%	0.00%
<b>Gérard Lavinay</b>	200	0.00%	0.00%
<b>Malgorzata Hornig</b>	-	-	-
<b>Carine Mosnier</b>	1,372	0.02%	0.03%

*[1] As of March 31, 2024, the capital stock of Comète (acting as lead holding company) was fully controlled by Eric Hémar and his family.*

*[2] Investment held directly and indirectly via Clair Grenelle SAS.*

Eric Hémar also controls Immod, a company which, as of March 31, 2024, held 1,978,289 Company shares representing 32.05% of the capital stock and 38.37% of the exercisable voting rights. In addition, Immod holds 155,520 equity warrants, the main terms of which are set out in section 3.1.1 paragraph f) "Potential capital". Each warrant carries the right to subscribe for two shares, implying as of

March 31, 2024 a 5.04% potential maximum equity dilution of post-dilution capital.

Christophe Satin also controls Libertad, a company which, as of March 31, 2024, held 137,133 Company shares representing 1.31% of the capital stock and 1.68% of the exercisable voting rights.

## e) Information on the independent advisor

<p>• <b>Jesus Hernandez</b></p> <p><b>Advisor</b></p> <p><b>Business address:</b> ID Logistics España, C/Federico Mompou, 5 – Edificio 1, Plant 6, 28050 Madrid, Spain</p>	<p>Having graduated from the University of Madrid, Jesus Hernandez developed international management skills during a broad career in logistics. He started work with C&amp;A, where he remained for 19 years. His positions during this time included Coordination Logistics Director in Düsseldorf, Germany. He then joined logistics operator Tibbett &amp; Britten as Chief Operating Officer Spain and, just a year later, was appointed Chief Executive for Spain, Portugal and Morocco, a position he continued after the takeover of the company by Exel Logistics. In March 2006, Jesus Hernandez joined ID Logistics as General Manager Spain. In March 2015, he was appointed General Manager Brazil. After a year devoted to ID Logistics operations in Germany, in December 2019 he was appointed Chief Integration Officer in respect of ID Logistics' new operations in the USA.</p>
	<p><b>List of functions and offices exercised as of the Universal Registration Document Date</b></p> <p><b>Principal function</b></p> <ul style="list-style-type: none"> <li>• Chief Integration Officer</li> </ul> <p><b>Other offices within the Group</b></p> <p>None</p> <p><b>Other offices outside the Group</b></p> <p>None</p>
	<p><b>List of functions and offices having expired during the last five years</b></p> <ul style="list-style-type: none"> <li>• ID Logistics Brazil General Manager</li> </ul>

The independent advisor brings to the Board of Directors his extensive operational experience in logistics and international affairs. As mentioned in Article 16 bis of the Company bylaws, we hereby inform you that the independent advisor is responsible for ensuring the application of the bylaws, laws and regulations. He may issue an opinion on any item on the Board meeting agenda and may ask the Chairman that his comments be communicated to the shareholders' general meeting if he deems it appropriate. As stated in section 3.1.5.3 d), his remuneration in respect of his office is included in the amount of remuneration paid to non-executive directors, subject to the same allocation rules as other non-executive directors. He is also subject to the Board of Directors Rules of Procedure and to the conflict of interest rules applicable to the other members of the Board of Directors.

## f) Conditions for preparing the Board's work

In order to give sufficient time to Board members to properly prepare for meetings, the Chairman endeavors to send them all information and documentation required in advance. Accordingly, the draft annual financial statements were sent to the directors three days before the designated Board meeting to approve the financial statements.

Each time a Board member has submitted a request, the Chairman has sent him or her the requested information and documentation, as far as possible.

## g) Board meetings

The Board met seven times in 2023. Meeting notices were sent out at least two days in advance. The attendance rate for Board meetings during the year was 100%. Meetings are held at Group premises or by conference call.

The statutory auditors were invited to the Board of Directors meetings called to approve the annual and half-year financial statements and management forecasts, which they attended.

## h) Board of Directors Rules of Procedure

The Board has introduced Rules of Procedure, which principally cover the following points:

- The Board's members, role and procedures.
- Duties of the directors (fiduciary duty, non-compete obligations, confidentiality, diligence, prevention of insider trading, etc.)
- Audit Committee.

The Board of Directors Rules of Procedure can be viewed on the Company website in the corporate governance section under "Shareholders".

### i) Conflicts of interest among Board members

Article 4, "Directors' duties", of the Board of Directors Rules of Procedure stipulates that, in a situation that gives rise to or could give rise to a conflict between corporate interests and the direct or indirect private interests of a director or the interests of shareholders or a group of shareholders that he/she represents, the director in question undertakes to:

- inform the Board of the situation as soon as he/she is aware of it,
- declare any conflicts of interest prior to each Board meeting, depending on the agenda, and
- decide on any consequences affecting his/her position as a director.

Depending on the individual circumstances, the director must:

- either abstain from participating in the deliberations and vote on an agreement or transaction that presents a conflict of interest,

- or not attend the Board meetings during the period in which he or she is involved in a conflict of interest,
- or resign as a director.

Non-disclosure shall be construed as an acknowledgment that no conflict of interest exists.

### j) Tasks of the Board of Directors

The Board of Directors sets the direction of the Company's business and ensures the implementation thereof, in accordance with the Company's interests, taking into account the social and environmental implications of its business. Subject to the powers expressly reserved for general meetings of shareholders and subject to the corporate purpose, it addresses any matters pertaining to the efficient running of the Company and, by way of voting, settles matters concerning the Company.

### k) Subjects discussed during Board meetings and performance review

During the year ended December 31, 2023, the Company's Board of Directors met seven times:

Date	% directors in attendance	Subjects
2/3/2023	100%	<ul style="list-style-type: none"> <li>• Authorization to grant a guarantee to a subsidiary to cover existing financing arrangements</li> </ul>
2/9/2023	100%	<ul style="list-style-type: none"> <li>• 2023-2026 strategic review and challenges</li> <li>• Update on CSR commitments</li> <li>• Approval of the Spedimex acquisition plan</li> </ul>
3/6/2023	100%	<ul style="list-style-type: none"> <li>• Renewal of a subsidiary financing guarantee as part of a refinancing arrangement</li> </ul>
3/15/2023	100%	<ul style="list-style-type: none"> <li>• Appointment of a new Board member</li> <li>• Reappointment of the employee representative director</li> <li>• Approval of 2022 financial statements</li> <li>• Review of 2022 statement of non-financial performance</li> <li>• Update on the integration of recent acquisitions</li> <li>• Review of management forecasts</li> <li>• Determination of executive officers' remuneration</li> <li>• Board assessment and operation</li> <li>• Review of potential conflicts of interest</li> <li>• Review of Middlednext Code points requiring special attention</li> <li>• Reappointment of a statutory auditor</li> <li>• Preparation of the general meeting</li> </ul>
5/4/2023	100%	<ul style="list-style-type: none"> <li>• Review of proposed acquisition of Immod's stake in Ficopar</li> </ul>
5/31/2023	100%	<ul style="list-style-type: none"> <li>• Reappointments</li> <li>• Implementation of the share buyback program</li> <li>• Share plan</li> </ul>
8/30/2023	100%	<ul style="list-style-type: none"> <li>• Approval of H1 2023 financial statements</li> <li>• Bonus share plans</li> <li>• Authorization for real estate guarantees</li> </ul>

In addition to technical issues on the agenda, Board meetings are always an opportunity to review the Company's business, its development and changes in its market environment.

### l) Assessment of the Board's work

In March 2024, the Board conducted a formal assessment of its own work and that of the Audit Committee.

This self-assessment covered matters including gender balance on the Board and the balance of relations between the Chairman and Chief Executive Officer and the Board, both of which were deemed satisfactory.

The composition and operation of the Board of Directors were held to be satisfactory.

### m) Organization and operation of the Special Committee

#### ► Audit Committee members

The Audit Committee has two members, by preference both independent directors, appointed by the Board of Directors: Chairman Michel Clair and Hervé Montjotin, both independent directors.

All Audit Committee members have financial expertise (see "Director information" above).

#### ► Objectives

The Audit Committee's objective is to issue opinions or recommendations to the Board of Directors with regard to the accounts, internal and external audit and the Group's financial policies, while ensuring that information provided to shareholders and the market is reliable and clear. To fulfill its mission, the Audit Committee:

- reviews accounting principles and methods adopted in the preparation of the individual and consolidated financial statements that are submitted to the Board of Directors, ensuring they are appropriate, consistently applied and that any proposed changes are properly justified;
- reviews draft annual and half-year individual and consolidated financial statements prepared by senior management before presentation to the Board of Directors;
- reviews draft annual and half-year management reports from the Board of Directors, and all other reports, opinions, statements and other documents containing accounting or financial information, the publication of which is compulsory under current regulations, before their publication, as well as all accounts prepared for purposes of specific material transactions such as capital contributions, mergers, market transactions and payment of interim dividends;
- reviews the company consolidation scope and, if applicable, the reasons for excluding certain companies, changes in consolidation scope and the impact thereof;
- reviews material off-balance sheet risks and commitments;
- verifies that in-house data collection and checking procedures ensure that the data is accurate, quickly reported and appropriate;
- annually reviews with internal audit managers and the statutory auditors their audit plans, the conclusions of

their audits, their recommendations and the follow-up action taken;

- interviews internal audit managers and controllers from the finance department and issues an opinion on the department's organization;
- conducts the procedure for selecting the statutory auditors prior to their appointment or reappointment and oversees compliance with rules, principles and recommendations ensuring their independence;
- issues a recommendation regarding statutory auditor appointments or reappointments to be proposed to the general meeting;
- issues an opinion on the fees requested by the statutory auditors for the performance of their statutory audit of the financial statements and for any other engagements;
- approves the provision of services by the statutory auditors other than the certification of the financial statements;
- monitors the statutory auditors' performance of their assignment and, where relevant, notes any observations and findings of the French High Council of Statutory Auditors following audits conducted;
- reviews regulated agreements requiring the prior approval of the Board of Directors;
- monitors the efficacy of the risk management system;
- reviews any financial or accounting matters submitted to it by the Board of Directors or its Chairman and expresses, in particular, an opinion on any planned issue of new shares, securities or debt; and
- regularly reports to the Board of Directors on the findings of the financial statement certification assignment, the manner in which the assignment contributed to the integrity of the financial reporting and the role it played in this process. It must also promptly inform the Board of any difficulty encountered.

#### ► Operations

The Audit Committee meets according to a timetable established by the committee Chairman, which must give the committee time to review at least the annual and half-year consolidated financial statements, the Group budget and the internal and external audit plan.

The Audit Committee may interview any member of the Company's Board of Directors and arrange for the performance of any internal or external audit on any subject that, in its opinion, falls within its remit. The Audit Committee Chairman informs the Board of Directors thereof in advance. In particular, the Audit Committee is entitled to interview persons involved in preparing or auditing the financial statements, including the Chief Financial Officer and the main managers within the finance department. The Audit Committee's interview of the statutory auditors may but need not be attended by any representative of the Company.

The Audit Committee Chairman reports to the Board of Directors on the committee's work. If, during the course of its work, the Audit Committee detects a material risk that it considers is not being managed properly, the Chairman notifies the Chairman of the Board of Directors thereof without delay.

The Audit Committee met three times in 2023, on the following dates:

- March 14, 2023 to review the 2022 financial statements;
- June 13, 2023 for an annual update on the Group's internal control roadmap;
- August 30, 2023 to review the 2023 half-year financial statements.

All committee members attended these meetings and were given adequate time to review the financial and accounting documents. They had the opportunity to interview the statutory auditors and the Chief Financial Officer.

The Committee reported on its work to the Board, which has taken note and has followed all of its recommendations.

### 3.1.4 General management and Board Chairman

#### a) Detailed arrangements for the exercise of general management

Either the Chairman of the Board of Directors, or another individual appointed by the Board of Directors as Chief Executive Officer, shall carry out and be responsible for the general management of the Company.

The Board of Directors shall choose between the two methods of general management. The decision as to the choice of the general management method shall be taken by a simple majority vote of the directors in attendance or represented. The option selected must be implemented for a term of no less than one year.

By decision dated June 21, 2010, the Board of Directors appointed Mr. Eric Hémar as Chairman and CEO of the Company. On May 31, 2022, the Board of Directors resolved to renew the term of office of Mr. Eric Hémar as Chairman and CEO and, on the proposal of the latter, to renew the term of office of Mr. Christophe Satin as Deputy CEO.

#### b) Limitation of the powers of the CEO and Deputy CEO

The Chief Executive Officer is vested with the broadest powers to act under any circumstances in the name of the Company. He exercises these powers subject to the corporate purpose and subject to those powers expressly reserved by law to the shareholders' meetings or to the Board of Directors. He represents the Company in its dealings with third parties.

Where the general management of the Company is performed by the Chairman of the Board of Directors, the following provisions relating to the CEO apply to him.

The CEO is subject to the provisions governing the simultaneous holding of appointments as Chief Executive Officer, member of the management committee, sole managing director, director or member of the supervisory board of corporations (sociétés anonymes) whose head office is located in France.

On a motion by the CEO, the Board of Directors may appoint one or more individuals to assist the CEO; such person(s) shall hold the office of Deputy Chief Executive Officer. There may not be more than five Deputy CEOs.

Where the CEO ceases or is unable to perform his duties, the Deputy CEOs shall, unless otherwise resolved by the Board, remain in office and continue to hold their powers until a new CEO is appointed.

The Board of Directors shall determine the remuneration of the Deputy CEOs. The Board of Directors shall, jointly with the CEO, determine the scope and term of the powers conferred on Deputy CEOs. Vis-à-vis third parties, Deputy CEOs shall hold the same powers as the CEO.

Apart from statutory or regulatory restrictions, no other specific limitation has been set by the Board of Directors on the powers of the CEO or Deputy CEOs.

### 3.1.5 Remuneration of Company corporate officers

Presented below is the corporate officer remuneration policy for the 2024 financial year established by the Board of Directors on March 13, 2024, which will be submitted for approval to the combined general meeting to be held on May 30, 2024.

This section also sets out the fixed, variable and exceptional elements comprising the total remuneration and benefits of all kinds paid during the 2023 fiscal year or allocated in respect of that year to the Chairman and CEO, the Deputy CEO and the directors, in respect of their appointments.

Pursuant to Article L. 22-10-34 of the French Commercial Code, we hereby inform you that the payment of items of variable and exceptional remuneration in respect of the 2023 and 2024 financial years presented in this report and to be paid to the persons concerned is subject respectively to the approval of the combined May 30, 2024 general meeting and the general meeting to be held in 2025 to approve the 2024 financial statements.

#### 3.1.5.1 Remuneration policy applicable to all corporate officers

On March 13, 2024, the Board of Directors approved the remuneration policy for all corporate officers as follows:

##### a) Respect for the corporate interest and contribution to the Company's commercial strategy and sustainability

The remuneration policy for corporate officers is in line with the Company's interests, contributes to its sustainability and is aligned with its development strategy as described in section 1.6 "Development strategy" of the 2023 Universal Registration Document. It is also a component of the value-added model referred to in section 1.10 "Consolidated statement of non-financial performance" of the 2023 Universal Registration Document.

##### b) Decision-making process for the determination, review and implementation of the remuneration policy, including the measures to prevent or manage conflicts of interest, and the manner in which the remuneration and employment conditions applicable to the Company's employees are taken into consideration

The Board of Directors alone is authorized to determine the remuneration and benefits in kind granted to corporate officers. Remuneration and benefits in kind granted to the executive corporate officers are determined based on the following principles:

- competitiveness and loyalty;
- internal equity and performance;
- comprehensiveness and overall assessment;
- balance between the various items comprising remuneration;
- use of comparative data based on both market standards and practices employed at comparable companies;
- consistency, transparency, stability and intelligibility of the rules applied;
- adaptation to the strategy and business context, compliance with the corporate interest;
- consideration of the importance of the responsibilities taken on.

The Board of Directors votes on the remuneration awarded to corporate officers every year, it being noted that the executive corporate officers are required to abstain from discussion and voting on their own remuneration.

The Board of Directors takes into account and applies the principles set forth by the Middledex Code (Recommendations R12 and R16) when establishing the remuneration awarded to executive corporate officers. The Board ensures that the remuneration and employment conditions applicable to the Company's employees are taken into consideration when establishing the remuneration; in particular, it ensures that the remuneration established for the executive corporate officers is consistent with that of the Company's other corporate officers and employees and that the remuneration established maintains a fair balance and takes into account the Company's interests, market practices, the executives' performance, and the Company's other stakeholders.

**c) Valuation methods to be applied to the corporate officers in order to establish the extent to which they meet the performance criteria provided for variable and share-based remuneration**

The level of achievement of the objectives set for the variable remuneration and, where applicable, share-based remuneration, is determined by the Board of Directors. The Board of Directors relies on the Group finance department to determine the level of achievement of the financial targets and, where applicable, on the legal and human resources departments to determine the level of achievement of the non-financial targets. These elements are discussed during Board meetings.

**d) Criteria for distributing the fixed annual amount allocated by the general meeting to the directors**

The Board of Directors is free to distribute among its members the amount set by the general meeting for Board member remuneration. However, in accordance with the Board of Directors Rules of Procedure, in respect of their remuneration, the directors receive a fixed portion (pro rata temporis depending on the start or end date of the term of office, as the case may be) and a variable portion relating to their attendance of Board meetings during the year. The Board of Directors also takes into account the participation of some of its members of the Audit Committee.

**e) Description and explanation of substantial changes to the remuneration policy**

No changes have been made to the Company's remuneration policy since the version adopted for the previous year.

**f) Application of the remuneration policy to corporate officers recently appointed or reappointed, pending approval by the general meeting of any significant changes to the policy**

In the event of changes in governance, the remuneration policy will be applied to the Company's new corporate officers, adjusted as required and subject to general meeting approval of any significant changes to the remuneration policy, in accordance with Article L. 22-10-8 (II) of the French Commercial Code.

**g) Procedural conditions allowing exceptions to the remuneration policy**

Under exceptional and temporary circumstances, the Board of Directors may make exceptions to all terms of the remuneration policy approved by the general meeting. The Board of Directors, assisted by the various Group departments (finance, legal, human resources, etc.) if necessary, will be responsible for approving the exceptional and temporary nature of the circumstances invoked as well as the fact that the planned exception is temporary, in accordance with the corporate purpose and as required in order to ensure the Company's sustainability or viability. The officers concerned will not be involved in this decision.

**3.1.5.2 Remuneration policy applicable to the Chairman and CEO, the Deputy CEO and the directors**

**3.1.5.2.1 Remuneration policy applicable to the Chairman and CEO**

**a) Annual fixed and variable remuneration**

The Chairman and CEO's annual remuneration includes a fixed portion and a variable portion relating to the achievement of stringent financial and non-financial quantitative and qualitative targets determined at the beginning of the year in line with the strategy approved by the Board of Directors.

The amount of the Chairman and CEO's fixed remuneration and the methods for calculating his variable remuneration (specifically the quantitative and qualitative financial and non-financial targets) are determined by the Board of Directors, based on an analysis of practices at a selection of comparable companies and on the executive's performance.

This fixed and variable remuneration is reviewed each year by the Board of Directors. Changes to this remuneration may be applied in view of the Company's economic and financial results for the previous financial year. Fixed remuneration is payable monthly over a 12-month period.

Mr. Eric Hémar does not receive any remuneration from the Group. He receives remuneration from Comète, a company in which he holds a 50.25% equity stake (the remainder being held by his wife and children) and which has signed a management agreement and services agreements with various Group subsidiaries, as set out in section 3.1.6.

Under these agreements and in respect of 2024, the Board of Directors proposes the following items of annual fixed and variable remuneration:

Fixed remuneration	€700,000
Annual variable remuneration in the event that 100% of the targets below are achieved	€500,000

The annual variable portion of Mr. Eric Hémar's remuneration in respect of 2024 will be determined based on the achievement of the following targets:

Target <sup>(1)</sup>	% Annual variable remuneration
Realization of 2024 budget <sup>(2)</sup>	60%
Customer retention and business development <sup>(3)</sup>	20%
Achievement of 2024 CSR targets <sup>(4)</sup>	10%
Target identification and M&A approach	10%
Annual variable remuneration	100%

*(1) The target achievement for quantified criteria is not published for reasons of confidentiality.*

*(2) Financial targets include quantitative indicators regarding revenue growth, underlying operating income (EBIT) and trade receivables days sales outstanding.*

*(3) The business development and customer retention targets include quantitative indicators expressed as a percentage of revenues and qualitative indicators regarding business development with new customers and/or new sectors, in line with the financial and strategic management targets.*

*(4) The CSR policy implementation target includes qualitative indicators regarding the implementation of an organizational system and plan to implement the Group's CSR policy.*

If targets are surpassed, variable remuneration is capped at the fulfillment of the targets and payment of the annual variable remuneration presented in this section will be subject to approval by the general meeting called in 2024 to approve the 2023 financial statements.

#### **b) Exceptional remuneration**

The Company's remuneration policy does not provide for any exceptional remuneration attributable to the Chairman and CEO in the normal course of business.

However, in the event of an exceptional event or operation (including but not limited to: organic growth of over 10%, an external acquisition representing more than 20% of current revenues, the establishment of operations in a new country representing more than 10% of current revenues, etc.), exceptional remuneration as approved by the Board of Directors, pursuant to a reasoned decision, may be paid after approval by the general meeting.

#### **c) Deferred variable remuneration**

The Company's remuneration policy does not provide for any deferred variable remuneration attributable to the Chairman and CEO during the normal course of business.

However, in the event of an exceptional event or operation (including but not limited to: organic growth of over 10%, an external acquisition representing more than 20% of current revenues, the establishment of operations in a new country representing more than 10% of current revenues, etc.), deferred variable remuneration as approved by the Board of Directors may be paid after approval by the general meeting.

#### **d) Granting of bonus performance shares or stock options**

Subject to the provisions of Articles L. 225-197-1 II 4 and L. 225-185 of the French Commercial Code, the Chairman and

CEO's long-term incentive plans may take the form of bonus performance share plans or the granting of stock options, depending on the tax and social security framework applicable at the time of allocation. Long-term incentive plans are designed to ensure that the interests of executive corporate officers and shareholders are aligned. The vesting of performance shares granted or, where applicable, the exercise of stock options would be subject to stringent performance criteria, combining internal corporate criteria and external criteria which, as far as possible, would be measured with regard to the Company and Group's performance compared to the rest of the market.

The Board of Directors approves the allocation of bonus performance shares or stock options to the Chairman and CEO, ensuring that they are lawful (in particular as regards the proportion of the Company's capital held by the beneficiary) and that such allocations, which shall be valued in accordance with IFRS 2, do not represent an excessive proportion of the Chairman and CEO's total remuneration and that the portion of allocations reserved for the Chairman and CEO under a plan is in accordance with market practices.

If the Chairman and CEO's appointment is terminated before the end of the vesting period for performance shares or options granted, they will be deemed invalid unless the provisions applicable in the event of death or disability are applied.

#### **e) Remuneration related to taking office**

The Company's remuneration policy does not provide for any remuneration related to the assumption of office by the Chairman and CEO.

**f) Remuneration and commitments upon termination of duties**

The Chairman and CEO does not benefit from any commitments related to the termination of his duties in the form of severance pay and/or non-compete compensation.

**g) Remuneration awarded to directors**

The Company's remuneration policy provides for the allocation of remuneration related to the Chairman and CEO's membership of the Board of Directors.

**h) Remuneration and benefits in kind owed or potentially owed to the Chairman and CEO under agreements entered into, directly or through an intermediary, in respect of his or her term of office, with the company in which the office is held, any company controlled by such company within the meaning of Article L. 233-16 of the French Commercial Code, any company that such company controls, within the meaning of said article, or any company under the same controlling entity, within the meaning of said article**

Service agreements have been entered into between Comète (acting as lead holding company), in which Mr. Eric Hémar holds a 50.25% equity stake (with the remainder being held by his family), and the Group's various subsidiaries (including the Company in particular), it being specified that Mr. Eric Hémar is paid by Comète (see section 3.1.6 of this Universal Registration Document).

**i) Benefits in kind, insurance and pension**

The Chairman and CEO does not receive benefits in kind or pension and insurance benefits. However, the Board of Directors may approve the affiliation of the Chairman and

CEO, if his personal situation so allows, to a personal protection insurance scheme (healthcare costs, disability, invalidity and death) and to the mandatory, defined-contribution group complementary pension scheme granted to all Company employees.

**j) Any other item of remuneration that may be attributed by virtue of the corporate office**

The entire remuneration policy for the Chairman and CEO is set out above. He is not entitled to receive any additional remuneration in respect of his office.

**3.1.5.2.2 Remuneration policy applicable to the Deputy CEO****a) Annual fixed and variable remuneration**

The Deputy CEO's annual remuneration includes a fixed portion and a variable portion relating to the achievement of stringent financial and financial quantitative and qualitative targets determined at the beginning of the year in line with the strategy approved by the Board of Directors.

The amount of the Deputy CEO's fixed remuneration and the methods for calculating his variable remuneration (specifically the quantitative and qualitative financial and non-financial targets) are determined by the Board of Directors, based on an analysis of practices at a selection of comparable companies and on the executive's performance.

This fixed and variable remuneration is reviewed each year by the Board of Directors. Changes to this remuneration may be applied in view of the Company's economic and financial results for the previous financial year. Fixed remuneration is payable monthly over a 12-month period.

The remuneration awarded to Mr. Christophe Satin, Group Deputy CEO and director of the Company, includes a fixed and variable portion. In respect of 2024, the Board of Directors proposes the following items of annual fixed and variable remuneration:

Fixed remuneration	€500,000
Annual variable remuneration in the event that 100% of the targets below are achieved	€400,000
Benefits in kind <sup>(1)</sup>	€5,000

(1) Corresponds to a company vehicle

The annual variable portion of Mr. Christophe Satin's remuneration in respect of 2024 will be determined based on the achievement of the following targets:

Target <sup>(1)</sup>	% variable remuneration
Realization of 2024 budget <sup>(2)</sup>	60%
Achievement of 2024 CSR targets <sup>(3)</sup>	10%
Achievement of sales retention and customer development targets <sup>(4)</sup>	20%
Creation of new solutions to meet changing business needs	10%
Annual variable remuneration	100%

(1) The target achievement for quantified criteria is not published for reasons of confidentiality.

(2) Financial targets include quantitative indicators regarding revenue growth, underlying operating income (EBIT) and trade receivables days sales outstanding.

(3) The CSR policy implementation target includes qualitative indicators regarding the implementation of an organizational system and plan to implement the Group's CSR policy.

(4) The business development and customer retention targets include quantitative indicators expressed as a percentage of revenues and qualitative indicators regarding business development with new customers and/or new sectors, in line with the financial and strategic management targets.

We hereby inform you that, in the event targets are surpassed, variable remuneration is capped at the fulfillment of the targets and that payment of the annual variable remuneration presented in this section will be subject to approval by the general meeting called in 2025 to approve the 2024 financial statements.

#### b) Exceptional remuneration

The Company's remuneration policy does not provide for any exceptional remuneration attributable to the Deputy CEO in the normal course of business.

However, in the event of an exceptional event or operation (including but not limited to: organic growth of over 10%, an external acquisition representing more than 20% of current revenues, the establishment of operations in a new country representing more than 10% of current revenues, etc.), exceptional remuneration as approved by the Board of Directors, pursuant to a reasoned decision, may be paid after approval by the general meeting.

#### c) Deferred variable remuneration

The Company's remuneration policy does not provide for any deferred variable remuneration attributable to the Deputy CEO during the normal course of business.

However, in the event of an exceptional event or operation (including but not limited to: organic growth of over 10%, an external acquisition representing more than 20% of current revenues, the establishment of operations in a new country representing more than 10% of current revenues, etc.), deferred variable remuneration as approved by the Board of Directors may be paid after approval by the general meeting.

#### d) Granting of bonus performance shares or stock options

The Deputy CEO's long-term incentive plans may take the form of bonus performance share plans or the granting of stock options, depending on the tax and social security framework

applicable at the time of allocation. Long-term incentive plans are designed to ensure that the interests of executive corporate officers and shareholders are aligned. The vesting of performance shares granted or, where applicable, the exercise of stock options would be subject to stringent performance criteria, combining internal corporate criteria and external criteria which, as far as possible, would be measured with regard to the Company and Group's performance compared to the rest of the market.

The Board of Directors approves the allocation of bonus performance shares or stock options to the Deputy CEO, ensuring that they are lawful (in particular as regards the proportion of the Company's capital held by the beneficiary) and that such allocations, which shall be valued in accordance with IFRS 2, do not represent an excessive proportion of the Deputy CEO's total remuneration and that the portion of allocations reserved for the Deputy CEO under a plan is in accordance with market practices.

If the Deputy CEO's appointment is terminated before the end of the vesting period for performance shares or options granted, they will be deemed invalid unless the provisions applicable in the event of death or disability are applied.

#### e) Remuneration related to taking office

The Company's remuneration policy does not provide for any remuneration related to the assumption of office by the Deputy CEO.

#### f) Remuneration and commitments upon termination of duties

The Deputy Chief Executive Officer benefits from non-compete compensation. However, he does not benefit from any commitments related to the termination of his duties, although the Board of Directors may take out a "senior executive loss of employment" policy for the Deputy CEO,

which guarantees him all or part of his contractual income for a maximum period of 24 months.

**g) Remuneration awarded to directors**

The Company's remuneration policy provides for the allocation of remuneration related to the Deputy CEO's membership of the Board of Directors.

**h) Remuneration and benefits in kind owed or potentially owed to the Deputy CEO under agreements entered into, directly or through an intermediary, in respect of his or her term of office, with the company in which the office is held, any company controlled by such company within the meaning of Article L. 233-16 of the French Commercial Code, any company that such company controls, within the meaning of said article, or any company under the same controlling entity, within the meaning of said article**

None

**i) Benefits in kind, insurance and pension**

The Deputy CEO receives a benefit in kind consisting of the provision of a company car. He does not benefit from an insurance or pension plan. However, the Board of Directors may approve the affiliation of the Deputy CEO, if his personal situation so allows, to a personal protection insurance scheme (healthcare costs, disability, invalidity and death) and to the mandatory, defined-contribution group complementary pension scheme granted to all Company employees.

**j) Any other item of remuneration that may be attributed by virtue of the corporate office**

The entire remuneration policy for the Deputy CEO is set out above. He is not entitled to receive any additional remuneration in respect of his office.

**3.1.5.2.3 Remuneration policy applicable to members of the Board of Directors**

The May 31, 2022 general meeting set the total amount of remuneration to be paid to Board members in respect of their appointments at €150,000 per fiscal year with effect from fiscal 2022 (until decided otherwise). The Board of Directors pays each member a fixed portion of 50% (pro rata temporis depending on the start or end date of the term of office, as the case may be), and a variable portion of 50% in accordance with the attendance rate at Board meetings during the year. The Board of Directors takes Audit Committee membership into account in its distribution of the total amount to be allocated.

### 3.1.5.3 Corporate officer remuneration in respect of 2023

In application of the remuneration policy approved by the May 31, 2023 general meeting (8th to 10th ordinary resolutions), this paragraph sets out the remuneration and benefits allocated in respect of or paid during fiscal year 2023:

- to the Company's executive corporate officers, namely Mr. Eric Hémar, Chairman and CEO, and Mr. Christophe Satin, Deputy CEO, on the understanding that the variable

remuneration will not be paid until approval by the May 30, 2024 general meeting in accordance with the provisions of Article L. 22-10-34 of the French Commercial Code (see chapter 6 of this Universal Registration Document) and that no variable remuneration may be reclaimed,

- to the Company's directors.

Moreover, with regard to Mr. Eric Hémar and Mr. Christophe Satin, the following information is provided:

	Employment contract		Supplementary pension scheme		Indemnities or benefits actually or potentially due upon termination or change of duties		Compensation for a non-compete clause	
	Yes	No	Yes	No	Yes	No	Yes	No
<b>Eric Hémar</b>								
Chairman and CEO								
Initial appointment in 2010		X		X		X		X
End of term of office: 2025								
<b>Christophe Satin</b>								
Deputy CEO								
Initial appointment in 2013	X <sup>(1)</sup>			X		X <sup>(2)</sup>		X
End of term of office: 2025								

*(1) Christophe Satin co-founded ID Logistics in 2001. When he was first appointed in 2010 as representative of Immod, director, he had already been an ID Logistics employee for nine years. His employment contract, which is permanent, contains a three-month notice clause and does not contain any clauses related to specific severance payments. However, his employment contract does entitle him to a pension based on his length of service with the Group.*

*(2) Effective May 1, 2015, the Company took out a senior executive loss of employment insurance policy for Christophe Satin, which guarantees him 80% of his contractual income for a period of 18 months.*

The summary tables below were prepared in accordance with the provisions of AMF Position-Recommendation no. 2021-02. Tables 4, 5, 7 and 9 do not apply to the Company.

**a) Remuneration and benefits allocated in respect of 2023 or paid during that year to Mr. Eric Hémar, Chairman and CEO**

It is hereby specified that Mr. Eric Hémar receives no remuneration from the Group other than that paid by Comète (acting as lead holding company), as described below.

The table below presents the remuneration or benefits granted in respect of 2023 or paid during the same year to Comète, in which Mr. Eric Hémar, Chairman and Chief Executive Officer of the Company, and his family hold 100% of the capital.

<b>Remuneration allocated in respect of 2023 or paid during that year to Comète</b>	<b>Amount or accounting valuation</b>	<b>Presentation</b>
Fixed remuneration (paid)	€650,000	As decided by the May 31, 2023 general meeting (12 <sup>th</sup> resolution). Fixed remuneration accounts for 62% of total remuneration
Annual variable remuneration (to be paid subject to approval by the 2024 general meeting)	€400,000	On March 13, 2024, the Board of Directors noted that the conditions for payment of the variable remuneration were fully met, giving variable remuneration of €400,000*. Variable remuneration accounts for 38% of total remuneration.

**Summary of remuneration, options and shares allocated to Comète (acting as lead holding company), a company controlled by Eric Hémar, Chairman and CEO of ID Logistics Group and general manager of Comète (in euros)**

	2023	2022
Remuneration allocated in respect of the year	€1,050,000	€950,000
Valuation of deferred variable remuneration allocated during the year	n/a	n/a
Valuation of stock options granted during the year	n/a	n/a
Valuation of bonus shares	n/a	n/a
<b>TOTAL</b>	<b>€1,050,000</b>	<b>€950,000</b>

**Summary of the remuneration awarded to Comète (acting as lead holding company), a company controlled by Eric Hémar, Chairman and CEO of ID Logistics Group and general manager of Comète (in euros)**

	2023		2022	
	Amount allocated	Amount paid	Amount allocated	Amount paid
Fixed remuneration	650,000	650,000	550,000	550,000
Annual variable remuneration	400,000 <sup>(1)</sup>	400,000	400,000	300,000
Deferred variable remuneration	n/a	n/a	n/a	n/a
Exceptional remuneration	n/a	n/a	n/a	300,000
Remuneration allocated in respect of directorships	n/a	n/a	n/a	n/a
Benefits in kind	n/a	n/a	n/a	n/a
<b>TOTAL</b>	<b>1,050,000</b>	<b>1,050,000</b>	<b>950,000</b>	<b>1,150,000</b>

(1) This variable remuneration shall only be paid once approved by the May 30, 2024 general meeting.

In particular, the annual variable portion of Comète's remuneration in respect of 2023 was determined based on the achievement of the following targets:

Target <sup>(1)</sup>	% variable remuneration	Achievement rate
Financial targets	60%	100%
Strategic management	10%	100%
Business development and customer retention	20%	100%
CSR policy targets	10%	100%
Annual variable remuneration approved by the May 31, 2023 general meeting		€400,000
Annual variable remuneration calculated in respect of 2023		€400,000
Annual variable remuneration allocated in respect of 2023 (which will be subject to approval by the 2024 general meeting)		€400,000

(1) The target achievement for quantified criteria is not published for reasons of confidentiality.

For information purposes, the tables below specify remuneration paid by Comète to Eric Hémar in respect of his position as general manager of Comète.

**Summary of remuneration, options and shares allocated to Eric Hémar, Chairman and CEO of ID Logistics Group and general manager of Comète**

	2023	2022
Remuneration allocated in respect of the year	160,000	160,000
Valuation of deferred variable remuneration allocated during the year	n/a	n/a
Valuation of stock options granted during the year	n/a	n/a
Valuation of bonus shares	n/a	n/a
Value of other long-term remuneration plans	n/a	n/a
<b>TOTAL</b>	<b>160,000</b>	<b>160,000</b>

**Summary of the remuneration paid by Comète (acting as lead holding company), a company controlled by Eric Hémar, Chairman and CEO of ID Logistics Group and general manager of Comète**

	2023		2022	
	Amount allocated	Amount paid	Amount allocated	Amount paid
Fixed remuneration	160,000	160,000	160,000	160,000
Annual variable remuneration	0	0	0	0
Deferred variable remuneration	n/a	n/a	n/a	n/a
Exceptional remuneration	n/a	n/a	n/a	
Remuneration allocated in respect of directorships	n/a	n/a	n/a	n/a
Benefits in kind	n/a	n/a	n/a	n/a
<b>TOTAL</b>	<b>160,000</b>	<b>160,000</b>	<b>160,000</b>	<b>160,000</b>

It is also specified that the departure of Mr. Hémar would not per se entail the automatic and immediate termination of the services agreements concluded with Comète. Nevertheless, all of these agreements could be terminated by the respective Group companies, subject to a three-month notice period.

Finally, until April 2022, Mr. Hémar was a director of Coface, a company listed on Euronext Paris, which paid him €55,000 in 2022 in respect of his directorship in 2021.

The table below sets out the amount of remuneration paid to the Chairman and CEO (as detailed above in the summary of remuneration awarded to Comète) compared to the average

and median remuneration paid to Company employees other than corporate officers over the last five years.

	2019	2020	2021	2022	2023
Annual change in total remuneration paid* during the year to the Chairman and CEO	+6.4%	-27.0%	+87.8%	+1.1%	-8.7%
Annual change in average total remuneration paid during the year to Company employees**	+10.7%	-1.1%	+43.1%	+14.5%	-5.8%
Total remuneration paid* to the Chairman and CEO as a multiple of the average remuneration paid to Company employees**	3.7	2.2	3.1	3.1	3.0
Total remuneration paid* to the Chairman and CEO as a multiple of the median remuneration paid to Company employees**	5.5	2.2	4.0	5.4	4.6
Total remuneration paid* to the Chairman and CEO as a multiple of the French minimum wage (SMIC)	31.4	22.6	42.0	40.2	34.1
Performance of the Company					
• Consolidated revenues	+8.8%	+7.1%	+16.3%	+31.9%	+10.7%
• Consolidated EBIT	+14.2%	+12.0%	+25.0%	+48.7%	+16.3%

\* Calculated in gross equivalent excluding social security charges for comparison purposes: The calculation uses the gross remuneration amounts paid to employees before employer social security charges. The amounts paid to Comète in the form of fees are not subject to social security charges and therefore correspond to the total cost for the Company. To make these two amounts comparable, the fees paid to Comète used for the calculation are reduced by an equivalent amount of employer social security charges to make them comparable to a gross amount before employer social security charges.

\*\* Other than corporate officers.

#### b) Remuneration and benefits allocated in respect of 2023 or paid during that year to Mr. Christophe Satin, Deputy CEO

The table below presents the remuneration and benefits paid or owing to Mr Christophe Satin, Deputy Chief Executive Officer, in respect of fiscal year 2023.

Remuneration allocated in respect of 2023 or paid during that year	Amount or accounting valuation	Presentation
Fixed remuneration (paid)	€500,000	As decided by the May 31, 2023 general meeting (13 <sup>th</sup> resolution). Fixed remuneration accounts for 63% of total remuneration.
Annual variable remuneration (to be paid subject to approval by the 2024 general meeting)	€300,000	On March 13, 2024, the Board of Directors noted that the conditions for payment of the variable remuneration were fully met, giving variable remuneration of €300,000*. Variable remuneration accounts for 37% of total remuneration
Deferred variable cash remuneration	n/a	
Exceptional remuneration	n/a	
Stock options, performance shares or any other long-term item of remuneration	n/a	
Remuneration in respect of directorship	n/a	
Valuation of benefits in kind	€5,000	Company vehicle
Remuneration, indemnities or benefits owed or potentially owed due to the assumption of, resignation from or change in duties or following the exercise thereof	n/a	
Contractual remuneration	n/a	

\* see section below on the breakdown of variable remuneration.

**Summary of remuneration, options and shares allocated to Christophe Satin, Deputy CEO of ID Logistics Group (in euros)**

	2023	2022
Remuneration allocated in respect of the year	800,000	700,000
Valuation of deferred variable remuneration allocated during the year	n/a	n/a
Valuation of stock options granted during the year	n/a	n/a
Valuation of bonus shares	n/a	n/a
Value of other long-term remuneration plans	n/a	n/a
<b>TOTAL</b>	<b>800,000</b>	<b>700,000</b>

**Summary table of remuneration paid to Christophe Satin, Deputy CEO of ID Logistics Group (in euros)**

	2023		2022	
	Amount allocated	Amount paid	Amount allocated	Amount paid
Fixed remuneration	500,000	500,000	400,000	400,000
Annual variable remuneration	300,000 <sup>(1)</sup>	300,000	300,000	250,000
Deferred variable remuneration	n/a	n/a	n/a	n/a
Exceptional remuneration	n/a	n/a	n/a	300,000
Remuneration awarded for directorships	n/a	n/a	n/a	n/a
Benefits in kind <sup>(2)</sup>	3,482	3,482	10,000	10,000
<b>TOTAL</b>	<b>803,482</b>	<b>803,482</b>	<b>710,000</b>	<b>960,000</b>

(1) This variable remuneration shall only be paid once approved by the May 30, 2024 general meeting.

(2) Corresponds to a company vehicle

In particular, the annual variable portion of Christophe Satin's remuneration in respect of 2023 was determined based on the achievement of the following targets:

Target <sup>(1)</sup>	% variable remuneration	Achievement rate
Financial targets	60%	100%
Business development and customer retention targets	20%	100%
Targets related to the successful integration of external acquisitions	10%	100%
CSR policy targets	10%	100%
Annual variable remuneration	100%	€300,000
Annual variable remuneration calculated in respect of 2023		€300,000
Annual variable remuneration allocated in respect of 2023 (which will be subject to approval by the 2024 general meeting)		€300,000

(1) The target achievement for quantified criteria is not published for reasons of confidentiality.

The table below sets out the amount of remuneration paid to the Deputy CEO (as detailed above in the summary of remuneration awarded to Christophe Satin) compared to the average and median remuneration paid to Company employees other than corporate officers over the last five years.

	2019	2020	2021	2022	2023
Annual change in total remuneration paid during the year to the Deputy CEO	+9.4%	-22.3%	+50.6%	+38.1%	<b>-16.3%</b>
Annual change in average total remuneration paid to Company employees*	+10.7%	-1.1%	+43.1%	+14.5%	<b>-5.8%</b>
Total remuneration paid to the Deputy CEO as a multiple of the average remuneration paid to Company employees*	3.9	2.4	2.8	3.8	<b>3.4</b>
Total remuneration paid to the Deputy CEO as a multiple of the median remuneration paid to Company employees*	5.8	2.5	3.5	6.5	<b>5.2</b>
Total remuneration paid to the Deputy CEO as a multiple of the French minimum wage (SMIC)	33.2	25.0	37.3	48.6	<b>38.6</b>
Performance of the Company					
• Consolidated revenues	+8.8%	+7.1%	+7.1%	+7.1%	<b>+10.7%</b>
• Consolidated EBIT	+14.2%	+12.0%	+12.0%	+12.0%	<b>+16.3%</b>

\*Other than corporate officers.

### c) Bonus shares allocated to each corporate officer

Corporate officer	Plan no. and date	Number of bonus shares allocated during the year	Value of shares at allocation date price	Vesting date	End of lock-in period	Performance criteria
Christophe Satin, Deputy CEO	Plan 2023-T 8/30/2023	13,000	€3,146,000	8/31/2028	8/31/2028	(1)
<b>Total</b>		<b>13,000</b>	<b>€3,146,000</b>			

(1) Continued employment of the beneficiary and achievement of revenue and EBIT criteria for 2022-2026. Quantified criteria levels are not published, for confidentiality reasons.

### d) Remuneration paid to non-executive corporate officers of the Company

The May 31, 2022 general meeting set the total amount of remuneration to be paid to Board members in respect of their appointments at €150,000 per fiscal year with effect from fiscal 2022 (until decided otherwise). The Board of Directors pays each director a fixed 50% portion of this amount (pro rata temporis depending on the start or end date of the term of office, as the case may be) taking any committee membership into account, and a variable 50% portion in accordance with the attendance rate at Board meetings during the year.

In respect of fiscal year 2022, the Company awarded remuneration in respect of directorships for a total gross amount of €138,642, no remuneration having been awarded to Eric Hémar, Christophe Satin, Jesus Hernandez or Vera Gorbacheva.

In respect of fiscal year 2023, the Company awarded remuneration in respect of directorships for a total gross amount of €136,785, no remuneration having been awarded to Eric Hémar, Christophe Satin, Jesus Hernandez or Malgorzata Hornig.

Non-executive corporate officers	Gross amounts allocated in respect of fiscal year 2023	Gross amounts paid during fiscal 2023 in respect of fiscal 2022	Gross amounts allocated in respect of fiscal year 2022	Gross amounts paid during fiscal 2022 in respect of fiscal 2021

(1) Remuneration received under the employment contract and prorated according to the term of office as director

(2) Ms. Carine Mosnier and Mr. Pascal Teranne receive remuneration as employees, the amount of which is not disclosed.

(3) Not established as of the Universal Registration Document Date

With the exception of the remuneration described above, the Company does not owe and did not pay any fees to Immod or Comète for their duties as directors in respect of fiscal 2022

and 2023, or to Ms. Marie-Aude Hémar, permanent representative of Comète on the Company's Board of Directors.

### 3.1.6 Contracts with corporate officers or a shareholder holding more than 10% of the voting rights in the Company

As of December 31, 2023, there were three indirect services agreements between Eric Hémar and the ID Logistics group via Comète. These agreements have an unlimited term with

a three-month notice period and are subject to the following financial terms and conditions for 2023:

Company	Purpose	Fixed portion paid in 2023* (€)	Variable portion paid in 2023 (€)	Variable portion allocated in respect of 2023* (€)
ID Logistics Group SA	General management, team management and strategic oversight, notably abroad	171,000	350,000	350,000
ID Logistics France SAS	Business development, human resources management	431,000	50,000	50,000
La Flèche SAS	Corporate relations, professional organizations, business development	48,000	-	-
<b>Total</b>		<b>650,000</b>	<b>400,000</b>	<b>400,000</b>

(\*) The fixed portion is billed monthly and payable within 30 days.

(\*\*) The variable portion is billed the following year after approval of the amount by the general meeting, subject to the payment terms applicable to the fixed portion. The variable portion for 2023 shall only be paid once approved by the May 30, 2024 general meeting.

There is also a management agreement between ID Logistics Group and Comète, pursuant to which Comète manages the Group and provides assistance in the performance of management services to the Group's direct and indirect subsidiaries. No consideration is awarded under this agreement.

See also the statutory auditors' special report in section 4.10.3 as well as Note 26 to the consolidated financial statements.

### 3.1.7 Evaluation procedure for ordinary agreements

The Audit Committee and the Board of Directors assess ordinary agreements entered into or renewed by the Company on a regular basis and at least once a year in order to ensure that they relate to ordinary transactions entered into on arm's length terms. They base their judgments on information provided by the Company's legal department, helped where appropriate by the finance department, which

meets at least annually to review ongoing agreements made or renewed during the fiscal year and the criteria for classification and terms and conditions of these agreements. Persons with a direct or indirect interest in any of these agreements can contribute to the discussions of the Audit Committee and Board of Directors but not participate in the assessment.

### 3.1.8 Shareholder participation in general meetings

Detailed information regarding the specific conditions relating to shareholder participation in general meetings is provided in Article 20 et seq. of the Company bylaws. Any shareholder, irrespective of the number of shares held, is entitled to participate in general meetings upon proof of

identity, subject to registration in a securities account prior to midnight (Paris time) on the second business day preceding the meeting, either in the registered share accounts kept by the Company, or in the bearer securities account kept by the authorized intermediary.

### 3.1.9 Items liable to have an impact in the event of a public takeover bid

In application of Article L. 22-10-11 of the French Commercial Code, we wish to specify the following points liable to have an impact in the event of a public takeover bid:

- The capital structure, the direct or indirect equity investments known to the Company and all relevant details are described under section 3.1.1 of the Universal Registration Document, "Capital stock".
- There is no restriction in the bylaws on the exercise of voting rights except for the cancellation of voting rights, which one or more shareholders may request, if a shareholder has failed to declare having crossed a shareholding threshold provided for in the bylaws.
- There is no restriction in the bylaws on share transfers, with the exception of the shareholder agreement described in section 3.1.1 h) of the Universal Registration Document, "Control of the Company".
- To the Company's knowledge, there are no agreements or commitments between shareholders other than those described in section 3.1.1 h) of the Universal Registration Document, "Control of the Company".
- There are no shares granting holders special control. However, a double voting right is conferred upon shares which can be proved to have been registered in the name of the same shareholder for at least four years.
- The appointment and dismissal of members of the Board of Directors are governed by statutory provisions and Articles 12 to 17 of the bylaws.

- With respect to the powers of the Board of Directors, current authorizations are set out in the table of powers to increase capital stock under section 3.1.1 e) of the Universal Registration Document, "Authorized capital". The Board of Directors' share buyback powers are described under section 5.2 "Treasury stock - Description of the share buyback program".
- Changes to the Company bylaws are made in accordance with statutory and regulatory provisions.
- The voting rights attached to ID Logistics shares held by staff via the ID Logistics Group employee equity mutual fund (FCPE) are exercised by a representative authorized by the fund's supervisory board to represent the holders in general meetings.
- There are no special agreements providing for indemnification if Board members or employees resign, are made redundant without actual and serious cause or if their employment is terminated due to a public takeover bid.
- The loan agreement and revolving credit facility contracted in 2022 and partly refinanced in 2023 by ID Logistics as part of the refinancing of existing acquisition loans will be canceled and all or part of the outstanding balance (€445 million excluding interest at December 31, 2023) may immediately fall due in the event of a change in control or delisting of the Company share.

## 3.2 INTERNAL CONTROL AND RISK MANAGEMENT PROCEDURES

The Company relies on the AMF's reference manual and guidelines for small and mid caps published in January 2007 and updated in July 2010 to establish its internal control manual and to structure its approach.

The internal control system covers all companies under the Group's control and included in the Group consolidation. Internal controls are tailored to the specific features of every consolidated company and take into account the relations between the Company and its subsidiaries.

However well the risk management and internal control procedures are designed and applied, they cannot provide an absolute guarantee of the Company's achievement of its objectives, which may partly depend on factors beyond the Company's control. Indeed, there are inherent limitations to any system and procedures in view of factors such as uncertainties in the outside world, use of judgment or flaws that can occur due to technical failures or human or other errors.

### a) General principles of risk management

A risk is the possibility of the occurrence of an event, the consequences of which could harm the Company's human resources, assets, environment, objectives or reputation.

Risk management consists of a set of appropriate resources, behaviors, procedures and actions defined and implemented by the Company. Risk management aims to identify and analyze the major risks faced by the Company. Risks exceeding limits considered acceptable are dealt with in an appropriate manner. In this context, the Company may implement action plans involving the introduction of appropriate procedures and controls as well as specific insurance programs if applicable.

The objectives of risk management are as follows:

- Make the Company's decision-making and strategic and operational procedures secure with a view to promoting its targets by taking an objective overview of potential threats and opportunities, resulting in an appropriate risk-taking approach and adequate allocation of human, technical and financial resources;
- Safeguard and enhance the Company's value, assets and reputation by identifying and analyzing key threats and opportunities so that risks may be anticipated;
- Ensure that the Company's actions are consistent with its values;
- Rally the Company's employees behind a shared vision of the main risks and promote awareness of the challenges and risks related to their job.

Consistent with these objectives, the risk management system is based on:

- an organizational system;
- persons involved in internal control;

- a reference manual;
- formal periodic review of the principal risks facing the Group;
- a code of ethics.

Any financial risks associated with climate change and the measures taken by the Company to reduce its carbon footprint in all aspects of its business are described in the consolidated statement of non-financial performance set out in section 1.11 of the Universal Registration Document.

### b) General principles of internal control

The internal control procedures are based on the risk management system and are designed to identify the main risks and issues requiring control. The procedures include appropriate controls and ensure the efficiency thereof.

They cover a set of resources, behaviors, procedures and actions tailored to the specific features of each subsidiary and the Group as a whole, which:

- promote control over the business, the efficiency of its operations as well as the effective use of resources,
- and must allow the Group to appropriately take into account major operational, financial and compliance risks.

The internal control procedures are specifically intended to ensure:

- compliance with laws and regulations in force,
- compliance with instructions and guidelines laid down by senior management or the Board of Directors,
- the proper functioning of Company in-house procedures, including those designed to safeguard its assets,
- accurate accounting and financial data.

By helping to prevent and control the risk of the Company not achieving its objectives, internal control plays a key role in the conduct and control of the Group's various businesses. In this context, the Company has adopted a dynamic approach to adapt its internal control procedures to the nature and development of its activities.

The Group internal control procedures are primarily based on its organization, its capacity to disseminate information quickly and its targeted human resources policy.

The Group's organizational structure constitutes the underlying internal control environment.

► **Board of Directors**

The Board of Directors discusses the key issues facing the Group and decides on major strategies. Through its Rules of Procedure, Audit Committee and ongoing control over Group management, the Board ensures that internal controls function correctly throughout the Group.

► **Senior management and Executive Committee**

The Chairman and CEO has overall operational and functional responsibility to implement the Board of Directors' approved strategy across all Group businesses. He is specifically responsible for the effective implementation of internal controls within the Group.

The Chairman and CEO is assisted in his duties by the Deputy CEO and by an Executive Committee whose members are appointed by the Chairman and the Deputy CEO. As of the Universal Registration Document Date, the Executive Committee comprised the Chief Financial Officer, the Chief Development and Innovation Officer and the Chief Operating Officer.

Executive Committee members are responsible for setting up and monitoring internal control systems in their respective areas of responsibility.

► **International Committee**

The International Committee comprises the members of the Executive Committee, the directors of the 18 countries where the Group operates and some Group directors who are not members of the Executive Committee.

The International Committee is designed to be a forum for the exchange and communication of information between its members. The Committee ensures that Group strategy and the operational policies derived from it, including internal control matters, have been properly implemented.

► **Operating divisions and functional departments**

In view of the Group's highly decentralized structure, the general managers of every business have the necessary powers to organize, direct and manage the operations and functions for which they are responsible, and to delegate authority likewise to the managers who report to them.

Each division is responsible for adopting internal controls in line with both its organization and Group policies and rules.

The Group's lean management style and the regular financial, operational, HR and sales reporting ensure that information is rapidly and directly distributed. The Group has also introduced in-house communication systems including intranet, a staff journal, plasma screens, etc., which help to spread a culture of internal control.

Finally, the human resources function fully adheres to internal control procedures:

- on staff recruitment by ensuring appropriate skills in line with the responsibilities of the position and an awareness of Group policies and values;
- through an ongoing training program;
- through annual performance reviews.

**c) Internal control relating to the preparation and processing of financial information**

As part of the Company's overall internal control system described above, the Group finance department is specifically responsible for accounting and financial internal controls which help to ensure that accounting and financial information is accurate and in compliance. The system functions as follows:

► **Organization**

- Accounting is centralized for all activities in France. While each country has its own accounting department so as to comply with local rules for statutory accounts, taxation and administrative declarations, as in France, it is centralized and supplier invoices and payments are made directly from the head office of the subsidiaries concerned.
- The consolidation is performed within the Group finance department. Consolidation instructions and a reporting timetable are sent out at the beginning of every year. Standard consolidation packages are used by the various subsidiaries. Currency conversions and IFRS adjustments are primarily performed within the corporate consolidation department, which constantly checks accounting standards and, where necessary, adjusts the procedure and data reported by the subsidiaries.
- All reporting and analysis by site and by country is centralized with the Group management accounting department, which prepares all reports that, after review by the Group finance department, are issued to senior management.
- Treasury is centralized for all activities in France. Furthermore, a cash pooling system has been set up with certain countries, covering 56% of available cash at December 31, 2023. All borrowings, including outside France, are approved and centralized with the Group finance department.

- Financial communications are centralized under the direct responsibility of the Chairman and CEO, the Deputy CEO and the CFO, who are the only people entitled to communicate Group financial data to outsiders. They prepare all financial press releases, which are published via a licensed broadcaster, the Group website and a PR agency.
- This organization is regularly reviewed and the employees involved are subject to an annual performance review. Training plans are put in place in order to maintain skills in line with Group requirements. The Group finance department participates in and approves the recruitment of chief financial officers of foreign subsidiaries. New foreign CFOs spend two weeks in induction training at the Group head office in France.

► **Systems and procedures**

Financial information is prepared on integrated systems: the SAP ERP system covers accounting for all French, Spanish, Portuguese, Dutch, Belgian, Polish and Romanian entities (69% of Group revenues) and management reporting for all Group business units worldwide. All users, including foreign CFOs and financial controllers, are trained in using this ERP system and the procedures are distributed. The budget is also prepared in this system in order to facilitate comparisons and analysis.

► **Controlling**

Management reports are regularly prepared and reported:

- on a weekly basis showing margin per warehouse;
- on a monthly basis including cut-off entries per site and overhead costs per country.

These monthly reports are backed up by an accounting closure which supplements these analyses with details concerning net income, cash flows, DSO and the balance sheet for each legal entity.

The monthly reports and financial results are discussed by Group finance department staff every month with every subsidiary before being presented to senior management.

Monthly scoreboards showing these financial indicators alongside operational indicators (e.g. volumes handled, hours worked, load ratio, hourly rate, etc.) and human resources indicators (e.g. temporary staff rate, accident rates, absenteeism, etc.) are sent to senior management. Variances vs. budget and prior year are explained and analyzed.

Real-time productivity reports per site (number of packages prepared, resources) are available on an ongoing basis.

The Group finance department performs a weekly cash review highlighting changes in cash balances over the previous week and a cash flow forecast for the following 5 weeks.

In addition to these various reports, a full-year projected Group cash flow statement and income statement are prepared every month based on forecasts received from all subsidiaries. These forecasts are presented and discussed with senior management, who subsequently take corrective action required to maintain estimated results in line with in-house budgets.

Finally, once a year, a three-year plan is prepared and presented to senior management per site and per country. These presentations lead to in-depth discussions on the financial results of the current year and the next three years, as well as on operational matters in order to anticipate their potential financial consequences: customer satisfaction surveys, HR statistics (industrial accidents, absenteeism, employment of disabled persons, etc.), identification of high-potential managers, review of staff morale, etc.

## 3.3 VIGILANCE PLAN

In application of Law no. 2017-399 dated March 27, 2017 on the vigilance of parent companies and instructing companies, the Chairman of the Board of Directors of the ID Logistics group has adopted this vigilance plan in order to identify the risks and prevent serious breaches of human rights and fundamental freedoms, the health and safety of individuals and the environment.

Furthermore, Article 17 of the Sapin II law requires the ID Logistics group to implement an anti-corruption plan.

As the requirements and approach of these two laws are similar and complement one another, a joint working group has been set up. The vigilance plan prepared applies to the entire ID Logistics group, which includes all consolidated companies (hereinafter referred to as the "Group"). It presents the overall progress of both plans.

The plan is one of many important parts of the Group's sustainable development policy, which has been in place for several years and is presented in the annual CSR report. The vigilance law has provided an opportunity to strengthen CSR efforts and, in particular, measures relating to the coordination of suppliers and subcontractors.

In order to prepare this plan, which applies to all ID Logistics group companies, a working group comprising the following department representatives was formed: purchasing, human resources, risk management, legal, compliance, operations.

The process for drawing up and defining the vigilance plan began in 2017 and continued up until now, covering the whole Group.

The plan has been gradually rolled out across the Group's subsidiaries since 2022. The roll-out of the scheme continued in 2023.

The current plan was designed based on the initial observations set out in the vigilance law:

- Risk mapping
- Risk assessment and prevention
- Whistleblowing system
- Measuring effectiveness

### 3.3.1 Identification and assessment of risks generated by ID Logistics' business

For a number of years, the Group has taken a global approach to managing its risks. The risks identified are classified under seven categories: External & Strategic, Business, Finance, Operational, Legal, Human Resources, and IT.

The working group conducted a review of all of these risks with regard to the vigilance law and Sapin II. Additional risks were identified and existing risks were defined in more

detail, through a review of the entire value chain (risks of adverse impacts on individuals and the environment, and not only for the company).

24 specific risks were identified and classified under four categories:

- Corruption & Integrity
- Human rights and fundamental freedoms
- Health and safety
- Environment

Area	Examples of risks assessed
Corruption & Integrity	<ul style="list-style-type: none"> <li>• Gifts, donations and sponsorship</li> <li>• Facilitation payments</li> <li>• Conflicts of interest</li> <li>• Collusion with customer or supplier</li> <li>• Goods theft</li> <li>• ...</li> </ul>
Human rights	<ul style="list-style-type: none"> <li>• Illegal workers</li> <li>• Compliance with working times</li> <li>• Regulations regarding temporary staff</li> <li>• Harassment and discrimination</li> <li>• ...</li> </ul>
Health and Safety	<ul style="list-style-type: none"> <li>• Analysis of accidents at logistics sites</li> <li>• Analysis of road transport accidents</li> <li>• Food hygiene with respect to stored products</li> <li>• ...</li> </ul>
Environment	<ul style="list-style-type: none"> <li>• Storage of toxic materials</li> <li>• Building upkeep (sprinklers, etc.)</li> <li>• ...</li> </ul>

The risk assessment methodology has been formalized to enable the Group's various subsidiaries to implement an annual self-assessment campaign:

► **Gross risk**

Gross risk includes the probability of the risk materializing and the impacts of the risk (financial, human and reputational) without taking into account the risk management measures in place.

Risk assessment is based on three criteria:

1. Country vulnerability

Country risk is assessed using two indices:

- *CPI Transparency International*, Corruption Perception Index
- *Maplecroft*, human rights

2. History/Maturity of the subsidiary in the area

Identification and analysis of past incidents (serious accidents, disputes with partners, etc.) as well as the level of the subsidiary's maturity with regard to ethics: regulatory framework, local code of ethics, local whistleblowing system, etc.

3. Risk factors

Specific factors relating to the organization of the subsidiary, its country of location, the services provided or the nature of the products stored (toxic materials, food/fresh products, etc.).

► **Net risk**

This is the residual risk, i.e. the gross risk after taking into account control measures in place (procedures, checks, audits).

The net risk assessment determines the actions to be carried out:

- Danger zone: mandatory implementation of an action plan by local management to reduce the risks and monitor progress at Group level.
- Vigilance zone: audit/checks of control systems in place at Group level.
- Comfort zone: local risk monitoring.

The risk matrix and associated methodology are formalized and distributed by the Group risk management department.

The Ethics & Compliance Officers (usually the CFO and HRD) at each subsidiary carry out a self-assessment of the subsidiary's risks, identify the risk management systems in place and draw up an action plan for critical risks.

Subsidiary risk maps were consolidated by the Group risk management department, which made adjustments/decisions.

This consolidation enabled the Group to establish two types of action plan:

- actions driven and led by the Group and shared with the subsidiaries,
- local actions led by the subsidiaries.

### 3.3.2 Risk assessment and prevention

The risk prevention strategy is based on a series of measures adapted to each area for which the Group is responsible. The main measures are presented below.

► **Code of Ethics**

The Group's Code of Ethics sets out a set of rules and principles to be applied by all employees. Having been provided to all employees and made available on the Group's website, it was updated in 2018 to reflect legislative changes (Sapin II law on the prevention of corruption). All topics covered by the vigilance law and Sapin II are included in this code, which has been appended to the internal regulations for French subsidiaries. As part of the induction procedure, the Code of Ethics is automatically sent by email to each new employee. This Code of Ethics is translated and distributed among each of our subsidiaries. In addition to the Code of Ethics, the Group has implemented specific procedures (gifts and invitations, donations and sponsorship, etc.).

► **Ethics training**

The most exposed staff (all head office employees and operations managers in France) receive ethics training in e-learning format. Furthermore, the Group has shared these training materials with the foreign subsidiaries, which have trained their staff via physical courses or e-learning.

This training module has been revised to take into account the requirements of the vigilance/Sapin II laws and to make the content more relevant to the risks identified during the risk mapping process (case studies and roleplays). It must enable employees to identify human rights and ethical risks in their day-to-day duties, as well as the areas and activities most at risk, and to acquire the right reflexes.

More specific in-class training sessions are provided to our employees and temporary staff members at our sites, as part of the integration process (covering safety, management and analysis of industrial accidents, PMS, management).

Since 2020, dedicated "responsible procurement" training has also been provided to the Group purchasing department.

► **ID Logistics Certification ("CID")**

In order to ensure consistent operational quality across all its subsidiaries throughout the world and to mitigate operational risks, the Group has implemented internal certification at all its sites/logistics warehouses.

The framework includes Group and local rules, and involves:

- internal audits (conducted by operational staff) and external audits (conducted by an independent third party),
- action plans,
- a site performance report with an associated grade.

The framework also includes regulatory and safety components that cover vigilance requirements:

Group	Commitment	Checkpoint examples
Safety & Regulations	Staff receive safety training	<ul style="list-style-type: none"> <li>Monitoring and control of operating authorizations</li> <li>Handling and posture training (load bearing, electrical authorizations, evacuation, classified sites, etc.)</li> <li>On-site display of good practices and integration booklets</li> </ul>
Safety & Regulations	Employee files are monitored	<ul style="list-style-type: none"> <li>Verification of documents</li> <li>Verification of medical exams and other regulatory requirements</li> <li>Integration process</li> </ul>
Safety & Regulations	Industrial accidents are under control	<ul style="list-style-type: none"> <li>Monitoring and improvement of frequency and severity rates</li> <li>Accident reports and preliminary analysis sheets</li> <li>Risk assessment by work unit</li> </ul>
Safety & Regulations	The management of the single assessment document is controlled	<ul style="list-style-type: none"> <li>Risk assessment and review by work unit</li> <li>Safety meeting &amp; and monthly safety inspection</li> </ul>
Safety & Regulations	Regulatory aspects are in place	<ul style="list-style-type: none"> <li>Prevention plan suited to the specific risks relating to subcontractor operations and working environment</li> <li>Fire safety certificates, driver/operator licenses, etc.</li> <li>Evacuation drills</li> <li>Wearing of personal protective equipment</li> </ul>
Safety & Regulations	Site security and access are ensured	<ul style="list-style-type: none"> <li>Audit of security specifications</li> <li>Known and applied safety protocol</li> <li>Loading/unloading procedures</li> </ul>
Safety & Regulations	Environmental risks are monitored at the sites concerned	<ul style="list-style-type: none"> <li>Monitoring of authorizations and approvals</li> <li>Toxic materials management and thresholds</li> </ul>
Safety & Regulations	Actions to improve working conditions are underway	<ul style="list-style-type: none"> <li>Actions and best practices for the design of picking locations, pallet wrapping, use of mobile equipment, etc.</li> </ul>
Safety & Regulations	Each site complies with a preventive and regulatory maintenance plan and ensures that the necessary repairs are performed	<ul style="list-style-type: none"> <li>Follow-up with ID Logistics' maintenance service providers</li> <li>Follow-up of controls and audits</li> <li>Audit of palletizers</li> <li>Compliance of agreements signed with suppliers and subcontractors</li> <li>Compliance of nationally approved suppliers</li> </ul>
Safety & Regulations	Handling and IT equipment are managed	<ul style="list-style-type: none"> <li>Verification of regular general inspections</li> <li>Forklift maintenance</li> <li>Forklift safety (anti-start system if safety belt is not attached, etc.)</li> <li>Inventory of IT equipment</li> </ul>

Group	Commitment	Checkpoint examples
Safety & Regulations	Waste management and cleaning are ensured for non-food sites	<ul style="list-style-type: none"> <li>• Waste recycling and monitoring of recycling bill</li> <li>• Specific disposal system for industrial waste</li> <li>• Cleaning checks</li> </ul>
Safety & Regulations	The sanitary control of the site is ensured (temperature-controlled warehouse)	<ul style="list-style-type: none"> <li>• Specific training plan</li> <li>• Product safety data sheets</li> <li>• Procedure and training guide for product checks at goods-in and shipment</li> </ul>
Safety & Regulations	The sanitary control of the site is ensured (ambient warehouse for food storage)	<ul style="list-style-type: none"> <li>• Specific training plan</li> <li>• Product safety data sheets</li> <li>• Procedure and training guide for product checks at goods-in and shipment</li> </ul>
Safety & Regulations	The sanitary control of the site is ensured (mainly non-food ambient warehouse)	<ul style="list-style-type: none"> <li>• Specific training plan</li> <li>• Product safety data sheets</li> <li>• Procedure and training guide for product checks at goods-in and shipment</li> </ul>

► **Purchasing and CSR Charter**

The corporate, social, ethical and environmental commitments required by the Group are set out in a supplier code of conduct or in the ID Logistics Purchasing and CSR Charter. The following aspects are covered:

- Business ethics and confidentiality.
- Anti-corruption measures.
- Environmental protection: energy and natural resource consumption, toxic materials management, waste recycling.
- Fundamental human rights (compliance with fundamental conventions, anti-discrimination initiatives).
- Working conditions (schedules, pay).
- Workplace health and safety.

Suppliers are required to adhere to these principles and ensure that all of their subcontractors enforce them throughout their supply chains.

The charter must be signed by all suppliers as well as those participating in calls for tenders launched by the Group.

The Group has signed the “Responsible Supplier Relationship” charter, in which it undertakes to maintain a respectful relationship with all suppliers, to incorporate environmental and social responsibility issues and to ensure the professionalism and ethics of its purchasing department.

► **Purchasing procedures**

Given its decentralized operations across nearly 400 logistics warehouses worldwide, the Group has set up centralized procedures for approving and managing its suppliers.

Major purchasing categories are managed by the Group or subsidiary purchasing department. Operational staff at our sites therefore have limited room for maneuver with suppliers, most of whom are preselected. This is designed to limit all risks relating to collusion and non-compliance with the Group’s commitments.

Calls for tenders are launched at Group or national level for our subsidiaries. Supplier approval is based on a checklist, enabling potential CSR risks to be identified. The choice of supplier and contractual arrangements are approved by Group senior management or by the country manager.

Standard contracts containing specific clauses (related to ethics, audits, etc.) have been drawn up by the Group legal department and circulated to the subsidiaries and sites.

► **Supplier questionnaire**

The most important suppliers in terms of purchasing volumes undergo an assessment/survey conducted by the purchasing department. These surveys help to ascertain internal stakeholders’ (our logistics sites) perception of suppliers.

This assessment covers a number of qualitative criteria, including compliance with commitments imposed by the Group. A section on ethics and corruption has been added to this survey.

### ► Supplier risk mapping

A specific methodology has been set up to assess Group suppliers and implement the necessary actions for high-risk suppliers.

To begin with, Group purchases have been broken down into purchase categories/business activities. These categories are then assessed in relation to four risks:

- Ethical risks (corruption, gifts and benefits offered, collusion, etc.)
- Human rights risks (child labor, illegal workers, etc.)
- Safety risks (work on safety and security facilities at our sites, absence of operating authorizations, etc.)
- Environmental risks (transport, storage of toxic materials, etc.)

A risk assessment is carried out at Group level and the most critical purchasing categories are broken down by supplier and subcontractor. Each supplier's base country is recorded in order to distinguish two types of partners: those that operate in countries that do not present a risk, and those operating in countries that do. At-risk countries are those identified by Verisk Maplecroft.

Operating in a country classified as at-risk is a compounding factor that impacts the initial assessment. A weighting

coefficient is also applied to each category based on the amount of expenditure incurred.

Based on this risk assessment, the following actions are taken depending on the supplier and subcontractor risk:

1. Risk-free or low-risk partner:
  - a. Signing of the Purchasing and CSR Charter
2. Moderate risk partner:
  - a. Signing of the Purchasing and CSR Charter
  - b. Inclusion of a CSR/ethics clause in the purchase agreement
3. High-risk partner:
  - a. Signing of the Purchasing and CSR Charter
  - b. Inclusion of a CSR/ethics clause in the purchase agreement
  - c. Inclusion of an audit clause in the purchase agreement and on-site audits, if required
  - d. Compliance report (country risk, politically exposed persons, sanctions, negative press) generated by an external database for the identification of at-risk counterparties and monitoring of this third party (via alerts). The tool is currently being implemented for the Group's subsidiaries.

## 3.3.3 Whistleblowing system

The top-down policies for identifying and mitigating the ethical, social and environmental risks described below are combined with bottom-up reporting mechanisms, enabling anyone who observes an at-risk situation to bring it to the Group's attention.

The Group has set up an internal whistleblowing system to meet the requirements of the Sapin II law regarding corruption, and has extended it to environmental and human rights offenses. The objective is to have a single whistleblowing system for the entire Group. A whistleblowing procedure was thus shared with all our subsidiaries.

The Group's Code of Ethics refers to the specific internal whistleblowing procedure, which is communicated to employees and stakeholders. The Group whistleblowing system is available for use by third parties. The different types of alerts managed under the whistleblowing system include:

- conflicts of interest, corruption and influence-peddling,
- discrimination and harassment,
- financial and bank fraud,
- environmental protection,
- workplace health and safety,
- non-compliance with laws, regulations or the public interest.

The Group has chosen a dedicated market solution specifically designed to satisfy all regulatory requirements (whistleblowing channel security; management of alert confidentiality, the whistleblower's identity, the identity of the third parties mentioned in the alert and all information collected while the alert is being processed), processing and protection of personal data, protection of whistleblowers and alert facilitators. The system is available both internally and externally.

The risk management and legal departments are authorized to receive and investigate alerts under strict confidentiality, and to conduct any investigations they may deem necessary.

### 3.3.4 Measuring effectiveness: monitoring the measures implemented and assessing their effectiveness

The ad hoc committee comprising the members of the initial working group is responsible for monitoring the plan and assessing the various tools and actions in place.

There are already indicators used to assess the effectiveness of measures in place. New indicators will be rolled out over time as part of a continuous improvement process for monitoring the system. The full integration of these measures into the internal control systems will also help ensure effective monitoring.

► **Monitoring ID Logistics Certification ratings (CID)**

Our sites all over the world undergo internal and external audits each year to determine compliance with Group standards and best practices.

When the rating is not in compliance, action plans must be implemented and monitored over time.

► **Whistleblowing alert report**

The roll-out of the whistleblowing system at Group level makes it possible to prepare a report on all alerts submitted by employees or third parties.

► **Internal audits**

Internal audits were carried out, in particular on the international subsidiaries, to verify the efficacy of anti-corruption and ethics programs:

- Internal audits: control of risk management systems, audit of procurement process, review of accounting records exposed to risk (donations, sponsorships, etc.), audit of access and authorization management.
- Audit of specific at-risk suppliers: during 2021, the Group's purchasing and risk management departments audited two suppliers identified as being at risk. The audit consists of a visit to the head office and production sites as well as interviews based on an audit questionnaire focused on 5 themes (Environment, HR, Quality, Ethics/Corruption, Production/Distribution). These audits are the subject of a report and a progress plan shared and monitored with the supplier. Questionnaires were sent to the main suppliers in 2022 and audits are scheduled for 2023.

## 3.4 STATUTORY AUDITORS

### 3.4.1 Regular statutory auditors

► **Deloitte et Associés**

6 place de la Pyramide – 92908 Paris La Défense Cedex  
Represented by Mr. Stéphane Rimbeuf

Deloitte et Associés was reappointed as regular statutory auditor at the May 31, 2022 general meeting for a six-year term ending at the close of the ordinary general meeting called to approve the financial statements for the fiscal year ending December 31, 2027. Deloitte et Associés was first appointed as regular statutory auditor of the Company at the June 21, 2010 general meeting. Deloitte et Associés has been the statutory auditor of the Group's principal subsidiaries in France and abroad since incorporation. Deloitte et Associés is registered with the Versailles and Centre Institute of Statutory Auditors.

► **Grant Thornton**

Cité Internationale - 44 quai Charles de Gaulle – CS 60095 – 69463 Lyon Cedex 6

Represented by Ms. Françoise Méchin

Grant Thornton was reappointed regular statutory auditor at the May 26, 2020 annual general meeting for a six-year term ending at the close of the ordinary general meeting called to approve the financial statements for the fiscal year ending December 31, 2025. Grant Thornton was first appointed as regular statutory auditor at the May 23, 2018 annual general meeting for the remaining term of its predecessor (i.e. until the May 26, 2020 annual general meeting). Grant Thornton is registered with the Versailles and Centre Institute of Statutory Auditors.

4.8.1 2023 Group consolidated financial statements	132		
4.8.2 Statutory auditors' report on the 2023 Group consolidated financial statements	168		

The reader is invited to read the following information relating to the Group's financial position and earnings together with the Group consolidated financial statements prepared under IFRS for the years ended December 31, 2023 and 2022 as provided under section 4.8 of the Universal Registration Document, "Annual historic financial information".

Given that the figures stated in euro millions in the tables and analyses in this chapter have been rounded, the totals shown do not necessarily equal the sum of the individual rounded figures. Similarly, the sum of the percentages that are based on the rounded figures does not necessarily equal 100%.

## 4.1 GENERAL PRESENTATION

The Company's consolidated financial statements have been prepared pursuant to IFRS, as adopted by the European

Union. The financial statements were approved by the Board of Directors at its March 13, 2024 meeting.

### 4.1.1 Key factors that had a material impact on business and earnings

#### ► Development of the Group's business

The main factor that had a material impact on the Group's business and earnings was rapid growth and the corresponding increase in revenues.

In the past, most growth in revenues was derived from winning new contracts, which generally came from tender offers that put the main market players in competition with each other.

The start of a new contract involves progressive improvements in productivity due to training and gradual optimization of the staff involved, progressive changes to the site in terms of location of the goods in the warehouse, use of equipment, adaptation of logistical processes (i.e. goods-in, order picking, shipment, quality controls etc.) and the introduction of IT systems. Given these requirements, it can take several months before optimum productivity is reached.

Furthermore, a new contract may be acquired due to the Group establishing a presence in a new country. The burden of additional administrative costs specifically due to establishing a new legal and operational company in the relevant country comes on top of the progressive improvement in the site's operational productivity.

Driving growth via the launch of new sites can therefore temporarily dampen the Group's overall earnings, which do not necessarily move in line with changes in revenues.

#### ► Changes in contracts in progress

For existing contracts, changes in revenues mostly follow movements in the indices used to establish the contractual price for the services and volumes provided. As such, the state of the economy may have an impact on the indices and volumes themselves, and on the Group's capacity to successfully carry out commercial negotiations.

#### ► Non-renewal of contracts

The non-renewal of a contract results in a loss in Group revenues and, accordingly, earnings.

#### ► Volatility of volumes

Revenues, costs and the Group's operating income are subject to a certain degree of volatility in volumes during a year, month or even week. In order to manage such volatility, based on data provided from customers and knowledge acquired from past contracts, the Group optimizes the fixed and variable resources at its disposal in terms of real estate, equipment and staff.

#### ► Changes in production costs

The Group's operating expenses cover both fixed and variable costs and include the following:

- Staff costs, including a fixed part and a variable part (due to temporary employees hired to cope with changes in volumes during the year);
- Real estate costs, which are largely fixed, and related overheads including energy, cleaning etc.;
- Plant and equipment costs (e.g. IT, forklift trucks etc.) covering rent, maintenance and consumables.

The Group strives to keep its costs variable where possible, notably its real estate, equipment and temporary staff expenses, and constantly reengineers its materials management procedures in order to improve the Group's margins.

### 4.1.2 Summary income statement

#### ► Revenues

Revenues correspond to invoices for services rendered, which cover handling, storage and other services (i.e.

management of shipments, transport, co-packing, etc.). Services are invoiced when rendered, generally on a monthly basis.

Revenues are recorded net of value added tax.

► **Purchases and external charges**

Purchases and external charges largely comprise the following items:

- Temporary staff costs;
- Premises costs including rent, rental charges, repairs and maintenance, security personnel and utilities such as water, electricity and gas, excluding lease liabilities under IFRS 16;
- Handling and transport equipment costs on forklifts, tractors, articulated trailers, etc. covering rent, repairs and maintenance, fuel etc. excluding lease liabilities under IFRS 16;
- Subcontracting costs;
- Other purchases and external charges comprise consumables (e.g. film, labels and packaging), travel expenses, IT costs and administrative costs.

► **Staff costs**

Staff costs cover all expenses related to Group employees including fixed and variable pay, related social security charges, pension accruals and charges, and employee profit share and incentives or the equivalent depending on the country concerned.

► **Miscellaneous taxes**

The 'Miscellaneous taxes' line principally relates to tax on salaries, car tax, land tax, C3S social contribution (former ORGANIC contribution) in France and the equivalent depending on the country concerned.

The Group has opted to account for CVAE as a tax on income, while only the part relating to CFE continues to be posted under 'Miscellaneous taxes'.

► **Other income and expenses**

Other income and expenses largely consist of items that cannot be classified under one of the aforementioned categories, such as subsidies, capital gains or losses on sale of fixed assets and accrual write-backs if applicable.

► **EBIT**

EBIT reflects the economic results of operations before non-recurring items (such as restructuring costs) and non-operating items (such as amortization of acquired customer relations).

### 4.1.3 Alternative performance indicators

In addition to the financial indicators presented in the financial statements, the Group tracks the following alternative performance indicators:

- Like-for-like change in revenues: this reflects the Group's organic growth, excluding the impact of:
  - changes in consolidation scope: the contribution to revenues of companies acquired during the period and companies sold during the previous period is excluded;
  - changes in the applicable accounting principles;
  - changes in exchange rates, by calculating revenues for the various periods on the basis of identical exchange rates: published data for the previous period is converted using the exchange rate for the current period.
- Underlying EBITDA: underlying operating income (EBIT) before net depreciation, amortization and impairment of PP&E and intangible assets
- Net borrowings: gross borrowings plus bank overdrafts less cash and cash equivalents
- Net debt: net borrowings plus IFRS 16 lease liabilities
- Gearing: net borrowings over consolidated equity

## 4.2 COMPARISON OF FISCAL YEARS 2023 AND 2022

2023 highlights:

- In March 2023, the Group contracted a new loan for €200 million, repayable over four years and maturing in February 2027. This loan was used to fully repay the €202 million short-term portion maturing in 2023 under the €400 million acquisition loan contracted in February 2022.
- At the end of May 2023, Eric Hémar, Chairman and CEO of the ID Logistics group, transferred his 5.0% stake in the Ficopar sub-holding company to ID Logistics Group via Immod, a company he controls, in exchange for new shares. After this streamlining of the legal structure, ID Logistics Group now holds 100% of its sub-holding company Ficopar.
- Late May 2023, the Group acquired a 100% equity interest in Spedimex (Poland). Founded in 1993, Spedimex is a leading Polish contract logistics operator with recognized expertise in the fashion and e-commerce sectors serving

major international and Polish brands, as well as in cosmetics. In addition to contract logistics, Spedimex boasts a solid distribution and transport network and offers value-added logistics services and retail order picking. Spedimex has developed an asset-light model and operates 15 sites across the country spanning a total area of 230,000 sqm. The company has implemented sophisticated automation and technology solutions capable of managing large complex flows, such as e-commerce and store returns covering over 15 European countries for a single customer. Over the past few years, Spedimex has significantly grown its revenues to reach PLN 510 million in 2022. The acquisition transaction was paid in cash in the amount of €27 million plus the equivalent of €54 million in new ID Logistics Group shares issued to Marcin Bał, Spedimex's former main shareholder and Chairman and CEO.

€m	2023	2022
Revenues	2,747.4	2,481.3
Purchases and external charges	(1,357.3)	(1,257.8)
Staff costs	(936.4)	(835.9)
Miscellaneous taxes	(19.4)	(17.9)
Other underlying income (expenses)	2.9	2.3
Net write-backs (increases) to provisions	(2.5)	0.7
<b>Underlying EBITDA</b>	<b>434.7</b>	<b>372.8</b>
Net depreciation/impairment	(308.9)	(264.6)
<b>EBIT before amortization of acquired customer relations</b>	<b>125.8</b>	<b>108.2</b>
Amortization of acquired customer relations	(6.0)	(5.6)
Non-recurring income (expenses)	7.1	(4.3)
Net financial items	(54.8)	(30.9)
Corporate income tax	(18.9)	(20.1)
Share of earnings of equity affiliates	0.7	1.5
<b>Net income from continuing operations</b>	<b>53.9</b>	<b>48.7</b>
Net income/(loss) from discontinued operations	-	(7.0)
<b>Total consolidated net income</b>	<b>53.9</b>	<b>41.7</b>
Minority interests	1.7	3.5
Group share	52.1	38.2

Consolidated revenues for the year ended December 31, 2023 amounted to €2,747.4 million, up 10.7% versus 2022 (up 7.2% like-for-like). In accordance with the definition

restated in section 4.1.3 “Alternative performance indicators”, the reconciliation between reported and like-for-like revenue data is as follows:

€m	2022	Change in consolidation	Foreign exchange gains or losses	Impact of the application of IAS 29	Like-for-like change	2023
Revenues	2,481.3	+5.7%	-1.6%	-0.6%	+7.2%	<b>2,747.4</b>

Revenues break down as follows:

€m	2023	2022
International	<b>1,920.9</b>	1,620.2
France	<b>826.5</b>	861.1
<b>Total revenues</b>	<b>2,747.4</b>	<b>2,481.3</b>

#### ► International

Full-year international revenues amounted to €1,920.9 million, up 18.6%, including 2023 full-year revenues from Kane Logistics, a company acquired in the United States in March 2022, and revenues from Spedimex, a company acquired in Poland, since its consolidation on June 1, 2023. Restated for these changes in consolidation scope and adverse currency movements related to the devaluation of the Argentine peso, year-on-year revenue growth came to 13.4%.

#### ► France

2023 revenues for France totaled €826.5 million, down 4.0% over the previous year. The year was marked by low consumption volumes and the postponement of certain new site launches to 2024.

2023 saw the Group launch 22 new contracts (versus 16 in 2022), including the first contract in the UK, a new country for ID Logistics.

2023 purchases and external charges amounted to €1,357.3 million, up from €1,257.8 million in 2022 but down as a percentage of revenues (49.4% in 2023 versus 50.7% in 2022), mainly due to the decrease in temporary staff costs in order to adjust to the low consumption volumes against a backdrop of high inflation.

Staff costs totaled €936.4 million, up from €835.9 million in 2022 and slightly up as a percentage of revenues (34.1% in

2023 versus 33.7% in 2022), counterbalancing the reduced use of temporary staff while costs were adjusted to the volumes entrusted by customers.

Miscellaneous taxes amounted to 0.7% of revenues, comparable to 2022.

As in 2022, other income and expenses broke even in 2023.

2023 net provision charges amounted to €2.5 million, compared to net write-backs of €0.7 million in 2022. These provisions are intended to cover labor-related risk, tax risks and risks related to disputes with customers or suppliers in the ordinary course of business.

Accordingly, 2023 underlying EBITDA came to €434.7 million, up from €372.8 million in 2022. The underlying EBITDA margin over revenues continued to rise, up 80 basis points from 15.0% in 2022 to 15.8%.

Depreciation, amortization and impairment charges increased from €264.6 million in 2022 to €308.9 million and represented 11.2% of 2023 revenues, up from 10.7% in 2022 due to the increase in real estate and mechanization investments over the past few years.

As a result of the foregoing items, 2023 EBIT before amortization of acquired customer relations came in at €125.8 million, giving an EBIT margin of 4.6%, compared to 2022 EBIT of €108.2 million and a 4.4% EBIT margin. EBIT breaks down as follows:

€m	2023	2022
International	<b>91.2</b>	70.9
<i>EBIT margin (% revenues)</i>	<b>4.7%</b>	4.4%
France	<b>34.6</b>	37.3
<i>EBIT margin (% revenues)</i>	<b>4.2%</b>	4.3%
<b>Total</b>	<b>125.8</b>	<b>108.2</b>
<i>EBIT margin (% revenues)</i>	<b>4.6%</b>	4.4%

- International EBIT margin came to 4.7%, a considerable improvement over the previous year (4.4%). This reflects the strong increase in productivity under new contracts launched in 2021 and 2022 and tight control of start-up costs for new contracts launched in 2023, including the

launch of operations in the UK, a new country for the Group.

- In France, thanks to astute cost adjustment, the revenue slowdown had a limited impact on the EBIT margin, which reached 4.2% in 2023, close to the 2022 level.

Amortization charges for acquired customer relations rose from €5.6 million in 2022 to €6.0 million due to the full-year impact from Kane Logistics and the acquisition of Spedimex.

Non-recurring income of €7.1 million in 2023 corresponds to a provision write-back on the Colisweb earnout payment, as the company failed to meet the relevant performance criteria in 2023. 2022 non-recurring expenses amounting to €4.3 million corresponded to costs and fees related to the Colisweb and Kane Logistics acquisitions.

Financial items amounted to a net expense of €54.8 million in 2023, up €23.9 million from 2022. This includes an increase in net cost of debt from €15.2 million to €27.5 million due to the full-year impact of the cost of debt contracted to finance the early 2022 acquisitions and financing interest rates. Other financial items mainly comprise a net discounting expense on real estate lease commitments (IFRS 16), up €12.6 million to €26.6 million in line with business growth (including €3.0 million due to changes in consolidation scope).

The 2023 'Corporate income tax' charge includes a business added value tax ("CVAE") charge of €2.0 million, down from

€3.9 million in 2022 in line with the decrease in the contribution rate. Excluding CVAE, the 2023 net tax charge amounted to €16.9 million, representing an effective tax rate of 24.1%, compared to a €16.2 million charge and an effective rate of 25.6% in 2022.

Group share of earnings of equity affiliates amounted to income of €0.7 million in 2023, compared to €1.5 million in 2022.

As a result of the foregoing items, 2023 net income from continuing operations came in at €53.9 million, up from €48.7 million in 2022.

In 2022, net income from discontinued operations in Russia was classified under a specific line item showing a net loss of €7.0 million for the year.

Consolidated net income amounted to €53.9 million in 2023, compared to €41.7 million in 2022 after allowing for the net loss from discontinued operations.

Minority interests decreased between 2022 and 2023, while net income, Group share amounted to €52.1 million, up 36.4% from €38.2 million in 2022.

## 4.3 CASH AND CAPITAL

Given that the figures stated in euro millions in the tables and analyses in this chapter have been rounded, the totals shown do not necessarily equal the sum of the individual

rounded figures. Similarly, the sum of the percentages that are based on the rounded figures does not necessarily equal 100%.

### 4.3.1 Group capital, cash and sources of finance

Group net debt breaks down as follows:

€m	12/31/2023	12/31/2022
Net cash and cash equivalents	241.8	183.6
Loans and borrowings	(523.8)	(493.4)
<b>Net borrowings</b>	<b>(282.0)</b>	<b>(309.8)</b>
IFRS 16 lease liabilities	(855.7)	(732.2)
<b>Net debt</b>	<b>(1,137.7)</b>	<b>(1,041.9)</b>

### 4.3.2 Equity finance

Changes in the Company's capital stock over the last five years are set out in section 3.1.1b) "Change in capital over the last 5 years".

### 4.3.3 Cash

As of December 31, 2023, Group net cash and cash equivalents amounted to €241.8 million, up from €183.6 million as of December 31, 2022.

€m	12/31/2023	12/31/2022
Cash and cash equivalents	241.8	183.6
Bank overdrafts	-	-
<b>Net cash and cash equivalents</b>	<b>241.8</b>	<b>183.6</b>

Cash and cash equivalents include cash, sight bank deposits, highly liquid money-market investments with initial maturities of up to three months and bank overdrafts. These

investments amounted to €16.0 million as of December 31, 2023 and €7.1 million as of December 31, 2022.

### 4.3.4 Debt finance

In addition to using operating cash flows, the Group funds capital expenditure by loans, finance leases and, where necessary, factoring.

These sources of finance are broken down as follows by category:

€m	12/31/2023	12/31/2022
Bank loan	513.7	483.1
Factoring	10.0	10.2
Other	0.1	0.1
<b>Total</b>	<b>523.8</b>	<b>493.4</b>

In February 2022, ID Logistics signed a financing agreement for a total of €465 million, including:

- a €200 million loan repayable over 5 years;

- a €200 million 2-year bridge loan to be refinanced by disintermediated instruments such as private placements;
- a €65 million revolving credit facility available for 6 years.

In March 2023, the short-term portion of this financing loan was refinanced by a new loan repayable over four years.

The €65 million revolving credit facility, unused as of December 31, 2022, was fully drawn at December 31, 2023.

These borrowings are subject to the following bank covenant: as of June 30 and December 31, net borrowings over underlying EBITDA, calculated excluding IFRS 16 impact, must be less than 3.0. As of December 31, 2023, this ratio was in compliance.

Other borrowings mainly related to warehouse plant and equipment (including forklift trucks, information systems, surveillance and access control and other equipment).

At December 31, 2023, the maturities of these borrowings break down as follows:

€m	Due in < 1 year <sup>(1)</sup>	1 to 5 years	Due in > 5 years	Total
Bank loans <sup>(1)</sup>	142.8	367.2	3.7	513.7
Factoring	10.0	-	-	10.0
Other	0.1	-	-	0.1
<b>Total gross borrowings</b>	<b>152.9</b>	<b>367.2</b>	<b>3.7</b>	<b>523.8</b>
IFRS 16 lease liabilities	237.8	512.6	105.3	855.7
<b>Total gross debt</b>	<b>390.7</b>	<b>879.8</b>	<b>109.0</b>	<b>1,379.5</b>

<sup>(1)</sup> As stated in section 4.5, the Group had drawn the entire €65 million revolving credit facility as of December 31, 2023. Given that the facility matures in six months as from December 31, 2023, it was classified as a current liability in an amount of €65 million. However, the facility can be regularly renewed until February 15, 2028.

At December 31, 2023, the breakdown of these borrowings by interest rate and currency is as follows:

€m	Amount	Currency	Rate
Bank loans	445.0	EUR	Floating
Bank loans	37.0	EUR	Fixed
Bank loans	17.7	PLN	Floating
Bank loans	12.5	BRL	Floating
Bank loans	1.3	Various	Various
Factoring	10.2	EUR	Floating
Other payables	0.1	EUR	Fixed
<b>Total</b>	<b>523.8</b>		

The bank loans totaling €445.0 million have been hedged via an interest rate cap covering €90 million as of December 31, 2023.

### 4.3.5 Restrictions on the use of capital resources

There are no restrictions on the use of capital resources generated or received by the Company and its subsidiaries.

### 4.3.6 Off-balance sheet commitments

As stated in section 4.3.4 above, the €445.0 million syndicated loan is subject to a bank covenant. Other off-balance sheet commitments granted by the Group are as follows:

€m	12/31/2023	12/31/2022
Parent company guarantees	27.4	23.0

## 4.4 CASH FLOW

€m	2023	2022
Net income from continuing operations	53.9	48.7
Net depreciation, impairment and provisions	317.4	269.5
Change in working capital	14.8	(9.3)
Other changes	43.7	34.4
<b>Net cash flow from operating activities</b>	<b>429.8</b>	<b>343.3</b>
Net capital expenditure	(72.9)	(60.0)
Acquisition of subsidiaries	(26.4)	(249.8)
<b>Net cash flow from investing activities</b>	<b>(99.3)</b>	<b>(309.8)</b>
Net financial expenses on financing activities	(27.4)	(15.2)
Net borrowings taken out (repaid)	29.3	228.3
Repayment of IFRS 16 lease liabilities	(269.2)	(214.1)
(Purchase) sale of treasury shares	(5.4)	(3.5)
Non-Group dividends distributed	(0.6)	(0.9)
<b>Net cash flow from financing activities</b>	<b>(273.4)</b>	<b>(5.3)</b>
Exchange gains (losses)	1.0	(1.4)
<b>Change in net cash and cash equivalents</b>	<b>58.2</b>	<b>26.8</b>
<b>Opening net cash and cash equivalents</b>	<b>183.6</b>	<b>156.8</b>
<b>Closing net cash and cash equivalents</b>	<b>241.8</b>	<b>183.6</b>

### ► Net cash flow from operating activities

2023 net cash flow from operating activities amounted to €429.8 million, a sharp increase compared to 2022 (€343.3 million).

- Before change in working capital, 2023 operating cash flow amounted to €415.0 million versus €352.6 million in 2022. This €62.4 million increase is in line with the improvement in underlying EBITDA compared to 2022.
- The change in working capital represented a €14.8 million inflow in 2023 compared to a €9.3 million outflow in 2022:
  - Operating working capital (trade receivables and payables) decreased from 14 days sales as of December 31, 2022 to 11 days as of December 31, 2023.
  - Non-operating working capital (tax and social security payables and other receivables and payables) represents an inflow that increased by three days sales between 2022 and 2023.
  - Overall working capital remained stable between 2022 and 2023 at 16 days sales.

### ► Net cash flow from investing activities

2023 net cash flow from investing activities represented a net outflow of €99.3 million, compared to €309.8 million in 2022. This breaks down as follows:

- In 2023, the Group acquired Spedimex (Poland), partly paid in cash for €19.7 million net of cash acquired. The Group also paid a €6.7 million earnout on Colisweb in respect of the company's 2022 performance. In 2022, the Group acquired Colisweb (France) and Kane Logistics (USA) for a total of €249.8 million including ancillary costs.
- Adjusted for these non-operating investments, 2023 net capital expenditure amounted to €72.9 million, compared to €60.0 million in 2022. As in previous years, this mainly comprises capital expenditure on hardware and equipment for new sites launched. Operating capital expenditure amounted to 2.7% of revenues in 2023 versus 2.4% in 2022.

► **Net cash flow from financing activities**

Net cash flow from financing activities amounted to a €273.4 million outflow compared to a €5.3 million outflow in 2022.

- IFRS 16 lease liability payments, i.e. warehouse lease payments and payments for rented handling and IT equipment, amounted to €269.2 million in 2023 compared to €214.1 million in 2022. This increase is in line with the increase in revenues and the resources leased as a consequence.
- In 2022, in connection with the Colisweb (France) and Kane Logistics (USA) acquisitions, the Group signed a €400.0 million financing deal involving the refinancing of €132.5 million of existing acquisition and revolving credit liabilities, leaving a net amount of €267.5 million accounting for the majority of new borrowings in 2022.

- In 2023, the Group repaid €20 million in accordance with the 2022 acquisition loan schedule. The Group also used the €65 million revolving credit facility, mainly to finance the Spedimex acquisition.
- Other changes were related to treasury share transactions under the liquidity contract, share issues arising from the exercise of equity warrants or equivalent, and dividend payments to minority shareholders of some subsidiaries.

In total, after exchange gains and losses, the Group posted a €58.2 million net cash inflow in 2023, compared to a net inflow of €26.8 million in 2022.

## 4.5 REQUIRED SOURCES OF FINANCE FOR THE FUTURE

Group management therefore considers that operating cash flows and available sources of finance as described under

section 4.3.4 of the Universal Registration Document, “Debt finance”, are sufficient to fund the Group’s business.

## 4.6 CAPITAL EXPENDITURE

### 4.6.1 Main capital expenditure over the last three fiscal years

Capital expenditure over the last three years excluding subsidiary acquisitions and lease commitments breaks down as follows:

€m	2023	2022	2021
Intangible assets	4.2	5.5	8.9
Property, plant and equipment	70.8	62.0	74.8
<b>Total</b>	<b>75.0</b>	<b>67.6</b>	<b>83.7</b>

These assets relate to ordinary operations including storage equipment, forklift trucks, transport equipment, information systems, computer hardware, electronic access and

surveillance material and equipment. This capital expenditure is usually made at the start of a new contract.

### 4.6.2 Principal ongoing or planned capital expenditure

As of the Universal Registration Document Date, ID Logistics is pursuing its capital expenditure program in relation to

new site launches at levels comparable to previous years, as explained in section 4.6.1 above.

### 4.6.3 Main capital expenditure planned

As of the Universal Registration Document Date, the Company’s senior management have not adopted any firm commitments regarding major capital expenditure.

## 4.7 DIVIDEND DISTRIBUTION POLICY

### 4.7.1 Dividends distributed in the last three fiscal years

None

## 4.7.2 Dividend distribution policy

In view of the Group's growth strategy, which covers both organic growth and mergers and acquisitions, Group management is not planning to make any short-term commitments regarding dividend distribution policy.

However, the Company's Board of Directors will regularly review opportunities to pay out a dividend taking account of the general state of the economic environment, the specific state of its business sector, the Group's earnings and financial position, the interests of the shareholders and any other factors it deems to be relevant.

## 4.8 ANNUAL HISTORIC FINANCIAL INFORMATION

### 4.8.1 2023 Group consolidated financial statements

#### CONSOLIDATED INCOME STATEMENT

<i>(€000)</i>	Not es	2023	2022

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 1 GENERAL INFORMATION

ID Logistics Group SA is a société anonyme (French corporation) subject to French law with head office located at 55 chemin des Engranauds, Orgon (13660), France. ID Logistics Group SA and its subsidiaries (hereinafter the "Group") carry out their logistics business in France and 18 other countries.

The Group consolidated financial statements for the year ended December 31, 2023 were approved by the Board of Directors on March 13, 2024. Unless otherwise indicated, they are presented in thousands of euros.

## 2 BASIS FOR THE PREPARATION AND PRESENTATION OF THE CONSOLIDATED FINANCIAL STATEMENTS

### 2.1 Accounting principles and methods applied

The Group consolidated financial statements for the year ended December 31, 2023 have been prepared in accordance with International Financial Reporting Standards (hereinafter "IFRS"), as adopted in the European Union as of December 31, 2022. International accounting principles cover all standards approved by the International Accounting Standards Board (IASB), i.e. IFRS, International Accounting Standards (IAS) and the interpretations issued by the IFRS Interpretations Committee (IFRS IC).

Said accounting principles can be viewed on the following website: [http://ec.europa.eu/finance/company-reporting/index\\_en.htm](http://ec.europa.eu/finance/company-reporting/index_en.htm)

If there are no standards or interpretations applicable to a specific transaction, Group management uses its own judgment to define and apply the accounting principles which result in fair and reliable data so that the financial statements:

- give a fair view of the Group's financial position, earnings and cash flows;
- reflect the economic substance of the transactions;
- are objective;
- are prudent; and
- are complete in all significant aspects.

## 2.2 Change in accounting principles

### 2.2.1 New compulsory standards, amendments and interpretations adopted by the European Union for fiscal 2023

The Group has applied all of the standards, amendments and interpretations compulsory for financial years beginning on or after January 1, 2023, including amendments to IAS 12 introducing a temporary exception to the requirements

regarding deferred tax assets and liabilities arising from the international tax reform ("Pillar Two"), which had no material impact.

### 2.2.2 New standards, amendments and interpretations adopted by the European Union but not compulsory for fiscal 2023

The Group has not applied in advance the non-mandatory standards and amendments for 2023.

The Group is currently analyzing the consequences of the new standards, amendments and interpretations and the

impact of their application on the financial statements. It does not expect any material impacts to arise from the application of the new compulsory standards.

## 2.3 Underlying accounting convention

The consolidated financial statements have been prepared pursuant to the historical cost convention, with the exception of certain assets and liabilities in accordance with IFRS

rules. The assets and liabilities in question are mentioned in the notes below.

## 2.4 Estimates and judgments

To prepare the accounts, the Group made certain estimates and adopted certain assumptions that it considered reasonable and realistic. The Group reviews its estimates and assumptions on a regular basis to take account of past experience and other factors considered relevant in view of economic conditions. Depending on how these assumptions evolve and on various conditions, the actual amounts or the amounts recorded in future financial statements may differ from the current estimates.

The principal estimates made by the Group to prepare the financial statements relate to the valuation and estimated useful lives of non-current operating assets and goodwill, the valuation of contingency and other operating provisions, the valuation of recorded deferred tax assets and assumptions adopted to calculate employee benefit liabilities.

The potential impacts of climate change are taken into account in the Group's strategic plan and risk management policy. In preparing the consolidated financial statements, the Group took these impacts into account when reviewing the useful lives of property, plant and equipment (Note 4.5) and carrying out goodwill impairment tests (Note 4.7).

The Group is committed to reducing its CO<sub>2</sub> emissions by reducing its energy consumption. This commitment is reflected in particular by the following measures:

- replacement of vehicle fleet (forklifts, trucks, passenger and commercial vehicles, etc.) with cleaner vehicles,
- energy-saving measures in existing warehouses (low-energy lighting, reduction of ambient temperature, etc.),
- selection of warehouses that meet the latest environmental standards for new locations.

## 2.5 Presentation principles

### 2.5.1 Income statement

Pursuant to IAS 1 - Presentation of financial statements, the Group presents the consolidated income statement by nature of expenses.

### 2.5.2 Balance sheet

Pursuant to IAS 1 - Presentation of financial statements, the Group presents the consolidated balance sheet distinguishing between current and non-current assets and between current and non-current liabilities.

The Group's operating assets, cash and cash equivalents and operating financial assets are all stated as current

assets. Deferred tax assets and the other assets are stated as non-current assets.

The Group's operating liabilities and payables falling due in the next 12 months are stated as current liabilities. Deferred tax liabilities and the other liabilities are stated as non-current liabilities.

## 3 HIGHLIGHTS

- On March 13, 2023, the Group contracted a new loan for €200 million, repayable over four years and maturing in February 2027. On March 15, 2023, this loan was used to fully repay the €202 million bridge loan maturing on August 16, 2023.
- On May 31, 2023, the Group completed the acquisition of a 100% equity stake in Polish-based Spedimex.

Founded in 1993, Spedimex is a leading Polish contract logistics operator with recognized expertise in the fashion and e-commerce sectors serving major international and Polish brands, as well as in cosmetics. In addition to contract logistics, Spedimex boasts a solid distribution and transport network and offers value-added logistics services and retail order picking. Spedimex has developed an asset-light model and operates 15 sites across the country spanning a total area of 230,000 sqm. The company has implemented sophisticated automation and technology solutions capable of managing large complex flows, such as e-commerce and store returns covering over 15 European countries for a single customer. Over the past few years, Spedimex has significantly grown its business to reach PLN 510 million revenues and PLN 41 million net income in 2022. Over the seven months of its consolidation in the Group financial statements, Spedimex contributed revenues of €70 million and EBITDA of €9 million. For the full year 2023, the company posted revenues of €118 million and EBITDA of €12 million.

The acquisition transaction was paid in cash in the amount of €27 million plus the equivalent of €54 million in new ID Logistics Group shares issued to Marcin Bąk, Spedimex's former main shareholder and Chairman and CEO. The investment purchase price shown in the statement of cash flows is €19 million, which corresponds to the €27 million price actually paid to date in cash, less acquired cash and cash equivalents totaling €8 million. The transaction does not provide for any future earnout payments.

The following table shows the details of the provisional purchase price allocation for this acquisition:

<i>(€000)</i>	<b>Amount</b>
Right-of-use assets (IFRS 16)	30,983
Customer relations	11,727
Non-current assets (fixed assets)	2,312
Working capital	(9,531)
Provisions	(2,162)
Cash	7,929
Deferred tax	(661)
Borrowings	(61)
Lease liabilities - IFRS 16	(30,983)
<b>Total revalued net assets</b>	<b>9,553</b>
Investment purchase price	80,582
<b>Goodwill</b>	<b>71,029</b>

- Also on May 31, 2023, Eric Hémar, Chairman and CEO of the ID Logistics group, transferred his 5.0% stake in the Ficopar sub-holding company to ID Logistics Group via Immod, a company he controls, in exchange for new shares. After this streamlining of the legal structure, ID Logistics Group now holds 100% of the intermediate holding company Ficopar, which itself holds almost all of the Group's operating subsidiaries. The impact of the transaction is a €13 million increase in shareholders' equity, Group share and an equivalent decrease in minority interests.
- Following the acquisition of Spedimex, a major fashion customer decided to entrust ID Logistics with the management of e-commerce and store returns from the UK region. The new business activity was launched in June 2023 from an 18,000 sqm warehouse employing 250 people in Northampton, England. The United Kingdom is now the 18<sup>th</sup> country in which ID Logistics operates.

- On December 13, 2023, the Argentinian government announced the devaluation of the Argentine peso by more than 50%. Before the devaluation, Argentina accounted for around 2% of Group consolidated revenues. In application of IAS 29, the closing peso exchange rate at December 31 is applied to transactions in Argentina in 2023 instead of the average exchange rate in the absence of hyperinflation.
- Regarding the conflict in Ukraine, the Group ceased operating in Russia in early January 2023. Operations in Russia were treated as discontinued operations as of December 31, 2022 and, in application of IFRS 5 – Non-current assets held for sale and discontinued operations, all income statement items, assets and liabilities relating to operations in Russia were reclassified under “Net income/(loss) from discontinued operations”, “Discontinued operations - assets” and “Discontinued operations - liabilities”. These restatements are described in Note 31 to the 2022 consolidated financial statements.

## 4 ACCOUNTING PRINCIPLES AND METHODS

### 4.1 Consolidation principles and scope

The Group consists of the parent company, ID Logistics Group SA, and its subsidiaries, joint ventures and equity affiliates. The list of companies included in the Group consolidation is provided in Note 30. All consolidated companies have the same balance sheet date, December 31.

#### 4.1.1 Subsidiaries

The subsidiaries’ financial statements are included in the consolidated financial statements as from the date when control is acquired and until the date such control is lost.

Material transactions, balances and inter-company profits and losses between consolidated companies are eliminated.

### 4.2 Conversion of foreign currencies

#### 4.2.1 Operating currency and reporting currency

The accounts are maintained in the operating currency of each Group company, i.e. the currency of the principal economic environment in which it operates, which is generally the local currency.

The consolidated financial statements are stated in euros, which is the operating and reporting currency of ID Logistics Group SA, the consolidating company.

#### 4.2.2 Transactions in foreign currencies

Transactions denominated in foreign currencies are converted at the prevailing exchange rate as of the transaction date. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are converted at the closing rate. Exchange gains and losses arising are posted to income.

Exchange differences on monetary assets and liabilities linked to a net investment in foreign subsidiaries are posted to items of other comprehensive income.

#### 4.2.3 Conversion of subsidiaries’ financial statements denominated in foreign currencies

Balance sheets of companies whose operating currency is not the euro are converted into euros at the closing rate, while their income statements and cash flow statements are

converted into euros at the average rate for the year. The exchange difference arising is posted to shareholders’ equity under “Exchange differences”. If a company is sold or closed, the related cumulative exchange differences in shareholders’ equity are posted to income for the period.

Goodwill is monitored in the currency of the subsidiary concerned.

As the conditions for treating Argentina as a hyperinflationary economy as defined by IFRS are satisfied, the Group applies IAS 29 to its operations in Argentina.

### 4.3 Business combinations, purchases of further equity interests and sales of equity interests

At the acquisition date, the goodwill equals the difference between:

- the fair value of the consideration transferred in exchange for control of the company, including any additions to the price, plus the value of the minority interests in the acquired company and, for a business combination performed in steps, plus the fair value at the acquisition date of the purchaser’s previously held investment in the acquired company, with the corresponding revaluation via the income statement; and
- the fair value of identifiable assets and liabilities acquired at the acquisition date.

Any purchase price supplements for business combinations are thus valued at fair value at the acquisition date. After the acquisition date, they are measured at fair value through profit or loss, unless the reason for the adjustment is related to a situation existing prior to the acquisition of which the purchaser was not aware. Following a one-year period from the acquisition date, any change in fair value is posted to income.

If the goodwill is negative, it is immediately posted to income.

Costs directly attributable to business combinations are recognized as non-recurring expenses for the period.

If less than 100% control is acquired, IFRS 3 revised gives the option, for any business combination, to recognize goodwill based either on 100% interest or on the percentage interest acquired (without subsequent change in the event of

further purchases of equity interests not giving control). Minority interests (non-controlling interests) in the acquired company are similarly valued either at fair value or at the share of net identifiable assets of the company acquired.

Business combinations prior to January 1, 2010 used to be accounted for under the partial goodwill method, which was the only applicable method.

For further acquisitions of equity interests in a subsidiary completed after January 1, 2010, the difference between the purchase price of the investment and the additional share of consolidated equity acquired is posted to shareholders' equity, Group share, without changing the consolidated value of the subsidiary's identifiable assets and liabilities including goodwill. For purposes of the consolidated statement of cash flows, payments for acquisitions paid in cash net of related acquisition costs are classified as cash flows from financing activities.

#### 4.4 Intangible assets

Intangible assets are stated at cost less cumulative amortization and impairment.

Intangible assets include amortized assets such as software, patents and customer relations.

In the case of business combinations where the customer profile, market share or operations of the entity acquired allow it to continue trading with its customers in view of customer loyalty programs, customer relations are posted to intangible assets and amortized over a period estimated as of the acquisition date.

Amortizable intangible assets are written down in fixed annual amounts over one to twelve years.

#### 4.5 Property, plant and equipment

Property, plant and equipment are stated at cost less cumulative depreciation and impairment.

The cost of borrowings taken out to finance major capital expenditure, incurred during the period of construction, is included in the acquisition cost.

Investment grants are recorded as a deduction from the value of property, plant and equipment.

Land is not depreciated. Other property, plant and equipment with a finite useful life are depreciated on a straight-line basis, based on the following estimated useful lives:

Buildings	10 to 30 years
Building fixtures and fittings	10 years
Plant, machinery and tools	3 to 10 years
Vehicles	3 to 8 years
IT and office equipment	3 to 10 years

Useful lives are reassessed at each balance sheet date. Assets with indefinite useful lives are not depreciated but are tested for impairment each year.

In view of the nature of the assets held, with the exception of buildings, no material asset components have been identified.

As of the December 31, 2023 balance sheet date, the Group identified no material climate change factors requiring revision of the useful lives applied.

#### 4.6 Leases

Within the scope of its operations, the Group enters into lease agreements as lessee in respect of the following main asset types:

- Logistics warehouses.
- Handling and transport equipment.
- Warehouse equipment.

For all agreements (except for the exemptions listed below) that meet the IFRS 16 definition of a lease, the lessee must recognize a right-of-use asset in respect of the leased asset and a lease liability amounting to the present value of future lease commitments (referred to as "lease liabilities").

An agreement comprises a lease if it entitles the Group to control the use of an identified asset for a fixed period in return for payment of consideration.

The Group has elected not to apply IFRS 16:

- to leases with a term of 12 months or less;
- to leases of low-value assets.

The main assumptions used to measure right-of-use assets and lease liabilities are as follows:

- Lease term. This corresponds to the non-cancellable period during which the lessee is entitled to use the underlying asset plus the periods covered by renewal or cancellation options that the Group is reasonably certain to exercise (renewal) or not (cancellation).

- Lease liability discount rate. The discount rate applied is the lessee's incremental borrowing rate. For each subsidiary, this corresponds to the interest rate determined in accordance with the lease currency and the country.

The Group conducted analyses to determine the existence of subleases, which may take the form of finance subleases or operating subleases. These analyses did not result in identifying any finance subleases requiring recognition of a rent receivable under assets instead of a right-of-use asset.

Deferred taxes relating to a right-of-use asset and lease liability arising from a single transaction are recognized on a net basis.

#### 4.7 Impairment of fixed assets

##### ► Impairment of property, plant and equipment and intangible assets

Pursuant to IAS 36 – Impairment of assets, the Group measures the recoverability of its non-current assets based on the following procedure:

- For depreciated property, plant and equipment and amortized intangible assets, management determines whether there is an indication of loss in value on such assets at each balance sheet date. Indications of loss in value are identified in relation to external or internal criteria. If applicable, an impairment test is carried out by comparing the net book value with the recoverable value, which is the higher of (i) the sales price less future selling costs and (ii) the value in use,
- For goodwill, an impairment test is carried out at least once a year and whenever an indication of loss in value is identified. Goodwill is tested at the level of each cash-generating unit corresponding to the geographical region to which the goodwill is assigned.

Value in use is calculated based on the discounted present value of the estimated future cash flows from using the assets. Future cash flows are derived from (i) a three-year business plan prepared and approved by management, (ii) two further years of extrapolated cash flows after the business plan period in order to take account of business growth trends and a gradual rise in operating margins to normalized levels, (iii) plus a terminal value based on normalized discounted cash flows applying a growth rate to infinity. The discount rate applied represents the Company's post-tax weighted average cost of capital.

Future cash flows take into account the current best estimate of the impact of climate change, in particular on the amounts of planned capital expenditure.

Impairment recorded against goodwill cannot be reversed or written back.

##### ► Impairment on investments in equity affiliates

Impairment tests on the value of investments in equity affiliates are conducted whenever there is an indication of loss in value. Under these tests, the book value of investments in equity affiliates is compared to the Group share of the present value of expected future cash flows for the equity affiliate concerned. If the book value of the investment exceeds the present value of expected future cash flows, an impairment charge for the difference is booked against the value of the investment in the equity affiliate concerned.

##### ► Impairment write-backs on intangible assets (other than goodwill), property, plant and equipment and investments in equity affiliates

At every balance sheet date, the Group assesses whether new events or circumstances show that impairment booked in previous periods may be written back.

In this case, if recoverable value based on the new estimates exceeds the net book value of the relevant asset, the Group writes back the impairment for an amount limited to the book value after depreciation that would have resulted had the impairment not been recorded.

#### 4.8 Financial assets

Financial assets are classified into one of the following four categories upon initial recognition:

- Financial assets stated at fair value through profit or loss: this category consists of securities held for trading by the Group.
- Financial assets stated at fair value through items of other comprehensive income: these are financial assets whose business model includes both the receipt of contractual cash flows and the sale of the assets; their contractual terms provide for cash flows corresponding solely to repayments of principal and interest on specified dates. They may include securities held for trading by the Group.
- Financial assets stated at amortized cost: these are financial assets whose business model involves the receipt of contractual cash flows; their contractual terms provide for cash flows corresponding solely to repayments of principal and interest on specified dates. These assets include loans, deposits and bonds.

Financial assets are not reclassified after initial recognition, unless the Group changes the business model according to which they are managed.

A bad debt accrual is recorded if there is a risk of non-recovery, which is assessed individually based on the aging of the financial assets.

Financial assets are derecognized if the right to receive any cash flow from these assets has expired or has been transferred and if the Group has transferred substantially all the risks and rewards of their ownership. If trade receivables are assigned with recourse against the transferor (in the form of a secured deposit or direct recourse) in the event of a payment default by the customer, such trade receivables may not be derecognized.

Gains and losses resulting from changes in the fair value of financial assets stated at fair value through profit or loss are included in income for the period when they arose.

The fair value of listed assets is based on current buy market prices. If there is no active market for a financial asset and in respect of unlisted securities, the Group determines fair value by using valuation techniques. Such valuation techniques include over the counter transactions, other similar instruments or a discounted cash flow analysis using as much market data as possible and not based wherever possible on in-house criteria.

The fair value of financial instruments was determined based on different methods as follows:

- **1.** Prices quoted on an active market. When prices quoted on an active market are available, they are used as a matter of preference in determining the market value. As of December 31, 2023, assets measured at fair value consisted of cash equivalents.
- **2.** In-house model with observable market criteria based on in-house valuation techniques. These techniques make use of customary actuarial methods factoring in observable market data (e.g. futures prices, yield curves, etc.). Most exchange-traded derivatives are valued using the methods commonly used by market players to value such financial instruments. As of December 31, 2023, only derivatives were valued under method 2.
- **3.** In-house model with unobservable criteria. The fair values used to determine book values are a reasonable estimate of market values. As of December 31, 2023, only non-current financial assets and liabilities as described in Note 6 were valued under method 3.

## 4.9 Inventories

Inventories are stated at weighted average cost. If the market value is lower than cost, an impairment reserve is set aside.

## 4.10 Cash and cash equivalents

Cash and cash equivalents include cash, sight bank deposits, highly liquid money-market investments with initial maturities of up to three months and non-material risk of loss, and bank overdrafts.

Positive bank balances are included in "Cash and cash equivalents" under balance sheet assets, while negative balances are included in "Bank overdrafts" under balance sheet liabilities.

Net cash and cash equivalents within the statement of consolidated cash flows represents the amount of cash and cash equivalents less bank overdrafts.

## 4.11 Treasury shares

Company shares held by the parent company or one of its consolidated subsidiaries are accounted for as a deduction from shareholders' equity at purchase cost. Changes in the fair value of treasury shares while they are held are not accounted for. Post-tax gains and losses on sale of treasury shares are posted to shareholders' equity.

## 4.12 Financial liabilities

Borrowings and bank loans are first recorded at fair value, which is generally their face value less directly attributable transaction costs. Thereafter, financial liabilities are stated at cost less repayments. Any difference between the cost less repayments and the repayment value is taken to income based on the effective interest and the term of the borrowings.

Liability derivatives are also measured at fair value on an ongoing basis.

Other financial liabilities, excluding derivatives, are stated at cost less repayments.

## 4.13 Derivatives

The Group holds derivative financial instruments in order to reduce exposure to interest rate risks. The purpose of such instruments is to hedge against the financial risks facing the Group. Financial instruments are recorded as of the transaction date, i.e. when the hedge was contracted. However, only those that meet the hedge accounting criteria under IAS 39 on financial instruments are accounted for in the manner described below. Changes in fair value on financial instruments not qualifying as hedges are immediately posted to other financial income and expense.

All transactions qualifying as hedges are documented in relation to the hedging strategy specifying the risk hedged, the asset or liability hedged, the hedge itself, the hedging relationship and the method for measuring the effectiveness of the hedge. Hedge effectiveness is reviewed at each balance sheet date. Derivatives are initially recorded at fair value. Thereafter, fair value is updated at each balance sheet date by reference to market data. Asset and liability derivatives are shown as current or non-current depending on their maturity and that of their underlying assets and liabilities.

A cash flow hedge protects against fluctuations in cash flows arising from an asset or liability or a highly probable future transaction when such fluctuations are liable to affect earnings. At each balance sheet date, the effective portion of the hedge is posted to shareholders' equity and the ineffective portion is posted to income. When the transaction is recorded, the effective portion within shareholders' equity is transferred to income at the same time as recording the hedged asset or liability.

#### 4.14 Staff benefits

Pursuant to the laws and practices in each country where it operates, the Group has various pension plans.

With respect to defined contribution plans, the Group has no liabilities other than to pay contributions.

With respect to defined benefit plans, the Group provides for its liability to pay defined levels of pensions to its employees.

##### ► Defined contribution plans

With respect to basic plans and other defined contribution schemes, the Group posts its contributions payable to expenses when they fall due and no accrual is recorded given that the Group has no commitment in addition to the contributions paid.

##### ► Defined benefit plans

With respect to defined benefit plans and one-off retirement compensation, the Group calculates its estimated liabilities every year in accordance with IAS 19 – Employee benefits, based on the projected unit of credit method.

This method takes into account future length of service probability, future level of pay, life expectancy and staff turnover on the basis of actuarial assumptions. The liability is discounted using an appropriate discount rate for each country where there are pension commitments. It is recorded in proportion to employees' years of service. If pensions are pre-financed by external funds, the assets held by these funds are valued at fair value as of the balance sheet date.

The cost of services rendered (which includes an increase in pension liabilities from adding one year's additional service)

and interest expense on the liability reflecting the reversal of the discounting effect, are all posted to the income statement. Updates to the pension fund's investments are deducted from the foregoing expenses. All these expenses and income are recorded under underlying operating income (EBIT) except for the reversal of the discounting effect, which is included in net financial items.

#### 4.15 Provisions and contingent liabilities

The Group books a provision when there is a legal, regulatory, contractual or constructive obligation resulting from past events that is expected to lead to an outflow of the Group's resources which represent economic benefits, and which can be reliably measured.

Provisions are discounted if the impact is deemed material and, if so, the discounting effect is posted to operating income.

Contingent liabilities represent potential obligations resulting from past events that will only be confirmed upon the occurrence of future uncertain events that are beyond the company's control. Contingent liabilities also relate to current obligations for which an outflow of resources is not probable. Apart from those arising from business combinations, contingent liabilities are disclosed in the notes and not accrued.

#### 4.16 Revenues

Group revenues are recognized as the amount the Group expects to receive as consideration for the transfer of control of goods and services.

A performance obligation is defined as a promise to transfer to the customer a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer.

The business generates revenues by providing warehousing and distribution services from dedicated or multi-client warehouses. Contract terms range from several months to several years. There is a single performance obligation insofar as the different services provided remain essentially the same for the duration of the contract. This performance obligation is satisfied over time, as it corresponds to the timing whereby the client receives and consumes the benefits associated with the promise. The transaction price is based on all the elements specified in the contract which, in a large number of cases, include a fixed part and a variable part covering this single performance obligation.

Customer invoicing and payment terms are determined individually for each contract.

## 4.17 Tax

Corporate income tax charges or income include current tax charges (income) and deferred tax charges (income). Tax charges (income) are recorded in income unless they relate to items within shareholders' equity, in which case they are posted to shareholders' equity.

### ► Current tax

Current tax represents the estimated amount due in respect of taxable income for the period plus or minus any adjustment for current tax in respect of prior periods.

### ► Deferred tax

Deferred tax is determined and recorded based on the liability method in respect of all temporary differences between the book value of assets and liabilities and their tax base.

Deferred tax is not recorded for the following items: (i) taxable timing differences (deferred tax liability) arising from the initial recognition of goodwill, (ii) initial recognition of an asset or liability in a transaction that is not a business combination and affects neither taxable income nor accounting earnings and (iii) timing differences arising from equity investments in subsidiaries if it is not probable that such differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are computed at the expected tax rates applying in the periods when the asset will be realized or the liability paid, based on tax regulations that have been adopted or substantially adopted as of the balance sheet date. Deferred tax assets and liabilities are netted off if there is a legally enforceable right to offset current tax receivables and payables and if they relate to

corporate income tax charged by the same tax authority for the same entity.

Deferred tax assets are only recognized if it is probable that the Group will have sufficient future taxable income against which the relevant temporary differences can be offset. Deferred tax assets are reviewed every balance sheet date and are reduced to the extent that it is no longer probable that sufficient future taxable income will be available. To assess the Group's ability to realize deferred tax assets, the following items have been taken into account:

- Forecasts of future taxable income;
- Non-recurring costs that are included in past losses;
- Historical taxable income for previous years.

With respect to investments in subsidiaries, joint ventures and equity affiliates, a deferred tax liability is booked for all taxable timing differences between the book value of the investments and their tax base, unless:

- the Group can decide the date when such differences reverse, for instance for a dividend payout; and
- it is probable that such differences will not reverse in the foreseeable future.

## 4.18 Earnings per share

Basic earnings per share is calculated by dividing Group net income by the weighted average number of shares of common stock in issue during the year.

Diluted earnings per share is calculated by dividing adjusted Group net income by the weighted average number of shares of common stock in issue plus any potential future diluting shares excluding any treasury shares.

## 5 SEGMENT INFORMATION

Pursuant to IFRS 8 – Operating segments, the information below for each operating segment is identical to that presented to the chief operational decision-maker for purposes of deciding about the allocation of resources to the segment and assessing its performance.

An operating segment is a distinct component of the Group:

- that engages in business activities from which it may generate revenues and incur expenses,
- whose operating results are reviewed regularly by the entity's chief operational decision-maker in order to make decisions about resources to be allocated to the segment and assess its performance, and
- for which discrete financial information is available.

The Group's chief operational decision-maker has been identified as the Chairman and CEO and the Deputy CEO, who jointly take strategic decisions.

The Group's two operating segments are France and International, determined in accordance with IFRS 8.

The France segment is made up of subsidiaries with head offices in continental France.

The International segment is made up of subsidiaries whose head offices are located outside continental France.

Fixed assets are operating assets used by a segment for operational purposes. They include goodwill, intangible assets and property, plant and equipment. They do not include current assets used for operational purposes, deferred tax assets/liabilities or non-current financial assets.

Segment information as presented to the chief decision-makers is as follows:

	12/31/2023 (12 months)			12/31/2022 (12 months)		
	France	International	Total	France	International	Total
<b>Revenues</b>	<b>826,497</b>	<b>1,920,928</b>	<b>2,747,425</b>	<b>861,133</b>	<b>1,620,186</b>	<b>2,481,319</b>
Underlying EBITDA <sup>(1)</sup>	126,182	308,474	434,656	129,375	243,432	372,807
EBIT before amortization of customer relations	34,588	91,162	125,750	37,256	70,936	108,192
Operating income	45,659	81,184	126,843	34,866	63,402	98,268
Net cash flow from operating activities	122,970	306,796	429,766	104,819	238,514	343,333
Operating capex <sup>(2)</sup>	13,843	61,083	74,926	11,938	55,603	67,541
Fixed assets	324,849	1,316,657	1,641,506	339,319	1,103,010	1,442,329
o/w Right-of-use assets under IFRS 16	145,649	692,243	837,892	159,805	561,005	720,810
Headcount	7,182	20,863	28,045	7,323	18,665	25,988

(1) Underlying EBITDA corresponds to underlying operating income (EBIT) before net depreciation, amortization and impairment of PP&E and intangible assets.

(2) Operating capital expenditure corresponds to acquisitions of intangible assets and property, plant and equipment, excluding acquisitions of subsidiaries.

A segment may comprise several countries if they share the same management, teams and customers and if performance is measured, not at country level, but at the level of a set of countries overseen by a single senior management team. This is notably the case for the Iberian Peninsula, which includes Spain and Portugal, and Benelux, which includes Belgium and the Netherlands.

In the International segment, Benelux, the USA, the Iberian Peninsula and Poland each account for over 10% of Group revenues. Revenues and underlying EBITDA amounted respectively to €311 million and €57 million (Benelux), €398 million and €69 million (USA), €416 million and €48 million (Iberian Peninsula), and €320 million and €67 million (Poland).

Revenues by customer business sector break down as follows:

Business sector	2023
E-commerce	25%
Food retail	23%
Fast-moving consumer goods	19%
Non-food retail	13%
Technology	7%
Fashion	6%
Cosmetics	3%
Industry	2%
Pharmaceuticals	2%

## 6 NOTES RELATING TO THE BALANCE SHEET, INCOME STATEMENT AND STATEMENT OF CASH FLOWS AND CHANGES THERETO

### 6.1 Balance sheet notes

#### Note 1: Goodwill and intangible assets

December 31, 2022	471,499	9,627	44,167	525,293
<b>December 31, 2023</b>	<b>532,913</b>	<b>8,041</b>	<b>49,745</b>	<b>590,699</b>

The Group has updated the accounting recognition of goodwill on the March 2022 acquisition of US-based Harkness Capital (Kane Logistics group parent company).

The now finalized purchase price allocation breaks down as follows:

(€000)	Amount
Right-of-use assets (IFRS 16)	82,488
Customer relations	22,046
Non-current assets (fixed assets)	11,714
Working capital	5,338
Provisions	(20,155)
Cash	1,728
Deferred tax	484
Borrowings	(32)
Lease liabilities - IFRS 16	(82,488)
<b>Total revalued net assets</b>	<b>21,123</b>
Investment purchase price	228,428
<b>Goodwill</b>	<b>207,305</b>

The purchase price allocation process did not result in any material fair value adjustments.

<b>December 31, 2023</b>	<b>656,121</b>	<b>83,259</b>	<b>98,512</b>	<b>837,892</b>

Other non-current assets mainly consist of vehicles (trucks and wagons) and handling equipment (forklifts).

Rental expenses for the year relating to short-term contracts and low-value assets totaled €72 million.

Around 80% of rental contracts relate to logistics warehouses and transport platforms, with contract terms mainly between 3 and 9 years.

#### Note 4: Goodwill and impairment tests

Impairment tests are conducted by region, for which the main assumptions for determining value in use are as follows:

2023								
CGU	Value of related goodwill	Risk-free rate	Market premium	Beta	Country risk premium	Specific risk premium	Discount rate	Growth rate to infinity
France	125,898	0.5%	7.9%	1.08	0.75%	1.4%	8.62%	2.5%
Iberian Peninsula	65,944	0.5%	7.9%	1.08	2.40%	1.4%	10.16%	2.5%
Benelux	45,073	0.5%	7.9%	1.08	0.30%	1.4%	8.19%	2.5%
USA	209,823	0.5%	7.9%	1.08	2.12%	1.4%	9.89%	2.5%
Poland	72,037	0.5%	7.9%	1.10	1.28%	1.4%	9.28%	2.5%
Other regions	14,138	0.5%	7.9%	1.05-1.11	0.0-18.21%	1.4%	7.79%-24.83%	2.5%

2022								
CGU	Value of related goodwill	Risk-free rate	Market premium	Beta	Country risk premium	Specific risk premium	Discount rate	Growth rate to infinity
France	125,898	0.1%	8.2%	0.96	0.7%	1.6%	9.2%	2.0%
Iberian Peninsula	65,944	0.1%	8.2%	0.96	2.2%	1.6%	10.6%	2.0%
Benelux	45,073	0.1%	8.2%	0.96	0.3%	1.6%	8.8%	2.0%
USA	220,446	0.1%	8.2%	0.95	0.0%	1.6%	8.4%	2.0%
Other regions	14,138	0.1%	8.2%	0.95-0.97	0.0-16.8%	1.6%	8.4%-24.7%	2.0%

All cash-generating units underwent impairment tests, which did not result in any impairment.

Discount rates used are post-tax rates applied to cash flows after tax. Using post-tax rates results in a recoverable amount identical to that which would have been obtained by applying a pre-tax rate to pre-tax cash flows.

	France	International	Total
<b>Book value of goodwill at December 31, 2021</b>	<b>90,747</b>	<b>136,870</b>	<b>227,617</b>
Change in goodwill	-	(10,326)	(10,326)
Impairment	-	-	-
Exchange gains (losses)	-	8,765	8,765
Scope	35,151	210,292	245,443
<b>Book value of goodwill at December 31, 2022</b>	<b>125,898</b>	<b>345,601</b>	<b>471,499</b>
Change in goodwill	-	-	-
Impairment	-	-	-
Exchange gains (losses)	-	(6,628)	(6,628)
Scope	-	68,042	68,042
<b>Book value of goodwill at December 31, 2023</b>	<b>125,898</b>	<b>407,015</b>	<b>532,913</b>

A 0.5% increase in the discount rate would not lead to any impairment being recorded.

A 0.5% decrease in the growth rate to infinity would not lead to any impairment being recorded.

A 5% decrease in the EBIT value used to calculate the terminal value would not lead to any impairment being recorded.

### Note 5: Investments in equity affiliates

Key information concerning equity affiliates based on their separate financial statements is as follows:

	Equity interest (%)	Investment in equity affiliates	Shareholders' equity	Revenues	Net income

<b>Total</b>	<b>36,840</b>	<b>45,589</b>

**Note 7: Trade and other current receivables**

	12/31/2023	12/31/2022
Trade receivables	527,423	471,592
Impairment provisions	(6,621)	(4,435)
<b>Total trade receivables – net</b>	<b>520,802</b>	<b>467,157</b>
Tax and social security receivables	79,646	54,539
Prepaid expenses	32,506	24,768
<b>Total other receivables – net</b>	<b>112,152</b>	<b>79,307</b>

Tax and social security receivables largely consist of value added tax or equivalent levies.

The doubtful receivables accrual changed as follows:

	2023	2022
<b>At January 1</b>	<b>(4,435)</b>	<b>(4,631)</b>
Charges	(2,128)	(1,398)
Write-backs	(58)	1,594
<b>At December 31</b>	<b>(6,621)</b>	<b>(4,435)</b>

The impairment provisions relate to over 90 days past due receivables.

**Maturity of trade receivables**

	Total	Not due and not impaired	< 30 days past due	30-90 days past due	> 90 days past due
12/31/2023	527,423	487,265	27,306	4,419	8,433
12/31/2022	471,592	415,468	38,318	8,044	9,762

There is no material risk of bad debts in respect of past due receivables.

The Group has entered into various factoring agreements providing for the transfer of all risks to the factoring company upon the assignment of receivables. Deconsolidated trade receivables as of December 31, 2023 amounted to €51 million.

**Note 8: Net cash and cash equivalents**

	12/31/2023	12/31/2022
Cash and cash equivalents	241,809	183,643
Bank overdrafts	-	-
<b>Net cash and cash equivalents</b>	<b>241,809</b>	<b>183,643</b>

Group cash and cash equivalents of €242 million at December 31, 2023 comprise cash, sight bank deposits, and money-market investments totaling €16 million.

## Note 9: Issued capital stock and additional paid-in capital

	Transaction type		Change in capital		Capital stock after transactions	
	Number of shares	Par value (€)	Additional paid-in capital (€)	Value (€)	Number of shares	
<b>January 1, 2022</b>			<b>57,240,985</b>	<b>2,836,894</b>	<b>5,673,788</b>	
	Bonus shares awarded	12,371	0.5	6,186	12,371	
<b>December 31, 2022</b>			<b>57,240,985</b>	<b>2,843,080</b>	<b>5,686,159</b>	
	Share issue	295,420	0.5	83,284,806	295,420	
	Share issue	191,749	0.5	53,092,532	191,749	
<b>December 31, 2023</b>			<b>193,618,323</b>	<b>3,086,665</b>	<b>6,173,328</b>	

The Group has a single class of shares of common stock that entitle stockholders to the same dividend.

No dividends have been paid out in the last three fiscal years.

As of December 31, 2023, there were 155,520 equity warrants outstanding granting the right to subscribe for 311,040 new shares. All equity warrants are held by Immod, which held a 32.05% equity stake in ID Logistics Group as of December 31, 2023.

## Note 10: Financial liabilities

### Borrowings (excluding lease liabilities) as of December 31, 2022

	12/31/2023	Due in < 1 year	Due in 1-5 years	Due in > 5 years
<b>Current borrowings</b>				
Bank loans	142,798	142,798	-	-

<b>December 31, 2023</b>	<b>513,672</b>	<b>10,013</b>	<b>78</b>	<b>523,763</b>

On February 16, 2022, the Group signed financing arrangements totaling €465 million, including a €200 million loan repayable over 5 years, a €200 million bridge loan with a maximum term of 2 years to be refinanced by instruments such as private placements, and a €65 million revolving credit facility with a maximum term of 7 years (fully drawn as of December 31, 2023).

On March 13, 2023, the Group contracted a new loan for €200 million, repayable over four years and maturing in February 2027. On March 15, 2023, this loan was used to fully repay the €202 million bridge loan maturing on August 16, 2023.

This loan is subject to the following bank covenant at December 31, 2023:

Ratio	Definition	Calculation	Limit
Leverage	Net borrowings over underlying EBITDA before application of IFRS 16	1.6	< 3.0

This ratio was in compliance at December 31, 2023.

### Note 11: Lease liabilities - IFRS 16

	12/31/2022	New borrowings	Repayments	Scope	Exchange differences	12/31/2023
Lease liabilities	732,162	357,243	(268,240)	30,983	3,582	855,730
<b>Total</b>	<b>732,162</b>	<b>357,243</b>	<b>(268,240)</b>	<b>30,983</b>	<b>3,582</b>	<b>855,730</b>
o/w lease liabilities (due in < 1 yr)						237,827
o/w lease liabilities (due in 1-5 yrs)						512,638

Foreign exchange gains or losses, changes in consolidation	(1,608)	(1,140)	3	(618)	<b>(3,363)</b>
<b>December 31, 2023</b>	<b>(5,198)</b>	<b>16,712</b>	<b>228</b>	<b>(2,722)</b>	<b>9,020</b>

The deferred tax assets arising from unrelieved tax losses were based on future taxable income calculated over a reasonable time frame.

The amounts of the Group's unrelieved tax losses, for which no deferred tax has been recognized to date, are as follows:

Balance sheet date	Unrelieved tax losses	Unrecognized deferred tax
12/31/2023	100,518	26,326
12/31/2022	104,394	27,185

Timing differences from equity affiliates and joint ventures are not material.

Unrelieved tax losses not recognized are of European origin (mainly France, Spain and Germany). They are carried forward indefinitely.

#### Note 14: Trade and other payables

	12/31/2023	12/31/2022
<b>Trade payables</b>	<b>416,572</b>	<b>347,458</b>
Tax and social security payables	<b>268,628</b>	250,660
Advances and down payments received	<b>16,671</b>	13,763
Other current payables	<b>12,974</b>	23,232
Deferred income	<b>23,743</b>	18,493
<b>Total other payables</b>	<b>322,016</b>	<b>306,148</b>

Trade and other payables all fall due in less than one year except for some deferred income which is amortized over the term of the customer contracts.

### Note 15: Derivatives and risk management

The Group's principal financial liabilities consist of bank loans and overdrafts, lease liabilities and finance leases, factoring liabilities and trade payables.

Furthermore, the Group holds financial assets such as trade receivables, security deposits, endorsements and available cash. These arise from the Group's operations.

The table below specifies the book value and the fair value of the financial instruments recorded in the consolidated balance sheet.

12/31/2023	Fair value via shareholders' equity	Loans and other receivables at amortized cost	Financial liabilities at cost less repayments	Derivatives	Closing book value	Fair value
Non-current financial assets	439	18,143	-	-	18,582	18,582

\* Tax and social security receivables described under Note 7

The fair value of the current assets and liabilities is close to the book value given the very low impact of discounting and credit risk.

Group management considers that the carrying amount of the non-current financial assets represents a reasonable approximation of their fair value. Group management considers that the carrying amount of the non-current financial liabilities, excluding bank loans, represents a reasonable approximation of their fair value.

Bank loans mainly consist of loans at floating interest rates and finance lease liabilities. The fair value of floating rate loans approximately equals their net book value. The net book value of non-current payables equals the discounted present value of the minimum amounts payable. Group management considers that this value represents a reasonable approximation of their fair value.

### Management of financial risks

The main risks of the Group's financial instruments are interest rate, exchange rate and liquidity risks.

#### ► Interest rate risk

Loan contracts are approved by the Group finance department and are predominantly contracted by the French legal entities.

As of December 31, 2023, 92% of borrowings were contracted at floating rates and 8% at fixed rates. After allowing for hedging arrangements, a 1% increase in average interest rates would result in an additional €4 million interest expense under net financial items.

The maturity of borrowings is detailed under Note 10. Trade and other payables represent current operating liabilities and largely fall due in less than one year.

#### ► Exchange rate risk

The Group regularly revalues its exposure to exchange rate risk. As of December 31, 2023, no specific hedge was taken out in respect of amounts denominated in currencies other than euros. The total value of foreign currency assets and liabilities as of December 31, 2023 is broken down as follows:

Foreign currency amount	BRL	PLN	RON	TWD	USD	Other	Total
Assets excluding goodwill	92,842	301,960	19,497	28,819	351,341	31,399	825,858
Liabilities	75,387	244,884	14,227	26,238	282,134	14,255	657,125
<b>Net balance before hedging</b>	<b>17,455</b>	<b>57,076</b>	<b>5,270</b>	<b>2,581</b>	<b>69,207</b>	<b>17,144</b>	<b>168,733</b>
Hedging	-	-	-	-	-	-	-
<b>Net balance after hedging</b>	<b>17,455</b>	<b>57,076</b>	<b>5,270</b>	<b>2,581</b>	<b>69,207</b>	<b>17,144</b>	<b>168,733</b>

#### ► Liquidity risk

The Group is financed principally from available cash, factoring, bank overdrafts, leases and a syndicated banking loan.

Based on prevailing exchange rates and interest rates as of December 31, 2023, as well as on the contractual loan repayment schedules, cash flows related to financial liabilities were as follows:

12/31/2023	Book value	Due in < 1 year			Due in 1-5 years			Due in > 5 years		
		Fixed rate interest expense	Floating rate interest expense	Re-payment	Fixed rate interest expense	Floating rate interest expense	Re-payment	Fixed rate interest expense	Floating rate interest expense	Re-payment
Bank overdrafts	-	-	-	-	-	-	-	-	-	-
Loans	513,672	2,800	21,784	142,798	31,825	26,782	367,149	248	-	3,725
Factoring	10,013	-	-	10,013	-	-	-	-	-	-
Other liabilities	78	-	-	78	-	-	-	-	-	-

Borrowings due in less than one year have the following maturities:

	Due in < 1 month	Due in 1 to 3 months	Due in > 3 months	Total
Bank overdrafts	-	-	-	-
Loans	2,620	51,790	88,388	142,798
Factoring	10,013	-	-	10,013
Other liabilities	-	-	78	78

The Group regularly revalues its exposure to liquidity risk. As of December 31, 2023, management believes the Group can meet its future liabilities as they fall due.

## Note 16: Financial instruments

As stated under Note 10, a portion of the Group's borrowings is contracted at floating rates primarily based on EURIBOR 3 months. In order to limit exposure to an increase in rates, the Group has contracted interest rate hedging instruments.

The Group entered into an interest rate cap agreement in 2020 for a nominal amount of €47,500,000, which expired in 2023, and signed a new agreement in 2022 for a nominal amount of €100 million.

Financial expenses include changes in the fair value of the interest rate cap in respect of its non-effective portion.

The fair value of the interest rate caps is recognized in assets with a matching deduction from shareholders' equity corresponding to the amount net of tax, pursuant to IAS 39.

The impact of these gains and losses is described in the table below:

	Recorded fair value			Posted to	
	Notional value	Assets	Liabilities	Profit or loss	Shareholders' equity
Interest rate cap	90,000	2,511	-	(595)	(1,161)
<b>12/31/2023</b>	<b>90,000</b>	<b>2,511</b>	<b>-</b>	<b>(595)</b>	<b>(1,161)</b>
Interest rate cap	147,500	4,267	-	428	3,839
<b>12/31/2022</b>	<b>147,500</b>	<b>4,267</b>	<b>-</b>	<b>428</b>	<b>3,839</b>

## Note 17: Employee benefits

### 17a) Pensions

#### ► Assumptions applied

The principal assumptions used for actuarial valuations of the plans are as follows:

France	12/31/2023	12/31/2022
Discount rate	3.33%	3.65%
Annual wage increases	2.50%	2.20%
Social security charge rate	39%	39%
International	12/31/2023	12/31/2022
Discount rate	2.93%-3.15%	3.19%-3.66%
Annual wage increases	0.00%-2.50%	2.30-2.50%
Annual pensions increase	1.00%-2.30%	1.00-1.50%

The discount rates were based on the yield on AA rated corporate bonds in the relevant countries as of the balance sheet date. The recorded liabilities have maturities similar to those of the underlying commitments.

The mortality tables used for the calculated values are in line with current legislation and statistics published in the various countries involved.

#### ► Accrued gross liability

	France	International	Total
<b>January 1, 2023</b>	<b>9,000</b>	<b>29,476</b>	<b>38,476</b>

Bonds	-	-	-
Insurance policies	692	23,694	24,386
Other	-	-	-
<b>Total</b>	<b>692</b>	<b>23,694</b>	<b>24,386</b>

► **Income statement expense**

The expense for the year can be broken down as follows:

	France	International	Total
Service cost	300	409	709
Net interest expense	269	131	400
Administrative costs	-	-	-
<b>December 31, 2023</b>	<b>569</b>	<b>540</b>	<b>1,109</b>

Actuarial gains and losses on the value of the plan assets and liabilities are broken down as follows:

	France	International	Total
Demographic assumptions	-	64	64
Financial assumptions	(160)	2,411	2,251
Experience gains or losses on liability	-	(29)	(29)
Experience gains or losses on plan assets	-	(992)	(992)
<b>Actuarial gains (losses)</b>	<b>(160)</b>	<b>1,454</b>	<b>1,294</b>

The sensitivity of the present value of the liability to the discount rate is as follows:

	Annual discount rate		
	(-50 basis points)	Base discount rate	(+50 basis points)
<b>Present value of the liability</b>	<b>44,974</b>	<b>42,180</b>	<b>39,418</b>

### 17b) Share-based pay

The cost of the plans is based on binomial-coefficient algorithms less the gross annual expense.

The calculation factors included are the exercise price, term of the option, non-exercise period, retention period,

conditions for obligatory amendments, share value, dividend payout, risk-free rate until warrant maturity, and volatility and margin of the share loan.

## 6.2 Income statement notes

### Note 18: Other underlying income and expenses

	2023	2022
Other underlying income	7,094	4,751
Other underlying expenses	(4,228)	(2,429)
<b>Other underlying income and expenses</b>	<b>2,866</b>	<b>2,322</b>

### Note 19: Provision charges and write-backs

	2023	2022
Provision write-backs	11,521	10,274
Provision charges	(14,018)	(9,534)
<b>Provision charges and write-backs</b>	<b>(2,497)</b>	<b>740</b>

### Note 20: Depreciation/impairment

	2023	2022
Depreciation/impairment	(308,906)	(264,615)
Provision write-backs	-	-
<b>Net depreciation/impairment</b>	<b>(308,906)</b>	<b>(264,615)</b>

### Note 21: Non-recurring income (expenses)

Non-recurring income and expenses are broken down as follows:

	2023	2022
Other non-recurring income	7,273	-
Costs on acquisitions of equity investments	(202)	(4,296)
<b>Total non-recurring expenses</b>	<b>7,071</b>	<b>(4,296)</b>

Other non-recurring income includes a €7 million item corresponding to the cancellation of the outstanding Colisweb earnout payment, as the relevant performance criteria were not met.

Costs on acquisitions of equity interests correspond mainly to costs incurred in connection with the Spedimex acquisition.

## Note 22: Net financial items

	2023	2022
Interest and related financial income	4,368	1,698
Currency gains	820	897
Gains on hedging transactions	1,557	697
<b>Total financial income</b>	<b>6,745</b>	<b>3,292</b>
Interest and related expenses	(31,782)	(16,863)
Interest expenses - IFRS 16	(26,590)	(14,012)
Discounting of balance sheet accounts	(520)	(106)
Other financial expenses	(1,622)	(1,066)
Currency losses	(1,000)	(1,708)
Losses on hedging transactions	-	(442)
<b>Total financial expenses</b>	<b>(61,514)</b>	<b>(34,197)</b>
<b>Total</b>	<b>(54,769)</b>	<b>(30,905)</b>

Interest and related expenses include a €27 million interest expense recognized in application of IFRS 16, while the remaining amount pertains to bank loans, other payables and bank overdrafts.

Net cost of debt excluding IFRS 16 amounted to €27 million in 2023, compared to €15 million in 2022.

## Note 23: Corporate income tax

	2023	2022
Current tax charge	16,235	21,216
Net deferred tax charge (income)	715	(4,979)
Tax on business value added (CVAE)	1,985	3,889
<b>Total tax</b>	<b>18,935</b>	<b>20,126</b>

	2023	2022
Total consolidated net income	53,869	48,690
Tax excluding CVAE	16,950	16,237
Earnings in equity affiliates	(730)	(1,453)
<b>Income before tax</b>	<b>70,089</b>	<b>63,474</b>
Statutory tax rate	25.83%	25.83%
<b>Theoretical tax</b>	<b>18,104</b>	<b>16,395</b>
Permanent differences	1,785	1,400
Losses for the year not recognized	1,794	2,180
Use and recognition of prior losses not recognized	(3,068)	(3,600)
Other taxes	(504)	187
Differences in tax rates	(1,161)	(325)
<b>Tax excluding CVAE</b>	<b>16,950</b>	<b>16,237</b>
<b>Effective tax rate excl. CVAE</b>	<b>24.18%</b>	<b>25.58%</b>
CVAE	1,985	3,889
<b>Tax including CVAE</b>	<b>18,935</b>	<b>20,126</b>
<b>Effective tax rate</b>	<b>26.27%</b>	<b>29.88%</b>

### Note 24: Average number of shares

The average number of shares during the period was as follows:

<i>(In units)</i>	2023	2022
Average number of shares in issue	5,970,341	5,681,243
Average number of treasury shares	(22,207)	(8,451)
<b>Average number of shares</b>	<b>5,948,134</b>	<b>5,672,792</b>
Average number of equity warrants and bonus shares awarded	401,280	359,411
<b>Average number of diluted shares</b>	<b>6,349,414</b>	<b>6,032,203</b>

## 6.3 Other information

### Note 25: Headcount

The number of employees under open-ended employment contracts at December 31 was as follows:

<i>(In units)</i>	12/31/2023	12/31/2022
Managers	1,878	1,338
Non-managers	26,167	24,650
<b>Total</b>	<b>28,045</b>	<b>25,988</b>

### Note 26: Transactions with related parties

Transactions conducted between the Group and affiliated companies on an arm's length basis were as follows:

Company	Type of relationship	Transaction type	Income (expense)		Balance sheet asset (liability)	
			2023	2022	2023	2022
Comète	Joint director	Services provided	(1,050)	(1,150)	(616)	(535)
Financière ID	Joint shareholder	Real estate transactions - Services provided	630	7,583	-	119
Logistriel Netherlands	Joint shareholder	Real estate transactions - Services provided	(28)	-	(28)	-
CEPL objekt	Joint shareholder	Real estate transactions - Services provided	(1,600)	-	-	-
Logistriel Spain 2	Joint shareholder	Real estate transactions - Services provided	(807)	69	(773)	41

Transactions with equity affiliates, which are concluded on an arm's length basis, related to ongoing administrative

services and in total are not material in relation to the Group's business.

### Note 27: Directors' remuneration

The Chairman of the Board of Directors does not receive any remuneration from the Group. He receives remuneration from Comète, a company in which he holds a 50.25% equity stake (the remainder being held by his wife and children) and which has signed service agreements with various

Group subsidiaries. The services specified in these agreements include management related to strategy and business development.

The amounts of the aforementioned services are specified under Note 26.

#### ► Gross remuneration of other Board members

	2023	2022
<b>Expense type</b>		
Total gross remuneration	1,119	1,465
Post-employment benefits	-	-
Other long-term benefits	-	-
Severance pay	-	-

*\* excluding remuneration paid to the employee representative director*

### Note 28: Commitments and contingencies

The Group's signed commitments at the balance sheet date were as follows:

	12/31/2023	12/31/2022
<b>Commitments given</b>		
Parent company guarantees *	27,381	23,033
<b>Commitments received</b>		
Bank guarantees	20,010	22,272

*\* The parent company guarantees above do not include guarantees given for leasing commitments, which are described on the corresponding lines.*

### Note 29: Post balance sheet events

None.

## 4.8.2 Statutory auditors' report on the 2023 Group consolidated financial statements

This is a free translation into English of the statutory auditors' special report on regulated agreements issued in the French language and is provided solely for the convenience of English-speaking readers. This report on regulated agreements should be read in conjunction and construed in accordance with French law and professional auditing standards applicable in France. It should be understood that the agreements reported on are only those provided by the French Commercial Code and that the report does not apply to those related party transactions described in IAS 24 or other equivalent accounting standards.

To the Shareholders of ID Logistics Group,

### Opinion

In compliance with the engagement entrusted to us by the shareholders' general meeting, we have audited the accompanying consolidated financial statements of ID Logistics Group for the year ended December 31, 2023.

In our opinion, the consolidated financial statements give a true and fair view of the assets, liabilities and financial position of the Group as of December 31, 2019, and of the results of its operations for the year then ended, in accordance with International Financial Reporting Standards as adopted by the European Union.

The audit opinion expressed above is consistent with our report to the Audit Committee.

### Basis for opinion

#### Audit framework

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the "Statutory auditors' responsibilities for the

audit of the consolidated financial statements" section of our report.

### Independence

We conducted our audit engagement in compliance with the independence rules laid down in the French Commercial Code and the French Code of Ethics (code de déontologie) for statutory auditors, for the period from January 1, 2023 to the date of our report, and specifically we did not provide any prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No. 537/2014.

### Justification of assessments - Key audit matters

In accordance with the requirements of Articles L. 821-53 and R. 821-180 of the French Commercial Code (Code de commerce) relating to the justification of our assessments, we inform you of the key audit matters relating to risks of material misstatement that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period, as well as how we addressed those risks.

These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, We do not express an opinion on any components of the consolidated financial statements taken individually.

### Revenue recognition

#### Identified risk and main judgments

Group revenues for the year ended December 31, 2023 amounted to €2.7 billion. The Group generates its revenues by providing warehousing and distribution services from dedicated or multi-client warehouses. Revenues from each contract are recognized as described in Note 4.16 to the consolidated financial statements. Revenues are recognized depending on contract terms (i.e. once the service is

completed].

We deemed revenue recognition to be a key audit matter given the diversity and number of existing contracts between

the Group and its customers and because revenues are a key performance indicator in the Group's financial communication.

### Audit approach

Our audit approach to revenue recognition includes the review of revenue recognition accounting procedures and substantive tests on recognized revenues. As part of our work relating to internal control, we specifically examined the procedures implemented by the Group (contracting, invoicing, revenue recognition) and the key controls used to cover risks of material misstatements in revenue recognition. We also performed the following controls:

- we reviewed contractual clauses across a sample of new contracts launched during the year and verified consistency with invoicing procedures;
- we corroborated changes in revenue site by site based on our knowledge of the business and interviews with management;
- we conducted sample tests to verify the consistency of logistics services invoicing with accounting and cash collection;

for new agreements entered into during the year, we:

- selected agreements according to their financial impact and risk profile;
- assessed the Group's analyses of these agreements used to determine whether control is transferred over time and, where necessary, the identification of the various performance obligations.

### Measurement of goodwill

#### Identified risk and main judgments

As part of its development, the Group has carried out targeted acquisitions and has recognized a number of items of goodwill. This goodwill, which corresponds to the difference between the price paid and the fair value of the assets acquired and liabilities assumed, is described in Notes 4.3 and 6.1 (Notes 1 and 4) to the consolidated financial statements. It has been allocated to cash-generating units (CGUs) corresponding to the regions where the acquired companies operate.

As of December 31, 2023, goodwill amounted to €533 million and represented 20.5% of assets in the consolidated balance sheet.

Pursuant to prevailing accounting principles, the ID Logistics group carries out impairment tests annually or whenever an indication of impairment is identified. An impairment loss is recognized in the balance sheet when the net carrying amount of these assets exceeds their recoverable amount.

The recoverable values of goodwill are measured with reference to the value in use calculated on the basis of the Group's discounted net future cash flows generated by assets comprising the geographical area, as described in Notes 4.3 and 6.1 (sub-sections 1 and 4) to the consolidated financial statements.

The valuation of goodwill is a key audit matter considering its material amount and the significant estimates and judgments required of management in order to determine the various assumptions adopted, such as the revenue growth rate to infinity and annual cash flow discount rates.

### Audit approach

We examined the consistency of the Group's methodology with applicable accounting standards. We also conducted a critical review of how this methodology was implemented, specifically checking:

- the completeness of the assets included in the carrying amount of the CGU related to each tested geographical area and the consistency in the determination of this value with the way projected cash flows have been calculated for the value in use;
- the reasonableness of cash flow projections in connection with the economic and financial environment, the geographical areas in which the Group operates and the reliability of the process adopted to prepare estimates by examining the reasons for differences between between forecasts and actual figures;
- the consistency of the growth rate to infinity applied to cash flow projections with market analyses and the rates adopted by major operators;
- with the assistance of our valuation experts, the calculation of the discount rate applied to estimated expected cash flows in geographical areas, verifying that the different discount parameters comprising the weighted average cost of capital of each CGU (debt ratio, risk free rate, market premium, economic beta, specific risk premium and cost of debt) could be used to obtain a value close to the return rate that market players would expect for such business at that time;
- management's analysis of the sensitivity of value in use to a change in the main assumptions adopted.

Finally, we verified that Notes 4.3 and 6.1 (sub-sections 1 and 4) provided appropriate information.

### Specific testing

We have also performed specific checks required by the applicable laws and regulations on the information relating to the Group contained in the Board of Directors' management report in accordance with applicable professional standards in France.

We have no matters to report as to the fair presentation of said information and its consistency with the consolidated financial statements.

We hereby confirm that the statement of non-financial performance provided for in Article L. 225-102-1 of the French Commercial Code is included in the information relating to the Group contained in the management report, it being specified that, in accordance with Article L. 823-10 of the Code, we have not verified the fair presentation of the information contained in this statement or its consistency with the consolidated financial statements, which must be verified in a report by an independent third party.

### Other checks and disclosures required pursuant to statutory and regulatory provisions

- Consolidated financial statements presentation format for inclusion in Annual Financial Report

In accordance with the professional standards applicable to the statutory auditor's work relating to the parent company and consolidated financial statements presented in accordance with the European single electronic reporting format, we also verified compliance with this format as defined by Commission Delegated Regulation No. 2019/815 of December 17, 2018 in the presentation of the consolidated financial statements to be included in the Annual Financial Report referred to in Article L. 451-1-2 I of the French Monetary and Financial Code, prepared under the responsibility of the Chairman and CEO. In the case of consolidated financial statements, our work includes verification that the marking up of these financial statements is in accordance with the format defined by said regulation.

On the basis of our work, we conclude that the presentation of the consolidated financial statements to be included in the annual financial report complies, in all material aspects, with the European single electronic reporting format.

Due to the technical limitations inherent in the block tagging of consolidated financial statements according to the European single electronic reporting format, it is possible that the contents of certain tags in the notes to the financial statements may not be displayed in the same way as the consolidated financial statements attached to this report.

In addition, it is not our responsibility to verify that the consolidated financial statements that will actually be included by your Company in the annual financial report filed with the AMF correspond to those on which we have carried out our work.

### ► Appointment of the statutory auditors

We were appointed as statutory auditors of ID Logistics Group SA by the June 21, 2010 general meeting, in the case of Deloitte & Associés, and the May 23, 2018 general meeting, in the case of Grant Thornton.

As of December 31, 2023, Deloitte & Associés was in the fourteenth consecutive year of its assignment and Grant Thornton in its sixth year, and their twelfth and sixth years respectively since the Company's shares were admitted to trading on a regulated market.

### Responsibilities of management and those in charge of corporate governance regarding the consolidated financial statements

It is the responsibility of the Group's management to prepare consolidated financial statements that present a true and fair view, in accordance with IFRS as adopted by the European Union, and to implement the internal control procedures that it considers necessary for the preparation of consolidated financial statements that contain no material misstatements, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, for presenting, where applicable, in the consolidated financial statements, the necessary going concern information, and for applying the going concern accounting policy, unless it is expected that the Company will be liquidated or will cease trading.

The Audit Committee is responsible for monitoring the preparation of financial information and the effectiveness of internal control and risk management systems, as well as internal audits of procedures involved in the preparation and processing of accounting and financial information.

The consolidated financial statements were approved by the Board of Directors.

### Statutory auditors' responsibilities for the audit of the consolidated financial statements

#### ► Objective and audit approach

We are required to prepare a report on the consolidated financial statements. Our objective is to obtain reasonable assurance that the consolidated financial statements, taken as a whole, are free of material misstatements. While reasonable assurance entails a high level of assurance, it does not guarantee that an audit conducted in accordance with professional standards will systematically detect all material misstatements. Misstatements may result from fraud or error and are deemed material when it can reasonably be expected that they may influence, individually or in combination, economic decisions made on the basis of the financial statements.

As set out in Article L. 821-55 of the French Commercial Code, our engagement relating to the certification of the financial statements does not consist in guaranteeing the viability or quality of your company's management.

As part of an audit conducted in accordance with professional standards applicable in France, the statutory

auditor exercises professional judgment throughout the audit and furthermore:

- identifies and assesses the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, designs and performs audit procedures in response to those risks, and obtains audit evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud more serious than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the overriding of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control system;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the consolidated financial statements;
- assesses the appropriateness of management's use of the going concern principle and, based on the audit evidence obtained, assesses whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of the audit report. However, future events or conditions may cause the Company to cease to continue as a going concern. If the statutory auditor concludes that a material uncertainty exists, there is a requirement to draw attention in the audit report to the related disclosures in the consolidated financial statements or, if such disclosures are not provided or inadequate, issue a qualified opinion or refuse to certify the financial statements;

- evaluates the overall presentation of the consolidated financial statements and assesses whether these statements represent the underlying transactions and events in a manner that achieves fair presentation;
- obtains sufficient and appropriate audit evidence regarding the financial information of the entities or business activities included in the consolidation scope in order to express an opinion on the consolidated financial statements. The statutory auditor is responsible for the direction, supervision and performance of the audit of the consolidated financial statements and for the opinion expressed on these consolidated financial statements.

► **Report to the Audit Committee**

We submit a report to the Audit Committee which includes a description of the scope of the audit and the audit program implemented, as well as the results of our audit. We also report any significant deficiencies in internal control that we have identified regarding accounting and financial reporting procedures.

Our report to the Audit Committee includes the risks of material misstatement that, in our professional judgment, were of most significance in the audit of the consolidated financial statements of the current period and which therefore comprise the key audit matters that we are required to describe in this report.

We also provide the Audit Committee with the declaration provided for in Article 6 of Regulation (EU) No. 537-2014, confirming our independence as defined by the rules applicable in France, as set out in particular in Articles L.821-27 to L.821-34 of the French Commercial Code and in the French Code of Ethics for statutory auditors. Where appropriate, we discuss with the Audit Committee the risks impacting our independence, and the related safeguards.

## 4.9 REVIEW OF RESULTS AND FINANCIAL POSITION - PARENT COMPANY FINANCIAL STATEMENTS

### 4.9.1 Comparison of fiscal years 2023 and 2022

#### Significant events and changes to the bylaws

- On May 31, 2023, ID Logistics Group completed the acquisition of a 100% equity stake in Polish-based Spedimex. The acquisition transaction was paid in cash in the amount of €27 million plus the equivalent of €54 million in new ID Logistics Group shares issued to Marcin Bąk, Spedimex's former main shareholder and Chairman and CEO. The transaction does not provide for any future earnout payments. 191,749 new shares were issued in consideration for this transaction, corresponding to a €95,875 capital increase combined with an issue premium of €53,833,532.
- Also on May 31, 2023, Eric Hémar, Chairman and CEO of the ID Logistics group, transferred his 5.0% stake in the Ficopar sub-holding company to ID Logistics Group via Immod, a company he controls, in exchange for new shares. After this streamlining of the legal structure, ID Logistics Group now holds 100% of the intermediate holding company Ficopar, which itself holds almost all of the ID Logistics group's operating subsidiaries. 295,420 new shares were issued in consideration for this transaction, representing a €147,710 capital increase combined with an issue premium of €83,284,806.

#### ► Business summary

€m	12/31/2023 (12 months)	12/31/2022 (12 months)
Revenues	23.8	12.1
EBIT	3.1	0.3
Net financial items	(2.5)	(0.1)
Corporate income tax	(0.5)	(0.1)
<b>Net income</b>	<b>0.1</b>	<b>0.2</b>
Non-current assets	219.0	52.4
Working capital	(13.1)	16.0
Cash and cash equivalents	0.0	0.0
Shareholders' equity	205.9	68.4

ID Logistics Group SA is the parent company of the ID Logistics group and employs 15 people. ID Logistics Group SA operates as a holding company and recharges services provided to its direct and indirect subsidiaries, mainly in France. It has no commercial dealings outside the Group.

Revenues comprise invoices passed on to Group subsidiaries, which increased in view of the higher costs incurred by ID Logistics Group on their behalf. Expenses consist of fees and staff costs. They also increased compared to 2022.

Financial income and expenses comprise the result of the ID Logistics Group share buyback scheme and interest income on shareholder loans to subsidiaries.

Non-current assets largely consist of the Company's investment in Ficopar, the holding company for the ID Logistics group's operational activities in France and internationally, and Polish-based Spedimex acquired in 2023. Working capital consists of intercompany receivables and payables with various ID Logistics group subsidiaries and a non-material amount of services trade payables.

#### ► Equity investments

As stated above, the Company increased its stake in Ficopar (France) from 94.99% to 100% and acquired a 100% equity interest in Spedimex (Poland).

► **Results of subsidiaries**

ID Logistics Group SA holds a 100% stake in Ficopar (France) and Spedimex (Poland), for which the key figures for fiscal year 2023 are as follows (€000):

Subsidiary	Capital stock	Other equity	% interest	Gross investments	Net investments	Loans receivable and advances	Endorsements and sureties	Revenues	Net income	Dividends received
Ficopar	17,082	46,653	100%	127,734	127,734	-	-	-	6,356	-
Spedimex	449	940	100%	80,334	80,334	-	-	116,714	1,823	-
<b>Total</b>	<b>17,531</b>	<b>47,593</b>		<b>208,068</b>	<b>208,068</b>	<b>-</b>	<b>-</b>	<b>116,714</b>	<b>8,179</b>	<b>-</b>

► **Expenses not deductible for tax purposes**

In accordance with Article 223 quater of the French General Tax Code, it is stated that the following expenses referred to under Article 39-4 of the same code have been definitively added back to 2023 taxable income:

- Vehicle leasing: €102,933
- Vehicle taxes: €4,797

► **Information on late payments**

In application of the French Commercial Code, we present below a breakdown of late customer and supplier payments:

<b>Article D. 441 I, 1°, French Commercial Code: Past due invoices received and unpaid at the balance sheet date</b>						
	Due in 0 days (for information)	Due in 1-30 days	Due in 31-60 days	Due in 61-90 days	Due in > 90 days	Total (due in ≥ 1 day)
<b>(A) Past due payment categories</b>						
Number of invoices concerned				n/a		
Total amount of invoices concerned (including taxes)	10,423,781	3,942	1,984	9,246	43,229	58,400
Percentage of total purchases for the year (including taxes)	147%	0%	0%	0%	1%	1%
Percentage of revenues for the year				n/a		
<b>(B) Invoices excluded from (A) relating to disputed receivables and payables not recognized</b>						
Number of invoices excluded	n/a					
Total amount of invoices excluded (including taxes)	n/a					
<b>(C) Benchmark payment terms used (contractual or statutory terms – Article L. 441-6 or L. 441-3, French Commercial Code)</b>						
Payment terms used to calculate past due payments	Contractual terms					

<b>Article D. 441 I, 1°, French Commercial Code: Past due invoices issued and unpaid at the balance sheet date</b>						
	Due in 0 days (for information)	Due in 1-30 days	Due in 31-60 days	Due in 61-90 days	Due in > 90 days	Total (due in ≥ 1 day)
<b>(A) Past due payment categories</b>						
Number of invoices concerned				n/a		
Total amount of invoices concerned (including taxes)	25,531,780	0	0	0	0	0
Percentage of total purchases for the year (including taxes)				n/a		
Percentage of revenues for the year	139%	0%	0%	0%	0%	0%
<b>(B) Invoices excluded from (A) relating to disputed receivables and payables not recognized</b>						
Number of invoices excluded	n/a					
Total amount of invoices excluded (including taxes)	n/a					
<b>(C) Benchmark payment terms used (contractual or statutory terms – Article L. 441-6 or L. 441-3, French Commercial Code)</b>						

<b>Article D. 441 I, 1°, French Commercial Code: Past due invoices issued and unpaid at the balance sheet date</b>						
	<b>Due in 0 days (for information)</b>	<b>Due in 1-30 days</b>	<b>Due in 31-60 days</b>	<b>Due in 61-90 days</b>	<b>Due in &gt; 90 days</b>	<b>Total (due in ≥ 1 day)</b>
Payment terms used to calculate past due payments	Contractual terms					

► **Research and development activities**

In 2023 ID Logistics Group SA did not conduct any R&D activities that entitle it to a tax credit.

► **Human resources and environmental impact of the business**

The objective of the Group's human resources policy is to ensure that all staff attain operational excellence and adhere to the Group's corporate culture. For a number of years, ID Logistics has applied a training policy designed to focus on the induction of new staff, development of management skills, sharing and transfer of best practices and the spreading of the Group's corporate culture. ID Logistics focuses on staff mobility and internal promotion to manage staff in France and abroad.

Moreover, the Group's operations are subject to certain environmental laws and regulations. In view of its operations, the Group considers that it does not face a significant environmental risk. Nevertheless, the Group remains actively committed to an environmentally-friendly and sustainable development policy.

► **Recent developments and outlook**

In 2024, ID Logistics Group SA will continue its role as holding company of the ID Logistics group. While it may centralize certain administrative Group functions, it does not plan to conduct any business activity as such.

## NOTES TO THE FINANCIAL STATEMENTS

### 1 Accounting principles

The parent company financial statements for the year ended December 31, 2023 were prepared in accordance with ANC regulation 2018-07 of December 10, 2018 amending ANC regulation 2014-03 of June 5, 2014 on the French Chart of Accounts, and generally accepted accounting principles in France.

The financial statements are based on the following underlying conventions, in accordance with the principle of prudence:

- going concern,

- consistency of accounting principles between fiscal years,
  - accruals concept,
- and in accordance with general principles for the preparation and presentation of annual financial statements.

The underlying method chosen for valuation of accounting items is the historical cost convention.

The main principles used for balance sheet accounts are as follows:

#### 1.1 Non-current assets

Intangible assets are stated at cost. They consist of software and software licenses and are amortized over their estimated useful life.

#### 1.2 Equity investments

The gross value consists of the purchase cost excluding incidental expenses.

Impairment tests on the value of equity investments are conducted every year. Under these tests, the book value of

investments is compared to the Group share of the present value of future estimated cash flows. If the book value exceeds the present value of future estimated cash flows, an impairment charge for the difference is booked against the value of the investment.

#### 1.3 Liquidity contract and share buyback program

Treasury shares and other assets assigned to the liquidity contract and share buyback program are included under other fixed asset investments and other financial assets respectively.

The corresponding investment securities are valued pursuant to the FIFO (first in - first out) method and a provision is booked if the average stock market price over the last month of the year is less than the cost of the treasury shares.

## 1.4 Receivables and payables

Receivables and payables are recorded at face value. A bad debt provision is recorded against the value of receivables

whenever difficulties in collection are anticipated. This risk is assessed on a case-by-case basis.

## 1.5 Pension liabilities

Pension liabilities are disclosed as off-balance sheet commitments and are not accounted for. They have been calculated based on the following assumptions:

- Retirement age: 64 years.
- Wage growth rate: 2.50%.

- Discount rate: 3.33% (3.65% in 2022).
- Social security charge rate: 39%.

## 1.6 Consolidation

The Company consolidates all ID Logistics group companies.

## 2 Notes to the parent company financial statements

Unless otherwise indicated, data in the notes is stated in thousands of euros.

### 2.1 Highlights of the year

On May 31, 2023, ID Logistics Group completed the acquisition of a 100% equity stake in Polish-based Spedimex.

Founded in 1993, Spedimex is a leading Polish contract logistics operator with recognized expertise in the fashion and e-commerce sectors serving major international and Polish brands, as well as in cosmetics. In addition to contract logistics, Spedimex boasts a solid distribution and transport network and offers value-added logistics services and retail order picking. Spedimex has developed an asset-light model and operates 15 sites across the country spanning a total area of 230,000 sqm. The company has implemented sophisticated automation and technology solutions capable of managing large complex flows, such as e-commerce and store returns covering over 15 European countries for a single customer.

The acquisition transaction was paid in cash in the amount of €27 million plus the equivalent of €54 million in new ID Logistics Group shares issued to Marcin Bał, Spedimex's former main shareholder and Chairman and CEO. The transaction does not provide for any future earnout payments. 191,749 new shares were issued in consideration for this transaction, corresponding to a €95,875 capital increase combined with an issue premium of €53,833,532.

Also on May 31, 2023, Eric Hémar, Chairman and CEO of the ID Logistics group, transferred his 5.0% stake in the Ficopar sub-holding company to ID Logistics Group via Immod, a company he controls, in exchange for new shares. After this streamlining of the legal structure, ID Logistics Group now holds 100% of the intermediate holding company Ficopar, which itself holds almost all of the ID Logistics group's operating subsidiaries. 295,420 new shares were issued in consideration for this transaction, representing a €147,710 capital increase combined with an issue premium of €83,284,806.

### 2.2 Intangible assets

The change in intangible assets is broken down as follows:

	12/31/2022	Acquisitions	Disposals	12/31/2023
Software	1,838	970	-	2,808
<b>Total</b>	<b>1,838</b>	<b>970</b>	<b>-</b>	<b>2,808</b>

The change in amortization of intangible assets breaks down as follows:

	12/31/2022	Charges	Write-backs	12/31/2023
Software	583	235	-	818
<b>Total</b>	<b>583</b>	<b>235</b>	<b>-</b>	<b>818</b>

### 2.3 Financial assets

The change in equity investments is broken down as follows:

	12/31/2022	Acquisitions	Disposals	12/31/2023
Equity investments	44,302	163,766	-	208,068
<b>Total</b>	<b>44,302</b>	<b>163,766</b>	<b>-</b>	<b>208,068</b>

Information on acquisitions of securities is disclosed in Note 1) Highlights of the year.

contract and 18,877 shares amounting to €5,776,000 under the share buyback program.

Other fixed asset investments consist of treasury shares held under the liquidity contract and share buyback program. As of December 31, 2023, the Company held 3,442 treasury shares amounting to €1,053,000 under the liquidity

Other financial assets correspond to deposits with the financial intermediary in respect of the liquidity contract and share buyback program.

No impairment has been booked against other financial assets.

## 2.4 Maturity of receivables at the balance sheet date

All trade receivables fall due in less than one year.

## 2.5 Information on related parties

Required related party disclosures under Article R. 123-199-1 of the French Commercial Code are as follows:

	12/31/2023	12/31/2022
Trade receivables	25,532	9,703
Other receivables	-	12,078
<b>Total assets</b>	<b>25,532</b>	<b>21,781</b>
Trade payables	1,067	401
Other payables	22,198	141
<b>Total liabilities and shareholders' equity</b>	<b>23,265</b>	<b>542</b>

Revenues from related party transactions amounted to €23,749,000.

Operating and financial expenses on related party transactions amounted to €1,487,000 and €418,000 respectively.

## 2.6 Shareholders' equity and change in net assets

	12/31/2022	2022 earnings appropriation	Issue of warrants	2023 net income	12/31/2023
Capital stock	2,843	-	244	-	3,087

Pension liabilities amounted to €383,000.

## 2.16 Directors' remuneration

Directors' fees paid in 2023 amounted to €138,000.

Remuneration paid to directors by the Company totaled €518,000 in 2023.

## 2.17 Headcount

The average headcount was 15 people.

## 2.18 Statutory auditors' fees

The statutory auditors' fees for the year amounted to €176,000.

### **2.19 Post balance sheet events**

There were no significant events between the balance sheet date and the date when the parent company financial statements were approved.

### 4.9.3 Statutory auditors' report on the 2023 Company financial statements

This is a free translation into English of the statutory auditors' special report on regulated agreements issued in the French language and is provided solely for the convenience of English-speaking readers. This report on regulated agreements should be read in conjunction and construed in accordance with French law and professional auditing standards applicable in France. It should be understood that the agreements reported on are only those provided by the French Commercial Code and that the report does not apply to those related party transactions described in IAS 24 or other equivalent accounting standards.

To the Shareholders of ID Logistics Group,

#### Opinion

In compliance with the engagement entrusted to us by the shareholders' general meeting, we have audited the accompanying parent company financial statements of ID Logistics Group SA for the year ended December 31, 2023.

In our opinion the parent company financial statements, in accordance with French generally accepted accounting principles, give a true and fair view of the results of the Company's operations for the year ended and of the Company's financial position, assets and liabilities as of the balance sheet date.

The audit opinion expressed above is consistent with our report to the Audit Committee.

#### Basis for opinion

##### Audit framework

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the "Statutory auditors' responsibilities for the audit of the parent company financial statements" section of our report.

##### Independence

We conducted our audit engagement in compliance with the independence rules laid down in the French Commercial Code and the French Code of Ethics (code de déontologie) for statutory auditors, for the period from January 1, 2023 to the date of our report, and specifically we did not provide any prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No. 537/2014.

##### Justification of assessments - Key audit matters

In accordance with the requirements of Articles L.821-53 and R.821-180 of the French Commercial Code (Code de commerce) relating to the justification of our assessments, we inform you of the key audit matter relating to risks of material misstatement that, in our professional judgment,

was of most significance in our audit of the parent company financial statements of the current period, as well as how we addressed those risks.

These matters were addressed in the context of our audit of the parent company financial statements as a whole, and in forming our opinion thereon. We do not express an opinion on any components of the parent company financial statements taken individually.

## Identified risks and main judgments

### Valuation of equity investments

Equity investments, as presented in the balance sheet as of December 31, 2023 at a net amount of €208,068, represent one of the most significant balance sheet items. They are recognized at cost on the acquisition date and written down on the basis of their value in use.

As mentioned in Note 1.2 to the parent company financial statements, value in use is estimated by management on the basis of the present value of future estimated cash flows.

Estimating the value in use of these investments requires management to exercise judgment when selecting information to be taken into account (cash flows, discount rates, etc.).

We deemed the valuation of equity investments to be a key audit matter considering their material amount and the significant estimates and judgments required of management in order to determine the various assumptions adopted, such as the revenue growth rate to infinity and annual cash flow discount rates.

### Audit approach

To determine the reasonableness of the estimation of equity investments' value in use, based on the information provided to us, our work primarily consisted in verifying that the estimate of this value determined by management was based on an appropriate justification of the valuation method and figures used.

Our work also involved:

- obtaining cash flow and operating forecasts of the entity's business activities prepared by the operational management team, and verifying their consistency with forecast data presented in the latest strategic plans, prepared under the supervision of the general management team for each business;
- comparing forecasts adopted in previous periods with actual results in order to assess the achievement of past objectives;
- assessing, mainly with management and our experts, the reasonableness of the main data and assumptions underlying these estimates such as cash flow discount rates and long-term revenue growth rates.

## Specific testing

We also carried out the specific testing required by laws and regulations in accordance with the professional standards applicable in France.

### ► Information provided in the management report and in other documentation addressed to shareholders on the financial position and the annual financial statements

Apart from the following item, we have no matters to report regarding the fair presentation of the information provided in the Board of Directors' management report and in the other documents sent to shareholders concerning the financial position and the financial statements or on the consistency of such information with the parent company financial statements.

We would like to make the following observation regarding the fair presentation of the information on late payments required under Article D. 441-6 of the French Commercial Code and the consistency of such information with the parent company financial statements: the management report does not include the information required under said article regarding the numbers of customer and supplier invoices.

### ► Corporate governance report

We hereby confirm that the Board of Directors' report on corporate governance contains the information required by Articles L. 225-37-4, L. 22-10-10 and L. 22-10-9 of the French Commercial Code.

Regarding the information provided pursuant to Article L. 22-10-9 of the French Commercial Code on remuneration and benefits paid or allocated to the corporate officers and commitments made in their favor, we have verified the consistency of such information with the financial statements or with the underlying data and, where appropriate, with the information obtained by your Company from consolidated companies controlled by the Company. On the basis of this work, we hereby confirm that said information is fair and accurate.

Regarding the information relating to items that your Company considered liable to have an impact in the event of a public takeover bid or exchange offer, that was provided pursuant to the provisions of Article L. 22-10-11 of the French Commercial Code, we have verified its compliance with the documents from which it was derived and which were communicated to us. On the basis of this work, we have no matters to report on this information.

### ► Other information

As required by law, we have verified that the various disclosures relating to equity investments and the acquisition of controlling interests, along with the identity of the holders of capital and voting rights, have been made to you in the management report.

## Other checks and disclosures required pursuant to statutory and regulatory obligations

### ► Parent company financial statements presentation format for inclusion in Annual Financial Report

In accordance with the professional standards applicable to the statutory auditor's work relating to the parent company and consolidated financial statements presented in accordance with the European single electronic reporting format, we also verified compliance with this format as defined by Commission Delegated Regulation No. 2019/815 of December 17, 2018 in the presentation of the parent company financial statements to be included in the Annual Financial Report referred to in Article L. 451-1-2 I of the French Monetary and Financial Code, prepared under the responsibility of the Chairman and CEO.

On the basis of our work, we conclude that the presentation of the parent company financial statements to be included in the annual financial report complies, in all material aspects, with the European single electronic reporting format.

It is not our responsibility to verify that the parent company financial statements that will actually be included by your Company in the annual financial report filed with the AMF correspond to those on which we have carried out our work.

### ► Appointment of the statutory auditors

We were appointed as statutory auditors of ID Logistics Group SA by the June 21, 2010 general meeting, in the case of Deloitte & Associés, and the May 23, 2018 general meeting, in the case of Grant Thornton.

As of December 31, 2023, Deloitte & Associés was in the fourteenth consecutive year of its assignment and Grant Thornton in its sixth year, and their twelfth and sixth years respectively since the Company's shares were admitted to trading on a regulated market.

## Responsibilities of management and those in charge of corporate governance regarding the parent company financial statements

It is the responsibility of the Group's management to prepare parent company financial statements that present a true and fair view, in accordance with French generally accepted accounting principles, and to implement the internal control procedures that it considers necessary for the preparation of company financial statements that contain no material misstatements, whether due to fraud or error.

In preparing the parent company financial statements, management is responsible for assessing the Company's ability to continue as a going concern, for presenting, where applicable, in these financial statements, the necessary going concern information, and for applying the going concern accounting policy, unless it is expected that the Company will be liquidated or will cease trading.

The Audit Committee is responsible for monitoring the preparation of financial information and the effectiveness of internal control and risk management systems, as well as internal audits of procedures involved in the preparation and processing of accounting and financial information.

The parent company financial statements were approved by the Board of Directors.

### Statutory auditors' responsibilities for the audit of the parent company financial statements

#### ► Objective and audit approach

We are required to prepare a report on the parent company financial statements. Our objective is to obtain reasonable assurance that the parent company financial statements, taken as a whole, are free of material misstatements. While reasonable assurance entails a high level of assurance, it does not guarantee that an audit conducted in accordance with professional standards will systematically detect all material misstatements. Misstatements may result from fraud or error and are deemed material when it can reasonably be expected that they may influence, individually or in combination, economic decisions made on the basis of the financial statements.

As stated in Article L. 821-55 of the French Commercial Code, our assignment as auditors of the financial statements does not consist in guaranteeing the Company's viability or the quality of its management.

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor exercises professional judgment throughout the audit. Moreover:

- identifies and assesses the risks of material misstatement of the parent company financial statements, whether due to fraud or error, designs and performs audit procedures in response to those risks, and obtains audit evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the overriding of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control system;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the parent company financial statements;

- assesses the appropriateness of management's use of the going concern principle and, based on the audit evidence obtained, assesses whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of the audit report. However, future events or conditions may cause the Company to cease to continue as a going concern. If the statutory auditor concludes that a material uncertainty exists, there is a requirement to draw attention in the audit report to the related disclosures in the parent company financial statements or, if such disclosures are not provided or inadequate, issue a qualified opinion or refuse to certify the financial statements;
- evaluates the overall presentation of the parent company financial statements and assesses whether these statements represent the underlying transactions and events in a manner that achieves fair presentation;
- assesses the appropriateness of management's use of the going concern principle and, based on the audit evidence obtained, assesses whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of the audit report. However, future events or conditions may cause the Company to cease to continue as a going concern. If the statutory auditor concludes that a material uncertainty exists, there is a requirement to draw attention in the audit report to the related disclosures in the parent company financial statements or, if such disclosures are not provided or inadequate, issue a qualified opinion or refuse to certify the financial statements;
- evaluates the overall presentation of the parent company financial statements and assesses whether these statements represent the underlying transactions and events in a manner that achieves fair presentation.

#### ► Report to the Audit Committee

We submit a report to the Audit Committee which includes a description of the scope of the audit and the audit program implemented, as well as the results of our audit. We also report any significant deficiencies in internal control that we have identified regarding accounting and financial reporting procedures.

Our report to the Audit Committee includes the risks of material misstatement that, in our professional judgment, were of most significance in the audit of the parent company financial statements of the current period and which therefore comprise the key audit matters that we are required to describe in this report.

We also provide the Audit Committee with the declaration provided for in Article 6 of Regulation (EU) No. 537537, confirming our independence as defined by the rules applicable in France, as set out in particular in Articles

L.821-27 to L.821-34 of the French Commercial Code and in the French Code of Ethics for statutory auditors. Where appropriate, we discuss with the Audit Committee the risks impacting our independence, and the related safeguards.

## 4.10 TRANSACTIONS WITH RELATED PARTIES

Transactions with related parties are specified under Note 26 to the 2023 consolidated financial statements in section 4.8 of the Universal Registration Document, "Annual historic financial information". Current regulated agreements are

given in the special reports of the statutory auditors presented below.

No new regulated agreement has been entered into since the preparation of the statutory auditors' special report for fiscal 2023.

### 4.10.1 Transactions with related parties

As stated under Note 26 to the consolidated financial statements in section 4.8 of the Universal Registration Document, "Annual historic financial information", agreements entered into with Financière ID and its subsidiaries concern services provided and warehouse renting under commercial leases. The services provided concern invoices passed on for part of the costs for two ID Logistics France employees, who carry out occasional administrative assignments for Les Parcs du Lubéron 1 and Financière ID. Financière ID is a company that provides research, expert assessment, technical support, project

management and engineering consulting for industrial building projects and, in general, all operations related to transactions involving real estate and business undertakings. Financière ID may be called upon to carry out occasional transactions or consulting assignments in relation to real estate projects implemented by subsidiaries of ID Logistics Group.

Please refer also to section 3.1.6 of the Universal Registration Document, "Contracts with corporate officers or a shareholder holding more than 10% of the voting rights in the Company".

## 4.10.2 Statutory auditors' report on regulated agreements in respect of the year ended December 31, 2023

This is a free translation into English of the statutory auditors' special report on regulated agreements issued in the French language and is provided solely for the convenience of English-speaking readers. This report on regulated agreements should be read in conjunction and construed in accordance with French law and professional auditing standards applicable in France. It should be understood that the agreements reported on are only those provided by the French Commercial Code and that the report does not apply to those related party transactions described in IAS 24 or other equivalent accounting standards.

To the Shareholders of ID Logistics Group,

In our capacity as statutory auditors of the Company, we hereby submit our report on regulated agreements.

It is our responsibility to communicate to you, based on information given to us, the principal terms and conditions as well as the reasons justifying the interest for the Company of the agreements notified to us or that we discovered during our engagement; it is not our responsibility to comment on their usefulness or appropriateness or to search for other agreements. It is your responsibility, in accordance with Article R. 225-31 of the French commercial code, to assess the reason for signing these agreements in order to approve them.

It is also our responsibility to report to you any information required under Article R. 225-31 of the French Commercial Code relating to transactions undertaken during the past year in conjunction with agreements that the general meeting has approved in prior years.

We carried out the work that we considered necessary pursuant to professional standards of the French National Auditors Association relating to this engagement. This work consisted in verifying that the information provided to us was consistent with the source documents from which it was taken.

### Agreements submitted for the approval of the general meeting.

#### Agreements authorized and entered into during the year ended

We hereby state that we have not been notified of any agreement authorized and entered into during the year ended requiring approval from the general meeting

pursuant to the provisions of Article L. 225-38 of the French Commercial Code.

### Agreements previously approved by the general meeting

#### Agreements approved in prior years, for which transactions continued during the year ended

Pursuant to Article R. 225-30 of the French Commercial Code, we have been notified of the following agreements approved by the general meeting in prior years which continued to run during the year ended.

#### ► Group management agreements between ID Logistics Group and Comète

Person concerned: Mr. Eric Hémar (director of ID Logistics Group and general manager of Comète)

The purpose of this agreement dated July 17, 2018, of which the last amendment signed on May 26, 2020 was authorized by your Board of Directors on the same day, is to manage the Group and provide assistance to direct and indirect subsidiaries in the performance of management services.

This agreement is entered into for an indefinite term and is not subject to any remuneration.

#### ► Service agreement between ID Logistics Group and Comète

Person concerned: Mr. Eric Hémar (director of ID Logistics Group and general manager of Comète)

The purpose of this agreement approved by the Board of Directors on March 7, 2012, is the provision by Comète of advisory services and administrative and strategic assistance, financial consulting and guidance, as well as additional services.

In consideration for services provided, Comète receives a fixed fee plus a variable fee determined at the beginning of each year in accordance with set targets.

This agreement took effect on January 1, 2011 for an indefinite period.

For the year 2023, ID Logistics Group recognized:

- an expense of €171,000 excluding VAT in respect of the fixed fee pursuant to this agreement;
- an expense of €350,000 excluding VAT in respect of the variable fee pursuant to this agreement.

## 4.11 DATE OF LATEST FINANCIAL INFORMATION

The most recent financial information dates from December 31, 2023.

## 4.12 MATERIAL CONTRACTS

The Company has not entered into any material contracts other than those executed in the ordinary course of business and with related parties (see 4.10.2 “Transactions with related parties”) and those related to the subsidiary acquisitions referred to in section 4.6.3 “Main capital expenditure planned”.

## 4.13 INFORMATION PROVIDED BY THIRD PARTIES, EXPERTS’ DECLARATIONS AND DISCLOSURES OF SELF-INTEREST

None

## 4.14 TRENDS

### 4.14.1 Principal trends since the most recent fiscal year-end, December 31, 2023

Business since 2023 year-end has continued in line with trends observed at 2023 year-end.

### 4.14.2 Known trends, uncertainties, commitment requests or events reasonably likely to impact the Company’s outlook

As of the Universal Registration Document Date, apart from the aforementioned items there is no known trend, uncertainty, commitment request or event reasonably likely

to have a material impact, either positive or negative, on the Company’s outlook.

### 4.14.3 Profit forecasts or estimates

The Company does not intend to prepare a profits forecast or estimate.

## 4.15 COURT AND ARBITRATION PROCEEDINGS

The Group may be involved in court or arbitration proceedings or disputes with the public authorities in the course of its normal activities. The Group books a provision when there is a reasonable probability that such litigation will lead to costs for the Company or one of its subsidiaries, and when such costs can be reliably estimated.

There are no administrative, court or arbitration proceedings, including any proceedings of which the Group is aware or proceedings which are suspended or threatened, that could have or that have over the last 12 months had a material effect on the Group’s and/or the Company’s financial position or earnings.

## 4.16 SIGNIFICANT CHANGE IN FINANCIAL OR TRADING POSITION

With the exception of the items indicated in 4.14.1 “Principal trends since the most recent fiscal year-end, December 31, 2023”, to the Company’s best knowledge there has not been

any material change in the Group’s financial or commercial position since December 31, 2023.

## 5.1 INFORMATION CONCERNING THE COMPANY

### 5.1.1 Registered name of the Company

The Company's registered name is: ID Logistics Group.

### 5.1.2 Place of registration and Company registration number

The Company was registered with the Paris Trade and Companies Registry on October 3, 2001 before being transferred on October 4, 2005 to the Avignon Trade and Companies Registry, then, following relocation to the new

head office, to the Tarascon Trade and Companies Registry in July 2018 under number 439 418 922.

The Company's LEI number is: 969500U1DQN70VMJ9P45.

### 5.1.3 Date of incorporation and term

The Company was incorporated for a 99-year term ending October 3, 2100, except in the event of early dissolution or extension.

### 5.1.4 The Company's head office and legal form, legislation governing its business activities

Originally incorporated as a French simplified joint stock company (société par actions simplifiée), the Company was transformed into a French corporation (société anonyme) pursuant to the decision of the June 21, 2010 shareholders' general meeting.

The Company is governed by French law and is subject in particular to Articles L. 225-1 et seq. and L. 22-10-2 et seq. of the French Commercial Code with regard to its operations.

The Company's head office is located at: 55 chemin des Engrenauds, 13660 Orgon, France. The Company's contact details are as follows:

Telephone: +33 (0)4 42 11 06 00

Website: [www.id-logistics.com](http://www.id-logistics.com).

The information presented on the website does not form part of this document, unless incorporated by reference.

## 5.2 TREASURY STOCK - DESCRIPTION OF THE SHARE BUYBACK PROGRAM

### Share buyback program approved by the May 31, 2023 general meeting

The Company's Combined Ordinary and Extraordinary General Meeting held on May 31, 2023 authorized the Board of Directors, for a period of eighteen months from the date of the meeting, to implement a share buyback program pursuant to Article L. 22-10-62 of the French Commercial Code and the General Regulation of the French financial markets authority (Autorité des Marchés Financiers, AMF), under the terms and conditions described below:

- Securities: shares of common stock.
- Maximum proportion of capital stock allowed for the program: 10% of capital (i.e. 568,615 shares as of the date of the general meeting), with the proviso that this limit shall be applied as of the share buyback dates so as to take account of any share issues or capital reductions that may occur during the term of the program. The number of shares included in the calculation of this limit

represents the number of shares purchased less the number of shares resold during the term of the program under the liquidity objective.

- Given that the Company may not hold more than 10% of its capital stock, the maximum number of shares that can be purchased shall be 568,615 shares including existing treasury shares.
- Maximum purchase price: €600.
- Maximum value of the program: €341,169,000.
- Share buyback procedures: purchases, sales and transfers can be made by any means on financial markets or OTC markets, including by block trades; the draft shareholder resolution does not limit the portion of the program that may be completed by block share purchases.

- Objectives:
  - to stimulate trading on the secondary market or to enhance the liquidity of the ID Logistics Group share pursuant to a liquidity contract with an investment service provider, in compliance with market practices admitted by applicable regulations;
  - to hold the purchased shares for subsequent reissue as consideration or in exchange with regard to potential acquisitions, provided that the shares purchased for this purpose do not exceed 5% of the Company's capital stock;
  - to ensure coverage of stock option and/or bonus share plans (or similar plans) in favor of Group employees and/or corporate officers, as well as all share allocations under Company or Group savings plans (or similar plans) and profit-sharing schemes and/or all other forms of share allocation to Group employees and/or corporate officers;
- to ensure coverage of securities giving entitlement to the allocation of Company shares pursuant to applicable regulations;
- to hold the purchased shares for subsequent reissue as consideration, repayment, etc., or to transfer them to any ID Logistics Group creditor, customer or partner;
- to implement any market practice that may be admitted by the French financial markets authority (AMF), and more generally to complete any other transaction in accordance with the regulations in force;
- to cancel the purchased shares, if applicable, pursuant to the approval granted at the May 31, 2023 shareholders' general meeting.
- Term of the program: 18 months with effect from the May 31, 2023 general meeting until November 30, 2024.

### Implementation of the share buyback program

Reasons for purchase	% of the program
Stimulate the share price	82.5%
Coverage of share plans	17.5%
Stock options and warrants	-
Mergers and acquisitions	-
Cancellation	-

In conjunction with the share buyback program, the Company extended the liquidity contract entered into with Oddo Corporate Finance on April 18, 2012 until April 17,

2024. The contract will be renewed again until April 17, 2025. Under the liquidity contract, in 2023 the Company made the following purchases and sales of treasury shares:

Number of shares purchased	81,531
Average purchase price	€268.81
Number of shares sold	82,007
Average sale price	€271.32
Number of treasury shares at the balance sheet date	3,442 (0.06% of capital stock)
Value at purchase price	€925,000
Par value at balance sheet date	€1,053,000
Transaction costs	€20,000

Furthermore, during fiscal year 2023, the Company bought back 17,292 of its shares to cover share plans and used 11,640 of these shares for said purpose.

As of December 31, 2023, the Company held a total of 22,319 treasury shares representing 0.36% of the capital stock. No shares of the Company are held by any of its subsidiaries whatsoever or by any third parties on its behalf.

The shares held by the Company have not been used or reassigned for other purposes since the last authorization granted by the shareholders' general meeting.

### New share buyback program submitted to the May 30, 2024 general meeting

- ▶ **As of March 31, 2024, the number of directly and indirectly held shares was 4,437, representing 0.05% of the Company's capital stock.**

#### Number of shares held broken down by objective:

- Stimulating the share price via a liquidity contract in compliance with market practice: 2,764
- Mergers and acquisitions: -
- Coverage of share plans or equivalent: 1,673
- Coverage of stock options and warrants: -
- Cancellation: -

► **The new plan breaks down as follows:**

- Securities: shares of common stock.
- Maximum proportion of capital stock allowed for the program: 10% of capital (i.e. 617,332 shares as of the date of the general meeting), with the proviso that this limit shall be applied as of the share buyback dates so as to take account of any share issues or capital reductions that may occur during the term of the program. The number of shares included in the calculation of this limit represents the number of shares purchased less the number of shares resold during the term of the program under the liquidity objective.
- Given that the Company may not hold more than 10% of its capital stock, the maximum number of shares that can be purchased shall be 617,332 shares including existing treasury shares.
- Maximum purchase price: €600
- Maximum value of the program: €370,399,200
- Share buyback procedures: purchases, sales and transfers can be made by any means on financial markets or OTC markets, including by block trades; the draft shareholder resolution does not limit the portion of the program that may be completed by block share purchases.
- Objectives:
  - to stimulate trading on the secondary market or to enhance the liquidity of the ID Logistics Group share pursuant to a liquidity contract with an investment service provider, in compliance with market practices admitted by applicable regulations;
  - to hold the purchased shares for subsequent reissue as consideration or in exchange with regard to potential acquisitions, provided that the shares purchased for this purpose do not exceed 5% of the Company's capital stock;
  - to ensure coverage of stock option and/or bonus share plans (or similar plans) in favor of Group employees and/or corporate officers, as well as all share allocations under Company or Group savings plans (or similar plans) and profit-sharing schemes and/or all other forms of share allocation to Group employees and/or corporate officers;
  - to ensure coverage of securities giving entitlement to the allocation of Company shares pursuant to applicable regulations;
  - to hold the purchased shares for subsequent reissue as consideration, repayment, etc., or to transfer them to any ID Logistics Group creditor, customer or partner;
  - to implement any market practice that may be admitted by the French financial markets authority (AMF), and more generally to complete any other transaction in accordance with the regulations in force;
  - to cancel the purchased shares, if applicable, subject to approval from the May 30, 2024 shareholders' general meeting.
- Term of the program: 18 months with effect from the May 30, 2024 general meeting until November 29, 2025.

## 5.3 DEED OF INCORPORATION AND BYLAWS

### 5.3.1 Corporate purpose (Article 4 of the bylaws)

The Company's direct or indirect corporate purpose in France and abroad is: advising on and performing logistics services throughout the world and acquiring an interest in any company carrying out any activity; any industrial and commercial transactions pertaining to the creation, acquisition, letting or lease-management of any business undertaking, the rental, installation or operation of any establishment, business undertaking, factory or workshop pertaining to any of the activities specified above, the filing,

acquisition, operation or assignment of any processes, patents and intellectual property rights regarding such activities, the direct or indirect involvement of the Company in any financial, real property or movable property transactions or commercial or industrial enterprises which may pertain to the corporate purpose or to any similar or related purpose; as well as any transactions whatsoever contributing to the achievement of this purpose.

### 5.3.2 Rights, prerogatives and restrictions attaching to shares of the Company

#### 5.3.2.1 Voting rights (Article 25 of the bylaws)

The voting right attaching to shares is proportional to the amount of capital stock they represent. Each equity share or dividend share carries at least one vote. However, a double voting right as compared to that conferred on other shares, in light of the portion of the capital stock that they represent, is ascribed to all fully paid-up shares that are proved to have been registered for at least four consecutive years in the name of the same shareholder. In the event of a capital increase by capitalization of reserves, retained earnings or additional paid-in capital, or an exchange of shares in

connection with a stock split or reverse stock split, the double voting right is conferred on shares allocated in respect of registered shares, provided that they are held in registered form following allocation and that the shares in respect of which they were allocated carried a double voting right.

Where shares are pledged, the voting right is exercised by their owner.

Registered double voting shares that are converted to bearer shares, sold or transferred shall forfeit their double

voting rights except in cases provided for by law.

#### 5.3.2.2 Rights to dividends and profits (Article 11 of the bylaws)

All shares entitle their holders to a share of the Company's assets and profits in proportion to the amount of capital stock they represent.

#### 5.3.2.3 Dividend lapse period (Article 30 of the bylaws)

Dividends that fail to be claimed within 5 years from the date of distribution will be time-barred in favor of the State (Article L. 1126-1 of the French General Public Entities' Assets Code).

#### 5.3.2.4 Right to liquidation surplus (Article 32 of the bylaws)

The balance of net assets after repayment of the par value of the shares shall be shared equally between all shares.

#### 5.3.2.5 Preferential subscription right (Article 7 of the bylaws)

The Company's shares shall each carry a preferential right to subscribe to share issues.

### 5.3.3 Crossing of thresholds set in the bylaws (Article 9 of the bylaws)

In addition to the statutory duty to inform the Company of the ownership of certain percentages of the capital stock or voting rights, the Company bylaws provide that any individual or legal entity, acting alone or in concert, that comes to hold, directly or indirectly, a number of shares or voting rights in the Company that is equal to or greater than 2% of the Company's capital stock or voting rights is required, no later than prior to the close of trading on the fourth trading day following the crossing of the threshold as of registration of the securities allowing that shareholder to attain or exceed this threshold, to disclose to the Company, by registered letter with return receipt requested, the total number of shares and voting rights that they hold as well as all the details and other information that may be required as a result of the statutory duty to disclose threshold crossings.

#### 5.3.2.6 Limitation of voting rights

None.

#### 5.3.2.7 Identifiable bearer securities (Article 9 of the bylaws)

Shares shall be in registered or bearer form, as the shareholder may elect. Where shares are registered, they are registered in an individual account on the terms and conditions and in accordance with the procedures set out in applicable statutory and regulatory provisions.

The Company may in particular, at any time and in accordance with applicable statutory and regulatory provisions, request either the central custodian holding the securities issue account or, directly, one or more intermediaries as referred to in Article L. 211-3 of the French Monetary and Financial Code (subject to payment of remuneration by the Company) to provide it with the information required by law on the holders of securities carrying an immediate or future voting right at its shareholders' meetings, as well as the number of securities held by each of them and any restrictions affecting such securities.

#### 5.3.2.8 Buyback of Company shares

See section 5.2.3.

This disclosure shall be renewed in accordance with the foregoing provisions whenever a further 2% threshold is reached or exceeded, whether upwards or downwards, irrespective of the reason, including the crossing of the first statutory threshold.

In case of non-compliance with the foregoing provisions, subject to a request made by one or more shareholders holding at least 2% of the capital stock and recorded in the minutes of the general meeting, the shares exceeding the undisclosed threshold shall be stripped of voting rights at all shareholders' general meetings held until the expiry of a two-year period following the date on which the non-disclosure is rectified.

## 5.4 ID LOGISTICS GROUP SECURITIES MARKET

The institution performing financial market services for ID Logistics Group is CACEIS Corporate Trust, 14 rue Rouget de Lisle, 92862 Issy les Moulineaux Cedex 9.

## 5.5 DOCUMENTS ON DISPLAY

All of the Company's corporate documents which are required to be made available to the shareholders throughout the validity of this Universal Registration Document can be viewed at the Company's head office.

The following in particular may be reviewed:

- (a) The most recently updated version of the Company's deed of incorporation and bylaws;
- (b) All reports, correspondence and other documents, valuations and declarations drawn up by any expert at the Company's request, part of which is included or referred to in the Universal Registration Document.

Furthermore, the regulated information within the meaning of the General Regulation of the French financial markets authority (AMF) shall also be available, in accordance with the requirements of applicable statutory and regulatory provisions, on the Group's website ([www.id-logistics.com](http://www.id-logistics.com)).

## 5.6 LEGISLATION APPLICABLE TO GROUP OPERATIONS

The Group is subject to two categories of specific regulations:

- Regulations concerning classified sites in the warehousing division;
- Where applicable, regulations concerning transportation.

### Compliance with regulations concerning classified sites

The regulations concerning classified sites require a structured approach to each tender offer, consisting in:

- identifying the exact nature of the products to be stored and the related hazards (e.g. inflammables, explosives or pollutants);
- defining volumes for the whole year and periods of peak activity.

These factors are used to determine which sections of the permit to operate facilities classified for environmental protection (ICPE – Installations Classées pour la Protection de l'Environnement) are relevant (1510, 2663, 1412, etc.). In the case of a smaller-scale project or cross-docking site, a simple declaration may be sufficient.

In France, the operator must apply to the Prefect's Office (Préfecture) responsible for the region in which the site will be located for permission to operate a classified site. The permit is managed by the regional environment, development and housing department (DREAL), which is also responsible for carrying out regular checks on the operator's compliance with its obligations once the permit has been granted. Similar regulations exist in foreign countries where the Group operates.

Based on this analysis, ID Logistics identifies existing warehouses on the market or warehouses to be built.

In certain cases, ID Logistics directly launches construction of a warehouse, completing all the formalities required for obtaining the requisite ICPE permits. To date, ID Logistics has managed the construction of eight warehouses in France, each time obtaining the relevant authorizations.

Compliance with operating permits is an important part of the work of a logistics operator, which must check that stored products comply with permits granted and that the specific facilities and procedures required under the permit are properly maintained (e.g. fenced-off areas, specific fire hose reels, special surveillance procedures, etc.)

Regulations may differ between the various countries where the Group operates, even though they correspond to the same general principles.

Similar regulations exist in foreign countries where the Group operates. Having established operating subsidiaries in seventeen countries, ID Logistics has acquired a wealth of experience in controlling legal risks in relation to the contract logistics business.

### Compliance with transportation regulations

Transportation and freight forwarding operations are also subject to specific regulations. In countries where ID Logistics conducts these kinds of operations, specific authorization has been requested and obtained.

The Group has always adopted the following procedure when first establishing operations:

- Analysis of the country's legal environment by the Group legal affairs department;
- Local support from a top-ranking legal firm;
- Centralization of the required permits by the Group legal affairs department.

## May 30, 2024 Combined General Meeting

6.1 AGENDA

202 6.2 DRAFT RESOLUTIONS

203

The annual general meeting of our Company will be held on May 30, 2024. You are invited to regularly consult the "General Assembly" section of the Company's website

(<https://www.id-logistics.com/en/finance/>), which sets out practical procedures for the meeting.

## 6.1 AGENDA

### Ordinary resolutions

- Approval of the parent company financial statements for the year ended December 31, 2023 - Approval of expenses not deductible for tax purposes.
- Approval of the consolidated financial statements for the year ended December 31, 2023.
- Appropriation of earnings for the year.
- Statutory auditors' special report on regulated agreements and commitments including confirmation of no new agreements.
- Reappointment of Mr. Gérard Lavinay as director.
- Reappointment of Ms. Eléonore de Lacharrière as director.
- Reappointment of Ms. Malgorzata Hornig as director.
- Reappointment of Mr. Hervé Montjotin as director.
- Approval of the remuneration policy for the Chairman and CEO pursuant to Article L. 22-10-8 II of the French Commercial Code.
- Approval of the remuneration policy for the Deputy CEO pursuant to Article L. 22-10-8 II of the French Commercial Code.
- Approval of the remuneration policy for directors pursuant to Article L. 22-10-8 II of the French Commercial Code.
- Approval of all remuneration paid or awarded to corporate officers in respect of fiscal year 2023 pursuant to Article L. 22-10-34 I of the French Commercial Code.
- Approval of the remuneration paid or awarded to Mr. Eric Hémar, Chairman and CEO, in respect of fiscal year 2023.
- Approval of the remuneration paid or awarded to Mr. Christophe Satin, Deputy CEO, in respect of fiscal year 2023.
- Appointment of Alce Expertise as statutory auditors tasked with certifying sustainability information.
- Authorization to be granted to the Board of Directors for the Company to buy back its own shares in accordance with the conditions specified under Article L. 22-10-62 of the French Commercial Code, including the term of the authorization, objectives, procedures and cap.

### Extraordinary resolutions

- Authorization to be granted to the Board of Directors for the Company to cancel treasury shares purchased by the Company in accordance with the conditions specified under Article L. 22-10-62 of the French Commercial Code, including term of authorization and cap.
- Authorization to be granted to the Board of Directors to issue shares of common stock and/or equity securities giving access to other equity securities or giving entitlement to debt securities and/or securities giving access to future equity securities (of the Company or a Group company) without preferential subscription rights, to a specific category of beneficiaries, term of the authorization, maximum par value of the capital increase, issue price, power to limit the offering to the amount of subscriptions or to distribute unsubscribed securities.
- Authorization to increase the total value of issues in the event of surplus demand.
- Authorization to be granted to the Board of Directors to increase the capital stock by issuing shares of common stock and/or securities giving access to the capital without preferential subscription rights to members of a company savings plan pursuant to Articles L. 3332-18 et seq. of the French Labor Code, term of authorization, maximum par value of the capital increase, issue price and power to grant bonus shares pursuant to Article L. 3332-21 of the French Labor Code.
- Authorization to be granted to the Board of Directors with a view to issuing equity warrants ("BSA"), warrants to subscribe for and/or purchase new and/or existing shares ("BSAANE") and/or redeemable warrants to subscribe for and/or purchase new and/or existing shares ("BSAAR") without preferential subscription rights to a specific category of persons, maximum par value of the capital increase, term of the authorization and exercise price.
- Amendment to Article 14 of the bylaws to allow the introduction of a system of staggered director appointments.
- Authorization to be granted to the Board of Directors to bring the Company bylaws into compliance with statutory and regulatory provisions.
- Powers for formalities.

## 6.2 DRAFT RESOLUTIONS

### Ordinary resolutions

#### First Resolution – Approval of the parent company financial statements for the year ended December 31, 2023 – Approval of expenses not deductible for tax purposes

The shareholders at the general meeting, having reviewed the reports of the Board of Directors and the statutory auditors for the year ended December 31, 2023, hereby approve the parent company financial statements for the year ended December 31, 2022 as presented, which show net income of €144,062.

The shareholders at the general meeting specifically approve expenses referred to in Article 39 (4) of the French General Tax Code, amounting to €107,730, as well as the tax thereon.

#### Source

• Net income for the year	€144,062
• Retained earnings	€4,039,686

#### Appropriation

• Statutory reserve	€7,203
• Retained earnings	€4,176,545

Pursuant to the provisions of Article 243 bis of the French General Tax Code, it is recalled that no dividends or other earnings distributions within the meaning of the first paragraph of said article have been made in respect of the last three fiscal years.

#### Fourth Resolution – Statutory auditors' special report on regulated agreements and commitments including confirmation of no new agreements

The shareholders at the general meeting, having reviewed the statutory auditors' special report stating there are no new agreements as specified under Articles L. 225-38 et seq. of the French Commercial Code, merely take note thereof.

#### Fifth Resolution – Reappointment of Mr. Gérard Lavinay as director

The General Meeting resolves to reappoint Gérard Lavinay as director for a two-year term, subject to the adoption of the twenty-second resolution, expiring following the General Meeting called in 2026 to approve the financial statements for the year ended (or, if the twenty-second resolution is rejected, resolves to reappoint Gérard Lavinay as a director for a three-year term, expiring following the General Meeting called in 2027 to approve the financial statements for the year ended).

#### Second Resolution – Approval of the consolidated financial statements for the year ended December 31, 2023

The shareholders at the general meeting, having reviewed the reports of the Board of Directors and the statutory auditors on the consolidated financial statements for the year ended December 31, 2023, hereby approve said financial statements as submitted to them, which show net income Group share of €53,869,000.

#### Third Resolution – Appropriation of earnings for the year

On the recommendation of the Board of Directors, the shareholders at the general meeting hereby resolve to appropriate earnings for the year ended December 31, 2023 as follows:

#### Sixth Resolution – Reappointment of Ms. Eléonore Ladreit de Lacharrière as director

The shareholders at the general meeting hereby resolve to reappoint Ms. Eléonore Ladreit de Lacharrière as director for a three-year term expiring at the close of the general meeting held in 2027 to approve the financial statements for the year ended.

#### Seventh Resolution – Reappointment of Ms. Malgorzata Hornig as director

The shareholders at the general meeting hereby resolve to reappoint Ms. Malgorzata Hornig as director for a three-year term expiring at the close of the general meeting held in 2027 to approve the financial statements for the year ended.

#### Eighth Resolution – Reappointment of Mr. Hervé Montjotin as director

The shareholders at the general meeting hereby resolve to reappoint Mr. Hervé Montjotin as director for a three-year term expiring at the close of the general meeting held in 2027 to approve the financial statements for the year ended.

**Ninth Resolution – Approval of the remuneration policy for the Chairman and Chief Executive Officer pursuant to Article L. 22-10-8 II of the French Commercial Code**

The shareholders at the general meeting, having reviewed the Board of Directors' corporate governance report, hereby approve, pursuant to Articles L. 22-10-8 II and R. 22-10-14 of the French Commercial Code, the remuneration policy for the Chairman and Chief Executive Officer as set out in said report and referred to in sections 3.1.5.1 and 3.1.5.2.1 of the Company's 2023 Universal Registration Document.

**Tenth Resolution – Approval of the remuneration policy for the Deputy Chief Executive Officer pursuant to Article L. 22-10-8 II of the French Commercial Code**

The shareholders at the general meeting, having reviewed the Board of Directors' corporate governance report, hereby approve, pursuant to Articles L. 22-10-8 II and R. 22-10-14 of the French Commercial Code, the remuneration policy for the Deputy Chief Executive Officer as set out in said report and referred to in sections 3.1.5.1 and 3.1.5.2.2 of the Company's 2023 Universal Registration Document.

**Eleventh Resolution – Approval of the remuneration policy for directors pursuant to Article L. 22-10-8 II of the French Commercial Code**

The shareholders at the general meeting, having reviewed the Board of Directors' corporate governance report, hereby approve, pursuant to Articles L. 22-10-8 II and R. 22-10-14 of the French Commercial Code, the remuneration policy for directors as set out in said report and referred to in sections 3.1.5.1 and 3.1.5.2.3 of the Company's 2023 Universal Registration Document.

**Twelfth Resolution – Approval of all remuneration paid or awarded to corporate officers in respect of fiscal year 2023 pursuant to Article L. 22-10-34 I of the French Commercial Code**

The shareholders at the general meeting, having reviewed the Board of Directors' report on corporate governance, hereby approve, pursuant to Article L. 22-10-34 I of the French Commercial Code, the information set out in Article L. 22-10-9 I of said code regarding the remuneration paid or awarded to corporate officers in respect of fiscal year 2023, as set out in section 3.1.5.3 of the Company's 2023 Universal Registration Document.

**Thirteenth Resolution – Approval of the remuneration paid or awarded to Mr. Eric Hémar, Chairman and Chief Executive Officer, in respect of fiscal year 2023**

The shareholders at the general meeting, having reviewed the Board of Directors' report on corporate governance, hereby approve, pursuant to Article L. 22-10-34 II of the French Commercial Code, the fixed, variable and exceptional elements comprising the total remuneration and benefits of all kinds paid or awarded to Mr. Eric Hémar in his capacity as Chairman and Chief Executive Officer in respect of fiscal year 2023, as set out in section 3.1.5.3 a) of the Company's 2023 Universal Registration Document.

**Fourteenth Resolution – Approval of the remuneration paid or awarded to Mr. Christophe Satin, Deputy CEO, in respect of fiscal year 2023**

The shareholders at the general meeting, having reviewed the Board of Directors' report on corporate governance, hereby approve, pursuant to Article L. 22-10-34 II of the French Commercial Code, the fixed, variable and exceptional elements comprising the total remuneration and benefits of all kinds paid or awarded to Mr. Christophe Satin in his capacity as Deputy Chief Executive Officer in respect of fiscal year 2023, as set out in section 3.1.5.3 b) and c) of the Company's 2023 Universal Registration Document.

**Fifteenth resolution – Appointment of Alce Expertise as statutory auditors tasked with certifying sustainability information.**

The General Meeting, having taken note of the report of the Board of Directors, appoints Alce Expertise as Statutory Auditor to certify sustainability information, for a three-year term, i.e. until the close of the General Meeting to be held in 2027 to approve the financial statements for the 2026 financial year.

**Sixteenth Resolution – Authorization to be granted to the Board of Directors to buy back Company shares in accordance with the provisions of Article L. 22-10-62 of the French Commercial Code**

The shareholders at the general meeting, having reviewed the report of the Board of Directors, hereby authorize the Board, for a term of eighteen months, pursuant to Articles L. 22-10-62 et seq. of the French Commercial Code, to buy back, on one or more occasions and at such times as it shall decide, Company shares subject to a cap of 10% of the number of shares comprising the capital stock, adjusted where applicable to take into account any capital increases or reductions carried out during the term of the share buyback plan.

This authorization shall cancel the authorization granted to the Board of Directors under the fourteenth ordinary resolution of the May 31, 2023 general meeting.

Company shares may be repurchased for all purposes permitted by law, including without limitation:

- to stimulate trading on the secondary market or to enhance the liquidity of the ID Logistics Group share pursuant to a liquidity contract with an investment service provider, in compliance with practices admitted by applicable regulations;
- to hold the purchased shares for subsequent reissue as consideration or in exchange with regard to potential acquisitions, provided that the shares purchased for this purpose do not exceed 5% of the Company's capital stock;
- to ensure coverage of stock option and/or bonus share plans (or similar plans) in favor of Group employees and/or corporate officers, as well as all share allocations under Company or Group savings plans (or similar plans) and profit-sharing schemes and/or all other forms of share allocation to Group employees and/or corporate officers;
- to ensure coverage of securities giving entitlement to the allocation of Company shares pursuant to applicable regulations;
- to hold the purchased shares for subsequent reissue as consideration, repayment, etc., or to transfer them to any ID Logistics Group creditor, customer or partner;
- to implement any market practice that may be admitted by the French financial markets authority (AMF), and more generally to complete any other transaction in accordance with the regulations in force;
- to cancel the purchased shares if applicable, subject to the authorization granted under the seventeenth extraordinary resolution of this general meeting of shareholders.

These share buybacks may be carried out by any means, including block trades, and at such times as the Board of Directors shall see fit.

The Company reserves the right to use options or derivatives, in compliance with applicable regulations.

The maximum purchase price is set at €600 per share. In the event of equity transactions, including stock splits, reverse stock splits and bonus share allocations, the aforementioned amount will be revised accordingly through the application of a multiplier equal to the ratio between the number of shares comprising the capital stock before the transaction and the number of shares comprising the capital stock after the transaction.

The maximum value of the transaction is thus set at €370,399,200.

The shareholders at the general meeting hereby grant full powers to the Board of Directors, with the option to further delegate, to perform these transactions, define the terms and conditions thereof, sign any agreements and complete all formalities.

**Extraordinary resolutions**

**Seventeenth Resolution – Authorization to be granted to the Board of Directors to cancel treasury shares purchased by the Company under Article L. 22-10-62 of the French Commercial Code**

The shareholders at the general meeting, having reviewed the reports of the Board of Directors and the statutory auditors:

1. hereby authorize the Board of Directors to cancel, at its sole discretion, on one or more occasions, subject to a cap equal to 10% of the capital stock as determined on the day of the decision to cancel, after deduction of any shares canceled during the preceding 24 months, shares that the Company holds or may acquire as a result of purchases carried out pursuant to Article L. 22-10-62 of the French Commercial Code, and to reduce the capital stock accordingly, pursuant to applicable statutory and regulatory provisions;
2. hereby set the term of this authorization at twenty-four months from the date of this general meeting; and
3. hereby grant full powers to the Board of Directors, with the option to further delegate, to perform any operations required in connection with such share cancellations and corresponding capital reductions, amend the bylaws accordingly and complete all required formalities.

**Eighteenth Resolution – Authorization to be granted to the Board of Directors to issue shares of common stock and/or equity securities giving access to other equity securities or giving entitlement to debt securities and/or securities giving access to future equity securities (of the Company or a Group company), without preferential subscription rights, to a specific category of beneficiaries**

The shareholders at the general meeting, having reviewed the report of the Board of Directors and the statutory auditors' special report and in accordance with the

provisions of the French Commercial Code, specifically Articles L. 225-129-2, L. 22-10-49, L. 22-10-51, L. 225-138 and L. 228-92:

1. hereby delegate to the Board of Directors their power to increase the capital stock, on one or more occasions, in such proportions and at such times as it shall see fit, both in France and abroad, by issuing, in euros or foreign currency or in any other unit established by reference to a basket of currencies:
  - shares of common stock, and/or
  - equity securities giving access to other equity securities or giving entitlement to debt securities, and/or
  - securities giving access to future equity securities.

In accordance with Article L. 228-93 of the French Commercial Code, future securities may entitle holders to other equity securities to be issued by the Company and/or by any company which directly or indirectly owns more than half of the Company's capital stock or in which the Company directly or indirectly owns more than half of the capital stock;

2. hereby set the term of this authorization at eighteen months from the date of this general meeting;
3. The total par value of share issues completed under this authorization shall not exceed €1,400,000. The par value of any shares of common stock issued in the future to safeguard the rights of holders of securities giving access to the Company's capital stock shall be added to this cap in accordance with the law and any contractual requirements providing for other adjustments. This cap is independent of all other caps under other resolutions of this general meeting; The total par value of debt securities issued by the Company may not exceed €250 million. This cap is independent of all other caps under other resolutions of this general meeting;

4. hereby resolve to remove the shareholders' preferential subscription right to the shares covered by this resolution in favor of the following category of beneficiaries: French or foreign legal entities (including holding companies, entities, investment firms, mutual funds and group savings funds) or individuals, regularly investing in listed companies operating in the handling, robotics or logistics sector, subject to a minimum individual subscription of €100,000 or an equivalent amount per transaction and a number of investors limited to 50; the Board of Directors shall draw up a precise list of the beneficiaries included in this category and the number of shares to be issued to each one;
5. hereby note that this authorization requires the shareholders to waive their preferential subscription rights to Company shares that may be issued;
6. hereby resolve that the issue price for the shares issued under this authorization shall be set by the Board of Directors and shall be at least equal to the average listed share price over five consecutive days chosen from among the thirty trading sessions immediately preceding the share price determination, less a potential maximum discount of 10%, taking the date of issuance into account where applicable, on the understanding that the issue price of any securities giving access to the capital issued pursuant to this resolution shall be equal to the amount received immediately by the Company, where applicable, plus the amount liable to be received by the Company upon exercise or conversion of said securities, or, for each share issued as a result of the issue of said securities, at least equal to the aforementioned minimum amount;
7. hereby resolve that if the subscriptions do not account for the entire issue referred to under 1) above, the Board of Directors may:
  - limit the total issue value to the amount of the subscriptions, on the understanding that, in the event of issuing shares of common stock or securities giving access to capital stock where the primary security is a share, subscriptions must amount to at least three quarters of the resolved issue value for this limitation to be valid;
  - distribute any or all unsubscribed securities at its own discretion;
8. hereby resolve to grant the Board of Directors, within the limits set out above, with the option to further delegate, the necessary powers to exercise this authorization including, specifically, to:
  - set the amount of the share issue, the issue price and any issue premium that may be requested at time of issue,
  - set the dates, terms and conditions of all issues as well as the form and characteristics of the shares or securities giving access to the capital to be issued,

- set the date of issuance, which may be retrospective, of the shares or securities giving access to the capital to be issued and the manner in which they are to be paid up,
- draw up the list of beneficiaries included in the category of aforementioned persons and the number of shares to be granted to each one,
- at its sole discretion and at such time as it shall see fit, charge the costs, levies and fees related to the share issues carried out through exercise of the authority granted under this resolution against the amount of premiums related to said transactions and deduct the amount required to increase the statutory reserve to one-tenth of the new capital stock from the amount of said premiums after each transaction,
- record the completion of each share issue and amend the bylaws as required,
- in general, enter into any agreement required, in particular, for the successful completion of the planned issues,
- take all steps and complete all formalities required for the issue, listing and financial servicing of the securities issued pursuant to this authorization and for the exercise of the related rights,
- take all decisions required to ensure the admission of the shares and securities thereby issued to trading on any market on which the Company's shares might be admitted to trading.

#### **Nineteenth Resolution – Authorization to increase the issue amount in the event of over-subscription**

The shareholders at the general meeting, having reviewed the report of the Board of Directors and the statutory auditors' special report:

- 1) hereby resolve that, for each issue of shares of common stock or securities giving access to capital stock under the eighteenth resolution hereto, the number of securities to be issued may be increased under conditions laid down in Articles L. 225-135-1 and R. 225-118 of the French Commercial Code, subject to the caps set by the general meeting, in the event of over-subscription recognized by the Board of Directors;
- 2) hereby set the term of this authorization at twenty-six months from the date of this general meeting.

#### **Twentieth Resolution – Authorization to be granted to the Board of Directors to increase the capital stock by issuing shares of common stock and/or securities giving access to capital stock without preferential subscription rights to members of a company savings plan pursuant to Articles L. 3332-18 et seq. of the French Labor Code**

The shareholders at the general meeting, having reviewed the report of the Board of Directors and the statutory auditors' special report and pursuant to Articles L. 22-10-49, L. 225-129-6, L. 225-138-1 and L. 228-92 of the French Commercial Code and Articles L. 3332-18 et seq. of the French Labor Code:

- 1) hereby authorize the Board of Directors, if it sees fit and at its sole discretion, to increase the capital stock on one or more occasions by issuing Company common shares or securities giving access to future equity securities of the Company to members of one or more company or group savings plans set up by the Company and/or its French or foreign related companies pursuant to Article L. 225-180 of the French Commercial Code and Article L. 3344-1 of the French Labor Code;
- 2) cancel, in favor of such persons, the preferential subscription right for shares that may be issued pursuant to this authorization;
- 3) hereby set the term of this authorization at twenty-six months from the date of this general meeting;
- 4) cap the par value of any capital increases carried out under this authorization at 3% of capital stock as of the date when the Board of Directors decides to carry out this increase, said cap being independent of all other authorized capital increase caps. Where applicable, the additional amount of common shares issued in the future to safeguard the rights of holders of securities giving access to the Company's capital stock shall be added to this cap in accordance with the law and any contractual requirements providing for other adjustments;
- 5) hereby resolve, pursuant to paragraph 1) of this authorization, that the future share price may not vary, up or down, by more than 30%, or 40% when the plan lock-in period in accordance with Articles L. 3332-25 and L. 3332-26 of the French Labor Code is at least ten years, from the average opening share price during the twenty trading sessions preceding the Board of Directors' decision to increase the capital and issue shares accordingly;

6) hereby resolve, pursuant to the provisions of Article L. 3332-21 of the French Labor Code, that the Board of Directors may allot free of charge new or existing shares, or other new or existing securities giving access to the Company's capital stock, to the beneficiaries specified in paragraph 1) above, in order to (i) provide an employer contribution pursuant to regulations governing company or group savings schemes, and/or (ii) provide for a discount if appropriate;

7) take note that this authorization cancels any prior authorization having the same purpose.

The Board of Directors may or may not implement this authorization, take all steps and carry out any necessary formalities, with the option to further delegate same.

**Twenty-first Resolution – Authorization to be granted to the Board of Directors to issue equity warrants (“BSA”), warrants to subscribe for and/or purchase new and/or existing shares (“BSAANE”) and/or redeemable warrants to subscribe for and/or purchase new and/or existing shares (“BSAAR”), without preferential subscription rights, to a specific category of persons**

The shareholders at the general meeting, having reviewed the report of the Board of Directors and the statutory auditors' special report and in accordance with Articles L. 225-129-2, L. 22-10-49, L. 225-138 and L. 228-91 of the French Commercial Code:

1) hereby delegate to the Board of Directors their power, on one or more occasions, in such proportions and at such times as it shall see fit, both in France and abroad, to issue equity warrants (“BSA”), warrants to subscribe for and/or purchase new and/or existing shares (“BSAANE”) and/or redeemable warrants to subscribe for and/or purchase new and/or existing shares (“BSAAR”), without preferential subscription rights, to a specific category of persons;

2) hereby set the term of this authorization at eighteen months from the date of this general meeting;

3) hereby resolve that the total par value of the shares to which the holders of warrants issued under this authorization shall be entitled may not exceed €290,000. The par value of any shares of common stock issued in the future to safeguard the rights of holders of BSAs, BSAANEs and/or BSAARs shall be added to this cap in accordance with the law and any contractual requirements providing for other adjustments. This cap is independent of all other caps under other resolutions of this general meeting;

4) hereby resolve that the subscription and/or purchase price of shares to which warrant holders shall be entitled, after taking account of the warrant issue price, shall be no less than the average closing price of the ID Logistics Group share weighted by volume for the forty trading sessions preceding the date of the decision to issue the warrants;

5) hereby resolve to cancel the shareholders' preferential subscription right to future BSAs, BSAANEs and BSAARs in favor of the following category of persons:

(i) the employees and/or corporate officers of the Company and/or a Group company within the meaning of Article L. 233-3 of the French Commercial Code; and/or

(ii) the service providers or consultants having entered into a contract with the Company or a Group company within the meaning of Article L. 233-3 of the French Commercial Code;

6) note that this authorization requires the shareholders to waive their preferential subscription right to Company shares that may be issued to BSA, BSAANE and/or BSAAR warrant holders on exercise;

7) hereby resolve that if the subscriptions do not account for an entire issue of BSAs, BSAANEs and/or BSAARs, the Board of Directors may:

- limit the total issue value to the amount of the subscriptions;
- distribute any or all unsubscribed BSAs, BSAANEs and/or BSAARs at its own discretion among the aforementioned category of persons;

8) hereby resolve that the Board of Directors will have all necessary powers, with the option to further delegate, under statutory conditions and as stated above, to issue BSAs, BSAANEs and/or BSAARs and:

- determine the specific list of beneficiaries within the aforementioned category of persons, the type and number of warrants to be granted to each beneficiary, the number of shares corresponding to each warrant, the warrant issue price and the subscription and/or purchase price of the shares to which warrant holders are entitled under the conditions set out above, where the issue price for the warrants shall be determined in accordance with market conditions and expert valuation, warrant subscription and exercise conditions and deadlines, their adjustment procedures, and generally determine all issue terms and conditions;
- draw up a supplementary report describing the final terms of the issue;
- purchase the requisite shares under the share buyback program and assign them to the warrant plan;
- carry out the share issue arising from the exercise of BSAs, BSAANEs and/or BSAARs and amend the bylaws accordingly;
- on its sole initiative, charge the costs of the share issues against any related premium on issue and deduct from this value the amount required to increase the statutory reserve to one-tenth of the new capital stock after each share issue;
- sub-delegate to the Chief Executive Officer powers required to carry out the share issue and comply with the applicable limits, in accordance with any procedures determined in advance by the Board of Directors;
- and generally do everything that is necessary in such matters.

The general meeting takes note that this authorization cancels any prior authorization having the same purpose.

**Twenty-second Resolution – Amendment to Article 14 of the bylaws to allow the introduction of a system of staggered director appointments**

On the recommendation of the Board of Directors, the shareholders at the general meeting hereby resolve to introduce a system for reappointing the members of the Board of Directors on a rolling basis.

Accordingly, on an exceptional basis and solely in order to allow the introduction and continuation of a system of staggered director appointments, the ordinary general meeting may appoint or reappoint one or more directors for a term of office of one (1) year or two (2) years.

The general meeting therefore resolves to amend the first paragraph of Article 14 of the bylaws, "Term of directors' appointment except for the employee representative Board member", as follows:

*"The term of directors' appointment is three years. On an exceptional basis and solely in order to allow the introduction and continuation of a system of staggered director appointments, the ordinary general meeting may appoint or reappoint one or more directors for a term of office of one (1) year or two (2) years."*

The rest of Article 14 remains unchanged.

**Twenty-third resolution – Authorization to be granted to the Board of Directors to bring the Company bylaws into compliance with statutory and regulatory provisions**

The shareholders at the general meeting, having reviewed the report of the Board of Directors, hereby grant full powers to the Board of Directors to bring the Company bylaws into compliance with statutory and regulatory provisions, provided that the corresponding amendments are ratified by the next extraordinary general meeting.

**Twenty-fourth Resolution – Powers for formalities**

The shareholders at the general meeting hereby grant full powers to the bearer of a copy or excerpt of the minutes of this meeting to complete all filing and publication formalities required by law.

In order to facilitate the reading of this document, the cross-reference table below allows readers to find management report information in this Universal Registration Document.

It also indicates the chapters corresponding to the documents attached to the management report.

Management report	Chapter
Objective and exhaustive analysis of the Company's business operations, earnings, financial position including level of debt, volume and complexity of business, including any non-financial key performance indicators relating to the Company's specific operations, including environmental and employee matters. Where applicable, this analysis contains references to amounts given in the financial statements and additional explanations.	1.10, 4.2, 4.3, 4.4, 4.9
The Company's position and business during the fiscal year ended	4.2, 4.4, 4.9
Forecasts	4.14
Key post balance sheet events	4.14
Intercompany cash loan and related statutory auditors' report	n/a
Branch offices	n/a
Acquisition of equity interests of 5%, 10%, 20%, 33.33%, 50% and 66.66% of the capital or voting rights, or control	4.9.1
Research and development activities	1.9
Activity of subsidiaries and equity investments by business sector	4.2
Status of employee shareholdings as of the balance sheet date and the proportion of capital held by employees, including stock held by a PEE (French corporate savings plan) or FCPE (company mutual fund)	1.10.2
For companies operating at least one SEVESO facility:	
<ul style="list-style-type: none"> <li>• Information on the Company's technological accident risk prevention policy.</li> <li>• Information on the Company's ability to meet its property and personal civil liabilities arising from operating such facilities.</li> <li>• Details on the Company's resources to compensate victims in cases of technological accidents for which it may be liable</li> </ul>	n/a
Treasury shares and interlocking investments: identities of controlled companies holding Company stock and equity interest held	n/a
Notice of holding more than 10% of the capital of another joint stock corporation. Rectification of interlocking investments	n/a
Dividends distributed in respect of the last three fiscal years and amount of distributed earnings eligible and non-eligible for tax allowances broken down by category of stock	4.7.1
Expenses not deductible for tax purposes	4.9.1
Number of shares purchased and sold during the year pursuant to Article L. 225-209 of the French Commercial Code, including the average purchase and sales prices, the value of transaction costs, the number of treasury shares held at the balance sheet date, their value at purchase price, their par value for each of the objectives, the number of shares used, any reissues of treasury shares and the proportion of capital they represent	5.2
Any injunctions or financial penalties imposed by the French Competition Council for anti-competitive practices	n/a
Details of calculation and results of changing the bases for exercise of stock options and warrants in the case of rights issues, bonus share issues, distribution of reserves or additional paid-in capital, change in the distribution of earnings or reduction in capital	n/a
Information on late supplier payments	4.9.1
Description of principal risks and contingencies	2
Indications on the Company's use of financial instruments	n/a
Information on the manner in which the Company takes into account the social and environmental consequences of its operations	1.7, 1.10
Social commitments promoting non-discrimination, diversity and sustainable development	1.10
Information on financial risks relating to the impacts of climate change and the presentation of measures taken by the Company to reduce said risks, by implementing a low-carbon strategy in all areas of its business	1.10
Main features of internal control and risk management procedures implemented by the Company relating to the preparation and processing of accounting and financial information	3.2

<b>Management report</b>	<b>Chapter</b>
Safeguard measures for identifying risks and preventing serious breaches of human rights and fundamental liberties as well as serious damage to personal health and safety and the environment	3.3
Details of calculation and results of adjustments to the bases for the exercise of stock options in the case of a Company buyback of its own shares at a price higher than the listed price	n/a
Details of calculation and results of adjustments to the bases of securities giving access to the capital in the case of a Company buyback of its own shares at a price higher than the listed price	n/a
Information on risks incurred in case of changes to interest rates, exchange rates or stock prices	2.3
Reference to Dutreil law lock-in agreements	3.1.1
Quantified information on the impact of the transition to IFRS	n/a
Summary of directors' securities transactions	3.1.1
Identity of persons directly or indirectly holding more than 5%, 10%, 15%, 20%, 25%, 33.33%, 50%, 66.66%, 90% or 95% of the capital or voting rights	3.1.1
<b>Documents attached to the management report</b>	
Table of earnings for the last five fiscal years	4.9.4
Board of Directors' corporate governance report	3.1
<ul style="list-style-type: none"> <li>• Summary of current powers in respect of capital increases; exercise of such authority during the year</li> <li>• Composition and conditions for preparing and organizing the work of the Board of Directors</li> <li>• Application of the gender balance principle on the Board</li> <li>• Description of the diversity policy for Board members addressing such areas as age, gender, qualifications and professional experience and a description of the policy's aims, implementation processes and results achieved during the year ended</li> <li>• Restrictions imposed by the Board of Directors on the powers of the Chief Executive Officer</li> <li>• Declaration regarding the corporate governance code adopted by the Company and reasons for which any provisions may have been disregarded</li> <li>• List of offices and functions exercised in all companies by each corporate officer during the fiscal year</li> <li>• Choice made of one of the two general management methods, if changed</li> <li>• Information on the remuneration awarded to each corporate officer, including those whose term of office expired and those newly appointed during the year ended</li> <li>• Description of the corporate officer remuneration policy</li> <li>• Board's choice regarding lock-in provisions applicable to corporate officers holding bonus shares and/or shares resulting from the exercise of stock options</li> <li>• Agreements entered into, directly or via an intermediary, between i) a corporate officer or shareholder holding more than 10% of the voting rights in the Company and ii) a company controlled by the Company as defined under Article L. 233-3 of the French Commercial Code, with the exception of agreements covering ordinary transactions entered into on arm's length terms</li> <li>• Description of the procedure for assessing ordinary agreements entered into on arm's length terms</li> <li>• Bylaw provisions governing shareholder participation in general meetings</li> <li>• Items liable to have an impact in the event of a public takeover bid</li> </ul>	<p>3.1.1</p> <p>3.1.3</p> <p>3.1.3</p> <p>n/a</p> <p>3.1.3</p> <p>3.1.2</p> <p>3.1.3</p> <p>n/a</p> <p>3.1.5</p> <p>3.1.5</p> <p>3.1.5</p> <p>3.1.6</p> <p>3.1.7</p> <p>3.1.8</p> <p>3.1.9</p>
Consolidated statement of non-financial performance	1.10
Vigilance plan and report	3.3

# Schedule

## GLOSSARY

<b>IA</b>	Industrial accident
<b>Collaborative Consolidation Centers (CCC)</b>	Supplier consolidation center
<b>Operating Specifications</b>	Describe the entire service and assets to be provided by the Group
<b>Quality Specifications</b>	Describe the quality commitments undertaken and how they are to be measured
<b>Shipper</b>	The order issuer of the logistics operator
<b>CID</b>	A scheme for the certification of best practices which has been gradually rolled out to all Group entities and which enables the Group to guarantee a consistent and high-level operating quality all over the world
<b>Multi-supplier consolidation</b>	The sharing of a warehouse by several suppliers of the same customer. The goods remain the property of the suppliers, which are often too small to be able to deliver regularly to retailers at a competitive price. This type of storage guarantees the availability of products to the customer.
<b>Co-packing</b>	Packaging operation involving the grouping of parts into a batch (special offers, for example) or for shop displays
<b>Cross docking</b>	Organization of transport ensuring that the goods are received from the suppliers and customer orders prepared and shipped on the same day, with zero storage time
<b>Datacenters</b>	Servers for storage and backup of all data (transport flows, inventories, etc.) managed by ID Logistics
<b>HBA</b>	Health, Beauty & Accessories
<b>Class A, B or C warehouses</b>	<ul style="list-style-type: none"> <li>• <b>Class A warehouses:</b> multi-function warehouses. Criteria include: height over 9.3m, maneuvering area over 35m deep, 1,000 sqm of wharfing, load-bearing capacity 5 tons per sqm, heating, sprinkler system;</li> <li>• <b>Class B warehouses:</b> warehouses that meet modern standards. Criteria include: height over 7.5m, maneuvering area over 32m deep, 1,500 sqm of wharfing, load-bearing capacity at least 3 tons per sqm, sprinkler system;</li> <li>• <b>Class C warehouses:</b> this category includes all warehouses which do not fall within classes A or B.</li> </ul>
<b>Shared distribution centers (EMCA)</b>	The principle of these warehouses involves setting up a regional manufacturer's inventory hosted at a retailer's logistics warehouse with rail access, from which products will be shipped both to the host retailer's stores and to other retailers' warehouses.
<b>EDI/WEB EDI</b>	Electronic Data Interchange: the transfer of information in electronic form either by direct connection or via the internet (WEB EDI)
<b>Engineering</b>	The specific activity of defining, designing and analyzing projects for works, operations, coordination, support or control with a view to the execution and management of such projects
<b>Shipment "per pallet"</b>	A form of shipment and pricing per pallet unit (as opposed to full load)
<b>Fast Moving Consumer Goods (FMCG)</b>	Goods that are sold quickly and generally have a low price
<b>Freight forwarding</b>	The organization and management of international transport. The freight forwarder acts as an intermediary between its customer and the international transportation operators and organizes the transit arrangements for the transported goods (insurance, customs and administrative formalities, transport solutions, etc.)
<b>GHG</b>	Greenhouse gas

<b>ICPE</b>	“Installation Classée pour la Protection de l’Environnement” – classified facility for the protection of the environment
<b>“Class A” logistics building</b>	Warehouses with a height of over 9.3m and a maneuvering area over 35m deep. The buildings must also be insulated, heated and equipped with sprinkler systems, with a load-bearing capacity of at least 5 tons per sqm.
<b>Kanban</b>	A method of production management of Japanese origin designed to ensure just-in-time procurement by means of a card system. The aim of this method is to adapt the inventory level in accordance with actual and forecast consumption
<b>Kitting</b>	Putting several items together to form a kit or pack
<b>Key Performance Indicator (KPI)</b>	A set of performance indicators designed to measure the operating quality achieved in relation to a customer contract
<b>Full load</b>	A load that fills the whole vehicle (truck, freight wagon, barge, etc.), by occupying the entire floor space or by its volume or weight, leaving from a single point and delivered to a single customer
<b>Flexible logistics</b>	Traditional logistics (rack, shelving and standard picking truck) combined with digital technologies (ibeacon, video tracking, KPI display)
<b>Connected logistics</b>	Traditional logistics combined with ergonomic and smart handling equipment (“quick pick” remote picking truck, multi-code Put-to-Light systems, automatic packaging, etc.).
<b>Mechanized logistics</b>	Warehouse with a “pick & pack” order picking chain and teams working in shifts.
<b>Automated logistics</b>	Products are carried to operators by self-driving shuttles. Work is carried out in shifts. Stock movements are automated.
<b>Complex system logistics</b>	All operations are automated. Goods are received in shifts, before being transferred to the automated warehouse via self-driving shuttles. Several tools are used for picking operations (Goods to Man, high-speed sorters, picking stations). Shipment is mechanized or automated.
<b>Traditional pallet distribution</b>	Transportation, mainly by road, typified by the weight of packages (less than 500 kg) and speed of delivery
<b>Pick-n-Go/Pick and Go</b>	A system combining the classic picking truck, a voice-operated/radio frequency system, a WMS and a laser guiding system operated by means of terminals situated in the warehouse. The system facilitates the handling of goods and the movements of operators.
<b>Radio Frequency Identification (RFID)</b>	Technology enabling the remote collection and storage of data
<b>RIA</b>	Robinet Incendie Armé
<b>Psychosocial risks</b>	Principally stress at work
<b>Supply chain</b>	A term meaning the various suppliers and stages involved in purchasing. The flow of goods and information through logistics processes from the purchase of raw materials to delivery of the finished products to the customer. The supply chain includes all service providers and customers.
<b>Mini-load system</b>	An automated compact storage system
<b>Transport Management System (TMS)</b>	A system of transport management enabling providers to manage and plan the customer’s transport requirements and to offer optimized integration of the transport organization within its supply chain.
<b>Voice-Picking</b>	Order-picking system controlled by voice recognition. The order picker wears a single ear headset.
<b>Warehouse Management System (WMS)</b>	Warehouse management software
