ID LOGISTICS RECOGNIZED FOR ITS INVESTMENTS IN SPAIN AND THE GROWTH OF ITS OPERATIONS ACROSS THE IBERIAN PENINSULA

ID Logistics, an international contract logistics group and a key player in the digital transformation of the supply chain, received on Thursday, December 4th, the 2025 French Investment in Spain Award, presented by the Official Spanish Chamber of Commerce in France (COCEF). The distinction acknowledges the strong growth trajectory of ID Logistics in the Iberian Peninsula and the robustness of its technological projects.

Laurent Nicastro, Group Deputy Managing Director for Digital & Technology - ID Logistics
Sidney Pincaud, Head of Global Sales - Telefónica Global Solutions

ID LOGISTICS IBERIA: A STRATEGIC DRIVER OF THE GROUP GROWTH IN EUROPE

Present in Spain for nearly twenty years and in Portugal since 2016, ID Logistics has built one of its most robust logistics networks in the region. The subsidiary now operates 55 warehouses, employs up to 7,000 people, and supports around 60 clients across highly demanding sectors. With annual growth above 10% over the past five years, ID Logistics Iberia now ranks among the top three logistics operators in the country.

In 2025, this strategy reached a new milestone with the opening of a next-generation logistics platform in Valencia for Beko Europe. Covering 31,000 m², the site processes more than 500,000 units per year and serves the entire Spanish territory, including the Balearic and Canary Islands. As part of its development, ID Logistics worked with Telefónica Global Solutions to deploy satellite connectivity solutions ensuring uninterrupted logistics operations, even in the event of disruptions to terrestrial networks. This resilient architecture secures ID Logistics' critical operational flows (preparation, traceability and distribution) and reflects the ability of both partners to combine technological innovation and operational excellence in support of the performance of the Iberian network.

"This distinction highlights the commitment of our teams and confirms the momentum we have built in Spain, a key market in our European strategy," said Jérôme Jacek, Managing Director of ID Logistics Iberia.

AN OPERATIONAL MODEL SUPPORTED BY STRONG SECTOR EXPERTISE

ID Logistics Iberia manages complex operations across fashion, e-commerce, FMCG, consumer electronics and healthcare. Its sites are characterised by high-intensity order preparation, the integration of advanced digital solutions and automations designed to absorb significant fluctuations in volume.

The subsidiary has also reinforced its position in the healthcare sector with the creation of a dedicated Healthcare Business Unit, certified to GDP and GMP standards, with a distribution network covering Spain and Portugal. This expertise was notably demonstrated during critical national missions: in 2020, ID Logistics Iberia managed the first delivery of Pfizer vaccines in Spain, followed by the storage and distribution of more than 50 million doses across the country.

MAJOR PROJECTS SUPPORTING MARKET GROWTH IN SPAIN

To support its clients' expansion, ID Logistics Iberia is pursuing several large-scale developments, including the construction of an 80,000 m² logistics campus near Madrid, scheduled to open at the end of 2026, as well as the launch of a new site in the Canary Islands. These investments strengthen the Group's presence in the region and its ability to support the long-term evolution of Iberian markets.

A CONCRETE COMMITMENT TO MORE SUSTAINABLE LOGISTICS

Complementing the Group's global CSR strategy, ID Logistics Iberia has joined the Lean & Green initiative, committing to reduce its CO₂ emissions by at least 20% over five years. The programme structures actions to optimise transport, introduce low-emission vehicles, increase the use of renewable energy and continuously improve the energy performance of logistics sites.

"This award goes first and foremost to our teams, who drive our innovation, development and environmental transition initiatives every day. The strength of our digital infrastructure and our deployment capabilities have become a major competitive asset in our growth," said **Laurent Nicastro, Group Deputy Managing Director for Digital & Technology, during the award ceremony.**

ABOUT ID LOGISTICS:

ID Logistics, headed by Eric Hémar, is an international contract logistics group with revenues of €3.3 billion in 2024. ID Logistics manages nearly 450 sites in 19 countries, representing more than 9 million m² operated in Europe, America, Asia and Africa, with 42,000 employees.

With a customer portfolio balanced between distribution, e-commerce, consumer goods, cosmetics and fashion, ID Logistics is characterized by offers involving a high level of technology. Since its creation in 2001, the Group has developed a social and environmental approach through a number of original projects and is now firmly committed to an ambitious CSR policy. ID Logistics shares are listed on the Euronext regulated market in Paris and are included in the SBF 120 index (ISIN code: FR0010929125, Mnemo: IDL).
