ID LOGISTICS : LAUNCH OF A NEW LOGISTICS CAMPUS AT PULSAR LOGISTICS PARK TÓRTOLA (GUADALAJARA), SPAIN

This project marks a major milestone in strengthening the Group's capabilities in Spain, particularly in the Healthcare, FMCG and cosmetics sectors.

@ID Logistics

A NEXT-GENERATION WAREHOUSE

Designed to exceed 100,000 pallet positions, the future Campus will integrate automation solutions aimed at improving reliability, productivity and order preparation quality. The integration of intelligent conveyor systems, advanced internal flow management tools and picking-assistance technologies will enable efficiency levels significantly higher than those of a conventional warehouse. Ultimately, nearly 350 employees will operate this site, which will be capable of absorbing significant activity peaks and serving major cosmetics and healthcare clients.

A STRATEGIC LOCATION AT THE HEART OF A MAJOR LOGISTICS HUB

The choice of Tórtola de Henares is based on its strategic position within one of Spain's most competitive logistics hubs. Located close to major national transport corridors and offering fast connections to Madrid, the site provides an ideal environment for complex, high value-added operations. Its location within the Henares Corridor also benefits from a dynamic industrial ecosystem and infrastructure suited to large-scale projects, further strengthening the Group's ability to support its customers' growth.

A CAMPUS FOCUSED ON INNOVATION AND SUSTAINABLE PERFORMANCE

The facility has been designed as a genuine internal innovation hub. It will include dedicated areas for the development and testing of new technologies, particularly in automation, artificial intelligence applied to the supply chain and energy-efficiency solutions. Collaborative spaces will allow ID Logistics teams to develop operational solutions, while training areas will support the continuous upskilling of employees on new tools.

A PROJECT SERVING REGIONAL DEVELOPMENT

The Campus will make a significant contribution to the region's economic development by creating direct and indirect jobs, attracting new skilled profiles and stimulating the local ecosystem, particularly suppliers within the Henares Corridor. Designed with a holistic approach, the site will also place strong emphasis on employee well-being, with rest areas, health- and environment-focused initiatives, as well as an ambitious program dedicated to emissions reduction and the energy transition.

"This Campus is not just another warehouse; it represents a new way of thinking about logistics. It embodies a more human, more sustainable and smarter model — where technological innovation goes hand in hand with people's well-being and regional growth. With this initiative, we are strengthening our commitment to operational excellence and to delivering logistics solutions tailored to our customers' needs,"
Jérôme Jacek, Managing Director, ID Logistics Iberia

ABOUT ID LOGISTICS:

ID Logistics, headed by Eric HÉMAR, is an international contract logistics Group with revenues of €3.7 billion in 2025. ID Logistics manages nearly 450 sites in 19 countries representing 10 million m² operated in Europe, America, Asia and Africa, with 50,000 employees.

With a customer portfolio balanced between distribution, e-commerce, consumer goods, cosmetics and fashion, ID Logistics is characterized by offers involving a high level of technology. Since its creation in 2001, the Group has developed a social and environmental approach through a number of original projects, and is now firmly committed to an ambitious CSR policy. ID Logistics shares are listed on the Euronext regulated market in Paris and are included in the SBF 120 index (ISIN code: FR0010929125, Mnemo: IDL).
