ID LOGISTICS OPENS ITS 50th SITE IN POLAND

ID Logistics Poland reaches a new strategic milestone with the opening of its 50th site in the country. Located in Wrocław, this 24,000 sqm warehouse will support the ramp-up of the largest and most environmentally friendly European factory of a major global food industry player.
This new opening is part of a sustained growth dynamic. Since January 2026, ID Logistics Poland has opened three new sites. Following Słubice, dedicated to an e-commerce player near the German border, and Brwinów, near Warsaw, for a cosmetics distributor, the Wrocław site confirms the logistics operator's accelerating development in the country.

POLAND, A EUROPEAN LOGISTICS HUB

Based in Katowice, ID Logistics Poland operates 50 logistics sites and hubs across the country, representing more than 1.3 million sqm of warehouse space and supported by more than 10,000 employees.

The subsidiary supports international clients across Europe in managing their warehouses in sectors such as e-commerce, fashion, retail, FMCG, cosmetics and fragrances, in both B2B and B2C environments.

ID Logistics Poland also provides transport services in order to offer its clients a complete solution, including full truckload and fine distribution services, with more than 7 million deliveries executed in 2025. This confirms its ability to manage complex and high-intensity flows on a European scale, including omnichannel and multi-market environments.

In addition, ID Logistics is also present through its IDEO subsidiary, based in Warsaw and dedicated to 4PL services (flow management), which plans and organizes the entire European supply chain of major industrial groups.

PRESS RELEASE

Orgon, June 2026

AN INNOVATION-DRIVEN APPROACH ILLUSTRATED BY CONCRETE OPERATIONAL PROJECTS

This strong commercial development results from a highly dynamic innovation strategy driven by the company in Poland. ID Logistics Poland therefore designs and operates logistics solutions tailored to each client's needs. Several projects carried out across its Polish sites illustrate this sector-specific adaptability.

Deployment of automated truck unloading systems

At its Mszczonów site, for a major FMCG client, ID Logistics Poland operates an automated trailer unloading system that reduces truck unloading time from 45 minutes to 15 minutes, improving operational flow and delivery schedule stability.

Specific expertise in returns management

At its Stryków and Tarnów Podgórny sites, ID Logistics Poland operates and manages a complete returns management system, including quality control, refurbishment and preparation for resale for fashion and e-commerce clients.

In a context of strong e-commerce growth, the volume of returns handled by ID Logistics Poland increased by more than 30% in one year, reinforcing the importance of these systems in the overall performance of the supply chain. As a result, 98% of returned items recover their commercial value, limiting losses and environmental impact while stabilizing product assortments.

Development of RFID technologies

At the Stryków site, the integration of RFID technology, coupled with the WMS, divides product registration time by three and strengthens data reliability as well as real-time inventory visibility for a major fashion player.

A STRATEGIC PLATFORM SUPPORTING THE EUROPEAN SUPPLY CHAIN

With 50 sites, more than 10,000 employees and 7 million deliveries per year, ID Logistics Poland confirms its ability to support demanding supply chains, whether in large-scale returns management, omnichannel flows or products requiring specific logistics processes.

"Our priority is to support our clients over the long term by designing logistics models capable of combining operational performance, flexibility and resilience. In Poland, we have built a robust organization, both large-scale and tailor-made, enabling us to address today's supply chain challenges while anticipating those of tomorrow."

Yann Belgy, Managing Director of ID Logistics Poland

ABOUT ID LOGISTICS:

ID Logistics, headed by Eric HÉMAR, is an international contract logistics Group with revenues of €3.7 billion in 2025. ID Logistics manages nearly 450 sites in 19 countries representing 10 million m² operated in Europe, America, Asia and Africa, with 55,000 employees. With a customer portfolio balanced between distribution, e-commerce, consumer goods, cosmetics and fashion, ID Logistics is characterized by offers involving a high level of technology. Since its creation in 2001, the Group has developed a social and environmental approach through a number of original projects, and is now firmly committed to an ambitious CSR policy. ID Logistics shares are listed on the Euronext regulated market in Paris and are included in the SBF 120 index (ISIN code: FR0010929125, Mnemo: IDL).
